WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Venue - 17 February 2013, 0'37"

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

The Tradewinds Hotel overlooks the Swan River in Fremantle.

The well-appointed rooms have a kitchenette and are grouped around the central facilities of the hotel. You'll make your own reservation and make sure you tell them it's for the WIA Conference, so you get the special room rate of $180 per night.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

HAMS ACROSS AUSTRALIA.

VK2

Have you ever considered why the number 7 is lucky?

There are 7 cosmic stages, seven heavens and seven hells, 7 pillars of wisdom, seven rainbow colours. In Chinese there are 7 fairies, and the Bible mentions 7 circuits of Jericho. The Egyptians knew 7 daughters of Ra. The Greek Pan had seven pipes.

But what is the real reason 7 is lucky?

Because it's just 7 days until Wyong Field Day - 24th February 2013 - Just 7 days until Amateur Radio's Big Day Out.

Just 7 days until the gates open at 6.30.am for the flea market and 9am for the traders

7 days until the raffle, lucky gate prizes, lectures and let's not forget the free shuttle bus from Wyong station

Admission $15 - under 17 free

Wyong Field Day, proudly brought to you by Central Coast Amateur Radio Club

VK3
web service:- http://www.amateurradio.com.au/news/

Do you live in Metropolitan Melbourne and looking for a great social day out?

Sunday March 24th the Eastern and Mountain District Radio Club is holding its annual White Elephant Sale, one of the major hamfests in the Melbourne metro area.

Once you have snapped up all the for sale bargains form the many local and country traders you will be able to purchase a sausage from the BBQ and enjoy free tea or coffee from the kitchen and socialising with the many other hams attending.

So put it in your diary, it's on Sunday March 24th at the Great Ryrie Primary School Great Ryrie Street Heathmont Victoria.

For more information and table booking details visit club website www.emdrc.com.au

DISCUSSION POINT

What use is an f-call?

I've just had a browse through the latest Amateur Radio magazine, read a few stories, looked at a couple of photos and it struck me that there are two types of activities that Amateurs get up to.

There's the social activities,
where several amateurs, even groups or hordes - hmm is that the word, a horde of amateurs - get together and have a party. They build a station, either on the back of a trailer, a ute, a tent, a mountain, a boat, you name it. They erect, generally more than one, antenna structure, some go over the top and set-up about 15 different antennas - but the passion that underlies all that is held together by the social glue that makes up this hobby.

Generally a station built like that has some or other purpose, be it to activate some long lost atoll, or a special event call-sign, a particular day, or event, to memorialise some past history. Any number of different reasons to get together, build stuff and get on-air.

The other type of activity is much more insular. Sitting at home, surrounded by equipment, soldering iron, computer, circuit diagram, plans, descriptions, maps and the like. It's one where you might sit for hours listening, or calling CQ for a contest, or building a new piece of magic. It's one where you sit alone, with a song in your heart digging through a problem, learning and figuring out how something works, or as the case may be, doesn't work.

This kind of activity is one that nourishes the soul and brings little gems to your door-step, unexpected, un-remarked, and just as wonderful.

As amateurs we often remark on the social aspect of our hobby, but I think it's just as important to acknowledge the singular activity.

If you're in your shack listening to this, building something, or if you've just come out to see if there is still some daylight left, I'd like to encourage you to share your experience with another amateur. They might be on the other end of the radio, or they might be reading an article in Amateur Radio magazine.

Share your personal triumphs as much as your group ones.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

IARU Region 1 Vienna 2013 - Papers now available

The papers to be submitted to the IARU Region 1 2013 Interim Meeting in Vienna April 20-21 have been released.

Among the HF papers are:

Amendment to the 28MHz Band plan in relation to the Amateur Satellite Service

Alignment of the 30m Digital Modes Band plan

The future of the 30m (10 MHz) band

Assign frequencies for unmanned beacons in all of the HF-bands

Band plan for the 630m band

Operating Practices for the DXpeditioner

Operation at 5MHz and WRC15

Shortwave links for Digital Communications and Voice

The PDF's for these can be downloaded from http://uska.ch/die-iaru/iaru-zwischenkonferenzen/

The page text is in German but the papers are all in English.

TETHERCELL BLUETOOTH REMOTE CONTROL

Looking for a new way to remotely control things?

Tethercell may be the answer to your needs.

Tethercell is a plastic case the size of an AA battery, embedded with Bluetooth 4.0 transponder, which is powered by an AAA battery that fits inside. The Bluetooth-enabled battery is then synced with an app on your smart phone that allows you to turn the device on and off, set a timer and even monitor the amount of power remaining.

According to its inventors this first version of Tethercell
is a test bed for future applications. It's also
an opportunity to get the technology in the hands of the public.

More including a demonstration video is on-line at
tinyurl.com/tethercell

radiotoday.com.au

RadioToday have a link to a virtual
TOUR OF BBC BROADCASTING HOUSE

BUT If you are planning a vacation in the United Kingdom and are interested
in radio, then you will be happy to know that the British Broadcasting
Company's new facility 'in person' tour launches in April.

While on the tour some of the things you're
likely to see include a camera's eye view into
some of the studios broadcasting such programs as
the Six O'clock News and Radio 1.

Trained guides will also present a rich history of the building and the BBC.

NEWS FROM ARNEWSLINE USA
Amateur Radio Newsline Report 1849 - January 18 2013

NPR LABS HOPES TO DEVELOP EMERGENCY ALERT RADIO FOR THE DEAF

A new way to alert the deaf and hard of hearing
to oncoming disaster situations may soon be on
it's way. Amateur Radio Newsline's Heather Embee,
KB3TZD, is here with the details:

--

The trade newsletter Radio World reports that NPR
Labs personnel hope to begin a project that
demonstrates an emergency alerting system for the
deaf and hard-of-hearing population in the United
States. This, using broadcast radio as the transmission medium.

The end goal of this research is to develop a
deaf-accessible radio receiver with a large text
display and bright flashing lights. This in turn
could alert the user of a potential threat to life and property.

Rich Rarey is the NPR Labs Manager of Strategic
Technology Applications. He told Radio World
that there are currently some AM radios with
aural warnings and FM H-D receivers that have
very small text displays but without accessible
warning mechanisms. He says that the aim of NPR
Labs is to create a receiver that is useful for
deaf and hard-of-hearing people, which will also

be helpful for alerting the general public as well.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

You can read the entire report of this potentially lifesaving project on-line at tinyurl.com/emergency-alerts-for-the-deaf

PODCAST IS A PATENTED TERM OWNED BY PERSONAL AUDIO LLC

If you are a podcaster or thinking of becoming a podcaster, even on a very small scale, then its worth your time to read an article on who owns the rights to the term podcasting that appeared in a recent issue of the chron dot com business report.

In a nutshell, it appears as if the term podcast is not generic as most people might think. Rather it is a patented system owned by a company called Personal Audio LLC that developed it and other internet streaming back in 1996. And now Personal Audio LLC has decided to assert its rights by going after both podcast content creators as well as podcast distributors.

So far it has won every case that has gone to trial. Even Apple has lost to them. In that case a jury awarded Personal Audio LLC an $8 million judgment plus $4 million in interest for infringing on the company's The Playlist Patent.

So if you run a podcast or are thinking of creating one, you might want to take a few moments to read the story at tinyurl.com/podcast-patent and then talk to a knowledgeable patent attorney before proceeding or continuing your podcasting journey. It could theoretically save you every penny that you have ever will make or have saved.

MAN WHO POINTED LASER AT AIRCRAFT ARRESTED

The San Francisco Chronicle reports that an unnamed Oakland resident has been arrested for allegedly shining a laser at two aircraft hovering over the scene of a shooting on Monday, January 21st.

The 40-year-old man is alleged to have aimed a red laser several times at a KGO television helicopter as it flew about 1,000 feet over the scene of the incident in which an undercover

Oakland officer was shot in the arm. The man is
also alleged to have shined the laser at a
California Highway Patrol fixed wing aircraft
that was circling at about 3,500
feet. Thankfully no one aboard either aircraft was injured.

Under Title 18 Sub-part 39A, whoever knowingly
aims the beam of a laser pointer at an aircraft
in the jurisdiction of the United States, or at
the flight path of such an aircraft, shall be
fined or imprisoned for up to 5 years, or both.

US CONGRESS REMOVES EXPORT PROHIBITION ON SATELLITES

The National Defence Authorization Act for Fiscal
Year 2013, passed by Congress in late December
and now signed by President Obama has removed a
restriction that has essentially shut down
international cooperation for building amateur satellites in the past decade.

Under the old law, satellites and their component
parts were considered to be "munitions" and their
export to other countries was severely limited.
This made it impossible for amateur satellite
organizations in different countries to work
together on major projects. For example, the
last big amateur satellite, Phase 3D. It was
built jointly by AMSAT groups in the U.S.,
Germany and other countries, but that was before
the international cooperation measure was put in place.

The new law restricts satellite exports only to
China, North Korea and countries identified as
state sponsors of terrorism, as well as those
under trade embargoes. A recommendation from the
Departments of State and Defence said the old law
impeded the ability of American satellite
builders to work with international partners
while providing no noticeable benefit to national security.

MEDIA SURVEY: KPMG SAYS TELEVIEWERS ARE MULTITASKERS

A new study by the research firm KPMG has
concluded that 60% of American television viewers
are also devoted multitaskers who watch
television while accessing the Internet at the same time.

KPMG's findings were based on a global online
survey of 9,000 people in nine countries,
including the United States that was conducted
last October. The survey also concluded that
even though multiple devices vie for consumers'
attention, that most people still prefer to watch

television shows, movies and other video on the TV. Only 14% of those surveyed prefer to watch video on their smartphones or tablets.

According to KPMG, these results suggest that the next big disruption in living room viewing may come from so called "Smart TVs." These are Internet-connected sets that afford the viewer access to traditional TV broadcasts as well as online services such as Netflix, Hulu or Amazon.com.

KPMG is one of the world's largest professional services companies and one of the so-called Big Four auditors with global headquarters located in the Netherlands. Its findings hold implications for network programmers and advertisers, which can no longer be sure which screen is drawing the viewer's eyes.

It's only a week until Wyong!

Next Saturday sees the first ever contest university being held in Australia followed by the CCARC Field Day at Wyong on the Sunday.

All of those who have registered will be receiving the latest details of the Mini Contest University by email this weekend but full details are available also at www.fieldday.org.au/contest_university

For those who still haven't heard about the Mini Contest University, its aim is to give an introduction to the contesting side of our great hobby and we can still fit a few more in. If you are interested in attending this free event, please go to the web site to see how to register.

For those who are travelling to Wyong on Saturday for the Field Day on Sunday, you are very welcome to join us at Panarotti's in Tuggerah on Saturday evening where we will be having a combined MCU/Wyong Field day meal (and good natter). Details of the venue are on the front page of the fieldday.org.au website.

As always those web references are in the show notes on wia.org.au

So with everything organised here's hoping for some nice weather to make the weekend extra special !

This is Ed VK2JI See you at Wyong!

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The Irish Hour Net takes place on Sundays at 1700 UTC on 21.317 Mhz.
Brian, W7DFO, chairs the weekly Net from his QTH in the Pacific North West.

It has become what he refers to as a "challenge" gathering ex-pats from around the globe. Many of the call-ins to the net are from licensed Irish-Americans.

TC 16 BURSA will be active until 19th March in Bursa, Turkey.
It is operated by members of local branch of the Turkish Radio Amateur Club.
QSL as directed on the air.

Prefix hunters will be interested in the special event station PF 100 ZOO.
This will be active until the end of the month to celebrate 100 years of the Burgers Zoo in Arnhem.
The operator and QSL Manager is PA 0 FAW.

NEW INTERNATIONAL REPLY COUPON INTRODUCED

The ARRL say that the Universal Postal Union has introduced the newest model of the International Reply Coupon (IRC):

The Doha model -- so named for the 25th Universal Postal Congress that took place in Doha, Qatar in October 2012 -- will replace the current model, known as the Nairobi model.

Although the US Postal Service no longer sells IRCs, they are still available in other countries and post offices in the US are mandated to redeem them. The Doha model IRC will be available for purchase on July 1, 2013. It is valid for exchange until the end of 2017.

The Nairobi model remains valid until December 31, 2013.

K 0 YAK will operate as ST 2 SF from the Sudan until mid-April.
He hopes to be on 40 through 10 meters. QSL to his home call.

Rain tracked with wireless cellular network

The BBC report on a way to measure rainfall across a country by using mobile
phone network signals

Rain absorbs and scatters mobile phone signals in a way that can be analysed
to yield an overall rainfall picture.

The rise and fall of signal strength in each "link" - the path from one mast
to another - provides an average measure of how much rain there is between them.
As these links criss-cross one another across a region, these simple measures
can be mathematically picked apart to yield a map of the rainfall at a given
moment.

Mountain Goat award for Welsh radio amateur

SOTA (Summits on the Air) is pleased to report another long-time participant reaching the coveted Mountain Goat award.

Richard Price GW0VMW from Colwyn Bay, North Wales has been enjoying amateur radio from the hill and mountains since April 2004, and achieved Mountain Goat status from the summit of Moel Siabod GW/NW-010, 872m ASL.

There are new awards to work towards for the most active SOTA participants. The Summit-to-Summit Award recognises those QSOs that take place between activators, simultaneously on different summits.

The "SOTA Complete" award rewards those individuals who have managed to both activate, and chase the same summit.

See the SOTA websites for more information.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

A QUEST FOR HIGHER POWER ON VHF

Last year in South Africa there was a lot of excitement about the request for an increase of RF power from 400 Watt to 1 500 Watt, as already in use by radio amateurs in several other countries.

This matter is currently being discussed between the SARL and ICASA.

Higher power would be most beneficial for operation on the VHF bands, such as 50 and 144 MHz.

Weak Troppo Scatter signals with QSB are often observed across the country throughout the day and night on these bands. Tests conducted between Cape Town station ZS1NAZ and Port Elizabeth station ZS2FM on 50 MHz have shown that a 100 Watt signal is just above the noise level, but became very readable when the power was increased to 400 Watt. Just imagine how the Troppo scatter signals will improve with another increase of four times, resulting in country-wide communications most of the time; other propagation modes should perform even better.

Debby says…

In past years it has been our practice to send out renewal reminder invoices to all non-financial members from the previous year.

This year we (Evan & myself) have included those members in the mailing list for the first issue of Break In for the year, but have not updated their expiry date, nor included voting papers, in the hope this will alert them to renew or contact me to confirm renewal.

I am pleased to advise that so far this has proven to be very successful and the additional cost is nominal to us. Plus savings are made for postage as Break In has already been received.

There are some members whose expiry dates have not been updated due to a small glitch in our file, however they WILL have received their voting papers in with their Break In, so rest assured payment has been received.

Headquarters will be closed on Tuesday 26 and Wednesday 27th February.

Talk soon…Debby ZL2DL

BRANCH 74 – WELLINGTON VHF GROUP

DIGITAL TELEVISION TEST TRANSMISSIONS FROM MT BELMONT

The first test transmission, in cooperation with users of the adjacent spectrum, was a success and the station has been cleared to continue transmitting.

The coverage of the station is now being measured. Reception reports are welcome.

The transmission should be receivable over a 180° arc, from the North West, through North East, to the South East. There are likely to be two nulls: one in the direction of Titahi Bay and the other in the direction of Seaview. Transmissions over the remaining 180° arc are likely to be weaker.

Look for an unmodulated CW carrier on 506 MHz, in the centre of the licensed channel, on horizontal polarisation. The maximum EIRP is +20 dBW (100 Watts), towards the North East.

The CW transmission will continue until the digital modulator is ready.

For more information, and frequent updates, go to: www.vhf.org.nz

FMTAG NOTES

PROPOSALS

ZL2WHO has applied for a 2-metre beacon at Waipuna, co-located with the existing 6-metre beacon, at TOPO50 BJ33 890.46 298.11. The frequency will be 144.271 MHz.

FINAL RECOMMENDATIONS

None this time.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

NZART Conference 2013 – Branch 46 Masterton

Home of the Golden Shears

Queens Birthday weekend 31st May – 2nd June 2013

Venue: Copthorne Hotel and Resort Solway Park Wairarapa, High Street, Masterton

Accommodation: Copthorne Hotel and Resort Solway Park Wairarapa

On the outskirts of Masterton, Wairarapa's largest town, the Copthorne Hotel and Resort Solway Park is set in 24 acres of landscaped parklands with its own native bush walks and fragrant gardens. The hotel and resort provide 102 bedrooms, leisure and business facilities including three restaurants and bars, gym, swimming and spa pools, tennis and squash courts, seven conference rooms and business centre. and golf driving range on site.

The hotel holds a Qualmark 4 Star Plus and Enviro-Gold rating and is easily accessible from both Wellington and Auckland by road, rail and air.

Ring Copthorne Hotel on 0800 765 929 or email reservations@solway.co.nz and quote the group booking reference number 67866 for a flat rate for any room (standard and luxury)of $145 per night. There is also free parking available for campervans (non powered site) at the location.

There are also plenty of other hotels and motels no more than 10 minutes driving time from the venue to suit your budget.

Please contact the committee for further information or suggestions at info@nzartconference2013.co.nz or visit the conference web site nzartconference2013.co.nz or Postal address of Branch 46 NZART Conference 2013,PO Box 860, Masterton

See you there.

David Bray ZL2BA

Special Event – Grey Point Fort

Dear New Zealand Association of Radio Transmitters,

I would like to introduce ourselves as a group of Radio Amateur restoring Grey Point Fort, a WW1 Coastal Defence Fort located in Helens Bay, Crawfordsburn, Northern Ireland.

We would like to inform you that we will be running a special event station with the three Special Event Callsigns allocated to Grey Point Fort.

GB0GPF - GN0URN - MN0GPF

For a 48 hour special event, starting at 1700hrs UTC 31st May 2013 to 1700hrs UTC 2nd June 2013

An award certificate is available for contact with all three special event stations (sample on web site)

The Special Event is under the heading “A Moment of Remembrance” and is;

“To honour all who left us too soon, whose lives were cut short and those who sacrificed their lives so we can enjoy the precious gift of life and security.

Every life lost is a tragedy; it is a loss to each nation and to the families who grieve.

No one can take away the sorrow that comes to the families of the fallen, we can only say that they served in a noble and necessary cause and their sacrifice has made their nations more secure.

We owe them nothing less than to remember all of them and keep their memories alive in our hearts”.

We would also like you to know that we come from all walks of life, movie stars, missionaries, doctors, students, politicians and just plain people like ourselves, but we all have one common interest - In radio communications.

We also believe that age, nationality, disability, political and ethnic barriers are non-existent in our hobby and we all strive to promote international friendship and understanding throughout the world.

We all would like to ask, if you all, would consider taking part in the event.

If it is your wish to take part in the event, could you possibly send us your callsign/club callsign, email address and website address, we feel that since you have taken the time to show interest in the event that we will publish your callsign/club callsign and website URL on our webpage in the hope that we can spread international friendship.

For details of the event please visit our web site,
http://www.greypointfort.magix.net/public

Email address greypointfort@hotmail.co.uk

With my very best wishes

Steve GI4RNP

ARRL DX SSB Contest
What: ARRL DX SSB CONTEST - HAM BANDS 80-10 Meters.
Who: K3FT Dave , N3RW Rob, WA2TVS Dave, KB2BRR Margaret,

WB2CAK Jerry ++

Where: Aboard the Battleship New Jersey - CALL SIGN: NJ2BB
Representing The BNJARS (Battleship New Jersey Amateur Radio Station)

When: Phone: First full weekend in March March 2-3, 2013).
Starts: 0000 UTC Saturday; ends 2359 UTC Sunday.
Contest Period: 48 hours.

Objectives: W/VE amateurs work as many DX stations in as many DXCC entities as possible on the 160, 80, 40, 20, 15, and 10 meter bands.

DX stations work as many W/VE stations in as many of the 48 contiguous states and provinces as possible.

The QSL Route: QSL Info: QSL Manager is KB2BRR

QSL via the Bureau or send SASE with US Postage, or SAE with IRC or "Green Stamp" to:

Margaret Burgess, KB2BRR
150 Schooner Ave
Barnegat, NJ 08005
USA

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the March/April issue of Break-In-closes on 10 March 2013.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy. All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 5 March 2013 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail: zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on Sunday 24th February 2013. Next HQ-Infoline e-mailed on FRIDAY 1st March 2013. Closing date for this is Thursday 28th February 2013.

You have received this message because you are subscribed on an NZART infoline list.

Amateur Radio Newsline(tm) Report 1853 - February 15 2013

Amateur Radio Newsline report number 1853 with a release date of February 15 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a Nor-Easter that hits the U-S-A and Canada; the IARU to do a review of the Region 2 High Frequency bandplan; a Utah Medical Center adds ham radio as a major back-up; the STRAND One ham radio phone-sat to launch late this month and a Charlotte North Carolina TV station accomplishes what hams have been doing for over a decade. Find out the details are on Amateur Radio Newsline(tm) report number 1853 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: HAM RADIO RESPONDS TO NORTH-EAST BLIZZARD NEMO

Ham radio was ready when a severe winter storm hit the North-East. Amateur Radio Newsline's Bill Pasternak, WA6ITF, reports:

--

Amateur radio operators in the North-East were kept busy as a gigantic midwinter storm nick named Nemo buried the Northeast in snow on Saturday, February 9th. The storm left behind a geographic region digging out of heavy white drifts and reeling from gale-force winds. And ham radio severe weather spotters were on the job as well. Take a listen:

--

Taunton Skywarn audio.

--

That was the sound of the Taunton Skywarn Amateur Radio Club's emergency activation network in Massachusettes as the network passed along snow levels to the National Weather Service while the mega storm continued on its Northward trek. During the storm WX1BOX was also tweeting flooding information down on the coast and reported that Martha's Vinyard had suffered some storm related damage.

In all, more than three feet of snow fell on parts of Connecticut, and more than two feet accumulated on New Yorks Long Island. The storm also caused coastal flooding that forced evacuations of some

Massachusetts low-lying communities. This as waves off the south shore of Boston and parts of Cape Cod measured as high as 20 feet.

According to news reports, hundreds of thousands of people were without power as wind gusts of up to 80 miles per hour cut power lines and toppled trees. More than 400,000 customers were reported without power in Massachusetts and at least another 180,000 in Rhode Island. Also lost in some areas was both wireline and cellular telephone service. For some it was several days before utilities were restored.

Meantime, hams involved in Skywarn and other severe weather spotting services did their best to keep the National Weather Service and through it the public informed on the very latest in information regarding this bitterly cold Nor-Easter as it played havoc with those in its path.

With thanks to Lloyd Colston, KC5FM, for supplying the WX1BOX audio clip, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

(KC5FM)

**

RESCUE RADIO: CANADIAN HAMS READY WHEN STORM HITS

But the United States North-East was not the only region affected by Nemo. The storm then moved North into Canada and Stefan Kinford, N8WB, has that part of the story:

--

After several days of warnings, a major winter storm moved into the Canadian Maritimes. Messages from Bob Robichaud, VE1MBR, at the Atlantic Storm Prediction Centre in Dartmouth were being sent out to all CANWARN members to prepare them in case of activation. Information was also being posted on the Maritime Amateur website.

On Friday morning the call was made to activate CANWARN in Nova Scotia and Prince Edward Island on Saturday February 9th beginning at 8am Atlantic Time. A message went out to all CANWARN members to let everyone know of the net and that information Environment Canada would be looking for.

At 8 a.m. Saturday Morning, Net Control began operations by linking up 13 repeaters throughout Nova Scotia through the MAVCOM system, IRLP, Echolink and HF operations on 80 meters 3.770 MHz. CANWARN spotters were asked to record snowfall amounts each hour, visibility, wind speed, direction and storm surge. Notes would also be kept for any changeover from snow to freezing rain, ice pellets, rain, flooding and any other damage reports.

Starting at 11 a.m. damage reports starting coming in of trees down, roofs being blown off, flooding in coastal areas and roads being breached. Power outages were reported all over the province.

Over the next 12 hours Net Control recorded close to 200 messages. As darkness approached hams were told by Environment Canada that hams could close the net for the evening after the high tide at 10 pm in case of any reports of storm surge. The net activated again Sunday morning for only one hour to record any damage reports. At that time the net was terminated.

For the Amateur Radio Newsline, Im Stephan Kinford, N8WB, reporting.

--

More information about CANWARN Atlantic can be found on The Maritime Amateur website at www.maritimeamateur.ca (VE1JBL)

**

RESCUE RADIO: UTAH MEDICAL CENTER ADDS HAM RADIO EMCOMM BACKUP

Utah's Intermountain Healthcare Southwest Region's Dixie Regional Medical Center has completed installation of two special antennas. Both will serve as a part of its backup communications system powered by amateur radio.

Bob Vosper, AE7HY, is the Technical Manager for Washington County Amateur Radio Emergency Service. He notes that much of Intermountain's communications system is Internet-based. He notes that if the web connection goes down, that a possible communications blackout could occur.

To cope with this potential situation, the hospital arranged for Washington County Amateur Radio Emergency Service to install an amateur radio system as a back up that can function without the aid of the Internet or local radio repeaters. The system will also be able to transmit large blocks of data over amateur radio bands.

According to Vosper, other backup systems were already in place but adding ham radio is just an added redundancy. (StGeorge.com)

**

WORLDBEAT: IARU TO REVIEW REGION II HF BABDPLAN THIS YEAR

The ARRL reports that the International Amateur Radio Union Region 2 High Frequency bandplan will be a topic of discussion at a conference will be held later this year in Mexico. According to the League, the Region 2 conference is held every three years and is attended by delegations from the national Amateur Radio societies in the western hemisphere that are members of the IARU.

The ARRL is the IARU Member Society for the US. It notes that IARU band plans are voluntary guidelines. It adds that they do not have the force of FCC regulations and that for radio amateurs in the US, IARU

band plans are informational, not regulations. However most other countries do not have the detailed sub-band regulations as are in place here in the United States, so for radio amateurs in those nations the voluntary IARU band plans may offer the only guidance on frequency usage.

Hams living in Region 2 can find the current bandplan on-line at www.iaru-r2.org/band-plan. The Region 1 and Region 3 band plans are also posted there as well. (ARRL, IARU)

**

HAM RADIO IN SPACE: STRAND-1 AMATEUR RADIO SMARTPHONE CUBESAT TO LAUNCH FEBRUARY 25

The BBC says that the world's first 'smartphone-sat' project called STRAND-1 will be ready to launch at the end of February. The STRAND-1 CubeSat will carry a Google Nexus One Android smartphone into space to demonstrate the feasibility of using cheap smartphone's electronics to control a spacecraft.

Also included will be a software-based speech synthesizer to commemorate the U-O-SAT family of amateur radio satellites that were launched in the 1980's. There will also be an amateur radio AX.25 packet radio downlink on 437.575 MHz.

The STRAND-1 satellite was built in Guildford in the United Kingdom by volunteers from the Surrey Space Centre and Surrey Satellite Technology Limited in their spare time. It is planned to be launched on February 25th into a 785 km orbit by the Indian Space Research Organization rocket. More is on-line at www.amsat-uk.org and we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (AMSAT-UK)

ENFORCEMENT: CONTINUED UNLICENSED OPERATION BRINGS NEW $25000 FINE

The FCC has affirmed a second $25,000 proposed fine to Whisler Fleurinor for unlicensed operation and this one it says its going to collect in full. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

You may remember back to October of 2011. That's when the South Central Region of the Enforcement Bureau issued a Forfeiture Order to Whisler Fleurinor affirming its findings in a 25,000 Notice of Apparent Liability for unlicensed operation of a radio transmitter. At that time the agency agreed to reduce the forfeiture amount to $500 based solely on his inability to pay claim. Fleurinor then paid the $500 forfeiture and that was supposed to be the end of the matter. But it turned out to be just the tip of a much larger unlicensed radio iceberg.

On several dates in late 2011, agents from the Miami Office used direction-finding to locate the source of radio frequency transmissions on the frequency 99.5 MHz. Once again the signal was traced it to Whisler Fleurinor's commercial property in Fort Lauderdale. As a result, the Miami FCC Office issued Fleurinor a second Notice of Apparent Liability for Forfeiture on February 1, 2012, which proposed a $25,000 forfeiture. This included a $15,000 upward adjustment because of the deliberate nature of the violation and given that Fleurinor had already been fined and issued multiple Notices of Unlicensed Operation for the same infringement.

In his response to the proposed fine Fleurinor denied that he violated the Communications Act or any FCC order. He asserted that there had been no radio transmission of any kind for at least 6 months, and that there is no radio equipment at this location. Fleurinor also asserted that the only remnant of any radio equipment is a roof antenna which has been disconnected and was not operational. Finally, Fleurinor states that he is unable to pay the forfeiture and urged cancellation on that basis as well.

However, in its February 8th decision, the FCC says it's not buying Fleurinor's explanation or defense. It notes that agents from the Miami Office determined that unlicensed radio transmissions on the frequency 99.5 MHz weew transmitted from the antenna located on top of Fleuronior's commercial property on several occasions during 2011. Also that he admits that the antenna at issue was his, but denies that he was operating the unlicensed station on the specified dates. This says the FCC says it does not find credible because its agents collected their evidence over several months.

As to his inability to pay the proposed fine, the FCC says that hes going to have to find a way to do so. This is because in an individual's inability to pay a forfeiture is just one of the factors we consider in determining the appropriate forfeiture penalty. In this case the FCC says that the record evidence in this case shows that Fleurinor is a repeat offender, having already received and paid a forfeiture for the very same violations at issue and has been in violation, either continuously or intermittently since at least 2008.

For the Amateur Radio Newsline, I'm Norm Seely, KI7UP, watching this one from out here in Scottsdale, Arizona

--

The bottom line is that the $25,000 fine stands and Fleurinor was given the customary 30 days to pay it, or the matter may be turned over to the Department of Justice for further action. And Norm adds that the other voice - er -bark you heard in his report is that of Henry J who wants a bit of credit too. (FCC)

**

RADIO CRIME: COPPER THEFT TAKES NWS RADIO SITE OFF THE AIR

National Weather Service Coordination Meteorologist Hector Guererro reports that a case of vandalism at the Coleman National Weather Service transmission site in Texas. One that took the Weather Radio station transmitter temporarily off the air.

Guererro said that county authorities reported that vandals broke into the transmitter building north of Coleman and stole the copper data feed lines that come from the city of San Angelo. The weather alert transmitter, which identifies as WXN-89, operates at 162.475 MHz. News reports say that many area Weather Alert radios and scanners are tuned to that frequency.

The lines are being replaced and the transmitter should be back on the air by the time you hear this report. Federal officials as well as Coleman county authorities are investigating the break-in and vandalism that damaged the federal government transmitting facility. (Nuizer.com, Brownwooid News)

**

RADIO CRIME: KWWK KNOCKED OFF THE AIR BY COPPER THIEF

Rochester Minnesota police are investigating a recent copper theft that took a local radio station off the air. Early Monday, February 4th, someone broke into the KWWK radio transmitter and tower site. The thief made off with both copper transmission line and a motor. An engineer found the crime when he went into work around 4 a.m.. Damage to the property is estimated at $550. (KTTC, others)

**

DELIVERY NOTICE: USPS TO SUSPEND SATURDAY MAIL DELIVERY

Receiving a QSL card could soon take a little bit longer. This with word that the United States Postal Service has announced that effective the week of August 5th, it will stop Saturday delivery of most mail first-class and standard mail, periodicals and direct-mail advertising. The only exceptions will be packages, mail-order medicines, priority and express mail which will still be delivered six days a week. At least for the time being. (USPS, others)

**

HAM RADIO BUSINESS: HARBACH TO DISCONTINUE PETER DAHL TRANSFORMER LINE

The famed Peter Dahl line of transformers used in many ham radio power amplifiers is going away. According to an announcement on the Harbach Electronics website, the company says that producing these transformers in these hard economic times is simply no longer cost effective. According to Jeff Weinberg, W8CQ, of Harbach, he is in negotiations with other entities for someone else to take over the manufacture of Peter Dahl transformers and other components in that product line but as of airtime nothing has been decided. Harbach will discontinue the Peter Dahl product like effective February 14th. More is on-line at harbachelectronics.com. (Harbach Electronics)

**

HAM HAPPENINGS: HEIL SOUND TO AGAIN HOST NAB HAM RADIO RECEPTION IN LAS VEGAS

Heil Sound has once again signed on as a major sponsor of the Amateur Radio Operators Reception at this years National Association of Broadcasters Convention. The gathering is slated for Wednesday, April 10 from 6 to 8PM Pacific at the LVH Hotel in Las Vegas, Nevada.

This will be Heil Sound's eighth year as a sponsor and, according to company president Sarah Heil, there will be a "pile of Heil" with prizes being awarded throughout the evening. Company founder Bob Heil, K9EID, will be on hand to help emcee and entertain the crowd with his stories from the Ham Radio world.

Again that's The 2013 Amateur Radio Operators Reception, sponsored by Broadcast Supply Worldwide, Heil Sound, Ltd., and Turner Engineering, will be held on Wednesday, April 10th from 6 to 8PM at the L-V-H Hotel for the 2013 NAB Amateur Radio Operators Reception. This reception is open to all NAB badge holders and Bob and Sarah Heil say that they hope to see you there. (Heil Sound)

**

HAM HAPPENINGS: CENTRAL STATES VHF CONFERENCE JULY 15 - 18

Conference registration is now open for the 2013 Central States VHF Conference that will be held July 25th to the 28th at the Elk Grove Holiday Inn in Elk Grove Village, Illinois. Conference features this year include an antenna test range, various talks and presentations as well as a special area for rover vehicles to be displayed. ARRL C-E-O Dave Sumner, K1ZZ, is slated as the banquet keynote speaker. More information is on-line at www.csvhfs.org/2013conference. (ANS, Central States VHF Society)

**

NAMES IN THE NEWS: ALEX TARSHA, N0AMT JOINS QRZ.COM

Alex Tarsha, N0AMT, has joined QRZ dot com as a full time staff member in its systems engineering department. Tarsha is a US Air Force veteran who comes to QRZ from the defense industry where he has recently been serving as a Lead Software Security engineer. At QRZ he

will function as an Information Technology Engineer performing server maintenance and software development. Prior to Alex's arrival, and for the past 20 years, all of the software and engineering behind QRZ dot com has been done by site creator and owner Fred Lloyd, AA7BQ. (QRZ)

**

NAMES IN THE NEWS: CHIP MARGELLI, K7JA JOINS INNOVANTENNAS

And word that Chip Margelli, K7JA, has joined InnovAntennas. At Innov Margelli will manage sales and marketing activities in the Americas and will also contribute to the company's global strategic planning.

For those of you who might not be aware, K7JA has been as a champion contester, DXer and DXpeditioner for over his five decades and was a 2008 inductee into the CQ Amateur Radio Hall of Fame. On the professional side Margelli has over 35 years experience in the amateur radio industry with stints at Yaesu, Heil Sound and CQ Communications. (InnovAntennas)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: FORMER HAMVENTION CHAIRMAN WALLACE WRIGHT AD8N - SK

The changing of the guard in ham radio continues with word of the passing of former Dayton Hamvention General Chairman Wallace Wright, Jr. AD8N, on Sunday, January 27th. According to Ron Moorefield, W8ILC, Wright, then WA8ZCA served in the Hamvention's leadership role in the 1977 year.

Wallace Wright spent most of his career with Dayton Power and Light retiring after 32 years of service. He also provided spiritual leadership in several communities within Southwest Ohio for over 40 years as an AME pastor and pastoral assistant at Agape Bible Fellowship.

Wallace Wright, AD8N, is survived by his wife of over 43 years, Sylvia and his two children. At the time of his passing he was age 73. (W8ILC)

**

EMERGING TECHNOLOGY: SDR TOUCH TURNS TABLET OR PHONE INTO SDR RECEIVER

Ham Radio Science reports on an interesting new app called SDR Touch. This is software that allows you to use your Android tablet or cell-phone along with a RTL2832U USB plug in thumb drive as a Software Defined Radio.

All you need do is to plug the relatively inexpensive drive into your Android 4.0 devices USB port and load the SDR Touch app. The combination is reported to allow you to tune and decode the audio from it. Simple, easy and if we may add, cheap.

More about the device itself is on-line at www.realtek.com.tw. A video showing it in action is at tinyurl.com/sdr-tablet. (Southgate, Ham Radio Science)

**

HAM RADIO IN SPACE: ARISS SWITCHES TO ERICSSON RADIO AFTER EXPERIENCING PROBLEMS WITH THE KENWOOD D700

ARISS has switched radios. After experiencing issues with the Kenwood D700 on two consecutive school contacts, Amateur Radio on the International Space Station operations have announced plans to use the Ericsson radio on the Columbus module for all contacts until problems with the D700 are resolved.

Frank Bauer, KA3HDO, is AMSAT's Vice President for Human Spaceflight Programs. He says that for some reason signals from the Service Module Kenwood D700 radio are much diminished. He notes that a recent contact with Israel had low audio levels. Another contact with the Hospital for Sick Children was even worse. Only one student was able to talk to Chris Hadfield before signals on the ground were lost even though the crew reports hearing the ground station well.

It should be noted that both these contacts were with made using telebridge stations which have above average gear. Also astro-ham Hadfield used the space stations IP Phone, immediately after the hospital radio contact and answered all the student's questions so that all was not lost. A later contact with a school in Japan using the Columbus Module Ericsson radio proved very successful. (ANS, ARISS)

**

ON THE AIR: CELEBRATING 50 YEARS OF THE ALGERIAN AMATEUR RADIO ASSOCIATION

On the air, listen out for members of a group of Algerian hams who will activate special event callsigns 7T9A and 7T50ARA. This to celebrate the 50th anniversary of the Algerian Amateur Radio Association. QSL both callsigns by the Bureau or direct to: PO Box 1, Algiers RP 16000, Algeria. Sorry, but no International Reply Coupons will be accepted for this one. (Via e-mail)

**

DX

In DX, V47JA will again be operating from his Calypso Bay, St. Kitts, vacation home from February 20th until March 21st. Active will be on 160 throuhgh 6 meters and will include 60 meters. Jon also advises Amateur Radio Newsline that he plans to take part in the CQ 160 Meter Contest February 22nd through the 24th and the ARRL International DX Contest on March 2nd and 3rd, both on SSB. QSL's via W5JON either direct or electronically via Logbook of the World.

VE3DZ will be on the air from Jamaica as 6Y2T until February 19th. He's reportedly operational on 160 through 10 meters using CW, SSB and RTTY. QSL via VE3DZ.

An international team will be on the air from Burundi through February 23rd. In total they will have 9 operators and four stations using the callsign 9U4U. Activity is on 160 through 10 meters using CW, SSB and RTTY. The operations QSL Manager is M0URX

W1VE will be active as 8P9RM from Barbados starting February 26th. His operation will be on 160 through 6 meters with a focus on CW and the lower bands. QSL via W1VE.

An International group, along with the Tunisian Radio Amateurs and the Engineering University of Gabes, are planning another DXpedition to Djerba Island between April 29th and May 6th. The Tusisian Amateur Radio Society is expected to receive the callsign TS8TI on or about March 15th. Operations for this DX outing will be on all HF bands including the 30, 17 and 12 meters using CW, SSB, RTTY, AMTOR and PSK31. Late word is that they are looking for operators, sponsors and individual contributions to make this operation possible.

Lastly, Bill Moore NC1L, the ARRL's Awards Branch Manager says that the current 5X8C operation from Uganda, along with the T6TJ and T6BP operations from Afghanistan have been approved for DXCC credit. If you've had cards declined except Logbook of the World applications please send an e-mail to bmoore (at) arrl.org to be placed on the list for an update. If your QSOs were confirmed only via Logbook of the World, they were not imported to DXCC since at the time of your application these were not yet approved. Moore says that Logbook of the World confirmed QSOs' can be reclaimed via your next submission only. Also from NC1L word that the Zed-81-A and Zed-81-D operations commencing back in 2012 from Republic of South Sudan have also been approved,

**

THAT FINAL ITEM: TV STATION LAUNCHES BALLOON TO EDGE OF SPACE

And finally this week, , Charlotte NBC affiliate WCNC, decided to do what ham radio operators have been doing for many years. That being to put some consumer grade video cameras inside a box, tie it to a helium filled balloon and launch it toward near-space. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the story of this unexpected extended flight:

--

Corrie Harding is WCNC's news director. He says that he saw a video on YouTube of two people launching a beer can toward space and wanted to see if his station could do the same thing. So with the help of Hackerspace Charlotte the station took two Go-Pro cameras, a lunchbox, a helium filled balloon, a 3D model of an astronaut with meteorologist Larry Sprinkle`s face attached and launched it to see how high it would reach.

The balloon rose to an altitude of 102,457 feet before breaking and sending both the cameras and the astronaut model plummeting back toward Earth. The package took 3 1/2 hours to ascend and 45 minutes to fall back to Earth. The station says that the package was found 25 days after the balloon was found by an air search lying in several acres of briars 172 miles from where it launched.

You can watch the video of the flight and the payload recovery at tinyurl.com/wcnc-balloon.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to Mark Garrett at least one ham radio operator was involved in the WCNC mission. Garrett identifies him as August Flassig, N6TYE, whose APRS call was used for the flight. (Media World)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Skeeter Nash, N5ASH, near Houston, Texas, saying 73 and we thank you for listening.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1100
BID: $OPDX.1100
February 18, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, N7QT, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 4J5T, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, IK7JWX, IK1SOW, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 9th-February, through Friday, 15th-February there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.info

3V, TUNISIA (Correction/Operator Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), between April 29th and May 6th. The Association des Radio Amateurs Tunisiens (ARAT) is expected to receive the callsign TS8TI on March 15th. Current operators/club participants mentioned are 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gab&#65533;s), 3V8SF (Scout Radio Club of Sfax), Leopoldo/I8LWL, Fred/IK7JWX (Team Leader), Antonello/IK2DUW (QSL Manager), Titti/IK8GQY (YL), Ferruccio/IK8TEM, Ampelio/IS0AGY, Rosy/IW2NLC (YL), Ashraf/KF5EYY and Stefano/IK6JRI. Activity will be on all HF bands, including the 30/17/12 meter bands and the CW, SSB, RTTY, AMTOR and PSK31 modes. They are looking for operators, sponsors and individual contributions, contact Fred, IK7JWX, at <ik7jwx2003@yahoo.it>.

4JT, AZERBAIJAN (Special Prefix). The Federation of Radio Sport of Azerbaijan
has announced that during the period of February 14th and March 5th, the Azerbaijanian HAMs are permitted to add the special addition of the letter "T", which means "Tragedy", to their callsigns. For example: 4J7DL would change to 4JT7DL, or 4K3M to 4KT3M, etc.... The activity is to remember the 21st anniversary of one of the most horrific events of the 1990s, the "Khojaly Massacre", the biggest war crime in the area of the former USSR. QSL via operator's home callsign. ADDED NOTE: On behalf of a group of Azerbaijani-Americans and their friends throughout the nation and the world, on the eve of the 21st anniversary of this tragedy, they hereby call upon you to help them commemorating Khojaly Massacre and its victims with a Presidential proclamation and submit a petition to the White House. Please go to:
https://petitions.whitehouse.gov/petition/issue-proclamation-commemorating-and-recognizing-war-crime-khojaly-massacre-and-its-victims/W8BbDqYx

5C, MOROCCO. Members of the URE Cartagena team will be active from the ARRAM HQ club station (CN8MC) in Rabat as 5C5T during the ARRL DX CW Contest (February 16-17th) as a Multi-Single/Low-Power entry. QSL via EA5YU, by the Spanish Bureau or direct. Operators mentioned are: Juan/EA5BLJ, Jose/EA5CP and Jose/EA5YU. The operators will be there until February 18th, and plan to be active outside of the contest on 80-10 meters using 100 watts, CW only.

5X, UGANDA (Update). Members of the F6KOP team will be going QTH as 5X8C on February 18th. If you did not make a QSO with the 5X8C team, you may

have another chance with a 5X station. Reg, NH6T, who is also in Uganda building apartment units there, reports: "Had the opportunity to spend several hours with the huge group out at Country Lake Resort yesterday (February 10th) afternoon and it was probably the most ham radio fun for me of the past decade. This resort, which was several miles down a rutted dirt road, was a mammoth tropical paradise equivalent to most of our Hawaiian resorts other than the Hyatt Regency. The complete antithesis of HK0NA what with swimming pool and food/drinks at the snap of a finger. The organization and operation of this undertaking would put most military campaigns to shame. The group is so well experienced that they had all antennas and six operating positions up and running in less than one day and an antenna farm which defies description. Thousands of feet of coax cable running every direction like spaghetti and antennas even mounted on the the ends of piers sticking out into Lake Victoria (the 2nd largest fresh water lake in the world). One does not expect to see multiple four-squares on a DXpedition." Reg also mentioned that he received the callsign 5W1C, but has not been on the air much because of his work. He also states [edited], "I'm only working with an NVIS antenna strung along the hedges here, but with usable signals on all bands except 20M which is way down in the mud. .... I literally can't get a higher antenna up here on the estate because the trees are so thick and also covered with thorns. On my first try I wound up my trusty hammer weight for an underhanded throw and it went high enough, but unfortunately remained stuck in the branches." Reg also added that the F6KOP team tried to get his callsign 5X1C for their DXpedition, but were told they had to settle for 5X8C because Entebbe is in a different radio district than Kampala.
As this was being written on February 15th, the 5X8C log on ClubLog reports that the 5X8C team as made 70435/QSOs with 18896/Unique callsigns (35714/CW, 25869/SSB and 8852/RTTY) with 1056/AF, 0/AN, 6219/AS, 51747/EU, 10106/NA, 553/OC and 754/SA. To check your QSOs, go to:
http://www.clublog.org/charts/?c&#65533;8C
Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

9U, BURUNDI (Update). The international team of operators from ON, PA and GM are now on the air as 9U4U from Bujumbura until February 23rd. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL Manager will be M0URX. The 9U4U Web site is online at: http://www.9u4u.be
This DXpedition will also have a Twitter page <https://twitter.com/9U4U>.

9X, RWANDA. Nick, G3RWF (5X1NH), plans to go to Rwanda between March 4-12th. He has requested the callsign 9X0NH, and the license should be valid for 2013 because he could return later in the year. Activity will be from Kigali and will be mainly CW. QSL via G3RWF.

A3, TONGA (Update/Callsign Change). Werner, DJ9KH, is now active from Tongatapu Island (OC-049) until February 23rd, and then on Vava'u Island (OC-064) between February 24th and March 2nd. His callsigns will be A35WH on both islands. He reported on February 14th: "Sorry to say, that we had

to leave our mast-material in Auckland. Air New Zealand wanted us to pay a hell lot of money for 2kg fiberglass, incredible. Now we took a palm-tree instead, not that high, but good enough for a vertical-dipole for 20/17/15m. Tried to work CW this morning GMT. Some more will follow." His equipment will be a K3 with 100 watts and wire-antennas (loops and verticals). Activity will be on the HF bands, depending on propagation. Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10105, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz

QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> every day and give information about planned activities, modes and frequencies. He doesn't use an online-log, LoTW and e-QSL.

A6, UNITED ARAB EMIRATES. Alex, SQ9UM, will be active as A6/SQ9UM between February 16-22nd. Activity will be on 40-10 meters, including the 30/17/12 meter bands, using CW, RTTY and from time to time SSB and PSK. QSL via his home callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operations for DXCC credit:
Z81A and Z81D • Republic of South Sudan;
Current operations commencing 2012

EA8, CANARY ISLANDS. Mauri, OHBYS, will be active as EA8CMX during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Single-Band (40m)/ High-Power entry. QSL via OH2BYS.

EF8, CANARY ISLANDS. Juan, EA8RM (ex-EA8CAC), will be active as EF8R during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or EB7DX.

FM, MARTINIQUE (Correction). Michael, HB9WDF, (not Ted, K7TRK), who was active as KP4/HB9WDF (Puerto Rico) and FY/HB9WDF (Kourou, French Guyana) two weeks ago, will be active as FM/HB9WDF from Martinique between now and February 21st. Activity will be holiday style on the satellites (AO-7, FO-29, VO-52, SO-50 and others if they are active), and the HF bands on PSK-31 and sometimes SSB. QSL via HB9WDF, direct, by the Bureau and eQSL.

H40, TEMOTO PROVINCE. Members of the Temotu Aid Radio Club (TARC) report on QRZ.com: "After the terrible earthquake and tsunami on February 6th, 2013, a group of Radio Amateurs founded the Temotu Aid Radio Club (TARC). We are organizing aid for the local people, specially for supporting the LATA hospital. Therefore the next upcoming DX-expedition activity will be from December 21st, 2013, to January 10th, 2014 from Lata, Nendo Island (OC-100). Donations to support the local hospital are most welcome. The travel costs for the expedition will be fully financed by the operators themselves. So your donation goes straight 100% to the LATA hospital." They mention the callsign will be H40TA and the activity will be on CW and SSB. QSL and donations information will be forthcoming (November 2013).

H44, SOLOMON ISLANDS (Excerpts Edited From Press Release #2 by G3SWH). Operators Phil/G3SWH and Jim/G3RTE will be active from Honiara, Guadalcanal, in the Solomon Islands, between February 18-28th. The Solomon Islands are located in CQ zone 28, ITU zone 51. Guadalcanal counts as OC-047 for IOTA purposes. The "most wanted" data provided by ClubLog currently shows the Solomon Islands at #81 in Europe and #77 in North America. Their activity will be on CW only on all bands 80-10 meters using 2 x K2s with 2 x KPA500 amplifiers to wire antennas. There will be no 160, 60, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours everyday as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. They will always work split and listen between 1 and 5 kHz up. Subject to a reliable Internet connection, they will upload the log to ClubLog and the G3SWH Web site on a daily basis. Otherwise the complete log will be uploaded upon their return. The log will be uploaded to LoTW as soon as possible after they return to the UK. Please make only one QSO per band. Making duplicate QSOs prevents someone else from making a QSO! Duplicate QSOs will *NOT* be logged. Believe your ears, not your Internet browser! QSL via G3SWH, either via the OQRS facility on Phil's Web site <http://www.g3swh.org.uk> (recommended), direct with SAE and adequate return postage or via the traditional Bureau route. There is more information at <www.g3swh.org.uk/h44kw.html> which will be updated from time to time.

HQ2, HONDURAS. Hiro, JA6WFM, will be active as HQ2N from San Pedro Sula during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. QSL via EA5GL or LoTW. Hiro will be here until January 2014.

IOTA DXPEDITION. John, YB5NOF, along with possibly 1 or 2 more operators, will activate three Indonesian IOTA groups during the months of May, June and July. His plans are tentative, but here is the schedule:
Banggai Island (OC-208) - During late April/early May; he will apply for the YE8B callsign.
Subi Besar Islands (OC-109) - Sometime in June; he will apply for the YE5S callsign.
Tambelan Islands (OC-122) - During July for the RSGB IOTA Contest); he will apply for the YE5T callsign.
More details will be forthcoming. Stay tuned!

IOTA NEWS.....
EU-001. Operators Teo/SV1GRM, George/SV1RP, John/SV1GYG, John/SV1GE and Takis/SV2FWV will be active from Kalolimnos Island (GIOTA DKS-048, MIA MGD-011, WLOTA 0662) between May 10-20th. Activity will be on all HF bands and modes. QSL via SV1GRM.

EU-010. Graham, MM0GHM, will be active as MM0GHM/m from the Isle of Barra (IOSA OH11, SCOTIA HI02, WLOTA 3126), Outer Hebrides, between March 24-29th. Activity will be on the HF bands, depending on propagation. QSL via his home callsign, direct or RSGB Bureau.

EU-038. Dirk, DL5DCL, will once again be active as PA/DL5DCL from
Ameland Island (WLOTA 1059) for 5 days starting April 1st.
Activity will be holiday style on several HF bands, CW only.
He will have an online log search and OQRS available during
and after his operation. He will have a new high quality QSL
card available. QSL via DL5DCL, by the Bureau, direct or via
OQRS. Visit his Web site at: http:/www.dl5dcl.de

EU-125. Dieter, DF2SD, will be active as OZ/DF2SD from Fano Island
(DIA NS-002, WWFF OZFF-004) between August 17-30th. Activity
will be holiday style on the 30/17/12 meter bands only, using
mainly RTTY and some SSB. QSL via his home callsign, direct
or by the Bureau.

NA-171. (Update) Operators Ismael/XE1AY, Benjamin/XE1AU, Armando/XE1CIC
and Enrique/XE2AA will be active as XF2E from Venados Island
between April 21-26th. Activity will be on 160-6 meters. QSL
via IT9EJW. Visit their Web page at: http://www.it9ejw.it/xf2e

OC-016. Jim, W8ERI, will be active as 3D2ZF from Taveuni Island between
February 17-23rd. Activity will be on 80-10 meters mainly SSB.
QSL via his home callsign.

OC-161. Imam, YB4IR, will be active as YB4IR/6 from Nias Island between
March 8-13th. Activity will be on the HF bands. QSL via his
home callsign. Visit his Blog page at: http://yb4ir.blogspot.com

OC-245. Operators Ucok/YB6AR, Adhi/YB3MM, Budi/YF1AR and Evendi/YC6EI
will be active from Rondo Island (ARLHS IDO-369) between March
9-17th. Callsign has not yet been announced. Activity will be
on 160-10 meters using CW, SSB and RTTY. QSL via IZ8CCW, direct
or by the Bureau. For more info and updates, visit:
http://www.mdxc.org/oc-245

J6, ST. LUCIA. Rob, N7QT, will be heading back to Saint Lucia on a suitcase
mini-DXpedition as J6/N7QT between April 5-16th. He will be using the new
CrankIR portable antenna system from SteppIR <www.steppir.com>. Operator
Frans, J69DS, will join him. Their operational base will be a magnificent
villa located in Babonneau, which overlooks the city of Gros Isle and Cap
Estate. Their goal is to demonstrate "ultralite" DXpeditions from magnif-
icent "vista" locations. The operation's equipment will include a field
portable radio (battery only) and using backpack/lightweight antennas.
Activity will be on 80-10 meters using CW, SSB and RTTY or PSK, as well
as operating field portable (battery only) either from the St. Lucia
beaches or scenic mountain tops. During field portable operations, they
will sign their callsigns /P. QSL J6/N7QT via LoTW, eQSL, by the Bureau,
or direct to his home callsign (SASE required!). J69DS will only accept
direct QSLs with a SASE. NO Bureau QSLs!

J7, DOMINICA. Rick, KK4GV, will be active as J79GV from Calibishie on
the northeast side of the island of Dominica (NA-101) between March
8-17th. He states, "The island is fairly un-commercialized and is mostly
rainforest and volcanic mountains. It has the tallest mountain peaks in

the Caribbean and is called the 'Nature Island of the Caribbean'." His activity will be holiday style and SSB only. QSL via his home callsign, direct or by the Bureau. He will upload log to LoTW when he gets home.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) during ARRL DX CW Contest (February 16-17th) as a Single-Op/ All-Band/Assisted entry. Activity will be part-time with a focus on the low bands. He is expected to be here until the summer of 2013. Dave is usually active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH8, AMERICAN SAMOA (Cancelled). Operators Bill/N6MW and Jim/N6TQ, who were expected to be active as KH8/N6MW from a hotel in Tutuila between March 19-28th, have postponed this indefinitely.

KP3, PUERTO RICO. Members of the Los Chachos Contest Club will be active as KP3Z during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. Operators mentioned are Felipe/NP4Z and Eric/NP3A. QSL via N4AO.

MJ, JERSEY. A Belgian team will be active as MJ/ON6NB from Jersey between May 24-30th. Operators mentioned are Philippe/ON4ACP, Erik/ON4ANN, Jose/ ON4CAU, Erik/ON4CCV, Walter/ON8CW, Cedric/ON4CKM and Rudi/ON6MI. The pilot station will be Frans/ON6QB. Activity will be on 160-2 meters using CW, SSB and PSK. An emphasis will be on the higher bands, conditions permitting. QSL via ON4ANN, direct or by the Bureau. There will be an online log search at: https://secure.clublog.org/logsearch/mj/on6nb
A Web page is available at: http://users.telenet.be/on4ann/MJ/index.html

NEW CONTEST (RaDAR 2013). The RaDAR-America contest is an event aimed at promoting the use of Rapidly Deployable Amateur Radio stations throughout North and South America. This contest is for all licensed radio amateurs. A choice is made prior to the contest to participate in one of the defined categories. The points system is so structured as to encourage portable operation, especially moveable stations. The event takes place the first Saturday of April and first Saturday of November starting at 14:00 UTC and ending at 18:00 UTC (4 hours). Complete rules can be found at:

http://radar-america.blogspot.com

OH0, ALAND ISLAND. Kim, OH6KZP, will be active as OH0X during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op entry. QSL via LoTW or to OH2TA.

PJ4, BONAIRE. Operators Janusz/SP9FIH and Kazik/SP6AXW will be active as PJ4/homecall from Bonaire (SA-006, WLOTA LH-1279) between April 8-20th. Activity will be on 160-6 meters using SSB and RTTY. Suggested frequencies are:
SSB - 1880, 3780, 7180, 14180, 18140, 21280, 24980, 28480 and 50120 kHz
RTTY - 1835, 3580, 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz

A survey is available for bands/modes needs on their Web page. QSL via SP9FIH: Janusz Wegrzyn, P.O. Box 480, 44-100 Gliwice, Poland (see Web page for details; PayPal available). For more details and updates, see: http://www.pj4-dxpedition.com

NOT THE MANAGER. Willi, DF8WS, reports that he has been receiving more and more QSLs for activities of RM4A and RM7M in the last years. He states, "I was only manager for these special callsigns before the USSR fell apart. In that time, prefix belonged to Kirghiz Rep. but after that I don't know to whom these calligns belong to and how to send QSLs."

QSL RECEIVED VIA LoTW: 3A2MW, 3B9SP, 5B4AIF, 5C5W, 5R8IC, 5X8C, 7Z1HL, 9J3A, 9L0W, 9M2CNC, 9X/ON4WW, A45XR, A65BP, C31BO, C6ABB, CO2JD, CP4BT, CR2T, CT3AS, CT1FIU, CU3EQ, D4C, DL2OE, DL3KOG, DL6KR, E77DX, EA3GHZ, FI1FJA, HH2B, HK0GU, HK1R, HZ1FI, JA8BNP, JD1BLY, JE8TGI, JJ1DWT, KP2/K5WE, KP4JFR, MD0CCE, MU/PA9M, NH0Z, OH7MN, P40G, PJ2V/DL7VOG, PJ5/DL7VOG, PY0F/PP1CZ, R7NK, RI1FJA, RW3XW, T6LG, TF2RR, TI2HAS, TZ6BB, UN1L, UY6IM, VK6DXI, VQ9LA, VU2NKS, WP4JCF, Z37M, Z38N, ZK2VB, ZL2HAM, ZL3HAM and ZS2I

QSLS RECEIVED VIA MAIL: 1A0C, 5U5U, 6Y4WU, 7O6T, 9M2/JA1PVI, 9Y4/DL8DYL, 9Y4/DL9DRA, CP6XE, D64K, ES9C, HC2/KF6ZWD, JA1RGL, JD1BMH, JY5HX, KP2/NM2O, T30PY, T88CP, V63XG, V84SMD, VP8DLB, VP2EKG, YB3GXS and YN2AA

QSLS RECEIVED VIA THE BUREAU: 3D2ML, 5B/NN3AA, 5P3WW, 9M2/R6AF/P, 9Q6AL, A52AB, A6/DL9WVM, A65BR, A92IO, BT4EXPO, BV100, FM/KL7WA, HB0/DJ2IA, HZ1DS, HZ1PS, IC8/DJ2OS, LX/DJ6OI, MD/DJ4AK, PJ7/DB4BJ, T8XX, TA4/DG1RYC, TC4X, TO5T, V31JZ/P, Z60K and ZD9AH.

RI1, FRANZ JOSEF LAND. Eugene, UA4RX, will be active as RI1FJ from Franz Josef Land (EU-019) during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. QSL via UA2FM direct, an OQRS is available on ClubLog.

SV8, GREECE (IOTA/Contest Op). Rich, M5RIC, will be active as SV8/M5RIC from Zakynthos Island (EU-052) between July 23-30th. Activity will be on 80-10 meters using SSB and RTTY. Rich will also be in the RSGB IOTA Contest (July 27-28th) as a Single-Op/High-Power/DXpedition entry. QSL via M5RIC.

TX5, CLIPPERTON ISLAND (Update). The following update was posted on February 12th, on the TX5K Clipperton Island DXpedition Web page [edited]: "All the California equipment has been assembled and is on the truck. It will be transported to San Diego on Wednesday, Thursday, February 13th. The boat (Shogun, San Diego) will be loaded on Thursday-Friday, February 14-15th. The first half of the team will board on Monday, February 18th, and the boat will sail for Cabo San Lucas, to pick up the rest of the team. We expect to arrive at Clipperton Island on February 26th. It will take at least one day to land and get the camp set up, so QRV should not be expected before February 28th. Please watch this site, the BLOG, and various news outlets for the anticipated start of operations. We look forward to having a rewarding DXpedition, and seeing you at the conferences later this year. We will be hosting a Courtesy Suite after the DX Dinner at Dayton and a similar party at Friedrichshafen, so plan to come see us! Good luck to all who want a contact with TX5K! Be sure to watch it in real time with DXA <http://www.dxa2.org/> and write to the BLOG <http://www.ky6r.com/>."

V3, BELIZE. Lee, N8LJ (ex-T32LJ), will be active as V31LJ from Placencia between February 27th and March 6th. Activity will be on the HF bands. QSL via K8ESQ.

VP2M, MONTSERRAT. Operators John/KB8RJ and XYL Crissie/WD8KUR will be active as VP2MRS and VP2MUR, respectively, from Gingerbread Hill in St. Peter's on Montserrat Island between February 20th and March 14th. Activity will be holiday style on 80-10 meters, including the WARC bands, using mostly SSB and some PSK. QSL both callsigns via KB8RJ.

VP2V, BRITISH VIRGIN ISLANDS (6m Op). Dave, W9DR, will be active as VP2V/W9DR from the north shore of the Island of Anegada (NA-023) in the British Virgin Islands (FK78TR) between June 14-28th. Activity will be on 50.115 MHz (SSB) and 50.115.6 MHz (CW). He will also be running

a beacon on 50.115.6 when the band is not open. Please submit confirmation request (QSL) to W9DR home address (QRZ.com).

YE1, INDONESIA. Members of the Bekasi DX Contest Club (YE1ZAT) will be active during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via YE1ZAT, by the Bureau, e-QSL or direct via info on QRZ.com. Visit the Bekasi DX Contest Club's Web page at: http://ye1zat.com

---
The following stations are expected to be active in the
ARRL DX CW Contest (February 16-17th, 2013)

HamRadioNow: ICOM 7100 Hand's On; Kenwood, Yaesu & N3ZN's Keys - from Orlando!

Posted: 15 Feb 2013 05:16 AM PST
http://forums.qrz.com/showthread.php?379880-HamRadioNow-ICOM-7100-Hand-s-On-Kenwood-Yaesu-amp-N3ZN-s-Keys-from-Orlando!&goto=newpost

HAMRADIONOW.tv

Episodes 55, 56, 57, 58...

We're back from the Orlando HamCation and cranking out the programs we shot there as fast as we can! The first four are on-line now. We won't bomb QRZ.com with each one... we'll wait until we have a few more up and post another notice. We had a great time, shot a lot of television, but we wouldn't call it a "'cation." We lost count in all the tapes, but there should be about 15 episodes out by the time we're done, covering radios, people, and 'punditry.'

Episode 55: Intro to the Orlando Episodes

This is a Jeff & Gary show, for those who like us. We shot this on Friday before the 'fest opened. Gary's got a few things on his mind, and you'll hear echoes of those thoughts in some of the upcoming episodes. Things like 'digital data streams' and the influx of Chinese radios. Plenty to argue about in the comments section below.

Episode 56: ICOM 7100 Hand's On

Jeff & Gary poke and prod at this new radio's touch-screen, looking at things like responsiveness, menu depth, "usability," in a very early first look.

Episode 57: Kenwood/Yaesu Update

Not much news from Kenwood and Yaesu. Kenwood's 990 and Yaesu's digital handheld were not on display... but they're on the way.

Episode 58: N3ZN Keys

Keymaker Tony Baleno N3ZN makes some finely crafted keys for a "lost art." OK, maybe not so lost! Jeff, Gary and Tony talk CW and look at a few of Tony's treasures.

Watch these episodes at our web site, www.HamRadioNow.tv.

THANK YOU to all our contributors and supporters!

//
ACMA Plots Amateur Radio Band Harvest for LTE:

Posted: 14 Feb 2013 04:07 PM PST
http://www.eham.net/articles/29767

The Australian Communications and Media Authority wants to use a small, 2 MHz radio frequency band to create a larger block of spectrum for future 4G transmissions, a move that could inconvenience thousands of radio amateurs currently using the range. According to a consultation paper (pdf) on the proposed reallocation issued by the ACMA, the purpose is to have an even 100 MHz for the 2.3 GHz time division LTE (TD-LTE) spectrum. Currently, the 2.3GHz spectrum has 98MHz which doesn't align well with the proposed 5MHz channels to be used for TD-LTE. An even 100MHz worth of spectrum would be more valuable for the government in an eventual auction. While the 2300-2302 MHz is primarily used for fixed, mobile and radio-location service, there are no users doing it currently. However, the authority's Register of Radiocommunications has roughly 10,000 advanced amateur licensees that can use the 2300-2302 MHz spectrum, on a secondary basis.

ARLP007 Propagation de K7RA

ZCZC AP07
QST de W1AW
Propagation Forecast Bulletin 7 ARLP007
>From Tad Cook, K7RA
Seattle, WA February 15, 2013
To all radio amateurs

SB PROP ARL ARLP007
ARLP007 Propagation de K7RA

Low levels of solar activity continue, the same as the past few weeks. Sunspot numbers remain remarkably consistent, with average daily numbers for the four reporting weeks since January 17 at 56.4, 55.7, 50.7 and finally 51.3 for the past week. As you can see, average daily sunspot numbers rose less than a point from the previous week to the past week. Average daily solar flux receded 2.4 points to 104. Geomagnetic conditions remain calm.

The ARRL International DX CW Contest is this weekend. Conditions will probably be about the same as last year, because solar activity is about the same as this time in 2012. See http://www.arrl.org/arrl-dx for contest details.

The latest prediction for solar flux shows values of 100 for February 15-16, 105 on February 17-19, 100 on February 20-22, 115 on February 23-24, 110 and 105 on February 25-26, 100 on February 27 through March 3, 95 on March 4-9,115 on March 10 and 120 on March 11-13.

The predicted planetary A index is 5 on February 15-20, 9 on February 21-22, 8 on February 23, 5 on February 24-28, then 10 and 8 on March 1-2, and 5 on March 3-17.

Every week F.K. Janda, OK1HH gives us his thoughts on geomagnetic conditions over the next few weeks. Generally for HF propagation, particularly for the higher bands (10-20 meters) we would like to see very little geomagnetic activity, but with as many sunspots and as much solar flux as possible. We have seen a lot of quiet geomagnetic conditions over the past few years, but not much in the way of sunspots or high solar flux values.

OK1HH suggests the geomagnetic field will be quiet to unsettled on February 15-16, quiet on February 17-21, quiet to active February

22, active to disturbed February 23, mostly quiet February 24-25, quiet February 26-28, quiet to unsettled March 1, quiet to active March 2, mostly quiet March 3, quiet to unsettled March 4, quiet March 5-6, mostly quiet March 7-8, quiet March 9, and quiet to active on March 10.

Don't miss the article in the March issue of QST, by Carl Luetzelschwab, K9LA titled "The Sun and the Ionosphere." It begins on page 48, gives an update on Cycle 24, and discusses measuring the Sun and ionosphere and relating solar flux to MUF, or Maximum Usable Frequency.

Neil Shapiro, W2NLS of Bethpage, which is on New York's Long Island, asked about relating the information in these bulletins to practical on-the-air results.

I suggested checking out the resources listed at the bottom of each bulletin, from the ARRL Technical Information Service and also the resources from the K9LA website.

One useful tool is to download the free program W6ELprop (which works on the Windows operating system) from http://www.qsl.net/w6elprop/.

You will need to enter your latitude and longitude for your default station location, and a useful tool for converting street addresses to geographical coordinates is at http://www.latlong.net/convert-address-to-lat-long.html.

You can use an average of the previous 5 days sunspot numbers from here:

http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt

For the K index, either use the latest Middle Latitude numbers from here:

http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt

Or use the planetary number from WWV:

http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt

I ran the numbers for Neil on February 15, from his QTH to the Czech Republic. It looks like 15 meters is a good bet from 1430-1700z, 17 meters 1330-1800z, and 20 meters over the same period as 17 meters, but stronger signals on 17 meters (assuming power levels and antennas are equal). It looks like 30 meters should open up around 1800z, and have strongest signals 2130-0100z, and 40 meters 2000-1000z, with best signals around 2230-0630z.

An alternative to sunspot numbers would be to use solar flux. You can set W6ELprop to default to either type, or change it on the fly by entering F103 (for example) as solar flux of 103, or S66 as

sunspot number of 66.

The engine used for driving W6ELprop was originally designed to work with the predicted smoothed sunspot number for the month, and it doesn't really work well to try to use the latest day's numbers. So an average for the past 5 days is a compromise.

Another useful tool is a new one from Stu Phillips, K6TU of Woodside, California: http://k6tu.net/.

This one is interesting. You subscribe to this service (but I think there is a free trial) and tell it what kind of prediction you want to run, then after making the calculations, it emails a link that you use to display them. For each band, you can step through hour-by-hour to see maps showing where your signals will be strongest, with different colors used to express different signal levels. It is interesting to see how the coverage areas shift, hour-by-hour.

We heard from Peter Thulesen, OX3XR in Nuuk, Greenland. He wrote, "Just to report my observations on 28 MHz propagation from Greenland (grid GP44) to North America, US and VE in the evenings after sunset here in Greenland. Around 2000-2200 UTC I very often have worked several/many stations on 28 MHz CW from all US and VE. This has been the situation January 2013. In the weekends where I have the possibility to monitor the bands during the day 28 MHz seems to be more dead towards W and VE than in the evening just after sunset.

"In the evening after sunset 28 MHz seems dead listening on the band. However, after calling CQ a few times around 28.025 MHz W and VE stations start to answer my call. The signal strength is good up to 599 and stable signals with only little QSB.

"When conditions have dropped for CW contacts I can normally continue working JT65 stations on 28 MHz, maybe another 30-45 minutes. I'm using a sloping dipole toward Europe and 100 watts."

Jeff, N8II of West Virginia wrote: "The seasonal changes we expect on the bands are occurring. Long path propagation has disappeared on 30 meters into SE Asia and the evening openings much improved on 12 thru 20 meters into East Asia. We get JAs some nights in the 2200Z hour on 12, 15 is better and on 20 CW the JTs, JT1AA/3 and JT1E, are much louder around 0100Z along with good openings to UA0U area which were almost nil in mid January.

"Conditions have been quite good at times into central Asia on the low bands. 4S7NE was logged around 0125Z on 40 meters CW on the February 8, T6LG continues to be active on 80 CW and EY8MM was also heard around their sunrise.

"I had quite a struggle completing a QSO with K7EKD near Seattle for his last state on 160 meters due to high noise on his end, but we made it at 0200Z on the February 7."

When Jeff mentioned K7EKD, I thought the call sounded eerily familiar. K7EKD taught electronics in my high school. I spoke with him a few times, but unfortunately was expelled from school (hey, it was the late 1960s!) before I got around to taking any of his classes. At that point I was WA7CSK and had been on the air four years. It was certainly an interesting time to be a teenager.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 7 through 13 were 58, 57, 58, 45, 60, 55, and 26, with a mean of 51.3. 10.7 cm flux was 102.8, 104.2, 107.6, 105.9, 105.2, 101.8, and 100.3, with a mean of 104. Estimated planetary A indices were 6, 7, 3, 4, 4, 4, and 11, with a mean of 5.6. Estimated mid-latitude A indices were 7, 8, 3, 3, 3, 3, and 9, with a mean of 5.1.

SARL NEWS SUNDAY 17 February 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Ton van Dijk, ZS6ANA, went silent on Friday 8th February.

Our sincerest condolences to Ton's family and friends.

(PAUSE)

IN THE NEWS TODAY:

SARL ANTENNA DEFENSE FUND TOUCHES R40 000

SARL COUNCIL TO MEET FRIDAY AND SATURDAY AT THE NARC

GET READY FOR THE YOUTH SPRINT ON 23 FEBRUARY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL ANTENNA DEFENSE FUND TOUCHES R40 000

This week the SARL Antenna Defence fund touched the R40 000 mark standing currently at R39 900. The fund was started to finance legal and building regulations experts to develop and launch an appeal to the relative authorities to have amateur radio towers and antenna structures under 15 metres exempted from the current building and zoning regulations. Legal, environmental and structural experts are being engaged to prepare a submission. Progress is relatively slow but as soon as it is opportune to share information with SARL members and listeners, it will be included in SARL news and will be published on the web.

For information on how to support the initiative and to see which individual radio amateurs, clubs and commercial undertakings have contributed visit www.sarl.org.za and click on the Antenna Defence Fund button in the left hand menu.

SARL COUNCIL TO MEET FRIDAY AND SATURDAY AT THE NARC

The SARL Council will meet this coming Friday and Saturday at the National Amateur Radio Centre in Gauteng for its annual strategy indaba. On Saturday morning Councillors will take time off between 10:00 and 11:00 to participate in the Youth Sprint which will run from 10:00 - 12:00 CAT. Council will deliberate on various strategic and regulatory issues including the Antenna Defence Campaign, the SARL Regulatory Framework and progress made with ICASA. A comprehensive action plan for the following year will be developed and discussed and tabled at the AGM in April. Highlights of the meeting will be included in next week's SARLNEWS.

RADIO ZS IN THE MAIL AND ON THE WEB

The January February Edition of RADIO ZS has been posted and is now available to members on the web. It is again an edition with interesting articles. Hans van de Groenendaal, ZS6AKV, looks at the second century of amateur radio supported disaster communication including a press cutting from the Cape Argus of 6 March 1926. If you are a DXer then "DXpedition to Swains island" will interest you. Ian Roberts looks at "Trans Equatorial Propagation in South Africa". Henry Chamberlain rides more on the SDR Wave and Duncan Baker's last installment of "Wireless telegraphy during the boer war" make interesting reading. Laurie Devereux takes us for coffee and Eddie Leighton talks about RaDAR.

GET READY FOR THE YOUTH SPRINT ON 23 FEBRUARY

The SARL Youth Sprint will be held on 23 February and no longer on Youth Day on 16 June. The reason for changing the date is that there are so many activities on National Youth Day that schools and young people found it difficult to fit in all the activity. The sprint is held 10:00 to 12:00 CAT. Get more details on the great prizes to be won on www.sarl.org.za.

LAST MAN STANDING TO FEATURE AMATEUR RADIO

ABC comedy Last Man Standing -- starring Tim Allen as Mike Baxter, KA0XTT, will prominently feature scenes with cast members using Amateur Radio. According to Last Man Standing Producer John Amodeo, NN6JA, the episode called "The Fight" will feature several of the regular cast members talking on the radios. "I can't say much about the episode right now," Amodeo said, "But this episode has the most significant use of Amateur Radio in a TV comedy.

"In addition to the original KA0XTT station in Mike Baxter's work office, viewers will get to see Mike's amateur radio shack in the basement of his home,"Amodeo explained. "A cast member will also be

calling in from a portable HF radio while hiking along the Amazon." The ARRL provided many of the awards -- including 5 Band DXCC, 5 Band Worked All States, 5 Band Worked All Continents and VUCC -- that are on Mike Baxter's home shack wall. The episode, which was filmed February 12, will also feature Richard Karn. Last Man Standing is shown on MNet channel 101 on Friday evenings. Multichoice has been approached to supply the date of broadcast but at going to press on Friday evening their reply was still outstanding. In the USA it will be screened in mid-March, SARLNEWS will keep you posted.

NEW SARL MEMBERS

A hearty welcome to: Richard Beavan Gwilt, ZS2RL and Johannes Wiid, ZSL1058, WHO joined the SARL as members. May your relationship with the SARL be lasting and joyful. By joining the SARL, you pushed its membership up to 1 688.

REQUEST BY LEARNER FOR ASSISTANCE WITH PROPAGATION STUDY

The following is a request by Dan&#65533; de Witt, ZU6DD, for assistance with a propagation study: "I am at present a grade 10 learner and I am busy with a scientific school task. The requirement for the task is to ask a question about a subject and then do measurements or to collect data in order to answer the question. I decided to do something about amateur radio. I wish to learn more about propagation on the 40 meter band. To this end I built a Morse code beacon. The beacon operates on 7 048 kHz and transmits a Morse code message at about 12 w.p.m. and 100 milliwatt. I would like to receive as many reports as possible on the beacon signal in order to make my research meaningful and for that I need the assistance af radio amateurs. Please listen, and if you hear the signal, send a signal report to me."

"Read more about the project on WWW.QRZ.COM and search for my call sign ZU6DD. There is a description and photos of thr beacon project. Signal reports must include the date, time and grid square referenfe. My email address is zu6dd@kripton.co.za, or it may be sent by SMS to 082 771 3976.

SARLNEWS requests radio amateurs friendly that you respond to this request from an enthusiastic young radio amateur.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. None of the regions rotating into view or the currently visible sunspots are actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 46.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

//
Amateur Radio Operators to Install Radio at Community Church:

Posted: 15 Feb 2013 04:04 PM PST
http://www.eham.net/articles/29769

The Cannon Beach Amateur Radio Society (CBARS) is working to install a new radio and antenna at the Cannon Beach Community Church. The church serves as an emergency shelter, and the radio will allow local amateur radio operators to communicate with emergency services in a disaster situation. Scott Sperley, a Cannon Beach Amateur Radio Society member and Cannon Beach firefighter, said the importance of amateur radio operators after a disaster became apparent after the storm of 2007, which isolated Cannon Beach. "[The storm of 2007] was a wake up call for the city," he said. According to Sperley, at the time ham radio operators were able to communicate outside the city, and they realized there was a need for a fixed radio at the church. Since the storm, the City of Cannon Beach has donated a radio system to the fire station in town, but Sperley said the church needs a radio because it is an emergency shelter and it creates some redundancy. "The primary purpose of amateur radio is to communicate when all other communication methods have failed," he said. The antenna the CBARS members will install is about six feet long, and will be placed on one of the peaks of the roof, but not on the new steeple. Sperley said the size of an antenna and how high it is placed can affect how much power is needed to reach the repeaters in Seaside and Arch Cape. A larger antenna placed at a high location, like the church's roof, will allow a greater range without having to increase the radio's power usage, which will help its batteries last longer in event of a disaster that causes a power outage.

Propagation Forecast Bulletin #07 de K7RA:

Posted: 15 Feb 2013 10:14 AM PST
http://www.eham.net/articles/29768

Low levels of solar activity continue, the same as the past few weeks. Sunspot numbers remain remarkably consistent, with average daily numbers for the four reporting weeks since January 17 at 56.4, 55.7, 50.7 and finally 51.3 for the past week. As you can see, average daily sunspot numbers rose less than a point from the previous week to the past week. Average daily solar flux receded 2.4 points to 104. Geomagnetic conditions remain calm.

Ham Radio in upcoming episode of Last Man Standing
Southgate Amateur Radio Club
“I cant say much about the episode right now,” Amodeo told the ARRL, “But
this episode has the most significant use of Amateur Radio in a TV comedy
since Herman Munster, W6XRL4, got his ham license.” Fans of 1960s
television will remember the episode ...

AmateurLogic.TV Episode 5

Posted: 28 Feb 2006 12:02 AM PST
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic05_hi.wmv

If you've ever wondered what a Hamfest is, then this episode is for you. We visit Jackson Amateur Radio Club's 2006 Capital City Hamfest'.

We've got an ARRL net being called, highlights from the Skywarn Forum, ARRL Katrina Review, an amateur radio Satellite Demonstration and lots more.

Plus Tommy's back with another PhotoTip' and Jim introduces a new segment on Network Tools'.

For those interested in learning more, there are also full length versions of the forums available on the downloads page as well.

To learn more about Amateur Radio please visit www.arrl.org

We hope you enjoy AmateurLogic.TV Episode 5. We'll be back again next month with a regular show.

The show runs about 39 minutes.

This posting includes a media file:
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic05_hi.wmv

//
AmateurLogic.TV Episode 4

Posted: 23 Jan 2006 04:40 PM PST
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic04_hi.wmv

We're back with the Active Cantenna to finally do some range testing.
Thanks to Amateur Radio and a couple of video cameras, we put you right in
the action. Ride Shotgun with Jim as we test WiFi's advertised 300' range.
We were pleasantly surprised....

There are more great web sites under review in Website Roundup'.

Tommy performs a little Digital Photography Magic by producing a 10 Mega
Pixel image from a 6 Mega Pixel camera!

PLUS, there's a surprise visit from some other popular IPTV Show hosts.

The show runs about 39 minutes.

http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic03_hi
_.wmv

No interviews this time... We build a high performance Active Cantenna'
from parts that you should be able to find locally. The big advantage is
that you can have a very long cable to the cantenna without any signal
loss, which is not possible on other designs.

The construction is shown in enough detail that one could follow along and
build their own.

Jim is back with another Website Roundup' segment.

And Tommy introduces Photo Tips'. This episode's topic is White Balance.

The show runs about 46 minutes.

This posting includes a media file:
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic03_hi
_.wmv

Posted: 17 Nov 2005 07:56 PM PST
http://www.podtrac.com/pts/redirect.wmv/www.amateurlogic.tv/transmitter/video/amlogic02_hi
.wmv

We visit Inner City Broadcasting's Radio Studios in Jackson and speak with
Roger Lamb, Director of Technical Operations.

Plus we introduce two new segments to the show:

Jim hosts Website Roundup', where we discuss interesting sites.

From The Bench' with George hacks a Firewire cable to determine the correct wiring diagram for DV.

The entire show runs 57 minutes and change.

This posting includes a media file:

Ham Radio Now

//
HamRadioNow: ICOM 7100 Hand's On... and more from Orlando

Posted: 16 Feb 2013 06:05 PM PST
http://hamradionow.tv

The '7100 Episode (#56) is the bait. Jeff & Gary poke and prod the touch-screen of this new mobile to see how it feels.

If you have a few minutes to spare after that, Episode 55 is the INTRO to all the Orlando stuff. In 57, we talk about how Yaesu and Kenwood don't have anything new quite yet (but it's coming). N3ZN shows of some of his fancy keys, and we talk CW, in #58. And finally in #59 we look at a new on-line Repeater Directory complete with iOS and Android apps... AND an RT Systems interface.

Pop some popcorn. You've got some Ham TV to watch.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th February 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Limerick Radio Club

Limerick Radio Club held its AGM on 13 February and following officers have been elected for 2013/14. Chairman Simon Kenny EI7ALB Treasurer Anthony Condon EI2AW Hon. Secretary Ger McNamara EI4GXB Committee: Alan Cronin EI8EM, Dermot Gleeson EI2GT, Brendan Kilmartin, Liam Rainford EI7DSB Trustees: Tom O'Sullivan EI3AL, Michael Kingston EI2IX, Dermot Glesson EI2GT.

Limerick Radio Club Radio Rally

The Annual Limerick Radio Club Rally will take place on Sunday 3rd March 2012 at the Radisson Blu Hotel Limerick. Doors open at 11am and admission is 5. All the usual traders will be present. Bring and Buy tables are Free of charge and will be allocated on a first come basis, they can be booked by contacting Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at/gmail /dot/com.

Renewal of Amateur Station Licences

In June 2009 the Wireless Telegraphy (Amateur Station Licence) Regulations 2009 came into force which changed individual Amateur Station Licences from annual licences to lifetime licences.

Whilst the licences are lifetime licences, under the regulations licensees are required to confirm the details of their licence to ComReg every five years. ComReg will begin advising licensees how to

comply with this requirement in 2014. We have been told by ComReg that they have yet to determine how this process will take place but will endeavour to make it as smooth as possible.

IRTS Awards Nominations

It is time once again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for:

Service to the Society or to Amateur Radio: Awards in this category can to members or to non-members.

Awards for other achievements:

Awards in this category include the 4 and 6 M Shields; the SWL Award; and the awards for Quality Construction Projects. These awards are confined to members only.

Nominations may be from Clubs or individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX, Jim EI4HH or, Peter EI4HX, Chair of awards committee, QTHR or by e-mail to ei4hxperimental/at eircom/dot/net. www.irts.ie/cgi/awards/cgi

Closing date for nominations is February 28th 2013.

South Eastern Amateur Radio Club

The AGM of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 25th February at 8.00 p.m. sharp. All members are asked to attend. For more details please visit www.searg.com.

Dundalk Amateur Radio Society EI7DAR

The AGM of DAR will take place Wednesday 6th March at the Society premises, 'Larkin House', 113, Castletown Road, Dundalk, commencing at 8pm sharp. Everyone welcome and a reminder to members that membership subscriptions are now due. For more details please visit www.ei7dar.com.

Lough Erne Amateur Radio Club Annual Rally

The Lough Erne Rally takes place on Sunday March 24th 2013.

The location is The Share Centre, Lisnaskea, Co. Fermanagh, BT92, 0EQ. Usual clubs and organisations will be present. Bring and buy, Food and on site parking available. Everyone welcome. More details can be obtained from www.learc.eu.

Cork Radio Club

The Annual General Meeting of Cork Radio Club will be held in the Vienna Woods Hotel in Cork on Monday February 25th at 20.00. All members are asked to attend and intending members are also very welcome.Enquiries to Jeremy EI5GM on 083-3317710.

DX News

Members of the Lufthansa Amateur Radio Club are off on another DXpedition. This time their destination is Vietnam. Listen for the callsign XV2DLH from now until 26 February. The QSL manager is DK8ZZ.

The ham shack at the American Guantanamo Bay base on Cuba was badly damaged by the recent hurricane Sandy. Repairs are at present taking place and it is hoped that activity by KG4KL and KG4WV will be possible in the coming week.

Phil G3SWH and Jim G3RTE will be QRV from Guadalcanal in the Solomon Islands from 18 - 28 February using the callsign H44KW. They will be active on CW on all bands 80 - 10m.

Two separate activities will take place from the west African country of Burkina Faso later this month. Firstly the Italian DXpedition Team will activate the callsign XT2TT from 21 February until 6 March. The second activity is by a Japanese group with the callsigns XT2CJA, XT2IVU, XT2AEF and XT2VWT. They plan to be QRV on all bands 80 - 10m CW, SSB and digital.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Australian Radio Amateurs May Lose the 2300 - 2302 MHz Band:

Posted: 16 Feb 2013 04:00 PM PST
http://www.eham.net/articles/29770

The ACMA has informed the WIA of proposed changes to spectrum usage in the 2300 - 2302 MHz band, which will result in Advanced Licensees losing access to that spectrum. The ACMA proposes to acquire the spectrum for LTE radio purposes. LTE, or long-term evolution, (marketed as 4G LTE), is a wireless standard for high-speed data over mobile phones and data terminals. The change will give LTE services the full 100MHz segment from 2300 - 2400MHz, or twenty 5MHz LTE channels, and naturally the government revenue from any resulting spectrum auction would be very significant. Losing any spectrum is always a great concern to radio amateurs, and this secondary allocation spectrum is the only viable option for Earth-Moon-Earth (EME) contacts to Region II (where the EME activity is on 2304 MHz) or Region I (which uses 2320 MHz). Australian radio amateur EME activity would then be confined to 2400 MHz and above, where ISM and Wi-Fi equipment is likely to cause interference to local EME stations. The ACMA plans to recommend the change to the Minister for Broadband, Communications and the Digital Economy, and make the changes under section 153B of the Radiocommunications Act 1992. If the Minister approves the change radio amateurs will probably lose access to the spectrum in 2015.

That's what i said, in my recent FAQ on getting a UK Full (Reciprocal) licence via the IRTS
single-exam HAREC
route!

The confirmation can be sent to any address, it is a worldwide facility.

GB2RS NEWS

Sunday 17th February 2013

The news headlines:

Digital Radio switch-on at RSGB National Radio Centre

AMSAT UK talk at National Student Space Conference

Successful Scottish ISS contact

A new digital radio service was switched on at 0846 on Thursday, 14 February at the RSGB's National Radio Centre in Bletchley Park. Serving the people of Bedfordshire, Hertfordshire and Buckinghamshire, the new service enables listeners to hear BBC Three Counties Radio, Heart, Capital FM, Gold, MK FM and Connect FM. Chairman Bob Whelan, G3PJT, General Manager Graham Coomber, G0NBI, Amateur Radio Manager Carlos Eavis, G3VHF and RSGB Member Robert Chipperfield, M0VFC attended the event. Graham and Robert were interviewed by Heart radio during the event.

Jim Heck, G3WGM, is Honorary Secretary of AMSAT-UK and project lead on the FUNcube amateur radio satellite project. He will be giving a presentation on FUNcube-1 to the UKSEDS National Student Space Conference (NSSC), which takes place in Bristol on 23 and 24 February. More information at www.amsat-uk.org.

Students at Breadalbane Academy in Aberfeldy had an ARISS contact with the International Space Station on Tuesday 12 February. The students spoke to Commander Kevin Ford, KF5GPP, in a contact lasting a little over nine minutes. A telebridge was used, operated by RSGB DRM Bernie McIntosh, GM4WZG.

Canadian astronaut Chris Hadfield, KC5RNJ/VA3OOG, has been very busy whilst on the International Space Station. Among his activities has been creating music. Most recently he has been working with Ed Robinson of the Big Bang Theory theme song creators. The result has been I.S.S., Is Somebody Singing, which was recently released with a national fanfare in Canada. Check it out on YouTube by searching for I.S.S. Is Somebody Singing.

The special event callsign celebrating the RSGB Centenary continues its stay in Region 2 this week. Today, 17 February, Lerwick ARS will be running an HF SSB station from Dunrossness. On 18 February, the GMDX Group will have an HF station running SSB, CW and RTTY from Culbokie,

before Caithness ARS take over on the 19th from Windhaven Brough, running PSK, CW and RTTY on 30m. Then, for the 5 days from 20 to 24 February, Caithness ARS will put their HF station using SSB on the 160, 80, 40 and 20m bands from Freswick. For those who haven't tried it yet there is a comprehensive `Am I in the log' feature at www.rsgb.org/centenary/ that shows on which Regions and Bands you have contacted the Centenary station. Details of how to get your QSL card are also on the website.

Papers for the IARU Interim Meeting in April have been released and are available for download and comment on the UK C4 and UK C5 discussion groups on Yahoo. C4 is on HF matters and C5 is on VHF and microwave matters. The Interim Meeting is, as its title implies, a place for discussion and potential agreement on current issues midway between the triennial General Conferences. Your comments on the various proposals are sought. Go to http://uk.groups.yahoo.com and search for ukc4discussion or ukc5discussion, note these searches are without spaces.

Leicester Radio Society is celebrating its Centenary year this year, and is trying to find out the exact date the club started. Records are scarce to say the least and so they are hoping that someone could shed some light on the subject. They know that it was formed in 1912 or 1913 but cannot find the exact date, although they know it was featured in a Model Engineer magazine of that period. Please can anyone assist? If you can help in any way, please email lrs100years@gmail.com.

Ofcom has published the responses to the radio spectrum planning consultation for the Glasgow 2014 Commonwealth Games. Those responding include the Radio Society of Great Britain, the BBC and the Met Office. You can read the responses by going to http://stakeholders.ofcom.org.uk and searching on Glasgow 2014. Then click on show responses, which is on the right hand side of the screen.

And now for the details of rallies and events for the coming week

It is with regret that the Wakefield & District Radio Society announces that the annual Northern Cross Rally that was scheduled for today, Sunday 17 February, has had to be cancelled due to circumstances beyond their control. For more information, contact the Chairman and Rally Manager, Ken Quinn, G8FSO on 07 900 563 117.

The next rallies that we are aware of are over the weekend of 2 and 3 March. More details will be broadcast nearer the time.

Now for the news of special events

TC16BURSA will be active until 19 March in Bursa, Turkey. It is operated by members of local branch of the Turkish Radio Amateur Club. QSL as directed on the air.

Prefix hunters will be interested in the special event station PF100ZOO. This will be active until the end of the month. It is to celebrate 100

years of the Burgers Zoo in Arnhem. The operator and QSL Manager is PA0FAW.

And now the DX news compiled from 425 DX News and other sources

V47JA will again be operating from his holiday home in Calypso Bay, St Kitts, from 20 February until 21 March. Activity will be on the 160 to 6m bands, including 60m. QSLs via W5JON either direct or electronically via Logbook of the World.

An international team will be on the air from Burundi until 23 February. In total they will have 9 operators and four stations using the callsign 9U4U. Activity is on the 10 to 160m bands using CW, SSB and RTTY. The QSL Manager is M0URX.

An Italian group will operate from Guinea-Bissau in West Africa until 2 March. The callsign is J52HF and the QTH will be the Cumura Mission, where they operated from last year. Activity will be on SSB only and QSLs go via I3LDP.

John, KF0RQ will be back in Cambodia until 18 March. He will reactivate his XU7ACQ callsign. He plans to be active on the 10 to 80m bands using SSB and CW. QSL to his home callsign.

Roy, KE4TG will be active again as J38RF from Grenada, IOTA reference NA-024, until 8 March. He will operate JT65HF, PSK31 and RTTY on the 10 to 80m bands, with some activity using SSB, CW and digital modes on 60 metres. QSL via KE4TG and LoTW.

Now the contest news

The ARRL International DX Contest finishes today, 17 February, at 2359UTC. This is the CW leg of the event. The SSB leg takes place next month. Work the USA, contiguous 48 States, and Canada only, giving them a signal report and your transmitter power. US/Canadian stations give a signal report and their State/Province code.

The 1.3GHz UK Activity Contest takes place on 19 February from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The 80m Club Championships CW log will be on 21 February from 2000 to 2130UTC. The exchange is the usual signal report and serial number.

The first 70MHz Cumulative Contest is on 24 February from 1000 to 1200UTC. Using all modes, the exchange is signal report, serial number and locator.

The CQWW 160m DX Contest runs for 48 hours from 2200UTC on Friday 22 February. This is the SSB leg of the event, the CW leg having taken place last month. The exchange is signal report and CQ zone and W stations send their State and VE stations send their Province.

The SSB leg of the French REF Contest takes place for 36 hours starting 0600UTC on 23 February. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number, with French stations sending their Department number or overseas prefix too.

And now the solar factual data for the period from Friday the 8th to Thursday the 14th of February, compiled by Neil Clarke, G0CAS on Friday the 15th of February.

Only two new sunspot regions appeared during the period, with a maximum of four regions visible on some days. On the whole solar activity was at very low levels, with one small C class solar flare taking place on the 9th, 12th and 14th. Solar flux levels declined from 108 units on the 9th to 100 by the 13th and 14th. The average was 104. The 90 day solar flux average on the 14th was 117 units, that's three units down on last week. X-ray flux levels varied little day to day and averaged B1.7 units. This is definitely not what we would expect so close to sunspot maximum. Geomagnetic activity was quiet until the 13th, when a weak disturbance commenced and lasted into the 14th. The cause of the disturbance is not known but is probably due to a glancing blow from a coronal mass ejection from an eruptive filament. Several of these took place during the period. The most disturbed day was the 14th, with an Ap index of 12 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decrease from 480 kilometres per second on the 8th to 340 by the 13th. Particle densities where low except for a brief increase to 15 particles per cubic centimetre on the 13th and the 14th. Bz varied between minus 3 and plus 4 nanoTeslas on the quiet days and between minus and plus 9 nanoTeslas on the 13th and the 14th.

And finally the solar forecast for the coming week. This week solar activity is expected to be predominately at low levels, with only C class solar flares taking place. There is though a chance that the occasional stronger solar flare could take place and increase activity. Solar flux levels are expected to be around the 110 mark, or slightly less for most of the week. Geomagnetic activity is expected to be at quiet levels until later in the week, when activity could increase slightly due to a small recurring coronal hole. MUFs during daylight hours at equal latitudes should be about 24MHz for the south and 21MHz for the north. Darkness hour lows should be around 8MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club has a club net on 145.225MHz from 8pm today and next Sunday. Tuesday sees a Morse class from 7.45pm, followed by the second week of the construction project from 8.30pm. The shack social is on Friday from 7.30pm. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there's an 80m net on 3.748MHz. Contact the FELCC Information Line on 07554 362 020 for more information.

Lincoln Short-Wave Club is holding a committee meeting on Monday at the Shack. On Wednesday there's a formal meeting at the BSA Club from 8.15pm. The club simplex net is on 144.325MHz from 8pm on Thursday, then the Saturday surgery and mentoring in the shack starts at 9am. Next Sunday the Foundation course kicks off at noon. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a committee meeting on Monday. Thursday sees training classes with Dave Murphy, G8OWL, and shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is having CW tuition. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is looking at a selection from GARES archive with Brian, G4CIB, plus there's HF & VHF operation from the shack. Contact Anne, 2E1GKY, on 01242 699 595, daytime.

On Monday Leicester Radio Society is having a talk on stealth antennas by David Jacobs, 2E0DFJ. Details from Stephen Tayler, 2E0SVT, by email to steve@2e0svt.net.

On Monday Sutton Coldfield Amateur Radio Society is running an open net on 145.250MHz from 7 30pm. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is having a demo of the vintage 18 Set by Colin Baker. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Dudley and District Amateur Radio Society is having a 23cm contest night. Details from Miles Hall, G4GSB, by email to g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club invites members to bring their vintage computers. More information from Chris, G1ETZ, on

01509 504 319.

On Wednesday Midland Amateur Radio Society is planning social events, rally visits and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is looking at PowerPoint with Terry, M0RIA. Contact Terry, M0RIA, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is looking at the club's new KX3 transceiver and members' recent projects. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Cheltenham Amateur Radio Association is looking at the aerial analyser project by Andy, 2E0CLY. Contact Derek Thom, G3NKS, on 01242 241 099.

On Friday Bromsgrove & District Amateur Radio Club is on the air. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society is having a radio workshop evening. Contact John, G8SEQ, on 07958 777 363.

On Friday Hucknall Rolls Royce Amateur Radio Club is having by a short talk by Mark, M6TYO about his first outings on air with his new licence. Details from Dave Wilde, G1YAI, by email to treasurer@hrrarc.com.

NEWS FOR THE NORTH OF ENGLAND

We start with clubs that have several events this week. Stockport Radio Society is watching two recent DXpedition videos on Tuesday. The weekend Foundation course commences next Saturday. Details from Nigel Roscoe, on 07973 312 699.

Denby Dale Radio Club is having a talk on Advanced Driving Techniques on Wednesday. Next Sunday there's a Foundation course at Pie Hall plus Communicator Badge Day at Bradley Wood Scout Camp. Details from Richard, M0RBG, on 07976 220 126.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is having a talk on power supplies by Glyn, M0XUH. Contact Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is having a talk on remote control and operating by Steve Maskrey. Contact Bruce Sutherland, M0CVP,

on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is having a presentation on G100RSGB by representatives of Denby Dale Amateur Radio Society, lead by Richard M0RBG. Details from Martin, M0GQB, on 01422 341 317.

On Thursday South Manchester Radio and Computer Club is looking at antenna analysers. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday Tynemouth Amateur Radio Club is looking at the use of computers in radio. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

On Tuesday Mid Ulster Amateur Radio Club is having a shack night and continuing the Intermediate course. On Friday the two-day Foundation course commences. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

We start with an appeal by the Scottish Borders Repeater Group for support for the 2012-13 year. The group currently has 22 members but needs around 35 to break even for the year. If support is not forthcoming then some of the repeaters including GB3BT may need to close. For more information, or to join the group, please contact Jim, GM4FVM, by email to treasurer@sbrg.co.uk.

On Tuesday Dundee Amateur Radio Club is holding CW practice. Contact Paul, GM0BKC, on 07846 412 862.

On Wednesday Ayr Amateur Radio Group is visiting Bang and Olufsen, Glasgow. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday Aberdeen Amateur Radio Society is having a construction night. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is having its second construction night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with a notice from Horndean and District Amateur Radio Club that they are able to offer training at Foundation, Intermediate and Advanced level. For more information please visit their website at www.hdarc.co.uk.

Now for clubs that have several events this week. Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's slow speed CW on

1.995MHz from 8pm, and on Friday it's the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Worthing & District Amateur Radio Club is having a talk on Wednesday by Graham, G4FNL on internet applications in amateur radio. On Saturday it's the 80m CC-CW contest. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. Today, Flight Refuelling Amateur Radio Society is having a lecture on LF/MF operation by Andy, G4JNT and John, G0API. Contact John, G4POF, by email to g4pof@hotmail.com.

On Monday Braintree & District Amateur Radio Society is having a talk by G0LPO on how he hopes to win the construction contest. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having part 3 of the talk by Tony Crake, G0OVA. Contact Dave, G4XDU, on 01628 625 720.

On Monday Felixstowe & District Amateur Radio Society is having a demo of datamodes & APRS by Brian, 2E0BCM. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday Surrey Radio Contact Club is having a natter and fix it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Stevenage & District Amateur Radio Society is having a talk on dummy loads by Keith, G4KGP. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Tuesday Verulam Amateur Radio Club is holding its AGM followed by talk by David, G3YYD on replacing hardware with software. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday Dover Radio Club is continues its look at Iphone and Android amateur radio apps with Matt, M1CMN. Contact Pete, M0PKH, by email to peter.halloway@sky.com.

On Wednesday Norfolk Amateur Radio Club is watching the Rockall ultimate IOTA DX challenge video. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bredhurst Receiving and Transmitting Society is having a talk and demo on PSK. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Colchester Radio Amateurs is having a talk on aurora by Paul, G4YQC. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Cray Valley Radio Society is holding a club meeting. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a mystery video evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Lowestoft & District PYE Amateur Radio is having a club meeting and shack night. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships CW. Contact Rob, G4LMW, on 01635 862 737.

On Thursday Shefford & District Amateur Radio Society is having a talk on vectoring by Stewart, G3RXQ. Details from John Burnett, 2E0OAK, on 07860 804 793.

On Thursday Sutton & Cheam Radio Society is having a talk on the International Beacon Project by Leslie Butterfields, G0CIB. Contact John, G0BWV, on 020 8644 9945.

On Friday Mid-Sussex Amateur Radio Society is having a workshop evening with Peter, G4AKG, on tuning and using the club HF rig. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Friday Wimbledon & District Amateur Radio Society is closed. Contact Martin Brown, G6JXA, on 07812 735 507.

On Sunday East Kent Radio Society is at the Rainham Rally. Details from Karl Davies, M1DFM, on 01227 710 120.

On Sunday Itchen Valley Amateur Radio Club is holding a forum on members' ideas for the future. Details from Liz, M0ACL, on 02380 254 599.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Exeter Amateur Radio Society is holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Thornbury & South Gloucestershire Amateur Radio Club is having a video night on Wednesday and a 2m net on Friday. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Monday Appledore & District Amateur Radio Club is having an introduction to SDR by Dave, 2E0CNB & Laurence, G4XHK. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Tuesday Riviera Amateur Radio Club is putting MX0RIV on the air. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Thursday Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday Mid Cornwall Beacon and Repeater Group is holding an EGM to elect a new treasurer and deputy treasurer. The meeting commences at 7pm

at Treviglas Community College, Bradley Road, Newquay TR7 3JA. Full details are on the group's website, www.mcbarg.co.uk. There will also be a talk by Keith Holland, G3MCD, about the group's activities.

On Thursday South Bristol Amateur Radio Club is having a talk on programming by Henryk, M0HTB. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is holding Morse practice. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having an activity night. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is holding its AGM. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

Highlights of Solar and Geomagnetic Activity
11 - 17 February 2013

Solar activity was moderate. The largest flare of the period was a
M1/Sf with an associated Tenflare (340 sfu) radio burst from Region
1675 (N12, L=37, class/area Cso/050 on 17 February) at 17/1550 UTC.
The largest and most magnetically complex region of the period was
Region 1670 (N17, L166, class/area Dai/170 on 12 February). It
managed to produce two C-class flares before finally rotating off
the west limb on 16 February. Two filament eruptions occurred near
the southwest quadrant during the period. The first, a 7-degree long
filament located near S26W63, erupted beginning at approximately
12/2200 UTC. The second, a 10-degree long filament located near
S29W48, erupted at approximately 13/0300 UTC. It was later
determined that neither coronal mass ejection (CME) associated with
these filaments had a substantial Earthward trajectory. Several
other non-Earth directed CMEs were observed throughout the period as
well. However, late in the period a NE limb event showed a potential
Earth-directed CME. The ejecta was shown to be moving slowly
(approximately 300-400 km/s) using the plane-of-sky estimate but is
anticipated to be caught up in a coronal hole high speed stream (CH
HSS) and be nearly imperceptible as it passes.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels.

Geomagnetic field activity was quiet to unsettled with a couple of
isolated active periods. The first was on 13 February from
21000-2400 UTC due to prolonged periods of sustained negative Bz.
The second occurred on 16 February from 1500-1800 UTC due to the
passage of a weak transient CME.

Forecast of Solar and Geomagnetic Activity
18 February - 16 March 2013
```

Solar activity is expected to be very low to low.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 18-23 February in response to negative polarity CH HSS from CH95 and CH96, and again from 1-2 March due to a recurrent negative polarity CH HSS.

Geomagnetic field activity is expected to be predominantly quiet to unsettled with a slight chance for isolated active periods due to the effects of the negative polarity CHs mentioned previously.

Amateur Radio Supplies announces second giveaway to promote youth in
Amateur Radio

Amateur Radio Supplies of Haverhill, Mass., have announced a new
biannual giveaway to promote youth in amateur radio DXing and contesting.

☐Getting on HF (high frequency) in today☐s economy is very
challenging for many, but especially for our youth operators,☐ said Jeff
Demers, owner, Amateur Radio Supplies. ☐Many youth operators are unable to
purchase the needed equipment to get on the air. Here at Amateur Radio
Supplies, we want them to experience the joy that has propelled us in this
hobby for many decades. Thus, on June 1, 2013, we☐ll be doing the second
of many station sponsorships to support youth in DXing and contesting.☐

Amateur Radio Supplies will give a complete
HF (high frequency) station to the selected applicant, including:

☐ Alinco DX-SR8T/E 160-10m All Mode Transceiver & 30 Amp PS

☐ LDG AT-100 Pro II Desktop Antenna Tuner

☐ Choice of Rugged All Band G5RV or HyGain DX-77A Vertical 100☐ of

☐ Premium RG-213 Coax

☐ Vibroplex Brass Racer Iambic Paddles

☐ SignaLink USB Sound Card for Digital Modes

☐ Heil Pro Set Plus Headset

Applicants from any country under the age of 21 are invited
to provide brief answers to the following three questions, as well as
their name, call sign, and license class online.

1. How often are you able to operate on the HF bands?

2. Where (what QTH) do you typically operate from?

3. How do you intend to use the equipment provided?

Visit the Application Form

Nominations will also be accepted. If you know of a deserving youth, please email Randy Rowe at randy@amateurradiosupplies.com.

RaDAR - a concept and Sprint contest promoting /PM, /P, /M and /MM operators

Posted: 17 Feb 2013 10:27 PM PST
http://forums.qrz.com/showthread.php?380268-RaDAR-a-concept-and-Sprint-contest-promoting-PM-P-M-and-MM-operators&goto=newpost

Allow me to introduce you to the idea of Rapid Deployment Amateur Radio (=
RaDAR):

http://radar-america.blogspot.com/20...dio-rapid.html

http://zs6bne.wordpress.com/category/radar/

which is a concept for operating and rapidly re-deploying an amateur radio
station anywhere, anytime. It does not and is not intended to compete with
any other Amateur Radio group, although it does borrow elements from
HFPack, SOTA, etc..

But RaDAR is not only a concept, it also has it's own Contest, which is
centered on portable and especially mobile and pedestrian mobile Amateur
Radio operation, with emphasis on rapid QTH changes:

http://radar-america.blogspot.com/20...ement-and.html

Aim of the contest is not to award a certificate - although there'll be
one. If you are interested in this contest which is aimed at promoting
mobile and portable Amateur Radio, then you will notice that submitted logs
with pictures and descriptions of the transceiver and antenna setup are to
be posted on the RaDAR-America Blog, so that it may serve as a pictorial
teaching repository on this most interesting facet of our hobby.

South American lightouse weekend

Posted: 17 Feb 2013 08:04 PM PST
http://forums.qrz.com/showthread.php?380259-South-American-lightouse-weekend&goto=newpost

22, ,23 and 24 febreaury .

South American Lighthouse weekend

More information in http://www.lu3dxg.com.ar/faros2013/index.htm

This ocasion is ideal for lighthouse chasers!

Also i will be operate in Recalada Lightouse ARG 009.

Infomation Above my operation.

21,22,23 and 24 febraury 2013

Recalada Lightouse ARG 009

Bands 10 to 80 meters.

CW, SSB and digital modes

Operators:

LW6EGE

LU5DHE

LU7DR

LU1DVE

LU2EK

LU1DP

LU6UVI

(ALL WITH THE PREFIX /D)

QSL ONLY VIA LW6EGE DIRECT (WITH IRC OR 3 DOLLARS/EUROS)

I HOPE MAKE CONTACT WITH YOUR STATION :)

What's the purpose of that, other than to confirm that the RSCB and all its
works
is irrelevant to _REAL_ Amateur Radio.

In any case, I thought that G(B)3VHF was a 2m beacon in Wrotham. How come
a member of the politburo gets allocated such a choice callsign?

Improperganda.

There is no centenary.

In 1913 there was just the London Wireless Club, and there were a number of other geographical clubs up and down the country at the same time, some of them (Cantab Uni?) being much older.

The RSGB (as it was, before it degenerated to become the RSCB) was not incorporated until the mid 1920s.

However, bullshit, double talk, etc, is what we have come to expect from the RSCB over the years. If only they palyed a straight bat.

Am I missing something here, I thought that the RSCB (nee RSGB before the
decline)
existed solely for Amateur Radio? If there is an "Amateur Radio Manager"
just
who the hell do the other "Managers" think they are; what purpose do they
serve?

There was a discussion on here a fair time ago about this. It was once a
club callsign.

It depends. It is attractive to have some height above ground level,
and especially in a flat country you'll find that the few high sites
are full of transmitters.
It is an extra challenge, but it is worth the effort.

For example, the local 2m repeater PI3UTR is on a 367m high transmitter
tower that houses several FM radio transmitters up to 100kW ERP and also
digital radio and TV. There is a 70cm D-Star repeater and a 70/23/13/3cm
ATV repeater at the same location.

See http://pi3utr.nl/ for a picture and some info.

A 1600 gram weather balloon filled with hydrogen is let loose towards the heavens with its payload of fast-scan and slow-scan amateur television transmitters and an amateur radio tracking beacon Saturday during the 9th annual Yuma Hamfest held at the Yuma County Fairgrounds. The balloon, which was expected to burst at 90,000 feet or more, was to be in flight for approximately 90 minutes and travel up to 50 miles to the east before deploying a parachute to safely return the payload back the earth's surface.

I believe that these are just new stations on the DAB MUXes from Bow Brickhill and Sandy Heath (there's another one I forget the name of right now).

I presume that the NRC was chosen for publicity reasons, being both radio and BP related. I imagine that all they did (if anything) was get someone remote to enable a MUX feed at the right time.

Hams Help Train Emergency Responders:

Posted: 19 Feb 2013 01:49 AM PST
http://www.eham.net/articles/29773

Members of Ridgefield's volunteer disaster communications team -- all specially trained, FCC-licensed, amateur radio operators -- have been assisting in the development of a communications training video for use by fire, police and emergency medical first responders. Oscar Fuller of Danbury is coordinating the project. He is a member of Ridgefield's communication team, called R-COMM, and Connecticut Amateur Radio Emergency Service (ARES). Video production is funded through a federal/state grant managed by the Division of Emergency Management and Homeland Security's Region 5 communications group. Region 5 includes all of Litchfield county and the northern Fairfield county communities -- 43 towns in total. The video will demonstrate the capabilities of amateur radio equipment and disaster-trained operators. Ridgefield's Emergency Operations Center or EOC and many centers and hospitals throughout Region 5 are equipped with amateur radio equipment that provides backup communications when normal communication channels are out of service. The Amateur Radio Emergency Service motto is: "When all else fails -- Amateur Radio." Often referred to as "Hams," these radio operators have a long history of providing communications support during and after disasters. The regional ARES teams are active throughout the year and were used extensively during and after recent major power outages including Hurricane Sandy.

Man Accused of Threatening Amateur Radio Club Members:

Posted: 19 Feb 2013 01:47 AM PST
http://www.eham.net/articles/29772

SAN ANTONIO -- Northeast Bexar County resident John Watkins III is accused of making death threats to members of an amateur radio club. Watkins was arrested on two counts of making a terroristic threat, and booked into jail Saturday. Records show he has been released after posting $4,000 bond. According to an arrest warrant affidavit, radio club members determined someone was making threats, using racial slurs and creating "white noise," or static, on the channels that they use for broadcasting. A club member assigned to investigate it said he tracked the broadcasts to Watkins' home and confronted him in January, telling him to stop, the affidavit stated. Club members told investigators with the Bexar County Constable, Precinct

3, that Watkins made another threat over the airwaves the following day, saying he would use an AK 47 assault rifle to kill them, the affidavit stated.

==> OPERATION RADAR II: ARES® ROLE ELEVATED IN MAJOR FLORIDA INTEROPERABILITY EXERCISE

```
Florida's Division of Emergency Management
<http://www.floridadisaster.org/index.asp> (FDEM) undertook a huge
effort to design, conduct and evaluate a statewide interoperable
communications exercise entitled "Operation RADAR II," which was held
February 4-8, 2013. During the multi-day exercise, teams from numerous
disciplines from state, county and city agencies rolled mobile
communications units to, and worked from, the National Guard's Camp
Blanding in northeast Florida. The plan was to establish communications
networks and pass messages testing connectivity among one another and
with county EOCs and Public Safety Access Points (PSAPs) located
throughout the disaster-prone state. The goal was to fully integrate
multiple communications systems into an effective emergency
communications network.

Objectives included the identification of shortfalls in resources,
limits in capabilities, and conflicts in planning for interoperable
communications; demonstration of the ability to communicate throughout
the emergency response community and establish interoperable voice and
data communications between federal, state, and local first responders;
```

evaluation of response partners' ability to share necessary, appropriate data in all environments; and the demonstration that all response partners can effectively share information between communication modes.

The scenario was an event that involved two hurricanes directly impacting Florida, one from the Atlantic and one from the Gulf within ten days of each other. The effects were catastrophic with numerous lives lost and widespread displaced populations. All critical infrastructure was severely impacted with much of the state without power, major

transportation concerns, and widespread communications breakdowns and failures. Regions 3, 4, and 5 were hardest hit and needed interoperable communications support from the other four regions, state and federal resources. The budget for the exercise was $400,000, according to Bob Little, KK4OAI, FDEM's Communications Grant Manager.

ARES played a major role in this exercise for the first time, thanks in large part to the efforts of dynamic Northern Florida Section Manager Paul Eakin, KJ4G, and ardent supporters of Amateur Radio on the staff of the mega state EOC at Tallahassee. FDEM's Amateur Radio Unit, managed by Eakin, served as the Command Post/Auxiliary State Warning Point and as the hub for message and request routing and tracking via the state's Internet-based Constellation system. Kimo Montague, K4IMO, a veteran state emergency communications tech, ran this function from a position within the Amateur Radio tent.

The interoperability aspect provided by Amateur Radio was manifested by radio amateurs deployed with the various other teams and mobile units situated at distant locations throughout the large military campus, and around the state. Estimates of 50% to 75% of the field teams/units had active radio amateurs handling traffic with the CP/ASWP Amateur Radio tent. For example, a message originated at a county emergency management unit could be sent by one of the agency's radio amateurs to the CP/ASWP tent via any one of several frequencies and modes, and then a radio amateur there would process it, log it, and send it to its destination unit via the appropriate frequency and mode. Thus, the message crosses jurisdictional and functional lines in a flash: Interoperability achieved, routing via Amateur Radio.

The exercise was run under the NIMS Incident Command System, with COMLs in charge of the Communications Units, and with all ICS log, message, and other forms used. Several radio amateurs participated as newly minted certified Auxiliary Communications (AUXCOMM) operators, including Jeff Capehart, W4UFL, Alachua county's EC and RACES Radio Officer, who brought a mobile crank-up tower and station. (The Auxiliary Communications course has been developed and implemented by the Department of Homeland Security's Office of Emergency Communications, for radio amateurs; one course has been given in Florida so far).

If any player needed to communicate with the State Warning Point, they were directed to contact the Amateur Radio unit, serving as the command post and auxiliary State Warning Point. FDEM communications officers were in the Amateur Radio tent for this purpose. Other inter-agency and/or inter-function messages were handled in the same way. The primary communications platforms were two HF stations on voice LSB, one on 3950 kHz and the other on 7242 kHz; and an array of two-meter FM simplex frequencies for direct, point-to-point locale coverage. NVIS dipoles were deployed for the HF stations. The goal was communications redundancy, so several back-up bands and modes were tested as well. A portable UHF FM repeater (KJ4G) provided intra-site tactical communications for Amateur Radio Unit team members. Five different 2-meter FM simplex frequencies were available for inter-site communications, all with the call sign KA4EOC, the state EOC's station call sign.

On the digital mode side of the operations, several positions in the tent were dedicated to different systems, including the Southeastern Emergency Digital Associations Network <http://www.fla-sedan.com/index.html> (SEDAN), an extensive net on 145.77 MHz of traditional packet radio nodes heavily invested in Florida. An Automatic Packet Reporting System <http://www.aprs.org/> (APRS) node (N2DB) was active on 144.39 MHz, tracking the movement and locations of most of the players on the exercise field. A separate tent housed two Winlink <http://www.winlink.org/> (a global radio e-mail system) stations, one on a VHF (145.63 MHz) network, and the other on an HF (3593 kHz) net, for sending and receiving e-mail-formatted messages. The SEDAN and APRS modes were managed by Barry Isbelle, N2DB, and the Winlink stations were run by Jim Winfrey, KJ4SBG, and Ray Cook, WD4SEN, the Assistant EC for Clay county, Florida.

Digital Smart Technologies for Amateur Radio <http://www.icomamerica.com/en/products/amateur/dstar/dstar/default.aspx> (D-STAR) Reflector 46C and a D-STAR "Ratflector" for D-STAR emergency text messaging using the D-RATS <http://www.d-rats.com/documentation/3-manual/> platform, along with a Mesh <http://computer.howstuffworks.com/how-wireless-mesh-networks-work.htm> node, were operated and managed by Assistant SM Donna Barker, WQ4M, for all player communications, but especially for communications with State assets, including the State EOC at Tallahassee, and the rolling mobile back-up

EOC that was deployed to the exercise field. The State's mobile back-up EOC, packed with radios and computers, can perform all of the Emergency Support Functions (ESFs) when the hard EOC at Tallahassee is taken out in a major disaster. Ms. Barker is a communications and network analyst/expert.

Another Amateur Radio Unit tent station position was reserved for Red Cross communications. John Reynolds, W4IJJ, Communications Officer for the Florida Red Cross (state level), monitored and received messages

via the tent's 2-meter Call Channel on 147.585 MHz, and then relayed the messages via KGB-223 on the Red Cross frequency 47.42 MHz, which was also used to communicate with rolling Red Cross van/units out of Jacksonville and Gainesville. These van/units are used primarily for Mass Care and Feeding functions for the Red Cross.

The content of all the exercise messages was not as important as the connectivity: The goal was to have almost instant and reliable, effective and efficient connections across an incredibly diverse universe of public safety entities - from towns, cities, counties, the state, and the feds (FEMA), for every conceivable function, including not only the usual, traditional ones, but some that do not readily come to mind when thinking of disaster management, such as mapping units (the Alachua County Mobile Mapping Unit); radio shops (City of Jacksonville Radio Shop); Civil Air Patrol (Florida Wings); Florida Department of Health - IT Security; Florida Fish and Wildlife Conservation; Seminole Tribe of Florida; and mortuary services - to name a few.

The exercise was highly successful, and Amateur Radio not only rose to the challenge, but most certainly rose in the eyes of the professional emergency management community it served during this massive exercise. I'll have more on this exercise in next month's issue and in QST's Public Service column. See also K1CE For a Final, below, for some parting comments. - K1CE

==> AMERICAN RED CROSS TO PHASE OUT EMERGENCY COMMUNICATION RESPONSE VEHICLES

The American Red Cross has made the decision to phase out and decommission its Emergency Communication Response Vehicles (ECRVs), due to changes in technology, as well as a new satellite system and other factors regarding the vehicle fleet. "Retrofitting the decade-old vehicles with new equipment is not a good use of donated funds, as the long-term strategy is to move to more portable systems," American Red Cross Disaster Services Technology Manager Keith Robertory, KG4UIR, told the ARRL. "This is consistent with the trends in the telecom and technology industries."

The American Red Cross will be removing the Amateur Radios out of the ECRVs as part of the decommissioning process. These radios will either become part of the deployable inventory or provided to the chapter to build the local capacity. Equipment that can be used by the American Red Cross will not be phased out with the vehicle. According to Robertory, every communication capability of the ECRV already exists -- or will soon -- as a rapidly deployable kit that can be loaded on any vehicle that is owned or rented by the American Red Cross, providing more flexibility in shaping its response to match the disaster.

"From a radio perspective, the American Red Cross has a variety of different kits for amateur, business and public safety bands covering HF, VHF and UHF with portable radios, mobile units and base stations,"

he explained. "Two-way radio remains a valuable tool, providing communications in the initial days or weeks of a disaster, until normal communications is restored. Each American Red Cross chapter should continue with -- and improve -- the relationship with their local Amateur Radio operators. In a disaster, Amateur Radio will be the fastest deployed radio network because operators already live in the impacted communities."

Robertory called the ECRV operators "the key to the success of the ECRV program through the years. Their skills, dedication and flexibility have made the ECRV one of the most visible aspects of the American Red Cross Disaster Technology team. The ability to establish connectivity and communications remains vital to the American Red Cross, and their skills will continue to be needed as the American Red Cross implements new technology strategy and tactics. The commitment and flexibility of technologists -- including radio operators -- is what makes technology on a disaster successful. Building our future path based on the lessons we have learned is important to keep us all successful."

"This should not be seen as a setback for those radio amateurs who are working with the American Red Cross," said ARRL Emergency Preparedness Manager Mike Corey, KI1U. "In disaster response, adaptability is critical and keeping up with new technology is essential. This all must be done with a mind toward an effective and efficient response. Amateurs have played an important role in assisting the American Red Cross with their mission and I know we will continue to do so in the future."

Information about how to purchase these vehicles will be shared at a later date when the details are firm.

==> NEW ENGLAND WALLOPED BY HEAVY SNOW AND SIGNIFICANT DAMAGE IN BLIZZARD OF 2013

SKYWARN across New England was active for a blizzard that pounded the region with very heavy snowfall, blizzard conditions, winds to hurricane force, and significant tree and power line damage and power outages over southeast Massachusetts and Rhode Island on Friday, February 9, extending into Saturday, February 10, 2013. WX1BOX, the Amateur Radio station at the National Weather Service in Taunton, Massachusetts, was active for 28 continuous hours of operations.

"Our hopes to escape the 2012-2013 winter with nothing more than routine winter storms ended when this blizzard came to New England, said Rob Macedo, KD1CY, ARES® SKYWARN Coordinator for NWS Taunton and Eastern Massachusetts ARES Section Emergency Coordinator. "Eastern Massachusetts ARES was placed on stand-by on Friday, February 9, and that standby continues as of this writing as we have ARES operators remaining active on Cape Cod providing communications support for active shelters and for the Barnstable County (Cape Cod) Mutual Aid Coordination Center (MACC)," Macedo said.

The WX1BOX Amateur Radio SKYWARN operation facilitated several hundred snow fall reports, wind and wet snow damage reports and coastal flood reports. These reports were sent to multiple agencies including the National Weather Service in Taunton, the Massachusetts

Emergency Management Agency, Red Cross, other Non-Governmental Organizations (NGOs) as well as the media. This provided critical situational awareness and disaster intelligence information to all of these entities.

Snowfall totals of around 12-32" were recorded across Massachusetts, Rhode Island and Connecticut with lesser amounts on Nantucket Island. Boston Logan Airport recorded its fifth highest snowfall ever with this blizzard. Moderate to major coastal flooding was reported with the most significant coastal flood damage to roads and even shore structures recorded in Hull, Scituate, Sandwich, Gloucester and Salisbury, Massachusetts. Damaging to hurricane force wind gusts coupled with wet snow caused over 410,000 to be without power largely in southeast Massachusetts with over 170,000 without power in Rhode Island.

"The Amateur Radio mission in our region has really evolved into providing information on damage, power outages, and meteorological surface observations in situations such as this blizzard -- it isn't just about 'when all else fails' anymore," Macedo said.

The New England Reflector system on Echolink *NEW-ENG* node: 9123, IRLP 9123 was active and at one time had over 65 connections from stations within the affected area of the blizzard. The VoIP Hurricane Net system on *WX_TALK* node: 7203/IRLP9219 system was used as a listen-only system for those amateurs who wanted to listen in on some of the blizzard operations. Many local VHF and UHF repeaters were active with roll-call SKYWARN nets setup at 2 or 3 hour intervals. In Connecticut, the Hartford-Tolland County SKYWARN Net alone had 8 nets and 181 total check-ins across those 8 nets including nets run during the overnight period per a report from Hartford-Tolland County Connecticut SKYWARN Coordinator, Roger Jeanfaivre, K1PAI.

Connecticut State SKYWARN Coordinator Steve Williams, K1SJW, commended and thanked all of Connecticut's SKYWARN spotters and coordinators for the fantastic job everyone did reporting weather information and storm damage during the blizzard. Connecticut ARES Section Emergency Coordinator Wayne Gronlund, N1CLV, and Connecticut ARRL Section Manager, Betsey Doane, K1EIC, echoed these comments.

The Massachusetts Emergency Management Agency (MEMA) Region 1 WC1MAA Amateur Radio station, and Region 2 WC1MAB Amateur Radio station were staffed with RACES operators. Having operators in place to perform their functions at these served agencies helped to provide auxiliary communications. When power outages became so severe that the Pilgrim Nuclear Power Plant in Plymouth, Massachusetts had lost power, a roll-call was initiated on the state's VHF network. The Region 2 office did not hear the roll-call and was notified by the ARES sub-regional command center at the Acushnet EOC in Acushnet, Massachusetts, WA1EMA,

that the roll call was taking place and notified Pilgrim that they would assist in making sure Region 2 contact was made.

"Amateur Radio remains the ultimate back-up and has a significant place in providing situational awareness information for various served agencies," said Ed Caron, KA1RSY, District Emergency Coordinator for Southeast Massachusetts and Acushnet Emergency Management Communications Officer. John Miller, N1UMJ, was operating at WC1MAB to handle this traffic.

Cape Cod ARES was active and put in over 72 hours of continuous operation during and after the blizzard. They provided SKYWARN reports of coastal flooding, snowfall reports, wet snow and wind damage from around their area. In Hyannis, George Correiro, W1GLC, recorded a wind gust to 84 MPH and in the Marstons Mills section of Barnstable, Massachusetts, Cape Cod ARES District Emergency Coordinator Frank O'Laughlin,WQ1O, measured a 75 MPH gust. Wind gusts to hurricane force also occurred on Nantucket Island. Cape Cod ARES staffed multiple shelters and EOCs within their region, as well as the Barnstable County Mutual Aid Coordination Center (MACC).

"Cape Cod ARES rotated shifts to staff the shelters and the MACC. "I'm very proud of all my people who have put in very long hours," said O'Laughlin. Assistant District Emergency Coordinator Dan Howard, K1DYO, spent most of the 3-day period at the MACC. Eastern Massachusetts ARES was on stand-by to support Cape Cod ARES. - Source: Rob Macedo, KD1CY, Eastern Massachusetts SEC, and NWS Taunton SKYWARN Coordinator

==> 2013 NATIONAL HURRICANE CONFERENCE AMATEUR RADIO SLATE

The National Hurricane Conference will be held March 25-28 at the Hilton New Orleans Riverside in New Orleans, Louisiana. There will be several Amateur Radio activities going on during the week. The National Hurricane Conference (NHC) leadership continues to recognize the valuable contributions of Amateur Radio and again invited us to participate with two sessions.

NHC Session #1: Monday, March 25, 2013 from 10:30 AM to 12:00 PM, at the National Hurricane Conference (NHC). This is the main Amateur Radio session.

NHC Session #2: Monday, March 25, 2013 from 1:30 PM to 3:00 PM, is designed for Emergency Management officials titled Amateur Radio Rap Session-The Emergency Manager's Hidden Resource. The presentations will be live streamed on the Internet at www.nsradio.org/stream.htm <file:///E:/www.nsradio.org/stream.htm> and www.voipwx.net/files/stream.htm <file:///E:/www.voipwx.net/files/stream.htm>

All hams are invited at no cost to attend the Amateur Radio sessions at the National Hurricane Conference. For additional information:

http://www.hurricanemeeting.com <http://www.hurricanemeeting.com/>

http://www.southeastern.arrl.org/2013NationalHurricaneConferenceActivities.pdf

http://www.southeastern.arrl.org <http://www.southeastern.arrl.org/>

http://www.voipwx.net <http://www.voipwx.net/>

National Hurricane Conference presenters are:

John McHugh, K4AG, Coordinator for Amateur Radio, National Hurricane Center, WX4NHC

Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator, http://www2.fiu.edu/orgs/w4ehw

Rob Macedo, KD1CY, Director of Operations for the VoIP Hurricane Net and ARRL SEC, Eastern Massachusetts

Mike Corey, KI1U, ARRL Emergency Preparedness Manager

Greg Sarratt, W4OZK, ARRL Southeastern Division Director

We encourage you to visit all the activities you can and learn more about Amateur Radio emergency communications. Hope to see you there! -- Greg Sarratt, W4OZK, ARRL Southeastern Division Director http://www.southeastern.arrl.org <http://www.southeastern.arrl.org/>

==> LETTERS: RACES IN CERT, TOO

I was pleased to see your article The Future of ARES is CERTain in January 2013 QST. I am CERT trained and certified along with being a licensed operator. In our group, half of us are ARES registered, and the rest are RACES. I am a RACES operator. We wait for the Fire and/or Police officials from our three cities to call us for deployment. Your article, I am sad to say, did not mention anything about RACES. If you write a follow up it might be a good idea to mention all the RACES operators. Thank you for your article. -- Tom Perry, AG6GI, Pleasanton, California

==> ARRL BOARD CONSIDERS ITEMS OF INTEREST TO ARES

The League's Board of Directors met last month and considered several issues of interest for ARES members. First, the Board set seven legislative objectives for the 113th Congress of the United States. These are:

• To seek legislation instructing the FCC to extend the requirement for "reasonable accommodation" of Amateur Radio station antennas -- a requirement that now applies to state and local regulations -- to all forms of land use regulation.

• To oppose legislation that would lead to the reallocation of amateur spectrum or to sharing arrangements that reduce the utility of existing allocations.

• To oppose legislation that diminishes the rights of federal licensees in favor of unlicensed emitters or encourages the deployment of spectrum-polluting technologies.

• To seek recognition of the unique resources, capabilities and expertise of the Amateur Radio Service in any legislation that addresses communications issues that are related to emergencies, disasters or homeland security.

• To support the complementary legislative objectives of other radiocommunication services -- particularly the public safety and scientific services -- that require spectrum access and protection from interference for non-commercial purposes that benefit the public.

• To oppose "distracted driving" legislation that does not clearly exempt two-way mobile radio transmitters or receivers used by FCC-licensed radio amateurs.

• To support legislation authorizing FCC Commissioners to appoint an electrical engineer or computer scientist as an additional member of their staffs to ensure that Commissioners have adequate access to technical expertise when making decisions.

These objectives affect all of us as ARES operators and leaders to varying degrees. As related measures come up on the Congressional docket this year, make sure to support them with your lawmakers. Related new laws can greatly facilitate our ability to provide professional-grade emergency and disaster response communications.

ARRL International Humanitarian Award: John Bush, KH6DLK/V63JB

The ARRL Board of Directors voted to bestow the 2012 ARRL International Humanitarian Award upon John Bush, KH6DLK/V63JB, of Hilo, Hawaii and Federai, Ulithi, Yap, Federated States of Micronesia. Bush was recognized for his promotion of the development and welfare to the population of the Island of Federai in the Ulithi Atoll of the Federated States of Micronesia. In addition, he was acknowledged for his efforts in the development of an electronic infrastructure on the island, including electronic technologies and Amateur Radio. The ARRL has established the ARRL International Humanitarian Award to recognize those who have used Amateur Radio to provide emergency communications on an international level.

George Hart Distinguished Service Award: Marcia Forde, KW1U

The Board also voted to bestow the 2012 ARRL George Hart Distinguished Service Award upon ARRL Eastern Massachusetts Section Traffic Manager Marcia Forde, KW1U, of Concord, Massachusetts. Forde was recognized for her dedication to the National Traffic System (NTS). Since the early 1980s, she has held many positions within the NTS, including serving as Section Traffic Manager for the Eastern Massachusetts Section, Net Manager for the Eastern Area Net and as a Director of the Trans-Continental Corps. Forde, who has run various digital message systems -- from a packet node to a Winlink classic node -- is active in

recruiting volunteers for all levels of the NTS. The Board created the George Hart Distinguished Service Award at its 2009 Second Meeting. It is presented to an ARRL member whose service to the ARRL's Field Organization is of the most exemplary nature.

==> LETTERS: DISCONNECT WITH EMERGENCY MANAGEMENT AND HURRICANE SANDY OPS

Thanks for the excellent write up (QST, February, 2013) on ARES operations during Super Storm Sandy. You can imagine my head scratching as I read the article from Emergency Management entitled "Sandy Created a Black Hole of Communication" --http://www.emergencymgmt.com/disaster/Sandy-Black-Hole-of-Communication.html I was wondering if the ARES/RACES operators ever crossed paths with the general population in the impacted areas. Surely there was someone who remembered Amateur Radio as playing an important role, but apparently not. I would propose that we contact the writer of the article and determine why we were not mentioned. This could lead us to some additional after action activities.-- Fritz Bock, WD9FMB, Peoria County (Illinois) ARES EC

==> K1CE FOR A FINAL

I'd like to commend Mr. Paul Eakin, KJ4G, Northern Florida SM and his incredibly talented team of radio amateurs who successfully managed the Command Post/Auxiliary State Warning Point function at the gargantuan Operation RADAR exercise held in the woods and fields of Camp Blanding in northern Florida earlier this month. I'd also like to thank them all for inviting me to participate and observe, and for arranging for me to

have access to the military base for these purposes. It was one of those rare moments in life where you just bubble over and beam with pride in seeing something that you have invested so much of your life in come to such a fruition and pinnacle of achievement. To see Amateur Radio have such a seat at the table at this level was simply amazing.

I'd also like to note the contributions of other ARES, RACES and auxiliary communications groups that employ Amateur Radio that participated in this exercise either on site, or from their home facilities. These included groups from across the entire state, who participated from their home shacks or EOCs. In looking over the list of exercise participants, it was very heartening to see so many Amateur Radio emergency communications groups named. Bravo.

A pitfall of being a writer/editor of a newsletter like this is that you end up as a pencil-pusher, relying on the reports of others who are actually performing the work in the field. For me, in the case of this exercise, it was good to "get out there."

Alaska QSO Party 23 March 2013

Posted: 20 Feb 2013 08:23 AM PST
http://forums.qrz.com/showthread.php?380597-Alaska-QSO-Party-23-March-2013&goto=newpost

On the 23rd of March starting at 1800GMT the Great Alaska QSO Party goes
live.

This event will run until Sunday 24 March at 2359GMT.

This is a two part event with the HF portion happening in March. For the
latest information go to kl7yk.us/akqso.htm

Second port of the event will be in July, date not decided on just yet.
That second half will be the 50mhz and up portion.

HF will be on 10,20,30,40,80 and 160m using CW, SSB, PSK31 or RTTY. So
something for everyone.

Listen up on the 23rd of March for Alaskans calling CQ AK QSO Party! If
you need Alaska for your log this would be the event to try and get it.

Again the website will contain the latest information, the exchange at this
time is expected to be a simple serial number of the contact, call sign,
operators first Name and their Maidenhead Grid Square. We don't have
counties in Alaska. Join in the fun and lets make this first AK QSO Party
a great success!

For further info or comments see the website.

Cambria Radio Club and Horseshoe Amateur Radio Club & "Mulit-Club Field Day
2013

Posted: 20 Feb 2013 05:22 AM PST
http://forums.qrz.com/showthread.php?380587-Cambria-Radio-Club-and-Horseshoe-Amateur-Radio
-Club-amp-quot-Mulit-Club-Field-Day-2013&goto=newpost

To: Everyone in the Western PA area!!!!! ((((any beyond))))

As field day is just around the corner it looks like the Cambria Radio
Club and Horseshoe Amateur Radio Club will hold "Mulit-Club Field Day
2013" at The New Germany Grove. Anybody remember the fun from last

year?? Last year was a blast!!!. All hams and clubs looking for a place to go please reply ASAP with your desire to attend and if you wish to do anything form food, operation of a station, ARES or ACS booth, to learning, or even clean up. Just let us know.

http://cambriaradio.com/Field_Day.html Keep an eye on this link for additional information.

Here is a link to last years news. This publication covered multiple clubs around the area!!!! Lets make even bigger fireworks this year!!!

Link to the 2012 field day event report: http://cambriaradio.com/uploads/MultiClubFieldDay2012report.pdf Here you will see what we did in 2012 and who attended. 73

On behalf of everyone involved.... We are looking forward to your reply and participation - Tom Brew K3WS

reply to: fieldday@cambriaradio.com

Lets have some fun!!!!

Comment from one member already!!!!!

==========

FieldDay 2013; I would like to set up and demonstrate Satellite TVRO. I will provide info as to satellite geosynchronous

orbits in Clarke Orbital Belt, transponder symbol rates,

FEC ratios, NPIDs, VPIDs, APIDs, MPEG2, MPEG4

compression formats, monthly satellite orbit re-syncing,

satellite antenna, LNBFs etc.

I think most would find interesting and informative.

Only a thought....

Area Boy Scout Receives Amateur Radio Patch:

Posted: 20 Feb 2013 03:35 AM PST
http://www.eham.net/articles/29776

A Jamestown area Boy Scout is one of the youngest scouts to receive the Boy Scouts of America's Amateur Radio Operating Patch. The patch is a recent addition for the Boy Scouts and recognizes the scout's availability as an amateur radio operator for communications services for events and activities as well as in emergencies. All registered youth and adult members who also hold a valid FCC-issued amateur radio license of any class are eligible to earn and wear the patch. Wayne Schuver Jr., senior district executive of the Boy Scouts of America's Alleghany Highlands District, recently attended a Cub Scout meeting at Hillcrest Baptist Church in Jamestown to present the awards to Robert Miles, a Webelos scout, as well as his father, Aaron Miles, who were proud to receive them.

//
Two Rivers Calling: Ham Radio Roundup Connects Students with Learning Momen

Posted: 20 Feb 2013 03:34 AM PST
http://www.eham.net/articles/29775

Monday was dedicated to science, especially physics, math and astronomy. Tuesday brought lessons in geography, history, languages, and patience. After a slow morning of attempting to contact other ham radio operators, middle-schoolers at Two Rivers School in North Bend enjoyed an afternoon chatting with people all over the world, as part of the annual School Club Roundup. "All of a sudden the band has come alive!" announced ham radio operator Steven Kangas, who volunteered two days helping the students to get on the air for the twice-yearly roundup. Sponsored by the American Radio Relay League, the School Club Roundup ran through last week, giving students a chance for hands-on learning in many subject areas. At Two Rivers, students learned about the science of short-wave radio, then ventured outside to build their own "home-brewed Delta Loop" antenna, as Kangas called it, on the first day of the roundup. Middle school teacher Joe Burgener points out the antenna, anchored on one end to a 50-foot evergreen and to lower trees at two other points, forming a three-way intersection, with a loop of plastic is suspended in the center. "The whole thing is the antenna," he said, and it took them most of the day to assemble it. Kangas used an air cannon to shoot a line to the top of the tallest tree. Students used the line to pull progressively heavier cables

to the top of the tree, until they found the right weight, then the process was repeated in the lower trees. Many of the boys in the class thought Monday was the highlight of the roundup, but on Tuesday, most were equally anxious to talk into the microphone on the air. "We're encouraging them all to try it, to put their voice out there," said Burgener, as Kangas' radio hissed quietly at the center of a circle of students. Nearly all of them did.

4J, AZERBAIJAN
Amateurs in Azerbaijan are allowed to extend their prefix with the
letter T until March 5 to remember the tragedy of the massacre in
Khojaly 21 years ago (e.g. 4J7DL becomes 4JT7DL and 4K3M is 4KT3M).
QSLs via homecalls. See also: http://tinyurl.com/a6xxabm

7P, LESOTHO
During a storm a tree fell on the roof of Gerry,7P8CC (EI8CC), but he
hopes to back on the air soon. Gerry is the Irish Ambassador to Lesotho
and will stay there until 2014. QSL via his brother-in-law, EI7CC.

A6, UNITED ARAB EMIRATES
Alex,A6/SQ9UM, is working mainly in CW and RTTY (some SSB and PSK)
on 40m-10m until Feb 22. SL via homecall.

DL, GERMANY
The 20th anniversary of the town twinning between Haywards Heath and
Traunstein and the 25th jubilee of the "Friendship club Haywards Heath
Traunstein eV" is celebrated with the special callsign DR20CFT active
until late September (optional up to the end of December). The HAMs of
the Mid Sussex Amateur Radio Society (MSARS) in Haywards Heath are
using a special
callsign as well. QSL via DG2MEL.

ES, ESTONIA
The special calls ES95A-ES95Z will be activated till Mar 3 to celebrate
the Independence Day on Feb 24 and the founding of Estonia 95 years ago
A free diploma is issued in PDF format. See also: http://www.erau.ee

GM, SCOTLAND, EU-005
Jim,GM0NAI, will use the special callsign GM100C from his QTH in
Culbokie (EU-005, WLOTA 1234, WAB NH66, Loc IO77uo) on Feb 23/24.
This callsign will be activated by members of the UK HQ team (GR2HQ)

during the weekends until the end of the year.
QSL via the OQRS system of M0OXO. See: http://www.m0oxo.com/oqrs and
https://secure.clublog.org/charts/g100.php?c=GM100C

HA, HUNGARY
Karcsi,HA5OKE, and Gabi,HA7MAC, are using special event call HA30IGY
until June 30 to remember the Hungarian poet, translator and editor
Gyula Illyes who died on Apr 15, 1983.

HR, HONDURAS
After his DXpedition to Uganda with the F6KOP team Gerard,F2JD, is
expected to return to Honduras for three months starting around Feb 25.
As usual he will sign HR5/F2JD but has to repair his tower which was
destroyed in a heavy storm last autumn. QSL via F6AJA.
See: http://lesnouvellesdx.fr/voirlogs.php and http://f2jd.free.fr
---
Hiro,JA6WFM (HR2/NP3J), has joined the ARRL DX CW Contest as HQ2N from
San Pedro Sula and will stay there until Jan 2014. QSL via EA5GL, LoTW.

VP8/A, ANTACRTICA, AN-016
Adam,ZS7V, is the new radio technician and team leader of the South
African base SANAE IV (AN-016, AA ZS-03, WAP ZAF-03, WFF ZSFF-026).
He will be active in SSB for one year starting by the end of February.
QSL via ZS1HF.

XE, MEXICO
Fix,XE2I, celebrates his 35th amateur radio jubilee by using the
special callsign 4A2I this year. QSL via homecall.

XT, BURKINA FASO
The Italian DXpedition Team members Alfeo,I1HJT, Silvano,I2YSB,
Vinicio,IK2CIO, Angelo,IK2CKR, Marcello,IK2DIA, Stefano,IK2HKT,
Gino,IK2RZP, and Mac,JA3USA, will be active as XT2TT from Ouagadougou
(Loc IK92fi) working in CW, SSB and RTTY on 160m-6m between Feb 21 and
Mar 6. Following frequencies were announced:
CW: 1826.5, 3515, 7015, 10115, 14025, 18070, 21025, 24891, 28025 kHz
SSB: 3760, 7145, 14220, 18145, 21295, 24945, 28475 kHz
RTTY: 14081 kHz
6m: 50105 (CW) and 50125 (SSB)
Their equipment includes four Elecraft K3, three KPA500 PAs and an
ACOM 1000 amplifier, two Spiderbeams, a 20m/17m/15m/12m/10m yagi,
a vertical for 80m/40m, a vertical for 30m, a longwire for 160m,
a cubical quad for 6m, a Diamond Loop and a DHDL (both for lowband RX).
The main pilot station is IK7JWY and IK0FTA will be the pilot for 6m.
The software management (real-time online log) is done by IH9GPI.
QSL via IK2CIO (bureau), direct QSLs via I2YSB with OQRS.
See also: http://www.i2ysb.com/idt and http://www.hamradioweb.org
---
The "Japanese Radio Amateurs in Germany" members Tojo,JH3AEF (XT2AEF),
Kitai,JA3IVU (XT2IVU), Miyagawa,JA1CJA (XT2CJA), Asano,JP3FIA (XT2FIA),
will be QRV from Burkina Faso as well from Feb 21 until Mar 2.
Activities will take place in CW, SSB and digital modes on 80m-10m.

QSLs via homecalls. See: http://www.jaig.de and
http://www.i2ysb.com/idt/index.php?Itemid=101

YA, AFGHANISTAN
Eric,T6MO, plans to take part in the CQ 160m SSB Contest (Feb 22-24)
in the SOLP category (mainly from sunset until 1730 UTC). QSL via K9GY.

Z8, SOUTH SUDAN
Ken,K4ZW, announced to show up again as Z81Z between Feb 25 and Mar 6.
QSL via homecall.

South Pacific trip: Mike,WB7DXA, is travelling through Micronesia again
from Feb 21 until Mar 21 and plans to show up ont he bands as V63DXA
from Kosrae (OC-059), Pohnpei (OC-010) and maybe also from the
atolls Mokil and Pingelap (OC-226). He is sailing on a boat with a
marine radio but is not sure if it works on 20m. He will try to work
in SSB on 20m and maybe also other bands but has also a key for CW
just in case.
QSL via LoTW preferred but bureau QSLs may be sent also to his homecall

DXCC: Following DXpeditions were approved: 5X8C T6BP, T6TJ, Z81A, Z81D

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 22-24 CQ World Wide 160m Contest
Feb 23/24 REF Contest
Feb 23/24 UBA DX Contest
Feb 23/24 North American QSO Party
Feb 24 HSC Contest
Mar 2/3 ARRL DX SSB Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-016, FR, Reunion Island: FR1JB, FR1GZ, FR4NP, FR4DJ, FR4OA, FR4OM, FR4OO,
FR4OS, FR4OU, FR4OV, FR4PE, FR4PF, FR4PG, FR5CU, FR5FC and FR5HV plan
to be QRV from the volcano Piton de la Fournaise (Peak of the Furnace)
during several weekends this year. This volcano is a UNESCO world
heritage site. The first activity will take place on Feb 23/24. They
will sign TO1PF from the Eastern part of Reunion Island (DIFO FR-001,
WWFF FFF-011, WLOTA 1812) from a height of from 2632m.
QSL direct via FR1GZ.

AS-105, HL2, Kyonggi-do Province group: Rocky,HL1VAU, is on a business trip
to Kanghwa Island until the end of February. He is signing HL1VAU/2
mainly in CW on the HF bands. QSL via homecall.

AS-126, HS, Malay Peninsula South West group: Because of unexpected
circumstances Eddy,ON4AFU, had to cancel the second part of his
Thailand trip to Koh Butang.

NA-001, C6, Great Bahama Bank group: Tom,N1GN, and Bill,NE1B, are visiting
Nassau on the Bahamas (WLOTA 1115, Loc FL15gb) again and want to become
active as C6ANM from Feb 20 until Mar 3. They plan to take part in the
CQWW 160m SSB Contest as well. They will be joined by Mike,N1IW, and
Paul,K1VK, for the ARRL SSB Contest. QSL via LoTW or direct via WA2IYO.

NA-016, ZF, Cayman Islands: Dick,WN3R, is visiting Grand Cayman Island
(WLOTA 1042) again as ZF2RW from Feb 20-26. QSL direct via WN3R.

John,K6AM, will sign ZF2AM from Grand Cayman Island (WLOTA 1042) during
the CQWW 160m Contest (Feb 22-24). QSL via LoTW and K6AM.

NA-021, 8P, Barbados: Gerry,W1VE, is going to hit the airwaves as 8P9RM from
Saint Peter Parish on Barbados (WLOTA 0999) between Feb 26 and Mar 3.
He will sign 8P1V in the upcoming ARRL DX SSB Contest and will focus on
CW on the HF bands outside of the contest. QSL via W1VE.

NA-066, W6, California State South (Orange/San Diego County) group:
The Palos Verdes ARC members Ray,N6HE, Jeff,K6JW, Joe,NZ6L, Clay,AB9A,
Diana,AI6DF, Bill,KG6WVF, Dan,K6DPY, Steve,K6NT, and Bob,W6HIP, plan to
become active from Santa Catalina Island (USi CA016S, WLOTA 2912)
signing K6PV/6 from Feb 21-24. They also plan to join the CQWW 160m
SSB Contest but their main focus is to have fun.
QSL via K6PV. See also: http://www.palosverdes.com/pvarc

NA-099, KP4, Puerto Rico: Members of the "Radio Operadores del Este" (RODE)
will be QRV as KP3RE from Isleta Marina (USi PR-049) on Feb 24.
QSL via KP3RE.

NA-102, FG, Guadelope: FG4KH of the "E.M.E. Guadeloupe Clubs" shows up again
from the island (Loc FK96hf) between Feb 15 and Mar 9. Their emphasis
is put on 2m EME and Tropo QSOs in JT65B and SSB from Guadeloupe but
from time to time they will work also on HF. QSL via F1DUZ.
See also: http://fgdxpeditionf1duz.monsite-orange.fr

NA-103, VP2M, Montserrat: Christina,WD8MUR (VP2MUR), and Jack,KB8RJ (VP2MRS)
are spending their holidays on Montserrat (WLOTA 1475, Loc FK86vs) from
Feb 20 until Mar 14. Listen for them mainly in SSB on 80m-10m but they
want to work in PSK as well. QSLs for both calls via KB8RJ.

NA-104, V4, St. Kitts and Nevis: John,W5JON, works in SSB from 160m-6m
(incl. 60m) signing V47JA from St. Kitts Island (Loc FK87pg) between
Feb 20 and Mar 21 (including the ARRL DX SSB Contest).
QSL via LoTW or direct via W5JON.

NA-106, KP2, Virgin Island: Matt,K0BBC, and his wife Valerie,K0VAL, want to
escape the cold and are planning a trip to St. Thomas (USi VI004S).
They will work holiday style as KP2/K0BBC from Feb 26 until Mar 5,
including the ARRL DX SSB Contest. QSL via LoTW and K0BBC.

NA-107, FM, Martinique: Al,FM/F5VHJ, will be active from the QTH of
Laurent,FM5BH, on Martinique (DIFO FM-001, WLOTA 1041, DDFM 97)
between Feb 25 and Mar 3, including the ARRL SSB Contest (as TO5A).
QSL via LoTW and F5VHJ.

OC-016, 3D2, Viti Levu and Vanua Levu group: Jim,W8ERI, is working in SSB
on 80m-10m signing 3D2ZF from Taveuni until Feb 23. QSL via W8ERI.

OC-064, A3, Vava'u group: After staying on Tongatapu Werner,DJ9KH, plans to
go to Vava'u Island from Feb 24 until Mar 2. Contrary to the published
information in DXNL 1819 his call is A35WH (not A31WH).
QSL via LoTW and DJ9KH. See also: http://www.tonga2013.de

SA-028, PY2, Sao Paulo State East group: Marcelo,PY2FN/p, will be QRV only
in CW on 40m-6m from the lighthouse Ponta da Sela (ARLHS BRA-287,
Admiralty G0480, WLOTA 1007, Loc GG76gc) from Feb 22-25. QSL via PY2FN.
This activity counts also fro the Brazilian awards program:
Sao Sebastiao Island (DIB SP-02).

SA-030, CX: San Jose/Montevideo/Canelones Department group: Members of the
Radiogrupo Sur, Urigay will be actice as CV5A from the Isla de Flores
lighthouse (RGS CX-104, ARLHS URU-001, TWLHD CX-001, WLOTA L0528,
Admiralty G0690, Loc GF25ab) from Feb 21-24. The team will work in
all modes on 160m-6m. QSL only direct via CX2ABC.
See also: http://www.radiogruposur.org

SA-099, PJ2, Curacao Island: Ulf,PJ2/DL5AXX, will spend his holiday on
Curacao (WLOTA 0942) and will be working holiday style in CW and some
RTTY on 80m-10m from Feb 24 until Mar 11. QSL via DL5AXX.
OQRS on http://www.dl5axx.de/dxlog/default.aspx?Logid=75

Lighthouse activities:
The South American Lighthouse Weekend (Fin de Semana de Faros
Sudamericanos) will take place on Feb 22-24. Expect many activities
from South America during this weekend.

MMMonVHF Newsletter No. 1/ WEEK 08 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-02-21
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5 ; Guinee Bissau ; Square: IK21 ; start 2013-02-11

Guinee Bissau (IK21dt) qrv on HF and 50 MHz

J52EME and J52HF will be again on air from february 11 to march 2, 2013. Some members of
Verona DX Team will return to Cumura to help the Mission with their work and install new
devices.
In the spare time they will be on air on HF and 50 MHz Tropo and EME, if the condition will
be good.
Not 144 and 432.

SOURCE: tnx to Lucio, I3LDP, direct to MMMonVHF

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo
from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol
on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters

Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on 50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the
manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

WIANEWS WEEK COMMENCING FEBRUARY 24 2013.

ELVIS Saves The Day.

TAKEN YOUR TABLET?

Proposed Reallocation of 2.3 GHz band

VI4POLIO ON AIR

HISTORY OF THE CAN

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEB 24 2013.

FOLLOWING ANNOUNCEMENT IS FOR THOSE LISTENING OR READING BEFORE FEB 24

Hello Everyone, I'm Rod VK2LAX

Still up listening to the WIA broadcast? You'll need a good night's sleep
Don't forget what's on tomorrow?
It's Wyong Field Day!

Gates open at 6.30am so it's an early night or no bargains at the flea market.

Oh, and the traders open at 9am.

And you'll need that early start or you'll miss the free shuttle bus from Wyong station And don't forget the demonstration of transmitting and receiving equipment on the brand new 630 metres (472-479KHz) band

But no matter what time you get there's still the lucky gate prizes, lectures and raffle to interest everyone who comes to the premier Amateur Radio event in Australia.

Adults $15 under 17 free.

See you tomorrow at Amateur Radio's Big Day Out!

Proudly brought to you by Central Coast Amateur Radio Club Inc.

And do you also know what tomorrow is? It's National Tortilla Chip Day!

ELVIS Saves The Day.

Power FM/3BA transmitter saved from fire

Power FM and 3BA in Ballarat, Victoria, Australia had a lightning strike on the hill where their transmitter is housed causing a bushfire.

Thanks to a massive effort by the CFA and DSE, with the help of Elvis (the air crane, not the allegedly dead singer) the transmitter hut was saved but fairly singed and they've been running off generator power for some time.

This happened whilst technician is overseas so the GM spent most of his weekend on site getting new air conditioner units installed and ash out of the equipment!

The joys of radio!

For the full Radio Today story with pictures
http://radiotoday.com.au/20-contributors/2114-power-fm3ba-transmitter-saved-from-fire.html

TAKEN YOUR TABLET?

current.com.au writer Patrick Avenell in an article on retail sales shows how the lead up to Christmas 2012 was the first month in Australian retail history that the value of tablet sales exceeded notebook sales.

The pre-Christmas tablet market was strongly focused on Apple's iPad and iPad mini products and the co-branded Nexus 7 from Google and Asus. Even though there was some debate over the success of these tablets, JB Hi-Fi CEO said that only stock shortages prevented even greater sales.

Meanwhile, the value of headphones sales in the three months leading up to Christmas was equal to the entire home audio category, demonstrating the remarkably robust nature of that category.

Unlike other categories, such as TV, which have chased greater volumes through lower prices, headphone suppliers have lured consumers to high-end, expensive models with clever marketing and brand endorsements.

Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Proposed Reallocation of 2.3 GHz band

Last week the ACMA informed the WIA of proposed changes to spectrum usage in the 2.3 GHz band, which will result in Advanced Licensees losing access to 2300 - 2304 MHz.

The ACMA proposes to acquire the spectrum for LTE radio purposes. LTE, or long-term evolution, (marketed as 4G LTE), is a wireless standard for high-speed data over mobile phones and data terminals.

The proposed change gives LTE services the full 100MHz segment from 2300 - 2400MHz, or twenty 5MHz LTE channels, and naturally the government revenue from any resulting spectrum auction would be very significant, conservatively estimated at about $100M.

Losing any spectrum is always a great concern to radio amateurs.

This secondary allocation spectrum is the only viable option for Earth-Moon-Earth (EME) contacts to Region II (where the EME activity is on 2304 MHz) or Region I (which uses 2320 MHz).

Australian radio amateur EME activity would then be confined to 2400 MHz and above, where ISM and Wi-Fi equipment is likely to cause unacceptable interference.

The ACMA plans to recommend the change to the Minister for Broadband, Communications and the Digital Economy, and make the changes under section 153B of the Radiocommunications Act 1992.

If the Minister approves the change radio amateurs will probably lose access to the spectrum in 2015.

However, before making such a recommendation to the Minister the ACMA is required to undertake extensive consultation with stakeholders, and has prepared the consultation paper.

The ACMA will also be writing to all Advanced Amateur Radio Operators (who are affected by this proposal) to provide them with a copy of the notice and inviting their comments.

A link to the consultation paper is in a news item on the home page of the WIA website (wia.org.au). Radio amateurs are encouraged to forward their comments to the ACMA by Wednesday 27th March 2013.

The WIA is also particularly keen to hear of people who are using the 2.3GHz spectrum. If you are using 2.3GHz please send an email to the WIA with some

brief details of you activity in that band.

This is Phil Wait, VK2ASD, for the WIA.

About - 24 February 2013, 0'52"

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

Hosted in the Maritime Hub of Fremantle in Western Australia, the 2013 Conference in May offers you the best in Amateur Radio, with seminars, workshops and social activities for Amateur Radio enthusiasts and their partners. Hosted by Western Australian Amateur Radio Clubs and held at the Tradewinds Hotel in Fremantle, it's going to be your event. Why should you make the trip across the globe to Western Australia to visit the most isolated capital city in the world? Find out!

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

Audio - VK4RG calling in 8am net

That is the sound of Ron VK4RG- calling in the 8am net for Ipswich and District Radio Club since July 1986.

Last year the club celebrated 50 years. A highlight was a 50 years dinner held at the Ipswich Turf Club with a display of club memorabilia.

Several members also agreed to share their memories in front of a video camera.

A 27 minute video has been produced with some great yarns, including the vital role amateur radio played during the 1974 Brisbane and Ipswich floods. While it was not possible to hear from all members, the stories and vision are a broad representation of the strong bond the hobby of amateur radio has forged between members, partners, friends and family for half a century.

The video is now on YouTube. See the text version of WIA news for the link.

http://www.youtube.com/watch?v=5K1eg3X-WxU

Reporting from Ipswich, this is Allan VK4FABR

WIA & VK7 Regional News Broadcasts on UHF CB.

Spreading the news to a wider audience, VK7FRIK is broadcasting WIA National news and VK7 Regional news on UHF CB in the Burnie area.

They can be heard on UHF Channel 15 on Sundays at 09:00 and Thursday nights at 8pm.

If you know someone in the Burnie and surrounding areas that may be interested in becoming an amateur radio operator and has a UHF CB why not let them know about the broadcasts so they can tune in.

INTERNATIONAL NEWS With thanks to IRTS, IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

World Amateur Radio Day 2013

Each year on 18 April, radio amateurs around the world celebrate World Amateur Radio Day. On that day in 1925 the International Amateur Radio Union was founded.

In 1913 there occurred the first recorded instance of amateur radio being used to provide communications in a natural disaster, during severe flooding in the Midwest of the United States.

Accordingly, the theme of the event for 2013 is "Amateur Radio: Entering Its Second Century of Disaster Communications."

Activities on the occasion of World Amateur Radio Day 2013 can be a great opportunity to spread the word about what the "hams" are doing in the field of disaster communications in the 21st Century.

MORE ON PHONES IN SPACE

BBC say that the world's first 'smartphone-sat' project called STRAND-1 will be ready to launch at the end of February.

The STRAND-1 CubeSat will carry a Google Nexus One Android smartphone into space to demonstrate the feasibility of using cheap smartphone's electronics to control a spacecraft.

Also included will be a software-based speech synthesizer to commemorate the U-O-SAT family of amateur radio satellites that were launched in the 1980 s.

There will also be an amateur radio AX.25 packet radio downlink on 437.575 MHz.

The STRAND-1 satellite was built in Guildford in the United Kingdom by volunteers from the Surrey Space Centre and Surrey Satellite Technology Limited in their spare time. It is planned to be launched Feb 25 into a 785 km orbit by an Indian Space Research Organization rocket.

More is on-line at www.amsat-uk.org

==========

NEWS FROM ARNEWSLINE USA

TV STATION LAUNCHES BALLOON TO EDGE OF SPACE

Charlotte NBC affiliate WCNC, decided to do what ham radio operators have been doing for many years the world over. That being to put some consumer grade video cameras inside a box, tie it to a helium filled balloon and launch it toward near-space. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the story of this unexpected extended flight:

--

Corrie Harding is WCNC's news director. He says that he saw a video on YouTube of two people launching a beer can toward space and wanted to see if his station could do the same thing. So with the help of Hackerspace Charlotte the station took two Go-Pro cameras, a lunchbox, a helium filled balloon, a 3D model of an astronaut with meteorologist Larry Sprinkle's face attached and launched it to see how high it would reach.

The balloon rose to an altitude of 102,457 feet before breaking and sending both the cameras and the astronaut model plummeting back toward Earth. The package took 3 1/2 hours to ascend and 45 minutes to fall back to Earth. The station says that the package was found 25 days after the balloon was found by an air search lying in several acres of briars 172 miles from where it launched.

You can watch the video of the flight and the payload recovery at tinyurl.com/wcnc-balloon.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

==========

IRTS NEWS DESK

In June 2009 the Wireless Telegraphy (Amateur Station Licence) Regulations 2009 came into force which changed individual Amateur Station Licences from annual licences to lifetime licences.

Whilst the licences are lifetime licences, under the regulations licensees are required to confirm the details of their licence to ComReg every 5 years.

ComReg will begin advising licensees how to comply with this requirement in 2014. However ComReg has yet to determine how this process will take place but will endeavour to make it as smooth as possible

This weekend February 23 and 24 VI4POLIO is activated by members of "Rotarians Of Amateur Radio."

This activity celebrates Rotary International's 108th birthday and their commitment to eliminate Polio worldwide

ROAR WORLD PRESIDENT, Bill, VK4ZD wife Diane VK4HH and Daughter Alizah Pomery VK4FOXE, also a dedicated Rotarian will operate VI4POLIO from South East

Queensland.

V 47 JA will again be operating from his Calypso Bay, St. Kitts, vacation home until March 21st.

Activity will be on 160 through 6 meters and will include 60 meters.

V 47 JA also advised Amateur Radio Newsline that he plans to take part in the CQ 160 Meter Contest this weekend February 22nd through the 24th and the ARRL International DX Contest on March 2nd and 3rd, both on SSB.

QSLs via W5JON either direct or electronically via Logbook of the World.

8 P 9 RM from Barbados starts February 26th.
His operation will be on 160 through 6 meters with a focus on CW and the lower bands. QSL via W 1 VE.

Bill Moore NC 1 L, the ARRL's Awards Branch Manager says that the current 5 X 8 C operation from Uganda, along with the T 6 TJ and T 6 BP operations from Afghanistan have been approved for DXCC credit.

If you've had cards declined (except Logbook of the World applications) please send an e-mail to bmoore@arrl.org to be placed on the list for an update.

If your QSOs were confirmed only via Logbook of the World, they were not imported to DXCC since at the time of your application these were not approved. Logbook of the World confirmed QSOs' can be reclaimed via your next submission only.

Also from Bill word that the Z 81 A and Z 81 D operations commencing back in 2012 from Republic of South Sudan have also been approved,

CELEBRATING 50 YEARS OF THE ALGERIAN AMATEUR RADIO ASSOCIATION

Algerian hams will activate special event callsigns 7 T 9 A and 7 T 50 ARA.

This to celebrate the 50th anniversary of the Algerian Amateur Radio Association. QSL both callsigns by the Bureau.

DISCUSSION POINT

What use is an f-call?

In the past I've talked about experimentation. It's an activity that lies at the heart of Amateur Radio. In essence, Amateur Radio is a license to experiment. On the face of it, our license is permission to operate radio equipment on certain frequencies and using certain transmission modes, but that's an outcome that came after the experimentation.

As an author on Wikipedia puts it, "Throughout the history of amateur radio, we have made significant contributions to science, engineering, industry, and social services. Research by amateur radio operators has founded new industries, built economies, empowered nations, and saved lives in times of emergency.

"

Over the past little while I've heard some Amateurs exclaim that doing something was not allowed, or not done. I've heard people claim exclusive use of a frequency or heard them say that a proposal being made was not suitable for some or other reason.

For example, there is nothing saying that a slow-scan 'net cannot be run across a local repeater, or a temporary EchoLink node configured during a regular 'net, or the news being broadcast live, rather than from a pre-produced audio file.

I find it interesting that a hobby that includes the notion, nay, is built around the notion of experimentation, can in fact harbour such views.

If you have a license and you have a desire, that should be all that is required to go the next step, that of coming up with new and interesting ideas on how to use radio to do things.

As a student of life I have found myself surrounded by people telling me that things cannot be done. I find it surprising that this view is possible within Amateur Radio.

If you have an experiment that you'd like to try, I'd like to encourage you to go about your business and do just that.

I'm Onno VK6FLAB

REWIND

HISTORY OF THE CAN

Ear, Ear: a brief history of headphones

Headphones have been with us since the beginning of the 20th century when they are said to have been invented by one Nathaniel Baldwin who produced early models in his kitchen and later interested the US Navy in their adoption. They were the only way to hear the faint signals coming through the air by radio as the age of loudspeakers had not yet arrived.

With the advent of broadcast radio they again were the only way of hearing the signals, and even when loudspeakers did come on the scene, headphones created a niche for themselves which still exists today.

These early devices, which used moving iron drivers, were sensitive enough but lack of damping made for poor sound quality. The impedance needed for telegraph work was around 75 Ω but for radio reception they had to be more sensitive still and this raised their impedance to around 2000 Ω to match the outputs of the triode anodes of the receivers of the time.

Today these values have changed somewhat. Low-impedance phones are typically 16-32 Ω and high-impedance types are between 100 and 600 Ω. As the impedance increases, more voltage but less current is needed and the loudness for a given voltage decreases. With low voltage, very common in much equipment, the impedance has decreased.

Early headphones were very uncomfortable to wear for any length of time because of the hard wooden and then plastic cases that contained the workings and the usually tight headbands to which they were attached. Their very limited frequency response and construction that made them prone to distortion were strong discouragements for prolonged wearing and listening.

For a while, headphones were the only way to hear radio and telegraph signals as the early speakers were not only large and cumbersome but also very insensitive and again, prone to distortion. But as speakers got better, headphone use by the general public declined. However, it expanded in specialised industries such as the maritime and the budding aviation industry where both sound security and ease of hearing were essential.

Technology took a quantum leap forward with the advent of the moving coil, also known as the dynamic, headphone and this has become the most common device. It reduced background noise and made individual voices recognisable above the hiss and crackle of earlier devices while other technologies such as the electret and balanced armature have further improved quality.

These advancements turned makers towards making their headphones more comfortable for the wearer, recognising that this was a prerequisite for long-time wearing by specialised users. Soft surrounds, lighter units and adjustable headbands all contributed to a much more pleasant wearing experience.

Hand in hand with this came moves to exclude extraneous noise, in some cases made all the more important because by now headphones had reached a point of being a hi-fi device comparable with the best speakers.

Today, the best noise-cancelling phones are in-ear canal devices or closed back types while open back and ear bud versions give some noise isolation as well. For really effective noise cancellation, closed back phones attenuate by 8-12 dB but in-ear devices are even better at 10-15 dB.

Headphones and headsets (those with a microphone attached) are widely used in many industries. Emergency services are particularly suited to wireless headphones, as workers need to have free hands at all times and not have their movements impeded by equipment.

Mobile phone users are increasingly turning to Bluetooth for a hands-free means of communication while even office phones are going wireless for the freedom they afford. In the mining industry, especially long-wall underground mining, safety is paramount and radio/phone equipment has to be intrinsically safe because the smallest spark could cause a disastrous explosion.

Although jet engines are today nothing like as noisy as their forebears, they still represent a major source of noise in all aircraft. So for pilots, radio operators, navigators in the air force and anyone else who has to wear a headset or headphones for a long time, both comfort and

outside noise exclusion are important factors that equipment manufacturers have gone a long way to take into account.

And while the many technical improvements were going on, the price per unit has been falling and the choice has been rising.

With the advent of first the miniature, portable cassette player and later the iPod, tiny ear bud phones have taken the market by storm. They are now used by many two-way radio operators because they are so small, unobtrusive and efficient.

Two technologies seem likely to dominate the headphone market in the near to medium future. Unified communications (UC) is an integrated set of voice, data and video communications. Headset manufacturers are providing UC-certified headsets to integrate directly into certain platforms. They are now available in wireless for hands-free communication.

According to a Frost and Sullivan report on the industry, UC would appear to be a growth area that is going to provide huge versatility as it effectively links home landline phones, mobile phones, videoconferencing, email and software driven phones that allow calls to be made across the internet without specialised equipment other than a computer.

The second technology is wireless headsets, as mentioned previously. Allowing a freedom from cables and plugs, it is increasingly being used in control centres for emergency services and by the general public in a range of applications.

In whatever shape or form, headsets and headphones have provided clear hearing and communication for users in many industries. It is a safe bet that the technology will continue to improve in the near future.

THIS IS A TEST TRANSMISSION FROM A STATION IN WELLINGTON NEW ZEALAND

WELLINGTON VHF GROUP TESTS DIGITAL TELEVISION FROM MT BELMONT.

The first test transmission, in cooperation with users of the adjacent spectrum, was a success and the station has been cleared to continue transmitting.

The coverage of the station is now being measured. Reception reports are welcome.

The transmission should be receivable over a 180° arc, from the North West,
through North East, to the South East. There are likely to be two nulls:
one in the direction of Titahi Bay and the other in the direction of Seaview.
Transmissions over the remaining 180° arc are likely to be weaker.

Look for an unmodulated CW carrier on 506 MHz, in the centre of the licensed channel, on horizontal polarisation. The maximum EIRP is +20 dBW (100 Watts), towards the North East.

The CW transmission will continue until the digital modulator is ready.

For more information, and frequent updates, go to: www.vhf.org.nz

WW SPECIAL INTEREST GROUPS --- ILLW

Jim Linton VK3PC says the International Lighthouse and Lightship Weekend continues to grow

This 48 hour fun event, now in its 16th year and held on the third full weekend of August, has reached 150 registrations.

With 25 countries registered so far, Germany has the most on 35 closely followed by Australia, England and the USA.

Australia with 34 registrations has Victoria is in the lead on nine, followed by Queensland on eight, South Australia and Tasmania seven, then Western

Australia with three.

Those participating promote public awareness of lighthouses and lightships and their need for preservation and restoration.

The International Lighthouse and Lightship Weekend is on August the 17th and 18th. Visit its website illw.net to make an online registration, read the guidelines and explore it for more details.

Amateur Radio Supplies announces second giveaway to promote youth in Amateur Radio

Amateur Radio Supplies in the USA have announced a new biannual giveaway to promote youth in amateur radio DXing and contesting.

"Getting on HF (high frequency) in today's economy is very challenging for many, but especially for our youth operators," said Jeff Demers, owner, Amateur Radio Supplies. "Many youth operators are unable to purchase the needed equipment to get on the air.

Amateur Radio Supplies will give another complete high frequency station to this their 2nd selected applicant.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

http://forums.qrz.com/showthread.php?380686-West-Tyrone-Amateur-Radio-Club-St-Patricks-Day-Special-Event-Station&goto=newpost

The West Tyrone ARC will be taking part in the St. Patrick day
celebrations on Monday 18th March 2013 in Omagh, Co Tyrone.

The club will be running a special event station using the call sign
GB1SPD. They will be operational from the Strule Arts Centre in the Heart
of Omagh Town during Omagh District Council St Patrick Day Parade and
Festival.

The club will be operating on HF, VHF/UHF, Echo Link and Digital Modes
between 11am & 5pm.

We look forward to the prospect of working as many stations as possible.
Special Event QSL cards will be available to those who wish to have a
conformation of the QSO.

==> + FCC ENFORCEMENT NEWS: FCC DENIES CALIFORNIA MAN'S PETITION FOR
RECONSIDERATION AND UPHOLDS $24,000 FINE FOR UNLICENSED RADIO
OPERATIONS, REFUSING INSPECTION OF RADIO EQUIPMENT

In June 2011, the FCC issued a Forfeiture Order in the amount of
$24,000 to Kevin W. Bondy of Encino, California for engaging in
unlicensed radio operation and intentional interference to licensed
radio operations and for refusing to allow an inspection of his radio
equipment by FCC personnel. Following a Petition for Reconsideration
filed by Bondy, the FCC issued a Memorandum Report & Order on February
15, upholding the $24,000 fine.
```

In assessing the $24,000 fine, the FCC noted that it was responsible for making and enforcing regulations to prevent interference and to maintain control over the use of the radio spectrum in a manner that promotes the public interest and convenience. "Bondy's acts cut at the heart of the Commission's responsibilities to protect the nation's airwaves and regulate use of the spectrum," the 2011 Forfeiture Order said. "Bondy operated a radio without a license on the specific frequencies assigned and licensed by the Commission to The Oaks Shopping Center for the explicit and expressed purpose of prohibiting The Oaks's use of its licensed frequencies. This type of conduct inhibits the Commission's ability to effectively regulate and maintain control over the use of the spectrum and will not be tolerated." Read more here <http://www.arrl.org/news/fcc-upholds-california-man-s-24-000-fine-for-unlicensed-radio-operations-refusing-inspection-of-radi>.

==> + PUBLIC SERVICE: HAMS ACROSS NEW ENGLAND AND THE MARITIMES RESPOND TO BLIZZARD

As a blizzard swept across New England February 9-10, SKYWARN was ready. The storm dumped heavy snowfall -- with some areas receiving upwards of 3 feet of snow -- as blizzard conditions brought hurricane force winds that created power outages and significant tree and power line damage over Southeastern Massachusetts and Rhode Island. ARRL Eastern Massachusetts Section Emergency Coordinator Rob Macedo, KD1CY, helped lead operations at WX1BOX, the Amateur Radio station at the National Weather Service office in Taunton, Massachusetts, where hams were active for 28 continuous hours. Macedo also serves as the ARES SKYWARN Coordinator for the NWS office in Taunton.

The blizzard did not just affect the New England area -- Canada caught the brunt of the storm, as well. According to CANWARN's Jim Langille, VE1JBL, CANWARN members received messages from Bob Robichaud, VE1MBR, at the Atlantic Storm Prediction Centre in Dartmouth, Nova Scotia to let them know of the storm and that there was the possibility of an activation. CANWARN is the Canadian equivalent to SKYWARN. Read more here <http://www.arrl.org/news/hams-across-new-england-and-the-maritimes-respond-to-blizzard>.

==> + PUBLIC SERVICE: AMERICAN RED CROSS TO PHASE OUT EMERGENCY COMMUNICATION RESPONSE VEHICLES

The American Red Cross has made the decision to phase out and decommission its Emergency Communication Response Vehicles (ECRVs) due to changes in technology, as well as a new satellite system and other factors regarding the vehicle fleet. "Retrofitting the decade-old vehicles with new equipment is not a good use of donated funds, as the long-term strategy is to move to more portable systems," American Red Cross Disaster Services Technology Manager Keith Robertory, KG4UIR, told the ARRL. "This is consistent with the trends in the telecom and technology industries."

The American Red Cross will be removing the Amateur Radios from the ECRVs as part of the decommissioning process. These radios will either become part of the deployable inventory or provided to the local American Red Cross chapter to build local capacity. Robertory explained that from a radio perspective, the American Red Cross has a variety of different kits for amateur, business and public safety bands covering HF, VHF and UHF with portable radios, mobile units and base stations: "Two-way radio remains a valuable tool, providing communications in the initial days or weeks of a disaster, until normal communications is restored. Each American Red Cross chapter should continue with -- and improve -- the relationship with their local Amateur Radio operators. In a disaster, Amateur Radio will be the fastest deployed radio network because operators already live in the impacted communities." Read more here <http://www.arrl.org/news/american-red-cross-to-phase-out-emergency-communication-response-vehicles>.

==> + AMATEUR-CREATED "VARICODE" ADOPTED AS ITU RECOMMENDATION

On Tuesday, February 19, Fran&#65533;ois Rancy -- Director of the Radiocommunication Bureau of the International Telecommunication Union -- announced the simultaneous adoption and approval by correspondence of a new Recommendation entitled Telegraphic Alphabet for Data Communication by Phase Shift Keying at 31 Baud in the Amateur and Amateur-Satellite Services.

The alphabet -- commonly called "Varicode" because the more frequently used characters (in the English language) occupy fewer bits -- was developed by Peter Martinez, G3PLX, in the 1990s. Martinez was awarded the ARRL Technical Innovation Award for the year 2000 by the ARRL Board of Directors for his development of PSK31, which uses Varicode for transmission efficiency in much the same way as the Morse code. In ITU parlance, it now becomes Recommendation ITU-R M.2034.

Adoption of the Recommendation is the culmination of work conducted in ITU-R Study Group 5 and its Working Party 5A during 2011 and 2012. Working Party 5A is responsible for studies of techniques and frequency usage in the Amateur and Amateur-Satellite Services, as well as certain aspects of the land mobile and fixed services. Read more here <http://www.arrl.org/news/amateur-created-varicode-adopted-as-itu-recommendation>.

==> AUSTRALIAN AMATEURS MAY LOSE 2300-2302 MHZ

The Australian Communications and Media Authority (ACMA <http://www.acma.gov.au/>) -- that country's equivalent to the FCC -- has proposed changes to spectrum usage in the 2300-2302 MHz band that will make it off-limits to Australian amateurs as of 2015. The ACMA wants to re-allocate the spectrum to LTE (Long-Term Evolution) wireless data systems, the kind popularly used for mobile broadband applications. The proposed change would give LTE services 100 MHz between 2300 and 2400 MHz.

According to the Wireless Institute of Australia (WIA <http://www.wia.org.au/>), this secondary Amateur Radio allocation is the only viable option for Earth-Moon-Earth (EME) contacts between Australia and IARU Region 2 (where the EME activity is on 2304 MHz) or Region 1 (which uses 2320 MHz). If the reallocation goes through, Australian EME activity would then be confined to 2400 MHz and above, where ISM and Wi-Fi equipment are likely to cause interference.

"Amateurs in the United States are in no immediate danger of losing 2300-2305 MHz because the use of the 2300-2400 MHz band by various radio services in this country is quite different from most of the world," explained ARRL Chief Executive Officer David Sumner, K1ZZ. "Unfortunately, our colleagues in many other countries are facing the same challenge as in Australia, as the pressure grows for commercial mobile broadband services." -- Thanks to Phil Wait, VK2ASD, and the Wireless Institute of Australia for the information

==> + CHECK OUT THE MARCH ISSUE OF QST

The March issue of QST -- our annual antenna issue -- celebrates that integral part of any radio amateur's station. So grab your print edition of QST -- or settle in with your computer or tablet to read the digital version <http://www.nxtbook.com/nxtbooks/arrl/qst_201303/index.php> -- and discover what the March issue has to offer.

Usually it's possible to cover the full width of an amateur band with a single dipole. But when it comes to 75 meters (SSB) and 80 meters (CW), it gets a bit trickier. In his article "A Wideband Dipole for 75 and 80 Meters," Ted Armstrong, WA6RNC, takes a look at how you can cover 3.5-4 MHz with just one antenna. On the other end of the spectrum, both 10 and 6 meters see a lot of activity. Larry King, N5AFY, explains a way to combine these two hot bands on one antenna in his article "The Technician 6 and 10 Meter Special." And the reason the higher bands are so hot right now? It's all due to the Sun and Solar Cycle 24. In his article "The Sun and the Ionosphere," former NCJ Editor Carl Luetzelschwab, K9LA, explains how that relationship establishes the limits of HF propagation.

While many amateurs envy big antennas, there is something to be said for good things that come in smaller packages. Stan Levandowski, WB2LQF, knows that this is true, especially when it comes to the size of his shack. In his article "The 11 Square Foot Ham Shack," he shows how you can have a comfortable, efficient station in a small footprint. And just as all ham shacks are not created equal, neither is all audio. NCJ Managing Editor Rick Lindquist, WW1ME, explains how "amping it up" may hurt more than it helps in his article "Your On-the-Air Sound."

QST Product Review Editor Mark Wilson, K1RO, takes a look at the Tokyo Hy-Power Labs HL-550FX linear amplifier in this month's Product Review. He says this amplifier "covers 160-6 meters in a compact package." QST Technical Editor Joel R. Hallas, W1ZR, checked out the MFJ-976 and Palstar BT-1500A high power balanced antenna tuners, noting that both

antenna tuners can match most balanced antenna systems on most bands. You can find video overviews of the Tokyo Hy-Power Labs HL-550FX linear amplifier <http://www.nxtbook.com/nxtbooks/arrl/qst_201303/index.php#/54>, the MFJ-976 high power balanced antenna tuner <http://www.nxtbook.com/nxtbooks/arrl/qst_201303/index.php#/56> and the Palstar BT-1500A high power balanced antenna tuner <http://www.nxtbook.com/nxtbooks/arrl/qst_201303/index.php#/58> in the digital edition of the March issue of QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201303/index.php>.

Of course, there are the usual columns you know and have come to expect in the March issue of QST: Happenings, Hints & Kinks, The Doctor is In, Short Takes, Technical Correspondence, Vintage Radio, How's DX? and more. Look for your March issue in your mailbox and in your inbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ARRL SPRING SECTION MANAGER ELECTION RESULTS

Montana, Arizona and Iowa will be getting new Section Managers beginning April 1. In the only contested race this election cycle, George Forsyth, AA7GS, of Great Falls, beat out incumbent ARRL Montana Section Manager Doug Dunn, K7YD, of Livingston. Forsyth received 199 votes, while Dunn received 175 votes; Dunn has served 10 years as Section Manager. Forsyth -- an ARRL Life Member and ARRL Volunteer Examiner -- has been licensed for more than 28 years. He has served as the president and a board member of the Great Falls Area Amateur Radio Club and as a director of the Glacier Waterton International Hamfest. Ballots were counted at ARRL Headquarters on Tuesday, February 19.

Only one candidate was nominated for Section Manager in the Arizona and Iowa Sections. Robert Spencer, KE8DM, of Yuma, will take over from ARRL Arizona Section Manager Tom Fagan, K7DF, of Tucson, who has been in office since 2005. Fagan decided not to run for another term of office. Robert McCaffrey, K0CY, of Boone, will succeed ARRL Iowa Section Manager Tom Brehmer, N0LOH, of Muscatine, who also decided not to run for another term of office. Brehmer has been Section Manager since 2009.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next two-year terms of office beginning April 1: Dale Temple, W5RXU, Arkansas; Jim Brooks, KY4Z, Kentucky; Malcolm Keown, W5XX, Mississippi; Walt Mayfield, KE5SOO, North Texas; Carl Gardenias, WU6D, Orange, and Garth Crowe, N7XKT, Wyoming.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: There was a modest rise in the average daily sunspot numbers over the past seven days, rising 27 points to 78.3, while the average daily solar flux was up marginally, only 1.6 points to 105.6. The geomagnetic indices also went up, with the planetary A index rising from 5.6 to 6.4, and the middle latitude A index rising from 5.1 to 6. But there was a more substantial rise in both the solar flux and sunspot numbers for the past three days, with the solar flux at 104.7, 112.4 and 113.5, and the sunspot numbers at 92, 117 and 106. The predicted solar flux is 115 on February 21-22, 110 and 105 on February 23-24, 100 on February 25-March 3, 95 on March 4-14, 100 on March 15-16, 115 on March 17, and rising to 120 on March 18-20, which represents a peak for the next 45 days. The predicted planetary A index is 8 on February 21-22, 10 on February 23-24, 8 on February 25, 5 on February 26-28, 10 and 8 on March 1-2, 5 on March 3-10, 7 on March 11-12, and back down to 5 on March 13-27. Over the next month, we can look forward to improving HF conditions as we progress toward the spring equinox, which occurs on Wednesday, March 20 at 1102 UTC. Look for more on the ARRL website on Friday, February 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + INTERNATIONAL SPACE STATION EXPERIENCES LOSS OF COMMUNICATIONS WITH GROUND CONTROL

At approximately 9:45 AM EST (1445 UTC) on Tuesday, February 19, the International Space Station (ISS <http://www.nasa.gov/mission_pages/station/main/index.html>) experienced a loss of communication with the ground. At that time, flight controllers in Houston were updating the software onboard the ISS's flight computers when one of the ISS's data relay systems malfunctioned. The primary computer that controls critical station functions defaulted to a backup computer, but it did not allow the ISS to communicate with NASA's tracking and data relay satellites. Mission Control at Johnson Space Center in Houston, Texas was able to communicate with the crew as the ISS flew over Russian ground stations before 11 AM EST (1500 UTC) and instructed the crew to connect a backup computer to begin the process of restoring communications. Once communication was re-established, Expedition 34 <http://www.nasa.gov/mission_pages/station/expeditions/expedition34/index.html>
Commander Kevin Ford, KF5GPP, reported that the ISS's status was fine and that the crew was doing well. Communication systems were restored as of 12:34 PM EST. -- Thanks to NASA for the information

==> ON THE AIR: THREE OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that three current operations have been approved for DXCC credit: 5X8C in Uganda (commencing in 2012) and the T6TJ (commencing in 2012) and T6BP (commencing in 2011) operations in Afghanistan. "If you have had cards for these operations rejected in a recent application, please send an

e-mail <bmoore@arrl.org> to the ARRL DXCC Desk and you will be placed on the list for an update," Moore said. "If your QSOs were only via Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>), they were not imported to DXCC, since the operations were not approved at the time of your submission. LoTW QSOs can be reclaimed via your next LoTW submission. Once updated, results will appear in LoTW accounts, as well as online in the daily listings <http://www.arrl.org/dxcc>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 22 -- NCCC Sprint Ladder
- February 22-23 -- CQ 160-Meter Contest (SSB)
- February 23-24 -- Mississippi QSO Party; North American QSO Party (RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 24 -- High Speed Club CW Contest
- February 24-25 -- North Carolina QSO Party
- February 25-27 -- CQC Winter QSO Sprint
- February 27-28 -- CWops Mini-CWT Test

Next week:

- March 2 -- Wake Up! QRP Sprint
- March 2-3 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>
- March 3 -- DARC 10 Meter Contest
- March 5 -- AGCW YL-CW Party
- March 6-7 -- AWA John Rollins Memorial DX Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 23 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-3>, South Burlington, Vermont
- March 8-9 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfest-1>, Claremore, Oklahoma; ARRL Louisiana Section Convention <http://www.arrl.org/hamfests/louisiana-section-convention-acadiana-53rd-annual-hamfest>, Rayne, Louisiana
- March 16 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-2>, Lincoln,

Nebraska; ARRL West Texas State Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-58th-annual-st-patrick-s-day-hamfest>,
Midland, Texas
- March 23 -- ARRL South Texas State Convention
<http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-3>,
Rosenberg, Texas
- March 29-30 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-3>, Lewiston,
Maine
- March 30 -- ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-2>,
Raleigh, North Carolina
- April 13-14 -- Communications Academy
<http://www.arrl.org/hamfests/communications-academy-2013>, Seattle,
Washington
- April 19-20 -- Southeastern VHF Society Conference
<http://www.arrl.org/hamfests/svhfs-conference>, Cocoa Beach, Florida
- April 19-21 -- International DX Convention
<http://www.arrl.org/hamfests/international-dx-convention-2>, Visalia,
California
- April 20 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-northeast-louisiana-regional-ham-radiofest>,
Monroe, Louisiana
- April 26-28 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-3>, Boise, Idaho
- May 31-June 2 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>,
Seaside, Oregon

To find a convention or hamfest near you, click here

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will allow you to see rec.radio.info-crossposted bulletins, while still filtering out most SPAM or "Velveeta" crossposted to more than 2 newsgroups (as such articles usually do not contain a 'Followup-To:' header):

Score: -9999
Newsgroups: ,.*,
~Followup-To: .

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://static.slated.org/killfile/killfilefaq.htm |

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.antenna Antennas: theory, techniques and construction. |
rec.radio.amateur.boatanchors Vacuum tube-based amateur radio equipment. |
rec.radio.amateur.digital.misc Packet radio and other digital radio modes. |
rec.radio.amateur.dx Discussion, tips, notices and news for DXers. |

rec.radio.amateur.equipment All about production amateur radio hardware. |
rec.radio.amateur.homebrew Amateur radio construction and experimentation. |
rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.amateur.space Amateur radio transmissions through space. |
rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are
appropriate, but reserve the right to add groups if we feel it has
broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The
rec.radio.broadcasting moderation team prefers to review all articles |
before posting. Placing rec.radio.broadcasting before rec.radio.info |
on the Newsgroups line should accomplish this. We will typically |
abide by the rec.radio.broadcasting moderation team's decision whether |
the article is appropriate for rec.radio.info. |

- rec.radio.amateur.moderated is also a moderated group. As the
rec.radio.amateur.moderated Moderation Team manages both
rec.radio.amateur.moderated and rec.radio.info, we can manage
crossposting and approvals for both newsgroups. The
rec.radio.amateur.moderated group does not allow crossposting to other
discussion newsgroups, whether moderated or unmoderated. However, we
would like to manage rec.radio.info as consistently as possible with
how it was done by previous moderators, including the grandfathering
of existing regular postings. Therefore, the submitter can choose
rec.radio.amateur.moderated or the other unmoderated
rec.radio.amateur.* discussion newsgroups for crossposting, but not
both.

- Any FAQ or informational posting approved by the
rec.answers/news.answers moderation team that is also crossposted to
any rec.radio.* newsgroup (besides just rec.radio.info) is also
automatically pre-approved for rec.radio.info. See below for more
information.

If you post to another moderated group, it may be better to make special
arrangements with both moderators before posting by contacting us at our
administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders
can be configured to show you cross-posted articles only once anyway;
not everybody reads rec.radio.info; and rec.radio.info was never meant

to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org>

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

474. Amateur Radio Newsline(tm) Report 1854 - February 22 2013

Newsgroup: rec.radio.amateur.misc
Date: 2013-02-22 10:00:14 UTC

Amateur Radio Newsline(tm) Report 1854 - February 22 2013

Amateur Radio Newsline report number 1854 with a release date of February 22 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian radio amateurs may lose the 2300 to 2302 MHz band; Over the Horizon radar invades 10 meters; amateur satellite allocations on the agenda at I-A-R-U meeting in Vienna; Mainland China manufacturer releases low cost all service multi-mode High Frequency transceiver and zombies invade the nations Emergency Alert System. Find out the details are on Amateur Radio Newsline(tm) report number 1854 coming your way right now.

RADIO LA: VK HAMS COULD LOOSE ACCESS TO 2300 TO 2302 MHZ

Australian amateurs could soon loose access to the band from 2300 to 2302 MHz. Amateur Radio Newsline has the details in this report:

--

The Australian Communications and Media Authority or ACMA has informed the Wireless Institute of Australia of proposed changes to spectrum usage in the 2300 to 2302 MHz band. Changes that will result in Advanced Licensees losing access to that spectrum.

The ACMA proposes to acquire the spectrum for LTE radio purposes. LTE, or Long Term Evolution, marketed as 4G LTE, is a wireless standard for high-speed data for mobile phones and data terminals. The change would give LTE services the full 100MHz segment from 2300 to 2400MHz, which would resultin twenty 5MHz LTE channels

Losing any spectrum is of great concern to Australian radio amateurs as this secondary allocation is the only viable option for Earth-Moon-Earth contacts to Region II where the this activity is on 2304 MHz or Region I which uses 2320 MHz. After the reallocation Australian amateur EME activity would be confined to 2400 MHz and above, where wireless medical and Wi-Fi equipment is likely to cause interference weak signal reception by EME stations. And for hams in VK land it could mean that most EME operations could come to an end.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The Australian Communications and Media Authority plans to recommend the change to the Minister for Broadband Communications and Digital Economy in the near future. If the Minister approves the change radio Australian amateurs will probably lose access to the spectrum sometime in 2015. More on this situation is on-line at wia.org.au (WIA)

**

INTRUDER WATCH: OVER THE HORIZON RADAR HEARD ON 10 METERS

The IARU Region 1 Monitoring Service reports on a mysterious Over The Horizon radar causing interference in the 28 MHz amateur radio band. The mysterious signal disturbs the 28 to 29 MHz segment of 10 meters often with signals are 60 kHz wide, and jumping in bursts.

The location of the transmitter appears to be someplace in the Middle East but so far getting precise bearings have proven to be difficult.

The entire report covering this situation and other intruders to our ham bands can be downloaded free of charge at tinyurl.com/iarums-jan2013. (IARU-R1)

**

RESTRUCTURING: AMATEUR SATELLITE ALLOCATIONS ON THE R-1 AGENDA AT VIENNA

The IARU Region 1 2013 Interim Meeting slated for Vienna, Austreia in April will be discussing two proposals of importance to Amateur-Satellite Service and weak signal users. One that's not very controversial is an amendment to the 28 MHz Bandplan to remove of the downlink only restriction in the 29.300 to 29.510 MHz satellite segment. But the other has raised some eyebrows. The one proposes the introduction of a new satellite downlink band for CW and SSB transponders at 144.000 to 144.035 MHz.

The latter proposal could have the affect of putting United States hams in a rather precarious position. As pointed out on the W6YX VHF Reflector, SSB transmissions are not allowed below 144.100 in the US, even if they come from space. More important is that 144.0 to 144.035 is already used almost exclusively for C-W based Earth-Moon-Earth communications and experimentation and interference from SSB voice would not be very welcome in that spectrum. (IARU-R1)

**

RADIO LAW: RCFT REVERSES DECISION ON NORTHERN IRELAND EXAM

The U-K Radio Communications Foundation Trustees have done a complete about face in regard to a decision made last year not to issue Advanced Radio Amateur Examination pass certificates to two candidates in Northern Ireland. This following internal reviews which had suggested that the results might be unsafe.

Following further consideration of this issue in conjunction with representatives of Ofcom and the Foundation's own internal examination, the committees of Trustees have made a decision to now award the candidates their Advanced Radio Communications Examination Pass Certificates. Also they want to re-emphasize that there is no evidence of wrong doing by the club, its examiners or candidates themselves.

The Radio Communications Foundation Trustees also want to confirm that the Foundation remains committed to ensuring the highest possible standards of integrity in the examination system and will continue post-examination reviews of returned papers to support this objective. The Foundation's Standards Committee will review all examination appeal processes and procedures drawing on lessons learnt in this case.

The Foundation and the club have mutually agreed that no purpose would be served by further public comment on this matter. More o this matter is on the web at www.commsfoundation.org/rce/news. (RCFT)

**

RESCUE RADIO: AMATEUR RADIO GOES TO EMCOMM SCHOOL

An article in the just out March issue of QST Magazine "Amateur Radio Goes To School" will be of interest to anyone involved in emergency communications. Authored by David Witkowski, W6DTW, the article is a report on the annual Disaster Management Initiative Workshop held at Carnegie Mellon University's campus in California's Silicon Valley.

--

W6DTW: "Carnegie Mellon's Disaster Management initiative started a few years ago in an effort to bring academic focus to Public Safety communications and Disaster Response. Most of what we know about disaster response is really empirical. We've developed it over time and through interaction with other responders we've put together a body of knowledge which is suitable but what Carnegie Mellon is trying to do with the Disaster Management initiative is to apply academic rigor to the question of disaster response."

--

According to Witkowski, the Carnegie Mellon University's Disaster Management Initiative is a somewhat unique entity in that it's one of the very few instances where disaster management and disaster communications is being studied in a formal academic setting. It's also distinctive in that the Disaster Management Initiative leadership team of deans and professors and most of the workshop participants are licensed radio amateurs.

Witkowski notes that while the Disaster Management Initiative is about a lot of things aside from amateur radio, that one can definitely see its influence on the research and the annual workshop.

W6DTW's article appears in Rick Palm's Public Service column in the March issue of QST beginning on page 82. If you are involved in any

aspect of emergency service participation, this commentary is must reading. (W6DTW, ARNewsline)

ENFORCEMENT: UNLICENSED OPERATOR ARRESTED FOR THREATS AGAINST TEXAS RADIO CLUB

A man arrested on allegations he used amateur radio to threaten to kill members of a local amateur radio club has been released on bail from the Bexar County Texas Jail.

Twenty-nine year old John David Watkins III, posted a $4,000 bond and was freed before noon Sunday February 17th. This after his having been taken into custody the previous night on two counts of making terroristic threats.

An arrest affidavit states Watkins, known on radio frequencies as "White Noise," was creating interference and illegally transmitting without having the required radio operator license. A member of a radio club met with Watkins in January and told him to stop or the group would report him to the Federal Communications Commission.

Officials said that the next day Watkins allegedly made threats against the person who visited him and against other members of the club, saying he would kill them with an AK-47 rifle. These threats were reported to the police who provided security at the club's next meeting.

At airtime, what motivated Watkins to make the alleged threats or if the matter will go to trial is unknown. (MySanantonio.com, KABB, KSAT, others)

**

ENFORCEMENT: ARREST MADE IN UK UNLICENSED RADIO STATION RAID

A United Kingdom man has been arrested in a raid on an unlicensed radio station in Wolverhampton.

Police and officials from communications regulator Ofcom raided the premises in Park Village, early on Wednesday, February 13th. At that time equipment was also seized, including microphones, a mixer, a computer and associated cabling.

Police said the 33 year old man from the town of Dudley, was arrested on suspicion of offences under the Wireless Telegraphy Act 2006. He has since been released on bail. (BBC)

**

RADIO POLITICS: CONGRESS MAY CHANGE FCC SUNSHINE RULE

A bipartisan group of lawmakers in both the House and the Senate are reintroducing a bill to allow three or more Federal Communications Commissioners to meet in private, as long as no official agency action is taken.

Under current law, something known as the "sunshine" rule prohibits more than two FCC commissioners from talking to each other outside of a public meeting. The FCC Collaboration Act was reintroduced in the House by Representatives Anna Eshoo, John Shimkus and Mike Doyle. Senators Amy Klobuchar and Dean Heller plan to introduce the Senate counterpart.

The bill got sidelined last year when it was tucked in as a provision to a larger bill on FCC reform that Democratic party did not support. Otherwise, modifying the sunshine rule is something both sides of the aisle support. (Ad Week, NAB)

**

RADIO LAW: COURT RULES RFID NOT MARK OF THE BEAST

A very interesting court case that pitted a students religious beliefs versus communications technology has been decided. Skeeter Nash, N5ASH, is near Houston with more:

--

A Texas student who refused to wear a radio tag that tracked her movements on campus has lost a federal court appeal against her school's ID policy.

According to news reports, the 15 year old declined to wear the RFID badge on religious grounds, saying it was the "mark of the beast." After she stopped wearing it she was suspended and went to court where she won a temporary injunction to continue her studies at the school without the RF tag.

Now a federal court ruling has overturned the lower court. It says that if she is to stay at the particular school, she would be required to wear the badge. Otherwise, she would have to transfer to a new school.

The radio tags are used to track attendance, which in turn helps secure school funding.

Im Skeeter Nash, N5ASH.

--

More is on-line at tinyurl.com/student-rfid. (Published news reports)

**

WORLDBEAT: NEW INTERNATIONAL REPLY COUPON INTRODUCED

The Universal Postal Union has introduced the newest model of the International Reply Coupon. The new Doha coupon named for the 25th Universal Postal Congress that took place in Doha, Qatar in October 2012 will replace the current model, known as the Nairobi model.

Although the US Postal Service no longer sells IRC's, they are still available in other countries and post offices in the United States are mandated to redeem them. The Doha model IRC will be available for purchase on July 1st and is valid for exchange until the end of 2017. The Nairobi model remains valid until December 31st of this year. (ARRL)

**

RADIO BUSINESS: LOW COST CHINESE MADE ALL MODE HF TRANSCEIVER FROM CHINA INTRODUCED

A new all mode low priced High Frequency transceiver from China is on the way. Called the Feitong model FT-808 the new radio is being billed primarily as a Marine Band transceiver but its published specifications read more like a mid-range piece of ham radio gear. For instance the FT-808 has a receive range of 500 Khz to 29.9 Mhz and a transmitter that covers 1.6 to 29.9 Mhz. In other words, it covers all the ham radio bands from 160 through 10 and lots more.

The receiver is a double conversion superhetrodyne with both it and the transmitter capable of operating Upper and lower sideband, CW and AM with 100 memory channels. Tuning appears to be by up and down push buttons with a claimed receiving sensitivity of 12 db SINAD and a squelch sensitivity threshold on SSB, CW, and RTTY of less than 5.6uV.

One thing of note. While transmitter power appears to be in the 100 watt or slightly higher range but according to the public spec sheet there appears to be no provision to lock out transmission on 11 meters. This will likely keep it from gaining FCC acceptance for legalized sales in the United States. At least not in its current non locked out 11 meter configuration.

That said, the Feitong FT-808 carries a delivered list price of only $410 U-S dollars. Its complete specifications and a video of an Italian ham radio operation using it on 40 meters is on-line at tinyurl.com/feitong-808-hf. (Sparkys Blog, www.ecvv.com, iv3vjh.me, others)

**

HAM TRADITIONS: HAM RADIO 100 YEARS OLD AT ISU

The history of amateur radio at Iowa State University is described as a technological revolution. This by Jeff Stein who is an Iowa broadcasting historian, author and a former lecturer at Iowa State's Greenlee School of Journalism and Communication.

According to Stein, the fact that Iowa State was one of the first places to pay attention to this technology that ultimately revolutionized our lives in the 20th century is important. This is because it shows that Iowa State has consistently been dedicated to being first in developing communication technologies.

The report of Stein's findings was first reported in The Iowa State Daily where he notes that amateur radio first came to the school over 100 years ago. You can read the entire story by author Kimberly Woo on-line at tinyurl.com/Iowa-State-100. (Cyclone Amateur Radio Club)

**

HAM EDUCATION: FAR ACCEPTING SCHOLARSHIP APPS FOR 2013 TO 2014 ACADEMIC YEAR

The Foundation for Amateur Radio, a non-profit organization with its headquarters in Washington, D.C., plans to administer forty-seven scholarships for the 2013 to 2014 academic year. This, to assist licensed Radio Amateurs in the pursuit of higher education. The Foundation fully funds two of these scholarships. The remainder are administered by the Foundation for various donors.

Licensed Radio Amateurs who compete for these awards must be planning to pursue a full time course of studies beyond high school and be enrolled, or have been accepted for enrollment, at an accredited university, college or technical school. The awards range from $500 to $5,000 with preference given, in some cases, to residents of specified geographical areas or the pursuit of certain study programs. Non-US residents are eligible to apply for some of the scholarships.

To be considered, completed applications must be received at the Foundation by April 15th. Additional information and an application form may be requested by letter or post card sent to FAR Scholarships, Post Office Box 911, Columbia, Maryland, 21044-0911 or by e-mail to dave (dot) prestel (at) gmail (dot) com. Applications are available, for download from the web at tinyurl.com/far-scholarship-2013 (FAR)

HAM HAPPENINGS: NM RADIO CLUB TO CELEBRATE 63RD ANNIVERSARY IN MARCH

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating special event station K5BL on March 23rd. This in celebration of it being one of New Mexico's oldest, continuous operating radio clubs.

K5BL will be commemorating the clubs 63rd anniversary by operating from 1500 to 1400 UTC as near as possible to 14.330 and 21.337, MHz. A special QSL card for the event will be available by request. To get

one, send your QSL card confirming your contact with a business sized self addressed forever stamped envelope Special Events Station K5BL Anniversary, in care of the Mesilla Valley Radio Club, P.O. Box 1443, Las Cruces, New Mexico 88004-1443.

And less we forget to mention, a very happy 63rd to the Mesilla Valley Radio Club. (K6SAS)

WORLDBEAT: TV TRANSMITTER CAUSES MARITIME INTERFERENCE TO NEW ZEALAND VHF DISTRESS CHANNEL

An Interesting interference case has been solved down-under as we hear from Amateur Radio Newsline's Jim Meachen, ZL2BHF:

--

A recent case of a very low level of interference affecting the maritime VHF distress and calling channel 16 at two of New Zealand's Maritime sites has finally been solved. The investigation into the interference took seven days to resolve. It involved contacting ships and shore stations on the New Zealnd coast, as well as both ground and helicopter searches.

Eventually a very low level signal was detected. Direction finding indicated it was from a broadcast transmission location about 120 km from one of the affected sites and 185km from the other. A visit to the broadcast transmission site traced the low level interference to a spur from a high power television transmitter. The cause of the interference turned out to be an inspection panel which had been left open for maintenance purposes.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

Word is that sealing the inspection panel solved the problem immediately. (WIA)

**

HAM RADIO IN SPACE: UKUBE-1 TO LAUNCH IN JUNE 2013

The United Kingdoms' Herald newspaper reports that the UKube-1 CubeSat will be launched in June and will carry an amateur radio transponder to orbit.

According to the news story, the spacecraft is being built for the UK Space Agency by Clyde Space. If all goes as announced its launch will take place from the Baikonur Cosmodrome in Kazakhstan on a Soyuz-2-1B booster this spring.

UKube-1 will carry a set of AMSAT-UK FUNcube boards to provide an amateur radio 435 to145 MHz linear transponder. Also as a part of the payload will be a 1200 B-P-S-K beacon for educational outreach.

The newspaper also reports that Clyde Space has announced plans to build a facility in the United States. More is on-line at tinyurl.com/uquibe-june-launch (The Herald)

**

RADIO IN SPACE: SCIENTISTS OFFER SUPPORT FOR NASA'S NEXT MARS ROVER

Scientists have applauded a NASA decision to send another rover to Mars in 2020. At the same time they are stressing that the mission should pave the way to return Martian rocks to Earth. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

The new Mars rover mission was announced last December 4th by NASA's Associate Administrator for Science John Grunsfeld. This, at the annual meeting of the American Geophysical Union in San Francisco.

At that time it was announced that the next rover will share some design features with NASA's Mars Science Laboratory Curiosity rover, which landed on Mars in August to begin at least a two-year mission.

Now, in a pair of statements released January 28th ad 30th, two well-respected groups of researchers have shared their views on the plan to send another robotic explorer to the Red Planet in seven years. The Planetary Society and the American Astronomical Society's Division for Planetary Sciences applauded the announcement that NASA plans another mission to the Red Planet in 2020. At the same time both strongly suggested that the mission should have the capability to collect and store Martian rock samples as recommended by the National

Research Council's Planetary Science Decadal Survey.

NASA has released very few details on the proposed new rover plan. Because of this it's still unclear whether the robot will be able to collect Martian rock samples intended to be brought back to Earth.

For the Amateur Radio Newsline, Im Heather Embee, KB3TZD, in Berwick, Pennsylvania

--

It should be noted that most plans for returning Mars samples are multi-phase, with an initial mission to collect and store the rocks. Later missions would rendezvous with the collector and return the samples to Earth. (Space & Science)

**

ON THE AIR: ROTARY INTERNATIONAL END POLIO NOW CAMPAIGN

On Saturday, February 23rd and Sunday, February 24th, amateur radio operators around the world will take part in a special operating even. This to raise awareness about Rotary International's End Polio Now campaign.

The hams are all members of the Rotary International group Rotarians on Amateur Radio. They will be calling "CQ Rotary" or "CQ Polio" and will be prepared to talk about the Rotary Club and the accomplishments and challenges of the End Polio Now campaign. This is a joint effort of Rotary International, the World Health Organization, and other non-governmental organizations.

More information is on-line at www.endpolio.org. Questions go by e-mail to Dan Romanchik, KB6NU, to endpoliono (at) kb6nu (dot) com. A certificate or QSL card will be available on request to verify contacts made. (KB6NU, ARRL PR Remailer)

DX

In DX, G3RWF plans to be in Rwanda between March 4th to the 12th and has requested the callsign 9X0NH. The license should be valid for all of 2013 and he could return later in the year. Activity will be mainly CW. QSL via G3RWF.

A group of Japanese operators will be active from Rodrigues Island from March 1st to the 10th as 3B9DX. They will be operational on 80 through 10 meters using CW, SSB, RTTY and PSK31. QSL direct only via EA5GL

G3SWH and G3RTE will be operational from Guadalcanal, in the Solomon Islands, between February 18th and the 28th. Their activity will be on CW only on 80 through 10 meters. QSL via G3SWH.

SP9FIH and SP6AXW will be active stroke as PJ4 from Bonaire between April 8th to the 20th. Operations will be on 160 through 6 meters using SSB and RTTY. QSL only via SP9FIH

KK4GV will be active as J79GV from the northeast side of the island of Dominica between March 8th to the 17th. His operation will be holiday style and SSB only. QSL via his home callsign either direct or by the Bureau.

Lastly, N7QT will be heading back to Saint Lucia to operate stroke J6 on a suitcase between April 5th to the 16th. Activity will be on 80 through 10 meters using CW, SSB and RTTY and PSK. He will also be operating field portable from the St. Lucia beaches and mountain tops. QSL as directed on the air.

(Above from various DX news sources)

THAT FINAL ITEM: THE DEAD RISE AS HACKERS TARGET EAS NATIONWIDE

And finally this week, Inside Radio reports that the FCC, FBI and several state and local law enforcement agencies are investigating what now appears to have been a widespread hack attack on the United States Emergency Alert or EAS System. One that claimed that the dead were rising from their graves. Amateur Radio Newslines Steffan Kinford, N8WB, has the details:

--

The full extent of the phony zombie EAS attack isn't yet clear, but several stations recently aired a bogus EAS message about zombies attacking people and warning the public to stay clear of them.

Engineers say the hackers apparently had a solid knowledge of exactly how the EAS operates and how to breach it. One of these is Bonneville director of engineering John Dehnel. He says the company's Salt Lake City stations were among the targets. While the fake message never made it to KSL 1160 AM which is the primary message distribution or LP1 station for the area or its sister station KSL-TV, the bizarre communication was broadcast on the cluster's three secondary or HD2 stations.

Dehnel believes the culprit was EAS activation boxes that were left set to factory-installed default passwords to accommodate tech support crews. His guess is that before the attack you would likely have found most everyone still had the default password on it. The FCC has since issued a warning notice to broadcasters and other EAS decoder users for them to immediately change the passwords to ones that are propriety and secure.

The Bonneville HD2 stations reportedly fowarded the bogus EAS messages about one hour before a Great Falls, Montana television station that actually was the one that made the news headlines for airing the phony message. Several other stations also aired a fake EAS message,

including TV stations in Albuquerque and Marquette, Michigan. It's possible other stations also broadcast the alert but if there were any they are not known as this newscast is being prepared.

For the Amateur Radio Newsline, Im Stephan, Kinford, N8WB, in Wadsworth, Ohio.

--

You can read more on this very strange story at tinyurl.com/zombie-eas and tinyurl.com/montana-eas-hack (Inside Radio, RW, other published reports)

KARC Cram Course @ Frontier Communications March 9, 2013 (Charleston, WV)

Posted: 22 Feb 2013 06:52 AM PST
http://forums.qrz.com/showthread.php?380840-KARC-Cram-Course-Frontier-Communications-March-9-2013-(Charleston-WV)&goto=newpost

The Kanawha Amateur Radio Club, Inc. (KARC) will conduct an Amateur Radio Technician Cram Course on Saturday, March 9, 2013 at Frontier Communications, 1500 MacCorkle Avenue S.E., Charleston, West Virginia 25396. The first Cram Course will begin with check-in at 7:30 a.m. with instruction beginning at 8:00 a.m. Testing will begin at 1:00 p.m. The second Cram Course will begin at 1:00 p.m. with Check-In at 12:30 p.m. and testing at 5:00 p.m. The public (all ages) is cordially invited to participate in the course. Technician Class instructional materials will be provided to the students at no cost. There is a $15.00 fee for Technician, General and Amateur Extra Class test. Technician Class Students must have two pieces of identification, one of which must be a photo ID. Students should bring pencils and yellow high liters. General and Amateur Extra Class tests will also be given at 1:00 p.m. and 5:00 p.m. Upgrade candidates should bring a copy of their current FCC license and appropriate picture identification.

Seating is limited. Do not delay□register today!! Emergency responders, healthcare workers, military, civil air patrol, Boy and Girl Scouts or anyone interested in personal development are encouraged to participate in the Cram Course. For more Cram Course information or to preregister contact Terry Sanner, WV8V @ 304-344-7301 (Email: Terry.Sanner@frontier.com) or Dave Poe, W8IW at 304-965-3838 (Email: W8IW@cebridge.net) or Joe Richards, WV8WVU at 304-343-9355 (Email: wv8wvu@gmail.com).

Amateur Radio Newsline☐ Report 1854 ☐ February 22 2013

Amateur Radio Newsline report number 1854 with a release date of February 22 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian radio amateurs may lose the 2300 to 2302 MHz band; Over the Horizon radar invades 10 meters; amateur satellite allocations on the agenda at I-A-R-U meeting in Vienna; Mainland China manufacturer releases low cost all service multi-mode High Frequency transceiver and zombies invade the nations Emergency Alert System. Find out the details are on Amateur Radio Newsline☐ report number 1854 coming your way right now.

(Billboard Cart Here)

**

RADIO LA: VK HAMS COULD LOOSE ACCESS TO 2300 TO 2302 MHZ

Australian amateurs could soon loose access to the band from 2300 to 2302 MHz. Amateur Radio Newsline has the details in this report:

478. ARLP008 Propagation de K7RA

>From Tad Cook, K7RA
Seattle, WA February 22, 2013
To all radio amateurs

SB PROP ARL ARLP008
ARLP008 Propagation de K7RA

Average daily sunspot numbers over the past seven days, February 14-20, rose modestly by 27 points to 78.3. Average daily solar flux was up marginally, only 1.6 points to 105.6. Geomagnetic indices rose also, with the planetary A index from 5.6 to 6.4, and the middle latitude A index from 5.1 to 6. This is compared to the previous seven days, February 7-13 reported in last week's bulletin.

There was a more substantial rise in both solar flux and sunspot numbers for a recent three days, at 104.7, 112.4 and 113.5 for solar flux, and 92, 117 and 106 for sunspot numbers. But that turned around when the sunspot number dropped from 106 to 75 on Thursday, February 21 and solar flux declined from 113.5 to 108.5.

The predicted solar flux is 105 on February 22-23, 100 on February 24, 95 on February 25-26, 100, 105 and 110 on February 27 through March 1, 100 on March 2-3, 95 on March 4-14, 100 on March 15-16, 115 on March 17, and 120 on March 18-20, which represents a peak for the next 45 days.

The predicted planetary A index is 8 on February 22, 10 on February 23, 8 on February 24, 5 on February 25-28, 10 and 8 on March 1-2, 5 on March 3-10, 7 on March 11-12, and 5 on March 13-27.

Over the next month we can look forward to improving HF conditions as we progress toward the Spring Equinox, which occurs on Wednesday, March 20 at 1102z.

Using a propagation prediction program such as W6ELprop gives us a rough idea of what the seasonal improvement might be. Running two instances of the program simultaneously, once for February 21 and the other on March 21, but with the same solar flux (I used 107) allows me to flip back and forth between the results. I did one for Seattle to Japan, and the 15 meter opening from 2200z to 0030z on

February 21 shows up as a 2130-0500z opening on March 21. Similarly, a 17 meter opening from 2130-0230z on February 21 stretches to 2030-0500z on March 21.

OK1HH predicts the geomagnetic field as quiet to active on February 22, active to disturbed on February 23, mostly quiet February 24-25, quiet on February 26-28, quiet to unsettled March 1, quiet to active March 2, mostly quiet March 3, quiet to unsettled March 4, quiet March 5-6, mostly quiet March 7-8, quiet March 9, and quiet to active March 10.

Several news articles, such as
http://www.upi.com/Science_News/2013/02/20/NASA-instrument-sees-giant-sunspot-forming/UPI-80691361403797/
and
http://www.science20.com/news_articles/giant_sun_spot_size_6_earths_grows_48_hours-104269
mentioned a huge growing sunspot group 1678 that might spit out solar flares. But this spot is way over on the western horizon (yes, the right side is referred to as "west" on the Sun) and about to slip away from view. It is not geo-effective, which it would be if it appeared in the center of the visible solar disc.

Jon Jones, N0JK of Lawrence, Kansas (where I was born!) has long enjoyed working 6 meter E-skip and even DX using very modest and even compromised antennas. Jon reported on February 16: "Julian, XE2JS DL68 had a nice 6 meter Es opening to the Midwest Saturday evening (February 17 UTC). I worked Julian while I was mobile on highway 40 west of Lawrence, KS EM28 with 58 to 59 signals at 0135 UTC. My 6 meter mobile antenna is a 2 meter 5/8 mag. mount whip (quarter-wave on 6 meters). Saw ZL1RS worked TI5/N5BEK earlier at 2254 UTC February 16."

Yes, Jon feeds that 2 meter whip directly on 6 meters, no change in loading or any modification. That distance between him and XE2JS is a little less than 1,000 miles.

On February 19, Jon reported: "The whip I currently use has a 1.1 to 1 SWR, as-is on 6 meters. Some 2 meter mag antennas don't match well on 6 and may need to be trimmed. ZL1RS later worked KD5PBR, N5DG, NW0W and a few other stations on 6 meters around 0230 UTC on Feb. 17. Likely an Es link on to TEP. (Jon means sporadic-E propagation linked to trans-equatorial propagation. See
http://www.ips.gov.au/Category/Educational/Other%20Topics/Radio%20Communication/Transequatorial.pdf
or
http://www.amateur-radio-wiki.net/index.php?title=Trans-Equatorial_Propagation
for info on TEP).

On February 21 Jon wrote, "Even better, I heard ZL1RS CW on February 20 at 2300 UTC on 50.087 MHz, about a 339 RST. This was on an attic dipole. I am sure I could have worked him with better antenna."

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on February 17: "I had limited time due to working 1700Z-0230Z over the weekend, but found conditions at least on 80, 15 and 10 meters to be excellent during the ARRL CW DX contest.

"In just a few hours on 80 meters around 0140-0440Z Saturday the February 16 and 0230-0400Z Sunday, I managed to work 270 QSOs and 67 DXCC countries with a 1/4 wave ground plane. Conditions were overall the best to Europe I can ever remember in a contest. I was able to run a steady stream of callers at times, the best I have ever done on 80. I didn't make any QSOs with central Asia, but the well equipped big guns did work that area. I was called by C4N in Cyprus with a huge signal, and also a 4Z5 (Israel), and A65BP (United Arab Emirates). Russians were generally somewhat weaker than western Europe, but many had good signals all the way to the UA4 area. Big guns RU1A and RL3A were well over S9! ZS1EL also called me as well as about 3 or 4 five-watt European stations. At least 3 PY stations also called in from southern Brazil. The omni-directional antenna does have a few advantages. Activity from Europe was very good even the second night when traditionally it is very slow. I also noticed that some far western USA stations were working Europe as well.

"10 meters was very interesting with marginal conditions to Europe Saturday, but OH, LY, YL, and SM were logged. There were a few loud signals from LZ, F, and EA. Stations in the Caribbean at the same time were very loud as was CR2X, and Africans 6V7S, CR3A, 3V8BB, and EA9EU all had very good signals. 15 meters around 1530Z was wide open to Europe with booming signals. Solar flux was right around 100.

"Sunday, I arrived at the perfect time around 1400Z when 10 meters was just opening to Europe. East of Poland, propagation was almost nil except for a weak R7MM, and about 3 weak Ukrainians, but I ran a big pile-up with a huge number of Germans logged and strong signals even from SM and LA. All of Europe east of Poland had good conditions to here in West Virginia at least thru 1510Z when I had to QRT. Conditions were better than would be expected with a solar flux of only 103 and K index of 2-3, simply amazing that Europe was booming in."

On February 19 Jeff wrote: "Last night February 18 (but February 19 based on universal time), T46RRC (Cuban IOTA NA-204) was on 80 and European signals calling them were down 15-20 db from the levels over the weekend. They were S9+25-30 dB on 160 Monday at 0230Z, a really awesome signal! They have been so loud that they have had no trouble putting a lot from 'mother Russia' into the log, the 17 meter op in the mornings can be heard running stations in Russian, but will switch over to English when a loud station here QRMs the Europeans."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 14 through 20 were 25, 59, 75, 74, 92, 117, and 106, with a mean of 78.3. 10.7 cm flux was 99.5, 100.1, 103.2, 105.5, 104.7, 112.4, and 113.5, with a mean of 105.6. Estimated planetary A indices were 10, 4, 8, 8, 4, 6, and 5, with a mean of 6.4. Estimated mid-latitude A indices were 11, 3, 6, 7, 4, 5, and 6, with a mean of 6.

FCC Denies CA Man's Petition for Reconsideration, Upholds $24,000 Fine:

Posted: 21 Feb 2013 09:22 AM PST
http://www.eham.net/articles/29784

In June 2011, the FCC issued a Forfeiture Order in the amount of $24,000 to Kevin W. Bondy of Encino, California for engaging in unlicensed radio operation and intentional interference to licensed radio operations and for refusing to allow an inspection of his radio equipment by FCC personnel. Following a Petition for Reconsideration filed by Bondy, the FCC issued a Memorandum Report & Order on February 15, upholding the $24,000 fine.

//
Hams Across New England and the Maritimes Respond to Blizzard:

Posted: 21 Feb 2013 09:21 AM PST
http://www.eham.net/articles/29783

As a blizzard swept across New England February 9-10, SKYWARN was ready. The storm dumped heavy snowfall -- with some areas receiving upwards of 3 feet of snow -- as blizzard conditions brought hurricane force winds that created power outages and significant tree and power line damage over Southeastern Massachusetts and Rhode Island. ARRL Eastern Massachusetts Section Emergency Coordinator Rob Macedo, KD1CY,

helped lead operations at WX1BOX, the Amateur Radio station at the National Weather Service office in Taunton, Massachusetts, where hams were active for 28 continuous hours. Macedo also serves as the ARES SKYWARN Coordinator for the NWS office in Taunton.

//
American Red Cross to Phase Out Emergency Communication Response Vehicles:

Posted: 21 Feb 2013 09:20 AM PST
http://www.eham.net/articles/29782

The American Red Cross has made the decision to phase out and decommission its Emergency Communication Response Vehicles (ECRVs) due to changes in technology, as well as a new satellite system and other factors regarding the vehicle fleet. "Retrofitting the decade-old vehicles with new equipment is not a good use of donated funds, as the long-term strategy is to move to more portable systems," American Red Cross Disaster Services Technology Manager Keith Robertory, KG4UIR, told the ARRL. "This is consistent with the trends in the telecom and technology industries."

//
Amateur-Created 'Varicode' Adopted as ITU Recommendation:

Posted: 21 Feb 2013 09:20 AM PST
http://www.eham.net/articles/29781

On Tuesday, February 19, François Rancy -- Director of the Radiocommunication Bureau of the International Telecommunication Union -- announced the simultaneous adoption and approval by correspondence of a new Recommendation entitled Telegraphic Alphabet for Data Communication by Phase Shift Keying at 31 Baud in the Amateur and Amateur-Satellite Services.

//
Australian Amateurs May Lose 2300-2302 MHz:

Posted: 21 Feb 2013 09:19 AM PST
http://www.eham.net/articles/29780

The Australian Communications and Media Authority (ACMA) -- that country's equivalent to the FCC --
has proposed changes to spectrum usage in the 2300-2302 MHz band that will make it off-limits to Australian amateurs as of 2015. The ACMA wants to re-allocate the spectrum to LTE (Long-Term Evolution) wireless data systems, the kind popularly used for mobile broadband applications. The proposed change would give LTE services 100 MHz between 2300 and 2400 MHz.

ARRL Spring Section Manager Election Results:

Posted: 21 Feb 2013 09:19 AM PST
http://www.eham.net/articles/29779

Montana, Arizona and Iowa will be getting new Section Managers beginning April 1. In the only contested race this election cycle, George Forsyth, AA7GS, of Great Falls, beat out incumbent ARRL Montana Section Manager Doug Dunn, K7YD, of Livingston. Forsyth received 199 votes, while Dunn received 175 votes; Dunn has served 10 years as Section Manager. Forsyth -- an ARRL Life Member and ARRL Volunteer Examiner -- has been licensed for more than 28 years. He has served as the president and a board member of the Great Falls Area Amateur Radio Club and as a director of the Glacier Waterton International Hamfest. Ballots were counted at ARRL Headquarters on Tuesday, February 19.

SARL NEWS SUNDAY 24 February 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Ronnie Grobler, ZS6RLG, of the East Rand Amateur Radio Club and digital enthusiast, went silent on 13th Feb 2013 after a 3 week's battle with cancer.

Our sincerest condolences to Ronnnie's relatives and friends.

(PAUSE)

IN THE NEWS TODAY:

ANTENNA DEFENCE A LONG TERM PROJECT

SA AMSAT MADE GOOD PROGRESS ON KLETSkous

SA AMATEUR RADIO DEVELOPMENT TRUST AWARDED THREE RAE BURSARIES

SARL NATIONAL CONVENTION PROGRAMME OUT SOON

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ANTENNA DEFENCE A LONG TERM PROJECT

The Council of the SARL at its annual strategic Indaba held on Friday and Saturday reviewed progress made on the Antenna Defence project. SARL legal adviser, Johann Marais, ZS1JM, said that considerable progress was made in identifying the various regulatory structures that impact on the erection of antennas and antenna towers. Council discussed the next steps to be taken and agreed on a plan of action. It

should be noted that the project is not a short term intervention and will still require a considerable amount of work before an action plan can be finalised. Council recognised the support from the many radio amateurs who have contributed to the funding of the project. The next progress report will be presented at SARL National Convention to be held on the West Rand at the end of April.

For more details and a list of radio amateurs, clubs and companies who are supporting the project, visit www.sarl.org.za and select antenna defence fund.

SA AMSAT MADE GOOD PROGRESS ON KLETSkous

SA AMSAT has reported good progress on KLETSkous. The team met last week on a teleconference. The designs and PC board layouts have been completed. The next step is the manufacture of the PC boards and the placing of the components followed by testing of each sub unit.

Project leader, Hannes Coetzee, ZS6BZP, said that the group expects to be able to demonstrate the transponder at the SA AMSAT conference which will the held at the Innovation Centre in Pretoria on 23 May. KLETSkous will have a transponder with an uplink on 79 cm and a down link on two metres.

Progress has also been made on the development of the space frame. The correct space hardened aluminium has been purchased and is now being machined to construct the second prototype.

SA AMSAT is now also embarking on a serious fundraising campaign. For details on how you can assist to make this project a reality visit www.amsatsa.org.za. Listen to Amateur Radio Today later this morning when the team will talk about what has been achieved to date.

SA AMATEUR RADIO DEVELOPMENT TRUST AWARDED THREE RAE BURSARIES

The South African Amateur Radio Development Trust has awarded three bursaries for young people to study for the RAE to be written in May. The bursaries each valued of R1 000 were awarded to Michelle Taylor, who is in grade 9, and Nicole Taylor, who is in grade 11. The two sisters will attend the RAE course presented by Karl Canitz in Belville. The third bursary was awarded to Karel Bezuidenhout, ZU6KB. He achieved the best results in the 2011 Class B examination with a 98% pass. He loves contesting and won the SARL youth sprint last year and came 22nd in the CW WW SSB 10 Metre assisted class 3 contest in Africa.

The bursary fund was given a major boost last year when the family of Tony Reumerman, ZS6AOG, made a handsome contribution to the fund, Three bursaries will be available for the October RA examination. For details visit www.amateurradio.org.za.

SARL NATIONAL CONVENTION PROGRAMME OUT SOON

The SARL National Convention will be hosted by the West Rand Amateur Radio Club on 26 and 27 April. The convention will start with a

welcoming event at the West Rand Amateur Radio Club house. On Saturday afternoon there will be a visit to the SA Space Agency's Hartbeeshoek facility and the annual awards dinner on Saturday evening will include several surprises including the opportunity to win an IC-V82 two metre hand-held transceiver donated by Sam Ford. The full programme and booking details will be available by next weekend.

RADIO ZS IN THE MAIL BUT DELIVERY DELAYED BY POSTAL STRIKE

Radio ZS was mailed last week but delivery may be delayed due to a postal strike. SARL members can however download an electronic copy from www.sarl.org.za. Go to the member's only section by selecting the button on the top right hand corner of the landing page and enter your PIN.

DID THE ASTEROID 2012 DA14 CAUSE IONIZATION WHEN IT PASSED THE EARTH?

On Friday night 15th February at 21:30 CAT when the asteroid passed between the Earth and the Moon, Ken Victor, ZS2OC, at Port Elizabeth was monitoring ZS1SIX on 50,080 MHz and could hear it at about S2. At 21:35 CAT the beacon signal suddenly increased in signal strength with a watery type sound. Ken decided to send his call sign a few times on the same frequency, hoping that someone else, who might also be listening to the beacon. would hear him. By this time his beam was pointing about 30 degrees north of Cape Town. At 21:39 CAT the beacon increased in strength and after another transmission he switched to receive and heard his call sign mixed with the beacon signal. The beacon signal was strongest at 21:40 CAT and he once again heard an echo of his call sign with a delay of more than a second.

What Ken wants to know is, did someone perhaps hear his signal and called him, or could this have been a delayed reflection from some distant area such as the trail of the speeding and very hot asteroid, or multi-hop Sporadic-E over the Atlantic. Can anyone explain this mysterious signal? Anyone with information can send it to Mike Bosch to email address mcbosch@webafrica.org.za.

CONTEST NEWS

The aim of the SARL Digital Contest is to establish as many contacts as possible between radio amateurs in Southern Africa using PSK31 and RTTY. The contest is open to all radio amateurs in Southern Africa. The contest runs from 13:00 UTC to 16:00 UTC on Sunday 24 February. Activity takes place on 80 metres (3 580 to 3 600 kHz); 40 metres (7 040 to 7 060 kHz) and 20 metres (14 070 to 14 099 kHz) and a station may be contacted twice on each band, once on RTTY and once on PSK31. The exchange is a RST report plus a sequential serial number starting at 001. Contacts with stations listed in General Rule 1.b are worth 3 points. Contacts with stations NOT listed in General Rule 1.b are worth 1 point. Read the contest rules for the band multipliers and scoring. Logs shall be submitted within 7 days after the contest to contest@sarl.org.za.

The SARL Hamnet 40 m Simulated Emergency Contest is open to all Radio Amateurs in South Africa, Namibia, Botswana, Zimbabwe, Swaziland, Mozambique, Lesotho, Marion Island and South African Antarctica. Only contacts with these areas will count. The contest will be on the air from 12:00 to 14:00 UTC on Sunday 3 March with phone activity in the band segments 7 063 to 7 100 kHz and 7 130 to 7 200 kHz. Participation can be as a Single operator stationary mobile, a Single operator portable, a Multi-operator portable or a Single operator base station. The exchange is a signal report followed by a three-figure number determined by the class of participation. Read the contest rules for details on antennas, power, the exchange and scoring. Logs must be submitted by 11 March to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth, 6025 or by e-mail to contest@peham.co.za.

NEW CLUB COMMITTEE

T5he following members were elected to the committee of the South Cape Amateur radio Club, ZS1SKR, at the club's AGM held on the 16th February 2013 at Glentana:

Chairman: Hans Potgieter, ZS1ALJ V-Chair: Sharon Malcolm, ZS1SLM Secretary/Treasurer: Abe Zwiegelaar, ZS1ZS Member: Eddie Pieterse, ZR1DEP

Thanks to the retiring committee members and strength to the new ones.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. Sunspot 1 678 continues to rotate towards the western limb but there remains a possibility for some flares until it rotates out of direct Earth view.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 46.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

24 February - That is today, the SARL Digital Contest 13:00 UTC to 16:00 UTC. 03 March - SARL Hamnet 40 m Simulated Emergency Contest 12:00 to 14:00 UTC. 03 March - Logs for the SARL Digital Contest to be in to contest@sarl.org.za. 11 March - Logs for the SARL Hamnet 40 m Simulated Emergency Contest must be in to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth, 6025 or by e-mail to contest@peham.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items

- if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

EARN 75th Anniversary Special Event, March 23

Posted: 22 Feb 2013 09:02 PM PST
http://forums.qrz.com/showthread.php?380950-EARN-75th-Anniversary-Special-Event-March-23&goto=newpost

The Edison Amateur Radio Network (EARN), a club primarily made up of employees and retirees of Southern California Edison, will be conducting a special event station on Saturday, March 23.

Founded in March of 1938 following major flooding, EARN will be operating from the historic Mill Creek One power house, near Mentone, California. Mill Creek One has been in operation since 1893, making it SCE's longest operating generating facility, and it was one of the first power plants in the USA to generate three-phase power. This is also one of the SCE sites that saw emergency communications over ham radio during and following the floods.

Since it was difficult to identify who the hams were at the time, hams employed by SCE organized a club to get hams within the company in regular contact. Formal check-in and traffic nets were started later that year (when everyone obtained crystals ground to the same frequency) and continue to this day.

We will be operating with our regular club callsign, W6SCE, and operate SSB on 7260 KHz, which was one of the original club frequencies (+/- QRM). We will also be switching off on other bands and modes, as conditions warrant. We expect to operate from about 10:00 AM to about 6:00 PM, Pacific time.

We will be sending a special commemorative QSL to anyone we contact. More information about the Edison Amateur Radio Network can be found at:
http://w6sce.org

//
XT2TT - Italian Team expedition!

Posted: 22 Feb 2013 02:49 PM PST
http://forums.qrz.com/showthread.php?380911-XT2TT-Italian-Team-expedition!&goto=newpost

I've never worked this entity, at least not since uploading my logs to LoTW. Got them on 3 band/modes today and just in time!! Headed to KH6 land tomorrow morning. Whew!!!!

Very good operators I've heard so far. Hope they keep up the good work!!
Looks like they are on from February 21 till March 6. I'll have a couple
of days on the backend to try and get them on some other bands (20, 17 and
15 thus far!)

.............Bob

2013-02-23

The Brit Fader Scholarship was established in 1993 by the Halifax Amateur Radio Club and endowed through the generosity of Club members and Radio Amateurs throughout the Maritime Provinces of Canada. This scholarship is intended exclusively for post-secondary educational use, to provide assistance with the cost of tuition, room, board, books and/or other fees essential to the advanced education of the recipient. The amount of the 2013 award will be $1000.00.

Applicant must be a Canadian Citizen, but without regard to gender, race, national origin, handicap status or any other factor and must be performing at a high academic level.

Applicant must, hold an active Basic Class or higher grade of Canadian Amateur Radio license.

This Scholarship will be provided for attendance at an accredited Canadian post-secondary technical school, college or university, with preference given to applicants who have been accepted into a program in the field of electronics or electrical engineering, or related area.

Application submissions must be postmarked no later than July 12 th , 2013.

A zipped application package (Criteria; Application Form; Reference Form) is available for down-loading from the HARC website atwww.Halifax-arc.org <http://www.Halifax-arc.org>. Follow the link to the Brit Fader Scholarship from the Home Page under Education .

Webinar - The first Top Band DX Contest - the 1921 Transatlantic Test

Posted: 23 Feb 2013 03:37 AM PST
http://forums.qrz.com/showthread.php?380971-Webinar-The-first-Top-Band-DX-Contest-the-1921-Transatlantic-Test&goto=newpost

The World Wide Radio Operators Foundation (WWROF) is pleased to announce
the following Webinar:

Title: The First Topband DX Contest - The 1921 Transatlantic Test
presented by Frank Donovan W3LPL

Date: March 18

Time: 9 PM EDT (19-Mar-2013 0100 ☐ 0200 UTC)

Registration (free): https://www2.gotomeeting.com/register/949979170

You can also access the link at http://wwrof.org/webinars/

Frank Donovan, W3LPL, provides an entertaining and informative look at the
very first Transatlantic contest held in 1921 including the

transmitters, receivers, antennas, and effort employed to eventually
achieve success. Even if you are not a contester, this is a great look

at the early days of radio.

Countries available: 3A, 3B8, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLANDS. Operators Toshi/JA8BMK, Ken/JN1THL (AB1GJ) and YL Yoshiko/JQ1LCW (KF7JXL) will be active as 3B9DX from Rodrigues Island (AF-017) between March 1-10th. Activity

will be on 80-10 meters using CW, SSB, RTTY and PSK31. The operators will be using a Kenwood TS-590, a Yaesu FT-897D, and a Tokyo Hy-power HL-550fx amp into a Hexbeam, a Windom and a vertical antennas. QSL via EA5GL direct only (w/SASE and IRC/greenstamps). ADDED NOTE: If time permits, Toshi/JA8BMK will operate as 3B8/JA8BMK from Mauritius Island (AF-049) on February 27th and 28th. For updates, watch QRZ.com.

3V, TUNISIA (Operator Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, who are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI (will receive license in March) between April 29th and May 6th (see OPDX.1100), have added two more operators to their operation. Operators mentioned are Luciano/IZ7EVZ and Fabio/IZ8DSS.

4Z, ISRAEL (WFF and Holyland SQ. Ops). Dov, 4Z4DX, plans to activate some World-Wide Flora & Fauna and Holyland Square locations to celebrate his 62nd birthday and 47 years on the air between March 25-27th. Look for him to operate from: Kursi Holyland (WWFF 4XFF-024, Holyland square O-06-HG), Park Hayarden (WWFF 4XFF-029, Holyland square N-05-KT) and Mount Hermon (WWFF 4XFF-023, Holyland square O-01-HG). QSL via 4Z4DX (QRZ.com).

5H, TANZANIA. Maurizio, IK2GZU, will once again return to the "Mission Ilembula" to do some work at the new hospital and orphanage between April 7th and May 8th. He plans to be active during his spare time as 5H3MB on the HF bands. Maurizio will use his FT-100 and the mission's TS-850 into a tri-band 3 element beam (20/15/10m) fixed on Europe and a vertical or dipole for the other bands. QSL via IK2GZU, direct or by the Bureau. Also, LoTW (after his return home). For more details, updates and an online log, visit his Web site at:
http://www.buffoli-pm.it/5h/Tanzania%202011.htm

5X, UGANDA (Update). Members of the F6KOP team went QRT as 5X8C at 1003z on February 17th. The 5X8C log on ClubLog reports that the 5X8C team has made 81242/QSOs with 21010/Unique callsigns (41077/CW, 28535/SSB, 11624/RTTY, 14/PSK63 and 1/PSK) with 1215/AF, 1/AN, 7560/AS, 59611/EU, 11391/NA, 627/OC and 837/SA. To check your QSOs, go to:
http://www.clublog.org/charts/?c=8C
Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

7P, LESOTHO. Peter, EI7CC, will once again be active as 7P8PB from Maseru between March 6-26th. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. He will be operating from his brother-in-law Gerry's station, 7P8CC (home callsign EI8CC). QSL via EI7CC, by the Bureau or direct. Logs will be uploaded to LoTW immediately upon his return to Ireland. If possible, Peter may try to upload them while in Lesotho.

8P, BARBADOS. Gerry, W1VE, will be active as 8P9RM between February 26th and March 1st, and then for the ARRL DX SSB Contest (March 2-3rd) he will

sign 8P1V. Activity will be on 160-6 meters, but with a concentration on the low-band CW, and naturally SSB during the contest. QSL both callsigns via his home callsign direct only. NO Bureau.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the ARRL DX SSB Contest (March 2-3rd) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9A, CROATIA. Charlie, NF4A, will be leaving Monday, February 25th, for 9A and will be operating as 9A5PC all week. Look for him in the morning U.S. time on either 15 or 10 meters (+/- a few sunspots)..... During the ARRL DX SSB Contest (March 2-3rd), Charlie will be one of the Multi-Multi operators at 9A1A. Logs for 9A5PC will uploaded to LoTW when he returns home. Please QSL directly to his U.S. address. Do not send cards to the 9A Bureau.

9M4, SPRATLY ISLAND (Update/Press Release #2). Steve, 9M6DXX, sent out the following on February 19th [Edited]: "On January 9th, I sent you some brief information about the 9M4SLL Spratly DXpedition which will take place between March 10-18th, and promised more details later. Here now is some further information.
Unfortunately Christian, EA3NT, had to withdraw from the DXpedition due to work reasons, but he has been replaced by two experienced Hungarian DXpeditioners: Pista/HA5AO and George/HA5UK. The other operators are John/9M6XRO, Steve/9M6DXX, James/9V1YC, Don/G3BJ, Tony/KM0O and Ben/N6MU/DJ0YI (total 8 operators).
9M4SLL will operate with five stations simultaneously at peak times, using mainly Elecraft K3 and K2 transceivers plus full legal power linear amplifiers on all stations. The antennas will all be verticals and all will be sited within a few meters of the ocean. In particular we will have a Titanex V160E 27m (87ft) high vertical for 160 and 80m with a Pennant antenna for RX on those bands. Activity will be on 160 to 10m, CW, SSB and RTTY. There will be no 60 meters operation as that is not permitted by the Malaysian licence.
The QSL Manager is Tim, M0URX, and direct or bureau QSLs can be requested by OQRS from his website at <http://m0urx.com/oqrs>. Logs will be uploaded to LoTW as soon as possible after the end of the DXpedition - within a few days. We plan to upload to an online log once per day during the DXpedition. Further information, including suggested operating frequencies, can be found on the 9M4SLL page on M0URX's website at <http://m0urx.com/9m4sll>."

A3, TONGA (Update/OC-064 Cancelled). Werner, DJ9KH, who is now active as A35WH from Tongatapu Island (OC-049), was expected to be active from Vava'u Island (OC-064) this week and had to cancel due to [edited] "The local airline had to close, and the situation with our flights back and the international connection-flight were so unsecured, that we had to cancel the flights." He will continue to operate Tongatapu Island probably til March 2nd. QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> everyday and give information about planned activities, modes and frequencies. He doesn't use an online-log, LoTW and e-QSL.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operations for DXCC credit:
4S7DXG • Sri Lanka; Only operations in 2008 and 2011
8Q7VR • Maldives; Only operations in 2008 and 2011

If you had credit rejected for contacts with dates during the periods noted, contact <dxccrules@arrl.org> to be put on the list for an update. Contacts before or after these periods cannot be accepted. Also, in order to expedite the search for these QSOs, please include the application "date received" or "reference number" noted on your credit slip of the submission these were originally rejected.

DXCC NEWS (Important Information regarding Digital DXCC Applications). The DXCC Blog <http://www.arrl.org/dxcc-blog> reports: "Before proceeding with an Online DXCC application you 'MUST', first, have Mozilla Firefox installed on your computer. Online DXCC is not compatible with Internet Explorer. If you do not use Firefox please visit this site to download and install this free program: http://www.mozilla.org/en-US/firefox/new/ "
For the complete announcement, go the DXCC Blog page listed above.

EA PSK63 CONTEST. Joaquin, EA4ZB, Contest Manager EA BPSK63, invites everyone to participate in this year's event which will be held between 1600z Saturday and 1600z Sunday, March 9-10th. The contest is sponsored by Uni•n de Radioaficionados Espa•oles (URE). The contest is open to any licensed amateur station. Activity will be on 80/40/20/15/10 meters. The complete official rules are available at:
http://www.ure.es/contest/428-ea-psk63-contest-english-version.html

FP, ST. PIERRE & MIQUELON. Eric, KV1J, will once again be operating from the Island of Miquelon (NA-032, DIFO FP-002 WLOTA 1417, Grid GN17) as FP/KV1J between July 6-16th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK31 (but primarily SSB and RTTY). He will generally be on the highest frequency band that is open, and he may try 6 meters if there is any indications of openings. Also, look for him on the satellites, weather permitting. Eric will also be in the IARU HF Contest (July 13-14th) as a Single-Op/All-Band/Mixed-Mode/High-Power entry. QSL via KV1J, direct or by the Bureau and also LoTW. For more details and updates, check out his Web page at: http://www.kv1j.com/fp/July13.html

IOTA NEWS.....
AF-109. (New IOTA) Members of the Egyptian Radio Amateur Society for Development (ERASD) plan to be active as SU8N from Geziret Disuqi (aka Nelson's Island), an island in the Nile Delta and Sinai Region Group, during May for one week (May 3-10th). "Nelson's Island" is approximately 20 kilometers east of the Egyptian port of Alexandria, four kilometers north of Cape Aboukir. Nelson's Island is approximately 350 meters by 150 meters. Activity will be on most HF bands. Operators mentioned are Said/SU1SK, Ateff/SU1AO, Hossam/SU1HM and Ayman/SU1AR. Look for more info to be forthcoming. Also, watch the ERASD's Web page at: http://www.qsl.net/egyptham
Also, watch: https://www.facebook.com/events/441478712566533

AS-042. Vladimir, RV3EFH, will once again be active as RV3EFH/0 from Bolshevik Island between March and October. Bolshevik Island is the second largest island of the archipelago of Severnaya Zemlya in the Russian Arctic. Activity is will be on 40/20/15/10 meters using CW, SSB and the Digital modes. While there he plans to activate several Loc. Squares. QSL via his QRZ.com address. All QSL will be answered once he returns to the mainland. Visit his Web page at: http://www.rv3efh.russian-hamradio.net

EU-047. Mike, DG5LAC, will be active as DG5LAC/p from Juist Island (GIA N-003) between July 27th and August 9th. Activity will be on 40-10 meters, possibly 80m, using 100 watts and SSB. He will also be a "part-time" entry in the RSGB IOTA Contest. QSL via his home callsign, by the Bureau, direct, eQSL, LoTW and OQRS.

EU-105. Operators Geert/ON7USB, Tim/ON5HC, Pat/ON7PQ, Jo/ON5MF and Francis/ON8AZ will be active as TM3B from Batz Island (WLOTA 0680) between May 4-11th. QSL via ON8AZ. The group has a Web page (still under construction) at: http://www.eu105.be

NA-014. Jim, AE1C, will be active as AE1C/VE9 from Grand Manan Island (CISA NB003, WLOTA 0082) between August 18-25th. Activity will be holiday style on the HF bands using 200 watts and a vertical antenna. QSL via his home callsign (LoTW preferred), eQSL or direct.

NA-034. Lou, W0FK, will be active from Longboat Key between March 2-16th. QSL via his home callsign, direct or by the Bureau.

NA-058. Pete, VE3IKV, will be active as W4/VA3RA from St. Simons Island (USI GA003S, WLOTA 4115, Glynn County, GA) on March 2nd. Activity will be on 30 or 17 meters using CW. QSL via VE3IKV, direct or by the Bureau.

NA-062. Pete, VE3IKV, will be active as W4/VA3RA from Key West (USI FL040S, Monroe County, FL) between March 3-15th. Activity will be holiday style on 30 or 17 meters using CW. QSL via VE3IKV, direct or by the Bureau.

NA-079. Pete, VE3IKV, will be active as VE3IKV/W4 from the Dry Tortugas Islands (Monroe County, FL) between March 11-14th. Activity will depend on the weather. Operations will be conducted by a battery and a solar panel since there is no power on the island. This will be CW only operation on 30/17/6 meters. QSL via his home callsign, by the Bureau or direct.

NA-143. Joe, K5KUA, will once again be active as K5KUA/5 from Galveston Island (USI TX001S, Galveston County, TX) between March 28th and April 1st. Activity will be on 80-10 meters using mainly CW and the Digital modes. QSL via his home callsign, direct or by the Bureau.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF and Nicholas/KJ4AVG will once again be active as homecall/p from Dauphin Island (USI AL002S, Mobile County, AL) between June 19-24th. Activity will be on the HF bands using CW and SSB. QSL via their home callsigns.

OC-245. (Update) Operators Ucok/YB6AR, Adhi/YB3MM, Budi/YF1AR and Evendi/YC6EI will be active as homecall/6 from Rondo Island (ARLHS IDO-369), the most western island lighthouse in Indonesia between March 9-17th. The group has applied for a special callsign but has not heard anything yet. Rondo Island is very difficult to reach since there is no special beach for the boat landing. This will be the first time amateur radio operations will take place from Rondo Island. Activity will be on 80-10 meters with 4 stations on the air using SSB and the Digital modes. QSL via IZ8CCW, direct or by the Bureau. The group is looking for sponsors. For more info and updates, visit: http://www.mdxc.org/oc-245

SA-027. Operators Jose/PU5IKE (Team Leader), Adriano/PP5RK and Andr&#65533; (SWL) were expected to be active as ZW5WIM from Paz Island this past weekend (February 23-24th) during the South American Lighthouses Weekend. QSL via PU5IKE, direct, LoTW, e-QSL and Bureau.

SA-028. You may have one more day (February 25th) to work Marcelo, PY2FN, as PY2FN/p from S&#65533;o Sebasti&#65533;o Island. This is the first operation from the Farol Ponta da Sela Lighthouse (ARLHS BRA-287). QSL via his home callsign. Log will be uploaded to LoTW after his activity.

SA-030. (Update) The team that was going to be active as CV5A from Flores Island between February 21-24th, had to suspended their operation until further notice.

ISWL CALLSIGNS (For March). The following ISWL club callsigns will be used throughout the month of March 2013:

GX4BJC/A - Operated from Walton on the Naze, in Essex, by Herbie/G6XOU. (ISWL Council Member & QSL Bureau Manager) (/A WAB Square &#65533;M22 - England, IOTA &#65533;U-005). Herbie will also use GX4BJC/P during the month. (/P WAB Details will be given at the time of the QSO).

MX1SWL and M1SWL - Operated from Broad Oak, in East Sussex, England, by Arthur/G0KOC. (ISWL Council Member & Callsign holder) (WAB Square &#65533;Q62 - England & IOTA &#65533;U-005).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for

their awards.

KH0, MARIANA ISLANDS. Operators Gennady/R0FA and Yuri/RA0FU will be
active as KH0/homecall from the Saipan Rental Shack on Saipan Island
(OC-086, USI NI002S, WLOTA 1333) between March 25th and April 4th.
Activity will be on all HF bands and modes, as well as an entry in the
CQWW WPX SSB Contest (March 30-31st). QSL via their home callsign, by
the Bureau or direct.

KH0, MARIANA ISLANDS. Operators Nick/JL1UTS and Chieko/7L3PFH will be
active as KH0TH and KH0TG, respectively, from the Saipan Rental Shack on
Saipan Island (OC-086, USI NI002S, WLOTA 1333) between May 2-5th. Activity
will be on all HF bands and modes. QSL via their home callsign, direct
or the JARL Bureau.

KH0, MARIANA ISLANDS. Operators Akira/JH8XGS (W3ANA/KH0) and Ben/JA1RTS
(KH0/JA1RTS) will be active from the Saipan Rental Shack on Saipan Island
(OC-086, USI NI002S, WLOTA 1333) between May 8-12th. Activity will be on
all HF bands and modes. QSL via their JA home callsigns, direct or by the
JARL Bureau.

(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

CO8DM ON LOTW. Doug, CO8DM, informs OPDX that his QSL Manager Steve, KU9C, has opened an LoTW account for him. Doug is converting his paper log to digital logs to upload to LoTW. He mentions there may be some times differences.

QSL KH0WF via JH1AJT direct or the JA Bureau. Operator was Zorro, JH1AJT, from Saipan.

QSL RECEIVED VIA LoTW: 3B9SP, 5B4AJC, 5X8C, 9Y4/DL7VOG, CO8DM, DJ9RR, DL7CM, E77W, EA3GHZ, EA3NT, EF8R, F5CQ, F6EYB, F6HKA, G3TXF, GM0NAI, GU4YOX, GW6W, H44KW, HB9ACA, HB9CVQ, HB9DDO, HK0GU, HK3O, HQ2N, KH6LC, KP2MM, LY2J, LY6A, M3W, MD2C, NP4G, OE2013R, OG4X, OH1MA, PA5KT, PJ5/DL7VOG, PJ7XK, PV8ADI, PY1VOY, S50R, TI5W, US5I, US5IQ, UU7J, V31ME, WB4JTT/KH6, YO3APJ, ZS4TX and ZS6YH

QSLS RECEIVED VIA MAIL: 3D2OP, 3DA0NJ, 3W1M, 4K4K, 5N4EAM, 6V7S, 706T, HK1NA, HK1R, J88CG, KH8/DL3DXX, LX/PA0RDY, RI0FM, S79NEN, T77C, V5/DL3DXX, V84SMD, VK9/OH3JR, W7PBL/VK9L, XF1F, XW0ZJZ, XW1A, Z81D and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 5N0OCH, 5R8HL, 7Z1HB, 8R1PY, 9X0TL, 9Y4W, AH0BT, BG1QQT, CT9/DF3FS, CU3NH, EA6/DL5NUA, EW7KF, FS/DL2RUM, HB0/HB9AON, MJ/DL9MWG, OM5CD, R100W, PJ2/DF8ZH, PJ4M, PJ7NK, TK/DL9YBY, TK5DS, V5/DC8QT, V5/DK2WH, VP2MOM, VP2MXO, VP5DX, YO9WF and Z21LS

TX5, CLIPPERTON ISLAND (Update). The TX5K Team is now on their way to Clipperton Island as of February 23rd. Here are details of the past week:
February 19th - "The team that had assembled in San Diego has now set sail on the Shogun for Cabo San Lucas, Mexico, where they will pick up the rest of the team." The team in San Diego included Jef/DD2CW, Ed/KE3D, Luis/XE1L, Bob/KK6EK, Giovanni/I5JHW, Lance/W7GJ, Walt/N6XG, Rick/KF4ZZ, Mike/WA6O and Igor/US0VA.
February 23rd - It was reported that they picked up the Cabo team and that "the full team has boarded, and once all 'precious cargo (all 1000 items)' is on board and stowed properly, they will be underway...."
A TX5K was spotted on the cluster on February 20th which was a pirate

or a "phantom spot". They are scheduled to arrive on the 26th, but have a lot of work to do setting up. This means expect the operation to be on air either February 28th or March 1st. The Team has been spotted while enroute to Cabo San Lucas as K6K/MM (QSL via N2OO). They will probably be on the air from Cabo to Clipperton. Once landing and set up is done, the TX5K activity will be on 160-10 meters using CW, SSB and RTTY. Their suggested frequencies are:
CW - 1833(*), 3523, 7023, 10103, 14033, 18083, 21033, 24903 and 28033 kHz
SSB - 3785 (up or down), 7185 (**), 14185 (***), 18165 (down), 21285, 24975 and 28515 kHz
RTTY - 10137, 14087 and 18097 kHz
Listening up, except were indicated.
* Listening up 2 / listen 10 down for JA
** Up 5-15 or down 5-15 / up 7225 for U.S. / down below 7100 for non-expanded band
*** Listen above 14225 for U.S. General licenses

QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Kei/JA7GYP (V63T) will be active from Pohnpei Island (OC-010) between April 15-20th. Activity will be on all bands and modes. QSL via their home callsigns.

VISALIA DX CONVENTION NEWS (Correction/IOTA Dinner). Ray, N6VR, sent out the following about the IOTA Dinner: "Guys, -- The 30 USDs I stated for the IOTA dinner has to be increased to 32 USDs because of an error the Hotel and I made during the initial meal cost computation, sorry. If you have all ready sent me 30 USDs please make up the 2 USDs difference at the door. Tnx, and sorry for the price increase, although it is 1 USD cheaper than last year! 73, Ray N6VR.... P.S. I may have not made it clear enough, but pse make checks to 'Ray Benny'."

VP5, TURKS AND CAICOS ISLANDS. Scott, K0MD, will be returning to Providenciales Island (NA-002, WLOTA 2003) and be active as VP5H during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign and LoTW.

VP9, BERMUDA (Update/Change). Operators Kurt/W6PH and Robert/WA1Z will team up to be active as VP9I for the ARRL DX SSB Contest (March 2-3rd) as a Multi-Op/Low-Power entry. QSL via WW3S (see QRZ.com).

XR0, EASTER ISLAND (Update). The UK DXpedition team which will be active as XR0YG from Easter Island (SA-001) between March 20-27th (see OPDX.1090), now has a Web page available at: http://xr0yg.com

XT, BURKINA FASO (Reminder). By the time you read this, a team of Japanese operators will be active from Burkina Faso using their individual callsigns until March 2nd. Activity will be on 80-10 meters using CW, SSB and the Digital modes. Look for the following operators (w/their XT callsign): Yukinori/JA3VWT (XT2VWT), Jusei/JA3IVU (XT2IVU), Junichi/JH3AEF (XT2AEF) and Kunio/JA1CJA (XT2CJA). QSL via their home callsign.

XT, BURKINA FASO (Reminder). By the time you read this, members of the "Italian DXpedition Team" will be active as XT2TT from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, until March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. The official Web site is: http://www.i2ysb.com/idt Official forum is: http://www.hamradioweb.org

YN, NICARAGUA (Update/Callsign Change). Scott, K7ZO, will once again be active as during the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/ All-Band entry. However, this year the TELCOR issued him a smaller callsign and he will be using YN5Z for the contest instead of his usual YN5ZO callsign. He usually operates "Field Day Style" using a 5 band Spiderbeam and 40m dipole on a push up mast. The radio is a TS-590 driving a KPA-500 amp. QSL via LoTW and K7ZO, direct or by the Bureau. Look for Scott to be active before the contest as well.

ZA, ALBANIA. The "425 DX News" reports that Max, IZ4JMA, is now living in Albania and will be on the air as ZA/IZ4JMA starting February 25th for 18 months at least. Activity will be on all bands and modes. QSL via IZ4JMA.

ZL7, CHATHAM ISLANDS (Update). Jim, ZL1LC, will be active as ZL7LC from Chatham Island (OC-038) between March 14-20th, as a micro DXpedition and running PSK31 only (see OPDX.1094). He announced this week on QRZ.com: "This is to give PSKers around the world, especially those in PODXS 070, DMC and EPC, an opportunity to work this DXCC entity on their mode of choice. The rigs will be Icom 7200 and 7000 with vertical antennas operating on 7.035, 14.070, 21.070 and 28.120 MHZ. I will be operating on the highest bands that are open. Please don't email me asking me to run another mode or operate on another frequency. Such emails will be treated as SPAM. To make quicker QSOs and allow more contacts, please send only your RST report and your name. I will QSL the RST. If a pileup develops, I will ask you to go UP 100 - 400Hz. Please operate in a SPLIT mode and transmit 100 to 400 Hertz above your receive frequency. I will be able to read your call and respond to you." He also reported that his QSL Manager will be EB7DX and direct (w/2 green stamps and SAE). NO Bureau. For more details and an online log (ClubLog), see QRZ.com.

ZS8, MARION ISLAND (Update). "DX-World.net" is reporting that Carson, ZR6CWI, has applied for ZS8C callsign for his stay on Marion Island.

Sunday 24th February 2013

Renewal of Amateur Station Licences

In June 2009 the Wireless Telegraphy (Amateur Station Licence) Regulations 2009 came into force which changed individual Amateur Station Licences from annual licences to lifetime licences.

Whilst the licences are lifetime licences, under the regulations licensees are required to confirm the details of their licence to ComReg every five years. ComReg will begin advising licensees how to comply with this requirement in 2014. We have been told by ComReg that they have yet to determine how this process will take place but will endeavour to make it as smooth as possible.

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Cork Radio Club

The Annual General Meeting of Cork Radio Club will be held in the Vienna Woods Hotel in Cork on Monday February 25th at 20.00. All members are asked to attend and intending members are also very welcome. Enquiries to Jeremy EI5GM on 083-3317710.

Return of IRTS Awards & Trophies

It is now time to return all trophies presented at last years IRTS, AGM. Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 10 th February or to any IRTS Committee Member before February 28th 2013.

IRTS Awards Nominations

It is time once again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for:

Service to the Society or to Amateur Radio: Awards in this category can to members or to non-members.

Awards for other achievements:

Awards in this category include the 4 and 6 M Shields; the SWL Award; and the awards for Quality Construction Projects. These awards are confined to members only.

Nominations may be from Clubs or individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX, Jim EI4HH or, Peter EI4HX, Chair of awards committee, QTHR or by e-mail to ei4hxperimental/at eircom/dot/net. www.irts.ie/cgi/awards/cgi

Closing date for nominations is February 28th 2013.

VHF / UHF Squares Table

The VHF / UHF Squares Table for 2012 at www.irts.ie/vhf shows that totals from 15 EI stations have been received to date, an increase on recent years. The VHF manager is awaiting a few more totals before finalising the table. As it stands, Tom EI4DQ tops the list with 399 squares worked in 2012, with Ger EI4GXB in second place with 320 squares. As in previous years, most of the VHF activity reported in the Squares Table has been on 50 MHz.

South Eastern Amateur Radio Group

The AGM of the South Eastern Amateur Radio Group will take place tomorrow night Monday the 25th February at 8.00 p.m. sharp in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on. All members are please asked to attend and new members or anyone that might be interested in joining the group are also very welcome to come along. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

Dundalk Amateur Radio Society EI7DAR

The AGM of DAR will take place Wednesday 6th March at the Society premises, 'Larkin House', 113, Castletown Road, Dundalk, commencing at 8pm sharp. Everyone welcome and a reminder to members that membership subscriptions are now due. For more details please visit www.ei7dar.com.

West Tyrone Amateur Radio Club

The West Tyrone ARC will be taking part in the St. Patrick day celebrations on Monday 18th March 2013 in Omagh, Co Tyrone. The club will be running a special event station using the call sign GB1SPD. They will be operational from the Strule Arts Centre in the Heart of Omagh Town during Omagh District Council St Patrick Day Parade and Festival. The club will be operating on HF, VHF/UHF, Echo Link and Digital Modes between 11am & 5pm. We look forward to the prospect of working as many stations as possible. Special Event QSL cards will be available to those who wish to have a conformation of the QSO. Details available on www.qrz,com and www.wtarc.org

----

DX News

Ken K4ZW will be active as Z81Z from South Sudan from 25 February until 6 March. This follows on from his original activation of the Z81Z call early in January. Prior to this week's stay in South Sudan Ken spent a few days operating the Ethiopian club station ET3AA in Addis Ababa.

An international team will operate from the DXCC entity of Clipperton Island from 28 February until 10 March. The callsign will be TX5K and they will be active on all bands. More details can be found on <tx5k.org>

Peter EI7CC makes another trip to Lesotho next month. Look for him to be active as 7P8PB from the shack of Gerry 7P8CC from 6 - 26 March. As usual calls from EI and GI will be appreciated.

A group of three Japanese operators will be QRV from the island of Rodrigues from 2 - 10 March. Their callsign will be 3B9DX and they will be active on all bands 10 - 80m SSB, CW, RTTY and PSK31. QSLs go via EA5GL.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

HamRadioNow: Too Much SDR; ARRL@100; On-line Repeater Directory

Posted: 24 Feb 2013 02:43 PM PST
http://hamradionow.tv

HAMRADIONOW EPISODES 59 thru 63: Online Now

59 covers RFinder, a new online repeater directory with apps for iOS and Android, and integration to RP's programming software. My quick tests worked well, but beware the outdated info that plagues all directories.

60 is a talk with ARRL COO Harold Kramer WJ1B on plans for the upcoming Centennial, particularly the National Convention to be held in Hartford in July, 2014.

61 starts the SDR Marathon. We talk to FlexRadio's Greg Jurrens K5GJ. Sure, lots of Flex product info, but also a lot of basic info about what Software Defined Radio is (and isn't).

62 and 63 are from the ARVN Archives, programs previously available only on DVD. Each episode comes in 3 parts of about an hour each.

62 is Phil Harman VK6APH's talk about designing the HPSDR Mercury receiver, the first direct-conversion SDR in Amateur Radio. It was the Sunday Seminar at the 2008 ARRL & TAPR DCC in Chicago. The second one? The Flex 6000 series. They go from antenna to A/D converter with no active components in between (maybe just a bandpass filter).

63 is the SDR Forum from the 2009 Dayton Hamvention®. Six SDR heavyweights cover the future, contesting, Flex, Elecraft, HPSDR, and operating the stuff.

We've got several more interviews to edit from the Orlando HamCation... coming soon, so stay tuned!

GB2RS NEWS

Sunday 24th February 2013

The news headlines:

Pat Hawker MBE, G3VA, Silent Key

EMC volunteers sought

Top Band newsreaders wanted

Radio amateurs around the world will be saddened to learn of the death of Pat Hawker MBE, G3VA, on 21 February 2013. He was 90 years old. His son and daughter, Philip and Virginia, were with him at the time. Pat was first licensed in 1936 as 2BUH, becoming G3VA in 1938. We send our deepest condolences to Pat's family and close friends. Amateur radio has lost one of its legends.

The RSGB EMC committee provides many services to its members including help with EMC issues, lobbying and representation on Standards Committees as well as publishing information and technical updates. If you have any EMC expertise you can offer to help to provide an outstanding service to RSGB Members in any of these areas, please contact John, M0JAV by email to emc.chairman@rsgb.org.uk or by phone on 07836 731 544.

Two additional news readers are required to join the GB2RS rota for the Sunday evening Top Band national news reading at 21.30 on 1990kHz, LSB. Volunteers may be located anywhere within the UK, but must be RSGB Members. Please contact the GB2RS news manager Gordon Adams, G3LEQ on 01565 652 652 for more information.

The special event callsign celebrating the RSGB Centenary finishes its stay in Region 2 this week. Today, 24 February, Caithness ARS are in Freswick running a station operating on the 20, 40, 80 and 160m bands. Tomorrow, 25 February, the callsign spends its last day in Region 2 with the GMDX Group in Invergordon with an HF station running SSB and CW. On Tuesday the callsign moves to Region 4. On 26 February, Mexborough and District ARS will have the station in Doncaster running HF and 4m using CW, SSB, FM and PSK. Wednesday sees Grimsby ARS running an HF and VHF station from Cleethorpes using CW, SSB, FM and PSK. York Radio Club will put G100RSGB on the air from York on 28 February running both HF and VHF stations using CW, SSB, FM and datamodes. On Friday, 1 March, the callsign moves to Fort Paul near Hull with the Humber Fortress Club, who plan to have both HF and VHF stations on the air using CW, SSB, FM and

datamodes. Next weekend, look for the callsign from Tynemouth ARC in North Shields running an HF station as well as 2m and 70cm, using SSB, CW and datamodes. 4 March sees the GD100RSGB callsign on the air again from the Isle of Man ARS running HF and VHF stations using CW, SSB and datamodes. For those who haven't tried it yet, there is a comprehensive `Am I in the log' feature at www.rsgb.org/centenary/ that shows on which Regions and Bands you have contacted the Centenary station. Details of how to get your QSL card are also on the website.

Existing Notices of Variation, or NoVs, for repeaters and beacons are due to expire on 31 March 2013. If you are the Keeper for one of these stations and already hold a NoV against your Full licence, you may apply for a temporary extension until 31 March 2014. Ofcom has set up a system to extend these NoVs online using the RSGB website. Go to www.rsgb.org and click on the Extend your Repeater or Beacon NoV link. These extensions are valid only when applied to an existing variation and are not otherwise valid.

The Central Scotland Ham Radio Conventions committee has announced that the 2013 Central Scotland Mini Ham Radio Convention will take place on Saturday 8 June at the Crofthead Farm Community Education Centre, Templar Rise, Livingston EH54 6DG. Further details are available at uk.groups.yahoo.com/group/cshrc.

And now for the details of rallies and events for the coming week

It's a busy time for rallies next weekend with five events spread over the whole country. On Saturday 2 March, the Lagan Valley ARS Rally will take place at the Village Centre, Ballynahinch Road, Hillsborough. Doors open at 11.30am and there will be trade stands and a Bring & Buy. Details from Jim, GI0DVU, on 028 9266 2270.

Sunday 3 March sees the BRATS Rainham Radio Rally take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Doors open at 10am. More from Trevor, G6YLW on 07717 678 795.

The Cambridge & District Amateur Radio Club Rally is also on 3 March at the Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester, Cambs PE29 2NH. Doors open at 10am and the entry is ?3. There will be trade stands and a Bring & Buy as well as special interest groups and a licensed bar. Details from David, M0ZEB on 01353 778 093.

In Devon, the Exeter Radio & Electronics Rally will be held on 3 March at America Hall, De La Rue Way, Pinhoe, Exeter EX4 8PW. Doors open at 10.30 and the admission is ?2. There will be trade stands and a Bring & Buy. Information from Pete, G3ZVI on 07714 198 374.

The final rally is the Spring Militaria & Electronics & Radio Amateur Hangar Sale, which takes place on 3 March at Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and there will be civil, military & vintage radio equipment, vehicle spares & more on display. Details from Rod Siebert on 01270 623 353.

Now for the news of special events

West Tyrone ARC will be taking part in the St Patrick's Day celebrations on Monday 18 March in Omagh, Co Tyrone. The club will be running a special event station using the callsign GB1SPD. They will be operational from the Strule Arts Centre in the Heart of Omagh Town during the Omagh District Council St Patrick Day Parade and Festival. The club will be operating on HF, VHF and UHF, Echolink and digital modes between 11am and 5pm. Special event QSL cards will be available to those who wish to have a confirmation of the QSO. Details are on www.qrz,com and www.wtarc.org.

And now the DX news compiled from 425 DX News and other sources

G3RWF plans to be in Rwanda between 4 and 12 March and has requested the callsign 9X0NH. The licence should be valid for all of 2013 and he could return later in the year. Activity will be mainly CW. QSL via G3RWF.

A group of Japanese operators will be active from Rodrigues Island, IOTA AF-017, from 1 to 10 March as 3B9DX. They will be operational on the 10 to 80m bands using CW, SSB, RTTY and PSK31. QSL direct only, via EA5GL.

G3SWH and G3RTE will be operational from Guadalcanal, IOTA OC-047, in the Solomon Islands, until 28 February. Their activity is on CW only on the 10 to 80m bands. QSL via G3SWH.

N6MUF will be active from Kota Kinabalu from 1 to 8 March before travelling to Layang-Layang Island, Spratly, IOTA AS-051, as 9M4SLL from 10 to 18 March. QSL Manager for 9M6 / N6MUF is DJ0YI, please QSL either direct, via the bureau or Logbook of the World. Logs will be uploaded to LoTW after the DXpedition.

An Italian DXpedition Team will activate Burkina Faso with the callsign XT2TT until 6 March. Then a second activity by a Japanese group with the callsigns XT2CJA, XT2IVU, XT2AEF and XT2VWT will activate Burkina Faso. They plan to be on the air on all bands from 10 to 80m using CW, SSB and digital modes.

Now the contest news

The first 70MHz Cumulative Contest takes place today, 24 February, from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

The CQWW 160m DX Contest ends its 48 hours run at 2200UTC tonight, 24 February. This is the SSB leg of the event, the CW leg having taken place last month. The exchange is signal report and CQ zone; W stations send their State and VE stations send their Province.

The SSB leg of the French REF Contest closes at 1800UTC tonight, 24 February, after a 36 hour run. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number, with French stations also sending their Department number or overseas prefix.

The 50MHz UK Activity Contest will take place on 26 February from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator. Also on 26 February, the SHF UK Activity Contests runs from 2000 to 2230UTC. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

The 144/432MHz Contest is a major one and runs from 1400UTC on 2 March to 1400UTC on 3 March. The weather often makes portable activity a real challenge for this, but the hardiest of souls will always find a way of getting on the air from a hilltop, in spite of snow or gales. Using all modes the exchange is signal report, serial number and locator.

The SSB leg of the ARRL International Contest is on 2 and 3 March. Running from 0000 to 2359UTC on the 1.8 to 28MHz bands, the exchange is signal report and transmitted power. W stations will send their State and VE stations send their Province.

Next Sunday, 3 March, the first of five UK Microwave Group Low Band series of contests takes place. The bands for this one are 23cm, 13cm and 9cm. Running from 1000 to 1600UTC, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 15th to Thursday the 21st of February, compiled by Neil Clarke, G0CAS on Friday the 22nd of February.

The number of sunspot groups increased as the week progressed to seven visible groups by the 21st. One of these regions produced an unexpected impulsive M1 class solar flare on the 17th that increased activity to moderate levels. On the 15th and 16th solar activity was very low. The remaining activity was at low levels, with C class solar flares taking place. Solar flux levels increased from100 units on the 15th to 114 by the 20th. The average was 104 units. The 90 day solar flux average on the 21st was 115 units, that's two units down on last week. X-ray flux levels increased slightly to peak at B3.6 units on the 19th, the average was B2.5 units. Geomagnetic activity was quiet on the 15th with an Ap index of only three units, however, activity increased to just unsettled levels on the 16th and the 17th. The most disturbed day was the 16th, with an Ap of 11 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 440 kilometres per second. Particle densities were low on the 15th and 21st and moderate on the other days, with densities peaking close to 20 particles per cubic centimetre. Bz varied between minus and plus 11 nanoTeslas on the 16th, which was the most disturbed day, and between minus and plus 3 nanoTeslas on the quietest day.

And finally the solar forecast for the coming week. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be at low levels or even very low on the occasional day. Solar flux levels are expected to be below the 100 mark but may increase slightly later in the week. Geomagnetic activity is expected to be mostly quiet, but could increase towards next weekend due to a small recurring coronal hole. MUFs during daylight hours at equal latitudes

should be about 24MHz for the south and 21MHz for the north. Darkness hour lows should be around 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency for a 90 per cent success rate is about 23MHz. The best time to try this path will be between 1100 and 1800 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Lincoln Short-Wave Club has Foundation training from noon today, next Saturday and next Sunday. On Monday there's a talk by Brod Purdy, G4RPB, about his exploits as an RAF electronics officer in the Vulcan and Shackleton. Thursday sees the club net on 145.375MHz from 8pm, and the Saturday surgery and mentoring is in the shack from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club has its club net on 145.225MHz from 8pm today and next Sunday. Monday sees a curry night at Monsoon. On Tuesday at 6.30pm there's a Morse class at 7.45pm and from 8.30pm the final session on the construction project with Barry, M0DGQ. The regular Friday shack social starts at 7.30. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 net on GB3FR, and on Friday there's a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is making arrangements for the Wythall Rally on Monday. Thursday sees training classes with Dave Murphy, G8OWL, and shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is having an informal meeting. Details from Anne, 2E1GKY, on 01242 699 595 daytime.

On Monday Stratford Upon Avon District Radio Society is having a skittles evening. Contact G0CHO, on 01608 664 488.

On Monday Sutton Coldfield Amateur Radio Society is having a natter night, general get together and is on the air. More info from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Dudley and District Amateur Radio Society is taking part in the 6 metre and 3cm contests. Details from Miles Hall, G4GSB, by email to g4gsb@gmx.com.

On Tuesday Hucknall Rolls Royce Amateur Radio Club is having a discussion and assistance night for those wanting learn more about the Arduino. Contact Dave Wilde, G1YAI, by email to treasurer@hrrarc.com.

On Tuesday Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding training classes and looking at computers, tablets and notepad. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is having a talk on Radio Mobile by G4NDM. Contact Terry, M0RIA, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is planning events for 2013 and having a contest logging demo. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Central Radio Amateur Circle is holding its AGM at The Turf Tavern, Wolverhampton Road, Bloxwich. Contact Martin Hallard, G1TYV, on 07906 905 071.

On Friday Coventry Amateur Radio Society is watching the Kiribati T32C DVD. Contact John, G8SEQ, on 07958 777 363.

On Friday Hucknall Rolls Royce Amateur Radio Club is having a club meting and a talk on APRS by Roger, M0HRR. Details from Dave Wilde, G1YAI, by email to treasurer@hrrarc.com.

NEWS FOR THE NORTH OF ENGLAND

We start with notice that South Tyneside Amateur Radio club is planning a Foundation course. For more information please contact Darren, 2E0MTY, on 07511 968 073.

Now for clubs that have several events this week. Denby Dale Radio Club is running its Foundation course at Pie Hall today, and also attending Communicator Badge day at Bradley Wood Scout Camp. Wednesday sees a night on the air from 7.30pm on 145.575MHz. Next Saturday the Foundation course continues. Details from Richard, M0RBG, on 07976 220 126.

South Manchester Radio and Computer Club is holding a technical forum on Monday. On Thursday there's a look at TS-590 user experiences with Peter, G0BHP. Details from Ron, G3SVW, on 01619 693 999.

Tynemouth Amateur Radio Club is preparing for the RSGB 144 & 432MHz contest on Friday. Next weekend the club is operating the RSGB Centenary Special Event station Gx100RSGB, on all HF bands, working SSB, CW & data. It is also possible that there may be a 2m/70cm station. More information from Bob, M0KLO, by email to mail@g0nwm.com.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club hosts the Tyne and Wear Repeater Group AGM at 7.30pm. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a practical evening, using the club test equipment. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday South Tyneside Amateur Radio Society is on the air. Details from Darren, 2E0MTY, on 07511 968 073.

On Monday Tyne & Wear Repeater Group is holding its AGM. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Tuesday Chester & District Radio Society Bring and Tell. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

[Note to Newsreaders: anything happening between Wednesday and next Sunday

has already been mentioned in the ``clubs with several events'' section].

NEWS FOR NORTHERN IRELAND

On Tuesday Mid Ulster Amateur Radio Club is having a shack night. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is having an on the air night. Contact Paul, GM0BKC, on 07846 412 862.

On Tuesday Kilmarnock & Loudoun Amateur Radio Club is having a club night. Meetings start at 19.30 prompt. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Wednesday Lothians Radio Society is having a talk on VHF tracking by Stan Frey, GM8ZQY. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Thursday Aberdeen Amateur Radio Society is having a Morse evening and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice of some forthcoming training courses. Chesham & District Amateur Radio Society plans to run a Foundation

training course, starting on Sunday 17 March. Training will last for three sessions, with the exam on the fourth Sunday, 14 April. The cost will be ?49.50, including the exam fee, room hire and training materials. Training will take place at the White Hill Community Centre, off White Hill, Chesham HP5 1AG. For more information contact Terry Thirlwell, G0VFW, by email to g0vfw@thirlwell.me.uk.

.

Now for clubs that have several events this week. Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm on 3.570MHz, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's a club meeting at the Farnborough Community Centre, and on Friday it's the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Brede Steam Amateur Radio Society is at the shack on Tuesday and next Saturday. For more information contact Steve, on 01424 720 815.

Newbury & District Amateur Radio Society is having a presentation on Wednesday on amateur radio at the North Pole by Michael, M0MPM. Next Saturday sees the start of the Intermediate tuition weekend. Contact Rob, G4LMW, on 01635 862 737.

Worthing & District Amateur Radio Club is putting GX3WOR on the air on Wednesday. Next Sunday sees the monthly breakfast meeting at the Goring Caf&#65533; from 9am. Contact John, G8FMJ, on 01273 593 232.

Thames Amateur Radio Group is having a talk on Friday by Andy G1GKN on Chain Home Towers. Next Sunday there's the club net on GB3DA from 8pm. Details from Pete Sipple, M0PSX, on 07940 579 116.

Bredhurst Receiving and Transmitting Society is having a rally discussion meeting on Thursday, and the Rainham Rally itself is next Sunday. Contact Charles, G4VSZ, 07982 244 788.

Now we return to the traditional listing in date order. On Sunday Itchen Valley Amateur Radio Club is holding a forum on ideas for the future. Details from Liz, M0ACL, on 02380 254 599.

On Tuesday Dorking & District Radio Society is having a talk on short range data transmissions by Ken Kangeyan, MD of Radiometrix. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday Stevenage & District Amateur Radio Society is having an LC meter workshop with Keith, G4KGP and Nicolas, M1HOG. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Dover Radio Club is having a talk on digital amateur TV by Justin Cockett, G8YTV. Details from Pete, M0PKH, by email to peter.halloway@sky.com.

On Wednesday Hastings Electronics and Radio Club is holding its AGM and having a demonstration of SDR by Wilf, M0GYE. Contact Gordon, on 01424 431 909.

On Wednesday Norfolk Amateur Radio Club is having an informal meeting with Bright Sparks, the shack is open and the workshop is available. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bittern DX Group is meeting at 8pm at The Roman Camp Inn, Aylmerton, NR11 8QD. Contact Linda, G0AJJ, on 01692 218 562.

On Thursday Edgware & District Radio Society is having a talk by Gerald Alterman on his Olympics experience. More information from Mike, G4RNW, on 020 8950 0658.

On Thursday Hilderstone Radio and Electronics Club is having a talk on operating from Barbados by Peter Love, G0KOK. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Reading & District Amateur Radio Club is having a talk on saving life as a Community First Responder by Martin Maynard, G8CIX. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society is having a natter night. Contact John Burnett, 2E0OAK, on 07860 804 793.

On Friday Cambridge & District Amateur Radio Club is holding a pre-rally meeting. Contact Ron, G3KBR, on 01223 501 712.

On Friday Crystal Palace Radio and Electronics Club is having a talk by Barrie McKay of the Crystal Palace Museum on the curious story of the Crystal Palace lost railway. Contact Bob, G3OOU, on 01737 552 170.

On Friday Mid-Sussex Amateur Radio Society is having a talk on the Sussex 4x4 Response Team by David Green, G4OTV. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Sunday East Kent Radio Society is at the Rainham Rally. Details from Karl Davies, M1DFM, on 01227 710 120.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Exeter Amateur Radio Society is looking at members' projects in the Moose Centre from 7pm on Monday. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Riviera Amateur Radio Club is having a club meeting and putting MX0RIV on the air on Tuesday from 7.30 to 9.30pm. Friday sees the club 2m net on 145.425MHz from 8pm. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

Thornbury & South Gloucestershire Amateur Radio Club is on the air on Wednesday. The 2m net is on Friday at 8pm. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Monday Bristol RSGB Group is having a talk by Trinity House Deep Sea Pilot Captain Roger Francis. Details from Robin, G3TKF, on 01225 420 442.

On Thursday South Bristol Amateur Radio Club is holding open house and is on the air. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is holding its construction contest. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is on the air. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Torbay Amateur Radio Society is having a natter night and an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Llanelli Amateur Radio Society is putting GB4SDD on the air, having a junk sale and club raffle. On Friday GB4SDD is on the air for St David's Day. Contact Craig, MW0MXT, on 01269 845 773.

On Thursday Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500MHz then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

```
:Product: Weekly Highlights and Forecasts
:Issued: 2013 Feb 25 0208 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
18 - 24 February 2013

Solar activity was low. 15 C-class flares were observed throughout
the week, 13 of which originated from Region 1678 (N11, L=069,
class/area=Dkc/470 on 21 Feb). This region was numbered on 18 Feb
and quickly evolved from a beta to a complex beta-gamma-delta type
magnetic configuration. By 20 Feb, it had grown to 12 times its
original size and produced the largest flare of the week, a C8/Sf at
24/1111 UTC. Region 1678 rotated off the visible disk on 23 February
as a Dko type region with beta-gamma magnetic characteristics. Over
a dozen coronal mass ejections were observed during the week. Many
of the CMEs were associated with disappearing solar filaments. An
8-degree filament erupted near N25W18 between 0147 and 0548 UTC on
the 19th. Analysis of the associated CME suggested it had an
Earth-directed component. The largest filament eruption of the week
occurred later that day when a 41 degree long filament centered near
S22W10 left the disk between 1006 and 2310 UTC. Analysis suggested
there was no earth-directed component with that CME.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit
remained at normal levels throughout the week.

Geomagnetic field activity was at quiet levels until mid-day on 22
Feb when major storm levels were observed at high latitudes and the
planetary K-index reached unsettled levels. The increased activity
was tied to the arrival of a geoeffective coronal hole high speed
stream, possibly coupled with a transient solar wind feature. The
unsettled conditions lasted through the first period of 23 February
after which quiet activity levels prevailed.

Forecast of Solar and Geomagnetic Activity
25 February - 23 March 2013
```

Solar activity is expected to be at very low to low levels throughout the forecast period with a slight chance for an M-class event after 10 March when Region 1675 returns.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels.

Geomagnetic field activity is expected to be at quiet levels through the majority of the forecast period. Unsettled levels are predicted for 01 and 21 March when recurrent coronal hole high speed streams are forecast to be geoeffective.

because the claim to represent amateur radio in Fecked up Britain, and
represent all amateurs in Fecked up Britain. so in this statement they
are asking anyone for help member or not, and only helping the
members, with a plt problem. when i had some interference phoned
ofcom and they were onlt to happy to be of assistance. ie 40 wiped
out. problem solved in 2 weeks.

have one on me. your buying

Special Events Station K5B - 24th Annual Bataan Memorial Death March
Marathon

Posted: 25 Feb 2013 03:25 PM PST
http://forums.qrz.com/showthread.php?381337-Special-Events-Station-K5B-24th-Annual-Bataan-Memorial-Death-March-Marathon&goto=newpost

The Mesilla Valley Radio Club (MVRC) will again be operating Special Events Station K5B for the Annual Bataan Memorial Death March Marathon on March 17th, 2013 at the MVRC club house.

The URL for the event is http://www.bataanmarch.com and the URL for K5B is http://www.n5bl.org/bataan .

Please be sure to give us a call and send your QSL and SASE and request this year's QSL card. The instructions to request this year's K5B card are on the K5B page shown above.

God bless our veterans.

73,

Fred,
WB4AEJ

Radio Operators at UP 200:

Posted: 25 Feb 2013 04:05 PM PST
http://www.eham.net/articles/29795

MARQUETTE -- All eyes were on the sled dogs during the UP 200, but behind the scenes, ears were closely monitoring the mushers. Hiawatha Amateur Radio (HAM) radio operators provide communication for the participants. Because cell phone coverage is marginal, various checkpoints are set along the trail to ensure the racers' safety. Saturday at the Holiday Inn, they demonstrated coordination process with radio operators to update the status of each racer.

- RoverMania On the Road
- ARRL September VHF - Results Are Live!
- AutoEZ Automates EZNEC
- Introduction to Impedance Matching
- Notes On ARRL DX CW

NEW HF OPERATORS - THINGS TO DO

Grab that microphone and head for the HF bands because there will be
thousands of DX stations all trying to log stations in the U.S. and
Canada this weekend in the ARRL DX Phone contest! If digital modes are
more to your liking, there are three digital contests on the way and a
couple of QSO parties that feature RTTY or PSK operation, too.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Software purveyor N3FJP's call was scrambled in the previous issue -
but the web link <http://www.n3fjp.com/> was OK. Sorry about that,
Scott! (Thanks, Dave K1ZZ)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Mar 2-3

- ARRL International Phone DX Contest
- NS Weekly Sprint--CW (Mar 1)
```

- Open Ukraine RTTY Championship
- OK1WC Memorial Contest (Mar 4)
- ARS Spartan Sprint--CW (Mar 5)
- YL CW Party (Mar 5)
- John Rollins Memorial DX Contest--CW (Mar 6)

Mar 9-10

- North American RTTY Sprint
- RSGB Commonwealth Contest--CW
- AGCW QRP Contest--CW
- QRP ARCI HF Grid Square Sprint--CW
- EA PSK63 Contest
- Idaho QSO Party
- Wisconsin QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The 2013 VHF Weak Signal Group Banquet will be held at the Dayton Hamvention on Friday evening, May 17th, at the Dayton Grand Hotel (Formerly the Doubletree Dayton Downtown Hotel). The guest speaker is Jeff Klein K1TEO - VHF Contester Extraordinaire. For tickets and more information contact Tony WA8RJF <WA8RJF@ARRL.net>.

Having mentioned ES5TV's 15 meter "Me-M-Me" echoes off the Moon, I also heard about other HF moonbounce successes by W0UN (15 and 10 meters) and ARRL CEO, K1ZZ (10 meters). Nice job, guys - let's see if we can make the round trip!

Tom K1KI came up with a pair of articles on cheating in chess <http://rjlipton.wordpress.com/2013/01/13/the-crown-game-affair/> and in ice fishing <http://nyti.ms/Wanjby>. Cheating at ice fishing? Perhaps there is some wisdom there for radiosport aficionados.

The previous issue told the sad news of Harbach Electronics dropping the Peter Dahl line of transformers. This issue reports the happy news that Hammond Manufacturing <http://www.hammondmfg.com/> will be winding Peter Dahl designs beginning in April of this year. (Thanks, Jeff W8CQ)

Make it easy for prospective contesters to find you - the list of clubs on the Contesting Wiki <http://wiki.contesting.com/index.php/Category:Clubs> needs updating with links to contest clubs around the world. There are listings from the U.S., Canada, and Argentina so there are many more to be added! Have your club secretary update your information or add it so that new members can join.

What organizations out there are sponsoring FM Simplex contests? The Milwaukee Radio Amateurs Club, Wireless Society of South Hills, and the Wireless Society of Southern Maine all sponsor these short contests for new hams. If your club sponsors such a contest, let the editor <rate-sheet@arrl.org> know and we'll see about publishing a list of these contests.

Looking up old call signs can be done online - the QRZ.com web site <http://www.qrz.com/search1993.html> has some capabilities going back to 1983. The vanityhq.com <http://vanityhq.com> Operation CQ project also has information and you can enter the history of your own call signs, too. (Thanks, Dave NN1N and George K5TR)

Well-known Finnish amateur, DXer, and occasional contester Osmo Antero Wiio, OH2TK died on February 20th at the age of 85. An author, journalist, professor and former member of Finland's Parliament, he was probably best known for Wiio's Laws <http://en.wikipedia.org/wiki/Wiio%27s_laws>.(Thanks, Daily DX and Doug K1DG)

Dink N7WA has just released three Android OS apps (free!) for viewing the latest contest results posted on the 3830 reflector <http://lists.contesting.com/_3830/>. The apps are available from Dink <http://www.eskimo.com/~mwdink/AndroidSummaryApps/> or you can search Google Play <https://play.google.com/> for ARRL DX Summary, WPX Summary, and NAQP Summary. The three apps support all modes of the contests and display the results in spreadsheet form. No more waiting for summaries to be posted! The application can be "sideloaded" on the Kindle Fire, too.

The ARRL November Sweepstakes writeup authors are completing their reports - and looking for additional photos and stories about your efforts to share in the extended online write-ups. If you have good material, post the material in the ARRL Soapbox and drop a note to your editor <rate-sheet@arrl.org>!

Jerry VE6CPP reports that a new VHF/UHF/�W Rover Group <http://groups.yahoo.com/group/vhfrovers/> has just been started on the Yahoo Groups website.

The Transatlantic Tests of 1921 are arguably the first formal competitive event in ham radio. Don't miss the upcoming March 18th webinar <http://wwrof.org/webinars/> on this event, sponsored by the World Wide Radio Operators Foundation. For background on this interesting era in ham radio, check out the Radio Club of America's website <http://radioclubofamerica.org/history.php?page=1921.html>! (Thanks, Jim K9JWV)

Web Site of the Week - A recent XKCD <http://xkcd.com/1133/> comic hilariously described the Saturn-V rocket using only the 1000 most common words. The "Up-Goer Five" story proved to be such a hit that an on-line editor <http://splasho.com/upgoer5/> was created which restricts your writing in the same way. Chris W2PA <http://w2pa.net/> posted his attempt <http://tinyurl.com/aptonee> to use the editor while writing about ham radio, contesting, and DXing. Your editor, of course, could not resist the temptation either and here is my description of radiosport:

Our game of listening and talking around the world over the air is a lot of fun. We can play the game any time. Some games last for a few

hours and some for two whole days. You can hear the world turning while you play the game as the Sun comes up and goes down. There are very many of us who like the game and when we play it is exciting to see how many people and places we can talk to. When we are strong we can talk to more people. We also have to listen well to be sure we get it right. It is not enough to just be fast, we have to know what we are doing, too. The game makes us better at using and understanding waves. By playing, we learn more about our selves and about the world we live in. You should listen some time and see if you would like to learn how to play, too!

WORD TO THE WISE

Let's put the "op" back in operators - Dave KM3T

==> SIGHTS AND SOUNDS

RoverMania Man, Bruce W9FZ, has posted a pair of pretty travelogues about his rambles with his XYL, Janice KA9VVQ, during this year's Minnesota QSO Party <http://w9fz.com/hamtrips/2013mnqpw9fz.html> and the ARRL January VHF Contest <http://w9fz.com/hamtrips/2013janvhfw9fz.html>. Let it snow and keep buttoned up!

Not only does Valery R5GA develop useful websites (see the Operating Tip below) but takes pretty nice photos <http://r5ga.com/photos.php?id=16>, too. This set is from his TO5X trip during which he placed #2 in the ARRL DX CW contest.

Tom AK2B discovered a really beautiful example of the art of homebrewing in this video <http://youtu.be/eJsQaZjacRg> by Lee Snook. Check out the cool multi-turn knobs on the left and right sides of the radio and the coax jumper technique, as well.

Where did the name of the 3830 score reporting website come from? In the primitive age before the Internet, hams actually used ham radio to exchange contest scores after the contest! For reasons relatively obscure, the frequency eventually settled on was 3830 kHz. One person would collect the scores and then send them over whatever medium was available. You can hear a little of what it was like in this post-ARRL DX CW contest video <http://www.youtube.com/watch?v=CJgblG09FAg> as some of the East Coast multi-multi stations exchange band-by-band breakdowns after the ARRL DX CW contest. (Thanks, Dave KM3T)

Tristan da Cunha, the lonely South Atlantic Ocean island better known to hams as ZD9, is the subject of this lovely photo from space and accompanying article from NASA's Earth Observatory <http://earthobservatory.nasa.gov/IOTD/view.php?id=80456&src=eoa-iotd>.

Luckily, there are English sub-titles available for this European version of "fantasy football <http://www.thepoke.co.uk/2013/02/20/electroshock-football/>". I think this could liven up radiosport "considerable." (Thanks, Lynn N7CFO)

==> RESULTS AND RECORDS

Our man in the ARRL Contest Branch, Sean KX9X, reports that the September VHF Contest results <http://arrl.org/contest-results-articles> are now online and that certificates for the 2012 ARRL January VHF Contest have finally left the building. He is now busy getting all of the 2012 ARRL DX certificates in the mail.

How about this photo finish? After 48 hours of brass pounding the TI5W and VP2ME teams are within four QSOs and one multiplier of a two-way tie for first place in the DX Multi-Two category!

- TI5W : 9143 QSOs and 349 multipliers for 9,572,721 points
- VP2ME: 9147 QSOs and 348 multipliers for 9,549,468 points

Yikes...that is just WAY too close! Log checkers, start your engines!

Preliminary scores <http://www.ncjweb.com/naqpcwprelim.php> for the January CW North American QSO Party are available for viewing. Let the sponsors know if you spot any errors. In particular, if you see your score classified as a Multi-2 score when you were actually a Single-Op, Unassisted entry, you need you to re-submit your log. (Thanks, Kirk K4RO and Tree N6TR)

A summary of the logs received for the December 2012 Canada Winter Contest <https://www.rac.ca/en/rac/programmes/contests/files/Summary%20of%20Canada%20Winter%20Contest%20Dec%202012%20Logs%20Received.pdf> has been posted online. (Thanks, RAC Canada Winter Contest Chairman, Sam VE5SF)

Just three months after the contest, final results from the 2012 California QSO Party <http://www.cqp.org/index.html> are now posted on the CQP website. The site includes full records <http://www.cqp.org/Records.html> and downloadable certificates <http://www.cqp.org/cqp2012-pdf.html>. 848 logs were received with a grand total of 271,000 QSOs and 18 new records! (Thanks, John K6MM)

A little research suggests that the Voyager spacecraft's transmitters output between 20 and 23 watts. As of last September the spacecraft was was a bit over 11 billion miles away, resulting in a miles-per-watt rating of between 492 and 566 million. (Thanks, Matt N3TZJ)

OPERATING TIP

Reviewing one's log checking report is a good way to learn how to get better. Valery R5GA just added another - the reverse log generator <http://rate.pileup.ru/vlog.php>. Currently based on the public logs from the 2012 CQ WW DX CW contest, you can enter any call sign - yours, someone else's, or even a busted call - and create a time-ordered list of everyone who worked that station. i.e. - a reverse log!

==> TECHNICAL TOPICS AND INFORMATION

Dan AC6LA has released AutoEZ <http://ac6la.com/autoez.html>, a new Excel application that works in conjunction with the EZNEC antenna modeling program. You can use AutoEZ to control diverse aspects of the model and then run multiple EZNEC test cases while automatically changing one or more variables between runs. AutoEZ can take full advantage of all the features new to EZNEC v. 5.0 such as virtual wires, realistic transmission lines with loss, transformers, L networks (which can be combined to form T and Pi networks), and parallel connected loads. The website includes numerous examples of how this powerful tool can be used for antenna system problems, such as designing antenna tuners, stubs, and transmission lines.

As a means of demonstrating the effects of height above ground, Al AB2ZY recommends the charts and figures that accompany this article <http://www.qsl.net/aa3rl/ant2.html> as being very useful in visualizing what happens as a dipole is raised and lowered.

If you are troubleshooting an amplifier's output circuit, turn off the power and be sure to ground the HV lines, then remove the tube and replace it with a non-inductive resistor of the same plate impedance as the tube from anode to ground. With all power still off, connect a network analyzer or antenna analyzer to the output connector. Tune up the output circuit and see if you can get a good match. If not, you have a problem in the output circuit! (Thanks, Mike G8TIC)

Safety first! Here's a nifty way to put a lockout <http://gdkonstantine.wordpress.com/2013/01/17/project-lockout/> on the power cord of an appliance or tool so that no one plugs it in while you're working on it. The February 26th issue of the Make Magazine Newsletter <http://makezine.com/newsletter/> also notes that those dessicant packets shipped with electronics and other items to keep them dry will also keep your tools dry. Save the packets and drop them in tool box or other tool holder!

Steve N2IC warns of a potential problem for SO2R operators. While sending alternating CQs on 15 and 10 meters, he "Noticed that people calling in on 10 sounded choppy. Turned out to be 15 meter RF coming back into the 10 meter radio through the unprotected RX antenna port. I have had that happen on other band combinations in other contests." This tip applies whenever a receiver input port without filtering is connected to an antenna when a nearby transmitter is active.

Technical Web Site of the Week - The on-line series from Electronic Design magazine, Impedance Matching - Parts 1-3 <http://electronicdesign.com/learning-resources/ebooks>, by W5LEF makes a good introduction and overview of the topic.

==> CONVERSATION

Notes On ARRL DX CW

After a few good January and February contests, I thought I'd summarize several topics of possible interest to the Contest Update readers.

While conditions haven't exactly been the high-band sunspot peak spectaculars we experienced a decade ago, there have been openings all across the contest bands. This is a bit of a balancing act - enough solar flux to open 10 meters in a big way can have the opposite effect on 160 and 80 meters by raising absorption in the lower layers of the ionosphere. With decent conditions all across the MF and HF bands, the result has been record scores in many contests.

There was some discussion around the K3LR post-contest dinner table about the "best" level of solar activity. The consensus was that a flux level of 120 would be best for all-band operation, solidly opening the higher bands while not having too big an opposite effect on the low bands. Good conditions also bring out the casual operators who further add to the scoring totals. In other words - things could be considerably worse and we're all making lots of contacts!

Managing Skam

We have now had a couple of contest seasons with the CW Skimmer <http://www.dxatlas.com/cwskimmer/> spots being widely available from the worldwide spotting networks. Initially, the concern was that use of a "skimmer" would convey enormous advantages to a single-op station. For example, across a 100 kHz slice of band filled with stations CQing every 500 Hz, a skimmer could theoretically identify every station in less than a minute while the best human operator would take dozens of times longer to do the same thing. Certainly, this would be an advantage to the station using the skimmer, assuming the data was not available to other stations.

What we see instead is so many skimmers feeding so much data into the networks that the possible advantage from any single skimmer is simply leveled out. The data problem has turned out to be not one of scarcity but of excess! It has also been noticed that the problem of self-spotting and "cheerleading" has essentially disappeared in the "fully-skimmed" environment. Things might be different during the upcoming ARRL DX Phone contest. (Statistics <http://reversebeacon.blogspot.com/> of the most active skimmers and most-spotted stations during ARRL DX CW were compiled by Bob, N6TV.)

Not only is there a flood of spotting information, there is also a noticeable amount of defective information in the form of bad calls - some obvious, some not - and occasionally, bad frequencies. At this stage in its development, a skimmer can be confused by signal artifacts and the timing of transmissions, causing erroneous leading and trailing letters, such as the common cases of K3LR getting spotted as EK3LR and TK3LR or W3LPL getting spotted as LW3LPL. One wonders what it must be like to actually be operating from Armenia (EK) or Corsica (TK) in competition with these spots!

To me, this seems very similar to managing email spam, so I am calling these bad spots "skam". While the skimmer server teams, such as at the Reverse Beacon Network <http://www.reversebeacon.net/> or RBN, are aware of this problem and are considering solutions, not every skimmer

spot goes through a server. Logging software such as N1MM Logger has added the means to flag and suppress known bad calls, too. There is more to be done.

Perhaps we can take a cue from the email world as to how to deal with automatically-generated unwanted data. Email service providers employ adaptive techniques called Bayesian filtering <http://en.wikipedia.org/wiki/Bayesian_spam_filtering> to assess the "spamicity" of a message. Email client software that runs on our own PCs can also filter email. Maybe we could do the same to assess the "skamicity" of a spot and keep it from propagating onto or within the spotting networks or onto our station band maps. There are numerous open-source spam filter packages so the possibility exists of adapting one to amateur spotting. And you phone operators out there, I hear you snickering about the CW spotting problem! The technology is out to "skim" SSB signals (security firms and agencies use it all the time) but hasn't gotten to the amateur community. Yet.

Support Socks

And one final note - in the Dec 5th issue <http://www.arrl.org/contest-update-issues?issue=2012-12-05> I mentioned using support socks during the contest and decided to give it a try myself. I ordered a pair of Activskin A866 support tights <http://www.glieberman.com/a866-thermofabric-full-support-tights-with-fly/> and gave 'em a try during the ARRL DX CW contest. These are like a pair of bicycling tights but lighter and with a bit more squeeze on your legs. I have to say that I did notice the difference!

Even after sitting at the radio for most of 18 hours a day, I didn't once have that "bloated leg" feeling I had experienced before. Furthermore, I felt somewhat more alert, particularly in the afternoon low-rate periods. This could be due to the blood circulating where it needed to - in my torso and head - instead of pooling in my legs and feet.

I liked the results so much that I've ordered another pair as well as two pairs of A2409 support socks <http://www.glieberman.com/a2409-thermofabric-light-support-knee-high-socks/> for my marathon editing sessions and long plane trips. Both the tights and socks are light enough that you can wear regular socks over them, too.

Speaking of editing sessions, it's time to end this one. I'll see you on the bands this weekend in the ARRL DX Phone contest, OK? Have fun!

73, Ward N0AX

==> CONTESTS

27 February through 12 March

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Int'l Phone DX Contest--Phone, from Mar 2, 0000Z to Mar 3, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and state, province, or power. Logs due: Apr 21. Rules <http://www.arrl.org/contests>

North American RTTY Sprint--Digital, from Mar 10, 0000Z to Mar 10, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/naqprules.php>

NS Weekly Sprint--CW, from Mar 1, 0200Z to Mar 1, 0300Z. Weekly on Thursday evenings local time. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com>

Open Ukraine RTTY Championship--Digital, from Mar 2, 2000Z to Mar 2, 2359Z. Multiple operating periods. See website. Bands (MHz): 1.8-28. Exchange: Regional abbreviation and serial. Logs due: Apr 30. Rules <http://uarl.com.ua/openrtty>

OK1WC Memorial Contest--Phone,CW, from Mar 4, 1600Z to Mar 4, 1659Z. First through fourth Monday of each month. See website. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

ARS Spartan Sprint--CW, from Mar 5, 0200Z to Mar 5, 0400Z. Monthly on the first Monday evening local time. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

YL CW Party--CW, from Mar 5, 1900Z to Mar 5, 2100Z. Bands (MHz): 3.5. Exchange: RST, serial, if YL "YL," name. Logs due: Mar 31. Rules <http://www.agcw.de>

John Rollins Memorial DX Contest--CW, from Mar 6, 2300Z to Mar 7, 2300Z. Multiple operating periods. See website. Bands (MHz): 7,14. Frequencies (MHz): Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org>

RSGB Commonwealth Contest--CW, from Mar 9, 1000Z to Mar 10, 1000Z. Bands (MHz): 3.5-28. Exchange: RST and serial (Commonwealth only). Logs due: 16 days. Rules <http://www.rsgbcc.org/hf/rules/2013/r80mcc.shtml>

AGCW QRP Contest--CW, from Mar 9, 1400Z to Mar 9, 2000Z. Bands (MHz): 3.5-28. Exchange: RST, serial, class, AGCW number or NM. Logs due: Mar 31. Rules <http://www.agcw.de>

QRP ARCI HF Grid Square Sprint--CW, from Mar 9, 1500Z to Mar 9, 1800Z. Bands (MHz): 3.5-28. Frequencies (MHz): QRP calling frequencies. Exchange: RST, 4-char grid square, QRP ARCI nr or power. Logs due: 14

days. Rules <http://www.qrparci.org/contests>

EA PSK63 Contest--Digital, from Mar 9, 1600Z to Mar 10, 1600Z. Bands (MHz): 3.5-28. Exchange: RST and serial or EA province. Logs due: Mar 31. Rules <http://www.ure.es>

Idaho QSO Party--Phone,CW,Digital, from Mar 9, 1900Z to Mar 10, 1900Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and ID county or S/P/C. Logs due: 30 days. Rules <http://www.idahoarrl.info/qsoparty>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 10, 1800Z to Mar 11, 0100Z. Bands (MHz): 3.5-28, 50+, Frequencies (MHz): CW 3.550, 7.050, 14.050; Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or S/P/C. Logs due: Apr 11. Rules <http://www.warac.org>

VHF+ CONTESTS

OK1WC Memorial Contest--Phone,CW, from Mar 4, 1600Z to Mar 4, 1659Z. First through fourth Monday of each month. See website. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

Idaho QSO Party--Phone,CW,Digital, from Mar 9, 1900Z to Mar 10, 1900Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Free services at Dayton Hamvention 2012

Posted: 26 Feb 2013 06:07 PM PST
http://forums.qrz.com/showthread.php?381496-Free-services-at-Dayton-Hamvention-2012&goto=newpost

I have rented flea market booth space # 3977 located next to gate E (north end) at the Dayton Hamvention this year. At this location I am going to provide the following FREE services to the attending public. 1. Free access to 110 Volts to check equipment. 2. Free access to my watt meter and cantenna dummy load for testing XMTR output. 3. Free access to a 12 volt power supply for gear testing.

4. Free access to my vacuum tube tester for testing the tubes you may have purchased.

5. Free paging on 2 meters on simplex frequency 147.525 Mhz. (be sure and bring your 2 meter hand held as someone just might be looking for you) Park it on 147.525 Mhz and rip the knob off. hi hi

6. Free advertising on my huge classified ad board for looking to buy or looking to sell items.

please print clearly and use a 3X5 card as a measure of how much to advertise at one time.

Be sure to include your name and callsign and contact information on your ad.

I have never done anything like this before and my main agenda is to provide needed services, make new friends, and have a lot of fun. Voluntary donations will be graciously appreciated by yours truly.

check out my BIO at QRZ.COM for updates. Feel free to contact me if you have any questions whatsoever.

Steve Ewald, WV1X, Field Organization Team Supervisor, would like us to spread the word about some prestigious awards from the ARRL. Please take a look and consider nominating one of our outstanding Nebraska hams.

73, Art K0AIZ

ARRL Award Nominations are Open

Each year the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators.

The nomination period is now open for the ARRL awards that are designed to recognize educational, technological and service pursuits in Amateur Radio. There is also an award to honor a young Amateur Radio operator. Please log onto www.arrl.org/arrl-award-nominations for specific details and information on how to nominate or submit supporting endorsements.

The ARRL Herb S. Brier Instructor of the Year Award is awarded to an ARRL volunteer Amateur Radio instructor or to an ARRL professional classroom teacher who uses creative instructional approaches and models the highest values of the Amateur Radio community. The award has been focused to reflect quality of instruction and commitment to licensing instruction. Nominations should be received by March 15, 2013, to be considered for this year.

The Hiram Percy Maxim Award is for a licensed radio amateur under age 21 (and an ARRL member) whose accomplishments and contributions are of the most exemplary nature within the framework of Amateur Radio activities. Nominations for this award need to be made through your Section Manger (see page 16) who will then forward the nomination to ARRL Headquarters by March 31, 2013.

The ARRL Microwave Development Award is presented to a licensed radio amateur or to individuals who are licensed radio amateurs contribute to the development of the Amateur Radio microwave bands. The nomination deadline is March 31, 2013.

The ARRL Technical Service Award recognizes a licensed radio amateur or individuals who are licensed radio amateurs that provide Amateur Radio technical assistance or training to others. The nomination deadline is March 31, 2013.

The ARRL Technical Innovation Award is granted to a licensed radio amateur or to individuals who are licensed radio amateurs who develop

and apply new technical ideas or techniques in Amateur Radio. The nomination deadline is March 31, 2013.

The Knight Distinguished Service Award was established to recognize exceptionally notable contributions by an ARRL Section Manager to the health and vitality of the League.

For more information about these awards, visit www.arrl.org/arrl-award-nominations.

You may also contact Steve Ewald, WV1X, at wv1x@arrl.org or 860-594-0265 at ARRL Headquarters.

Canadian DMR C-Bridge Launches

Posted: 26 Feb 2013 07:42 AM PST
http://forums.qrz.com/showthread.php?381416-Canadian-DMR-C-Bridge-Launches&goto=newpost

http://www.va3xpr.net/canadian-dmr-c-bridge-launches/

On February 23rd, Canada took it□s first step toward the creation of a national amateur radio DMR network with the launch of the first inter-provincial DMR networking server. This server, known commonly as a □c-Bridge□, which is manufactured by Rayfield Communications, will serve as a network hub for Canadian amateur radio DMR repeaters, allowing them to reliably link to one another and to the larger DMR-MARC global network using the Internet. The Canadian c-Bridge is located in Montreal and is currently supporting several DMR repeaters in Ontario and Quebec, including the VA3XPR digital DMR repeater located in downtown Toronto.

A special thanks goes out to all who made the launch of the Canadian c-Bridge possible, including Alain, VA2SPB, Chris, VE3BNI, Stephane, VE2TAX, Pierre, VE2PRT, Mike, AA9VI, JP, KC9KKO, John, W0PM and Don, VA3XFT.

For more information on the Canadian c-Bridge and how your organization can connect their DMR repeater to it, please contact Don Trynor, VA3XFT

HRD Releases Updated Manuals for Radio Control and Digital Master

Posted: 25 Feb 2013 06:49 PM PST
http://forums.qrz.com/showthread.php?381366-HRD-Releases-Updated-Manuals-for-Radio-Control-and-Digital-Master&goto=newpost

Tampa, FL February 25, 2013

HRD Software, LLC is pleased to announce the release of updated manuals for the HRD 6.0 program. Tim Browning, KB3NPH, took it upon himself to help us with the updated manuals. He has completed the Rig Control and DM-780 6.0 manuals and is working on the Logbook, Rotor and Satellite manuals.

Download the new Rig control and DM-780 manuals at http://www.hrdsoftwarellc.com/downloads/default.html under the manuals section. Once all the new manuals are complete, they will be offered as a printed version via Lulu.com.

The HRD developers (Rick W4PC and Erik KC0WWC) are hard at work on the first free update for the 6.0 paid users. 6.01 will include fixes for FSK on the Navigator interface, as well as updates to print reports from the DX reports for all the awards and much, much more.

HRD will be at the Charlotte Hamfest on March 8th and 9th, then on to Ft Walton, FL on the 15th and 16th. Come by and see 6.01 in action.

Videos for Version 6.0 are also provided on our YouTube channel:

http://www.youtube.com/hrdsoftware

You can purchase and download the product at http://www.hrdsoftwarellc.com

HRD Downloads: http://www.hrdsoftwarellc.com

Posted: 27 Feb 2013 02:06 AM PST
http://forums.qrz.com/showthread.php?381523-Nauryz-DX-Contest-First-Central-Asian-Contest&goto=newpost

The Association of Amateur Radio Services of Kazakhstan is announcing a launch of the new initiative - Nauryz DX Contest scheduled for March 23, 2013 on HF bands (80-10m).

The contest is dedicated to the spring holiday Nauryz (Nowruz) celebrations taking place around March 22 throughout Central Asia and in many places around the world.

Contest Organizing Committee is inviting all operators to take part in the event.

More information is available on the contest website

http://www.nauryz-dx-contest.com

and on Facebook page at

http://facebook.com/NauryzDxContest

See you in the contest!

Volunteers Help Keep Chilly Hilly Rolling:

Posted: 26 Feb 2013 04:15 PM PST
http://www.eham.net/articles/29801

BAINBRIDGE ISLAND -- A group of amateur radio operators huddled around a table early Sunday, watching a tiny green icon creep across a map on a computer monitor. The green icon was the ferry Tacoma, which at this moment was churning its way through Eagle Harbor carrying a horde of bicyclists bound for the annual Chilly Hilly ride. Minutes later, a radio in the center of the table crackled to life. "They've all disembarked now," a scout at the ferry terminal reported. "It looked like there were about 1,000." For the next seven hours the radio would rarely be silent. Ham radio enthusiasts coordinated a fleet of support vehicles for the Chilly Hilly ride from a makeshift headquarters in the Bainbridge Island American Legion Post. It's a volunteer service that ham radio clubs have provided to the Cascade Bicycle Club event for years, but recently the radio operators have incorporated an astounding array of technology into the support network.

//
Amateur Radio Enthusiasts Flock to La Porte for Annual Event:

Posted: 26 Feb 2013 04:15 PM PST
http://www.eham.net/articles/29800

La PORTE -- For one man it was the discovery of a nearly 100-year-old radio in his attic. For another, it was a Christmas gift that connected him to voices from around the world. And for a third, it was his father's military career that led him into the world of amateur radio. Hundreds like them gathered in La Porte on Saturday for the annual Cabin Fever Hamfest at the La Porte Civic Auditorium. Presented by the La Porte County Amateur Radio Club, the event sought to engage amateur (Ham) radio operators, collectors and restorers in one place where they could buy, sell and discuss the aspects of classic radios and their parts, and spread their joy to younger generations. A joy that includes building, fixing, restoring and just operating wireless communications. "It's a thousand hobbies in one," said vendor Tom Frisz of South Bend after selling a Motorola two-type receiver from the early 1950s. "There's always something new to try. If I make it into my 90s I can still sit in front of a radio and talk to a friend or people from around the world."

//
World's First 'Phonesat', STRaND-1, Launched into Orbit:

Posted: 26 Feb 2013 04:15 PM PST
http://www.eham.net/articles/29799

Launched into a 785km Sun-synchronous orbit on ISRO's PSLV launcher, the spacecraft is an innovative 3U CubeSat weighing 4.3 kg and is the world's first "phonesat" to go into orbit, as well as the first UK CubeSat to be launched. Developed by a team from the University of Surrey's Surrey Space Centre (SSC) and Surrey Satellite Technology Limited (SSTL), STRaND-1 is a training and demonstration mission, designed to test commercial off-the-shelf technologies in space.

//
Canadian DMR C-Bridge Launches:

Posted: 26 Feb 2013 03:03 PM PST
http://www.eham.net/articles/29796

On February 23rd, Canada took it's first step toward the creation of a national amateur radio DMR network with the launch of the first inter-provincial DMR networking server. This server, known commonly as a "c-Bridge", which is manufactured by Rayfield Communications, will serve as a network hub for Canadian amateur radio DMR repeaters, allowing them to reliably link to one another and to the larger DMR-MARC global network using the Internet. The Canadian c-Bridge is located in Montreal and is currently supporting several DMR repeaters in Ontario and Quebec, including the VA3XPR digital DMR repeater located in downtown Toronto.

517. [DXNL] DXNL 1821 (Feb 27, 2013)

DXNL 1821 - February 27th, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Fabian Kurz, DJ1YFK
(e-mail: dj1yfk@darc.de)

This issue of the DXNL is slightly delayed due to a sad reason.
My sister Gaby Burchart, to whom this issue is dedicated, passed
away on February 19th.
Johannes, DK8JB.

9A, Croatia:
Charlie, NF4A will be on the bands as 9A5PC until March 5
from the 9A1A club station. In the ARRL DX SSB Contest he'll
take part in the 9A1A M/M team. QSO for 9A5PC via NF4A, LoTW.

9M6, East Malaysia:
Before joining the 9M4SLL team, Ben DJ0YI will be 9M6/N6MUF
from March 1 - 9 from Kota Kinabalu (capital of Sabah) on
Borneo Island (OC-088). QSL via DJ0YI, LoTW.

9X, Rwanda:
Nick, G3RWF (5X1NH), plans a trip to Rwanda from March 4 - 12.
He applied for the callsign 9X0NH and hopes to be back later
this year for another visit. He'll mostly operate in CW from
Kigali. QSL via G3RWF, LoTW.

DL, Germany:
On June 20, 1913, Wilhelm II (German Emperor) visited the village
Eilvese near Hannover on the occasion of the completion of building
a 258 meter high radio tower, at that time the highest in Germany.
The special event callsign DL100OUI (SDOK 100OUI) will be QRV
throughout the year to remember the 100th anniversary of the first
commercial radio contact between Germany and the USA from this
location. OUI were the call letters of the German station at that
time, the US station was located in Tuckerton, NJ.

EU, Belarus:
The radio club "Dalnye Strany" celebrates its golden jubilee

in March with the special call EV50WB.
QSL via EU1AZ (SSB) und via EU1DX (CW, RTTY), LoTW.

FY, French Guiana:
Marc, F1HAR will use the callsign FY5KE in the ARRL DX SSB Contest in the SOSB 15m HP category. QSL via F1HAR (bureau), FY5KE (direct) or LoTW. Herve, F5HRY will also be QRV from Kourou in this contest, signing TO1A in the SOSB 10m category. QSL only via LoTW.

G, England:
GB3RS is station located in the "National Radio Centre" in Bletchley Park, an exhibition of the history and technology of radio communication. The RSGB is always looking for volunteers for the operation of the station. Please contact carlos.eavis[at]rsgb.org.uk
QSL via bureau. http://www.nationalradiocentre.com

The club stations of the "International Short Wave League" (ISWL) are announced to operate as follows in March:
Call QTH OP (IOTA, WAB, WLOTA)
GX4BJC/A Walton on the Naze Herbie, G6XOU (EU-005, TM22 , LH-1841)
GX4BJC/P Herbie, G6XOU
MX1SWL/A (to be announced)
QSLs via G6XOU. http://www.iswl.org.uk/

Mark, G4MEM, will be QRV from his home QTH Harrogate (EU-005, WLOTA 1841, SO92, WW Loc. IO93fx) using the call sign G100C on March 2/3. QSL via M0OXOs OQRS: http://www.m0oxo.com/oqrs/

SP, Poland:
Until March 5th, the club station SP6PNZ will use the special call 3Z55OP on the occasion of the 55th anniversary of the amateur radio club in Opole. An award is available (see website).
QSL via SP6PNZ. http://www.sp6pnz.republika.pl/
http://ot11pzk.wordpress.com/regulami/

On the occasion of the 20th company anniversary of "Bombardier Transportation (Rail Engineering) Polska Spolka" the special call 3Z20RE will be active on the bands until mid April. An award is available, see QRZ.COM. QSL via SP5DZC.

In March the special callsign SN150BPM will commemorate the great battle of Malogoszcz in 1863. QSL via SP7PCA.

TA, Turkey:
Willi, DJ7RJ, will be on the bands as TA4/DJ7RJ from February 27 to March 18, with a preference for the lowbands in CW and SSB.
QSL via Homecall.

TI, Costa Rica:
Juan Carlos, TI2JCY, Carlos, TI2KAC, Mauricio,TI4ZM, Eddie, K4UN, Bob, W4BW, Keith, W4KTR, and Lex, W4XO, will take part in the ARRL DX SSB Contest as TI8M in one of the multi operator

categories. Before and during the contest they are "on air" on
all HF bands. QSL via TI2KAC.

TX5: Clipperton Island:
The outstanding DX event of the week is the TX5K DXpedition
to Clipperton (NA-011). On February 18 the "Shogun" left San
Diego and the team is expected to start their operation on
the bands on February 28th or March 1st, until March 10th.
Members of the DXpedition crew are Jef, DD2CW, Mathias, DJ2HD,
Gerhard, DJ5IW, Markus, DJ7EO, Heye, DJ9RR, Christian, DL1MGB,
Dietmar, DL3DXX, Andreas, DL5CW, Thomas, DL5LYM, Yann, F1NGP,
Giovanni, I5JHW, Edward, KE3D, Richard, KF4ZZ, Robert, KK6EK,
Walter, N6XG, Carlos, NP4IW, Kenneth OZ1IKY, Robert, SP5XVY,
Igor, US0VA, Roman, US5WDX, Lance, W7GJ, Michael, WA6O, David WJ2O,
and Luis, XE1L. They will be QRV from two locations with ten
stations, using vertical antennas on the beach and a 6M8GJ yagi
for 6m (including EME). EME propagation windows to Europe are
expected to be favorable; please read the website for details.
They will use the DXA2 system for near real-time online logging:
http://www.dxa2.org/
Frequencies:
CW: 1833, 3523, 7023, 10103, 14033, 18083, 21033, 24903, 28033 kHz
SSB: 3785, 7185, 14185, 18165, 21285, 24975, 28515 kHz
RTTY: 10137, 14087, 18097 kHz
QSL via N2OO, LoTW within 6 months.
http://www.tx5k.org http://www.cordell.org/CI/index.html

UA, Russia:
The club station RK3YWA from Brjansk will use the special call
R100AIP until March 6 to commemorate the 100th birthday of
A. I. Pokryshkin, three times hero of the Soviet Union, who
headed the DOSAAF (Volunteer Society for Cooperation with the Army)
for 8 years after the war and who was an accomplished supporter
of radio sport in the USSR. QSL via RW3YW.

The special event call RG61PP will, from March to May, celebrate
the Day of the Cosmonaut (April 12) and the birthday of Yuri
gagarin (March 9, 1934).

Until March 3, the special callsign R2013CG will be on the
air on the occasion of the 6th "International Children's
Winter Games".
QSL via UA8WAA. http://www.icg-ufa2013.com/eng/

UR, Ukraine:
Radioclub "Delta" celebrates its 20th anniversary with the
special station EO20URD until March 17, and EM7UT and EO0UD
during the whole year. QSLs via UR7UT.

V3, Belize:
Lee, N8LJ (V31LJ), Stan, AC8W (V31AC), and Jim, KB8TXZ (V31VJ),
will be QRV from February27 to March 6 from 160 - 6m in

CW, RTTY and SSB. A participation in the ARRL DX SSB contest in
planned in the M/S category.
QSL V31LJ via K8ESQ; QSL V31AC and V31VJ via KB8TXZ.

W, USA:
Dave, K3FT, and Rob, N3RW, will be active in the ARRL DX SSB
contest from the "New Jersey" battleship as NJ2BB, using the
ship's antennas and possibly some mulitary surplus equipment.
QSL via KB2BRR. http://www.nj2bb.org

With the special call K2O the 20th anniversary of the keel laying
of the show boat "Branson Belle" will be celebrated on March 1/3.
QSL see QRZ.COM http://www.sbbevent.com

Sebastian, OE3SZA, is currently in New Mexico. Starting in March
he's on the bands as W5/OE3SZA. Until February 27 he's QRV from
Albuquerque on the local Echolink repeater: Node Nummer 714946,
call KF5ERC.

XU, Cambodia:
Eddy, ON4AFU will undertake a one-man-DXpedition from March 3 - 14
as XU7AFU, with 100W and wire antennas in CW. QSL via Homecall.
http://www.on4afu.net/

YA, Afghanistan:
Eric, K9GY (T6MO) will take part in the ARRL DX SSB contest in the
SOAB LP category, with a focus on 20m, if conditions permit he'll
also work on 15m/10m. QSL via Homecall.

YN, Nicaragua:
Scott, K7ZO will activate his new short call YN5Z (2012: YN5ZO)
from Nicaragua in the ARRL DX SSB contest in the SOAB HP category.
He'll use a TS-590, KPA-500 PA and a 5 band spiderbeam and wires.
QSL via Homecall, LoTW

YO, Romania:
The European Youth Olympic Winter Festival 2013 took place in
Brasov vom February 17 - 22. Until the end of August, the special
call sign YP0FOTE will be on the air by members of the "AJR
Brasov Radioclub", which issues a special award for this event.
QSL via YO6BBQ. http://eyowf2013.ro

YS, El Salvador: John, NO7B, geniesst to zum 12. March als YS1/NO7B
in SSB von 40 - 10 Meter die Pile-Ups. QSL via Homecall.

ZA, Albania:
Max, IZ4JMA is now living in Albania and will be on the bands as
ZA/IZ4JMA for at least 18 months on all bands and in all modes.
QSL via IZ4JMA.

Changes in the USKA QSL bureau:
QSL cards for non-members of the Swiss IARU society USKA
will no longer be returned with a "Not Member" stamp, but

silently discarded, to save work and money.

RM4A and RM7M:
Willi, DF8WS, receives QSLs for RM4A and RM7M for which he is
not the QSL manager. He was the manager for these calls in the
times of the USSR when they were assigned to hams in Kyrgyzstan;
now they belong to hams in Russia.

DXCC:
The following DXpeditions were accepted for DXCC credit:
4S7DXG (2008 and 2011), 8Q7VR (2008 and 2011)

To apply for the DXCC online, the web browser Firefox of the
Mozilla Foundation is now required; the Internet Explorer is
no longer supported.

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island Activities

AF-017; 3B9; Rodrigues Island: Toshi/JA8BMK, Ken/JN1THL and
Yoshiko/JQ1LCW will be QRV from Rodrigues Island (WWFF 3BFF-004,
WLOTA 4265) as 3B9DX from March 1 - 10. They expect to be QRV in CW,
SSB, RTTY and PSK31 on 80 - 10m. If time permits, Toshi/JA8BMK
will be QRV from Mauritius (IOTA AF-049; WLOTA 0595) on February
27/28. QSL only direct via EA5GL.

AS-024; JA6; Yaeyama Islands: The special event call 8J6ISG will be QRV
in March and April on all HF bands and modes from Ishigaki Island
(WLOTA 0134) on the occasion of the opening of the New Ishigaki
Airport. QSL via JARL bureau.

AS-042; UA0B; Severnaya Zemlya (North Land) (incl. Malyy Taymyr,
Shmidta, Sredniy, etc.): Vladimir, RV3EFH, will help IOTA hunters
to work Bolshevik Island from March to October on 40/20/15/10
Meter in CW, SSB and digital modes as RV3EFH/0. QSLs will be
available after his return, direct only.
http://www.rv3efh.russian-hamradio.net

AS-126; HS; Malay Peninsula South West group: The activity announced
in DXMB 1820 (HS0ZJF/9) was cancelled. http://www.on4afu.net/

EU-002; OH0; Aland Island: From Brando Island (WW Loc. KP00lj) Kim/OH6KZP
will be QRV as OH0X in the ARRL DX SSB contest. QSL via OH2TA (d/B).

EU-013; GJ/MJ; Jersey: For the ARRL DX SSB contest, Rich/M5IRC plans to
activate the "Jersey ARS Club Station" GJ2A in St. Brelade (WLOTA
0818). QSL via LoTW or direct via GJ2A.

EU-024; I*0; Sardina: From March 2 to 17 the special event call sign
II0IDP will be on the air from the former coastal radio station
of the Italian Navy in Cagliari. QSL via IS0IGV (d/B).
http://www.assoradiomarinai.it

EU-038; PA; Noord Holland/ Friesland/ Groningen Province group:
Marcel/PD5MVH spends his vacation (March 2/16) on Vlieland Island
(WLOTA 0773) and plans to be QRV on 40, 20 and 10m in SSB QRV.
QSL via PD5MVH (d/B).

EU-041; I*0; Maddalena Archipelago: The special event callsign II0ICH
will be QRV from March 2 to 17 from La Maddalena. This is an
activity supporting the "7th Italian Navy Coastal Radio Stations
Award 2013". QSL via IM0QMA (d/B). http://www.assoradiomarinai.it/

NA-002; VP5; Caicos Islands: Scott/K0MD will use the callsign VP5H from
Providenciales Island (WLOTA 2003) during the ARRL DX SSB contest.
QSL via LoTW and W0GJ (d/B).

NA-005; VP9; Bermuda Islands: Kurt/W6PH and Bob/WA1Z will take part in
the ARRL DX SSB contest as VP9I from Bermuda Island. QSL via LoTW
and direct via WW3S. http://www.vp9ge.com/vp9i.htm

NA-021; 8P; Barbados: Tim/W2SC will take part in the ARRL DX SSB Contest
from Barbados (WLOTA 0999) as 8P5A. QSL via NN1N (d), LoTW.

NA-023; VP2V; British Virgin Islands: From Feburary 27 to March 4,
Larry/KE2VB will be on the HF bands as VP2V/KE2VB in CW and maybe
some SSB, including a participation in the ARRL DX contest.
QSL via NR6M (d/B).

NA-024; J3; Grenada: Bob/G3PJT plans to be active as J34G (March 5/20)
from Grenada (WLOTA 0718). With a K2 and vertical antennas he'll
show up on the HF bands in "holiday style", with a focus on 30m
and 80m and a participation in the RSGB Commonwealth Contest.
QSL via G3PJT (d/B). Bureau cards can be requested by email.

NA-034; W4; Florida State Centre West (Pasco to Sarasota County)
group: Lou/W0FK will sign W0FK/4 from Longboat Key (USi FL053S,
WW Loc. EL87qj) from March 2 - 16 on the IOTA frequencies.
QSL via LoTW and W0FK (d/B).

NA-058; W4; Georgia State group: On March 2nd Pete/VE3IKV will activate
St. Simons Island (USi GA003S, WLOTA 4115) as W4/VA3RA in CW only
on 30m and 17m. QSL via VE3IKV (d/B).

NA-062; W4; Florida State (Florida Keys) group: After a brief activation
of St. Simons Island, Pete/VE3IKV will spend his vacation (March 3-15)
on Key West (USi FL040S) and operates in holiday style as W4/VA3RA
on 30m and 17m. QSL via VE3IKV (d/B).

NA-100; V2; Antigua and Barbuda: Alan/N3AD will use the shack of V26B
in Saint George Parish (WLOTA 1118; WW Loc. FK97cc) on March 1/3
and take part in the ARRL DX SSB contest as V26M. QSL via W3HNK (d).

NA-106; KP2; Virgin Islands: Brad, K7EUG, will still be on St. Croix
as NP2/K7EUG until March 5th. QSL via Homecall, LoTW, eQSL.

OC-019; KH6/KH7; Hawaiian Islands: In the ARRL DX SSB contest, Al/F5VHJ
will be QRV from Hawaii (USi HI025S, WLOTA 0065) as NH7A.
QSL via LoTW or F5VHJ (d/B).

SA-036; P4; Aruba Island: From March 3 to 17, Howard/WA2NHA will be on
Aruba (WLOTA 0033) and plans to be on the bands as P4/WA2NHA on
80m - 10m, mostly in CW. QSL via WA2NHA (d/B).
Another activation from Aruba in the ARRL DX SSB Contest is planned
by Andy/AE6Y as P49Y. QSL via AE6Y (d), LoTW .

SA-099; PJ2; Curacao Island: John/K6AM, Wayne/K8LEE and Geoff/W0CG
will visit the "Signal Point Super-Station" PJ2T on Curacao (WLOTA
0942) from February 26 to March 12. In the ARRL DX SSB Contest
they will take part as PJ2T, outside the contest they will use
PJ2/homecalls. QSL via Homecall. QSL for PJ2T via W3HNK (d).
http://www.pj2t.org/ccc/default.htm

IOTA Information
The following IOTA operations from October 2012 to January 2013
were approved for the IOTA programme:
RA4HKM/0 (AS-025), C6AVA (NA-048 & NA-054), YB4IR/5 (OC-075), L22D
(SA-022) and LU6W (SA-096). SA-096 is therefore now a valid group.

RAC Bulletin 2013-006E - Recruitment - Regulatory Affairs Officer
2013-02-26

The Radio Amateurs of Canada is seeking an organized, knowledgeable and diplomatic individual to undertake the role of Regulatory Affairs Officer. This is a senior executive level position reporting to the President. The position has a key role in managing our relationship with Industry Canada. This includes monitoring and analyzing Industry Canada initiatives, generating policy options and advising IC of RAC's position on issues of importance to our members. The core competencies for this position includes; the ability to work effectively in a team environment, the ability to generate options and problem solve at a strategic level, and the ability to work successfully with government, our members and third parties in creating successful outcomes in a complex environment.

For further information or to apply contact the President at ve4baw@rac.ca with a copy to the RAC Office Manager at racgm@rac.ca

Geoff Bawden VE4BAW
President and Chair RAC

Vernon Ikeda - VE2MBS/VE2QQ

RAC Bulletin 2013-005E - RAC Planning Session • February 15-17, 2013*
2013-02-26

This February the Board and Executive of RAC met in Ottawa to develop the planning context for 2013 and 2014 and the vision for RAC over next five years. Our last face to face planning meeting was in October of 2012 and we have successfully completed the objectives set out in that meeting; RAC is now solvent and we have stopped the slide in membership numbers.

This February the following key objectives were set:

* Increase number of active amateurs in Canada
* Identify key demographics and increase RAC membership as a percentage of active amateurs across Canada•s demographic mosaic.
* Enhance the relevance and respect for amateur radio in the eyes of the public and then leverage that respect with government. This will support spectrum protection, our influence on municipal issues and prevent new attacks on amateur radio privileges such as we saw (and are seeing) in distracted driving.

The foregoing requires that RAC move from a survival to growth mode and develop new resources to support achieving those goals. We agreed to continue to operate in the fiscally responsible fashion that we established in 2010 and noted the need to establish new budget lines to support key activities and eliminate the subsidies provided by our officers. We agreed to establish a resource to provide key information support (paper and electronics) for clubs, member and media to support us in achieving our objectives.

Webinars to discuss our plans in more detail.

Over the course of the next few months we will be undertaking regional webinars with Club Presidents and Field Service members chaired by the President and the local Regional Director. These meetings will allow us to discuss our plans for 2012/2013 in more detail. We are looking forward to creating this opportunity for dialogue.

More information will come out in the TCA and RAC Report so stay tuned.

Geoff Bawden VE4BAW
President and Chair RAC

RAC Bulletin 2013-007E - Ian MacFarquhar, VE9IM appointed as
Regulatory Affairs Officer*
2013-02-26

I am pleased to announce that Mr. Ian MacFarquhar, VE9IM, has taken on
the post of Regulatory Affairs Officer pending our recruitment of a
new executive member to undertake that post. Mr. MacFarquhar will
continue in the role of Vice President but will be assisted in that
role by Mr. Doug Mercer, VO1DM. Mr. Mercer will continue in his role
of Chief Field Services Officer.

Geoff Bawden VE4BAW
President and Chair RAC

MMMonVHF Newsletter No. 1/ WEEK 09 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-02-28
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5 ; Guinee Bissau ; Square: IK21 ; start 2013-02-11

Guinee Bissau (IK21dt) qrv on HF and 50 MHz

J52EME and J52HF will be again on air from february 11 to march 2, 2013. Some members of
Verona DX Team will return to Cumura to help the Mission with their work and install new
devices.
In the spare time they will be on air on HF and 50 MHz Tropo and EME, if the condition will
be good.
Not 144 and 432.

SOURCE: tnx to Lucio, I3LDP, direct to MMMonVHF

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo
from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol
on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters

Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

UPDATE from Rene, Eeltje and Johan.
Good news! We have our single entry visa for Ghana! It took a whole day travelling to the Ghanese embassy and waiting, getting interviewed, filling in the right answers (in capitals)
and showing the proof of our returnticket and yellow fever vaccination, but eventually we got
a sticker in our passports. All on schedule now! This was not cheap. The three of us in total ?360 (450$).
Such a waste.... But with help of our sponsors the damage is less painful though donations still are more than welcome!

Thank for your votes for the best EME VHF DXpedition 2012. The two men DXpedition operated by
PA3CEE Eltje and Ren&#65533; PE1L to Uganda (5X1EME) won. We're proud that all our African DXpeditions
since 2009 got the first place. It's clear that we do our best, never resting and

persisting in
getting all of you in the log and we want to promise you that our policy hasn't changed for 9G5EME.
You know us by know. We won't give up! Thanks for your trust gents! We're proud!

For 144 MHz we do use the same setup as we used in Gambia and Uganda, 2 x 8 Xpol a WA2ODO preamp and modest power.
If all ok we will have a small 70cm AND 23 cm setup with us.

Our schedule:
144 MHz start april 12th till april 14th (condx are not that great but OK for the bigger stations)
1296 MHz april 19th
144 Mhz april 20th (ARI contest)
432 MHz april 21th
144 MHz april 22nd till april 27th (22-24 good condx for smaller stations)

Power shutdowns are common in Africa so schedule can change and don't wait to make a contact with us till the last day.
Visit our website www.emelogger.com/ghana/

Johan, Eltje and Rene

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on 50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

SOURCE: tnx to Bernd, DF2ZC, direct to MMMonVHF

==> + FCC ENFORCEMENT NEWS: FCC ISSUES $10,000 FINE TO MISSOURI MAN FOR
UNLICENSED OPERATION ON 14.312 MHZ

On February 25, the FCC issued a Notice of Apparent Liability for
Forfeiture (NAL
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2013/db0225/DA-13-24
8A1.pdf>)
in the amount of $10,000 to Jared A. Bruegman, ex-KC0IQN, of Bolivar,
Missouri. The FCC said that Bruegman "apparently and willfully violated
Section 301 of the Communications Act of 1934, as amended by operating
an unlicensed radio transmitter on the frequency 14.312 MHz in Bolivar,
Missouri." Bruegman -- who does not currently hold an Amateur Radio
license -- was operating in the phone portion of the 20 meter band that
is assigned to the Amateur Radio Service on a primary basis; his
Amateur Radio license expired in 2010. As a former Technician class
licensee, he did not have privileges to operate in that portion of the
```

20 meter band when he held an Amateur Radio license.

In December 2012, the FCC's office in Kansas City received a complaint from an Amateur Radio operator, reporting interference on 14.312 MHz. Upon investigation, agents from that office heard a male voice transmitting on the frequency 14.312 MHz. Using direction finding equipment, the agents located the source of the radio frequency transmissions to a transmitting antenna mounted on a pole next to Bruegman's residence. The agents determined that the signals on 14.312 MHz exceeded the limits for operation under Part 15 of the Commission's rules and therefore a license was required to transmit. The agents further discovered that Bruegman did not hold a license to operate a radio transmitter on 14.312 MHz at or near that location.

The agents determined that the source of the transmissions was coming from an unlicensed radio transmitter from a bedroom in Bruegman's residence. "Mr Bruegman was the only person present in the bedroom and the only male in the residence during the inspection," the NAL stated. "Mr Bruegman admitted to the agents that he owned the radio transmitter. The agents observed that the transmitter was turned on and tuned to 14.311 MHz. Mr Bruegman told the agents that he had no current Commission licenses, but that he previously held an Amateur Radio license, call sign KC0IQN. Mr Bruegman told the agents he would remove the microphone from his transmitter and only use it as a receiver."

Section 503(b) of the Communications Act provides that "any person who willfully or repeatedly fails to comply substantially with the terms and conditions of any license, or willfully or repeatedly fails to comply with any of the provisions of the Act or of any rule, regulation, or order issued by the Commission thereunder, shall be liable for a forfeiture penalty." In addition, Bruegman was found to be in violation of Section 301 of the Communications Act, stating that "no person shall use or operate any apparatus for the transmission of energy or communications or signals by radio within the United States, except under and in accordance with the Act and with a license granted under the provisions of the Act."

Bruegman has until March 27, 2013 to pay the forfeiture in full, or file a written statement seeking its reduction or cancellation.

==> + FCC NEWS: FCC PROPOSES MORE SPECTRUM AT 5 GHZ FOR UNLICENSED BROADBAND

On February 20, the FCC released a Notice of Proposed Rulemaking (NPRM) in ET Docket No. 13-49, seeking to revise the Part 15 rules governing unlicensed national information infrastructure (U-NII) devices in the 5 GHz band. These devices presently operate in the frequency bands 5.15- 5.35 GHz and 5.47-5.825 GHz. They use wideband digital modulation techniques to provide a wide array of high data rate mobile and fixed communications for individuals, businesses and institutions. Slightly different rules apply to 5.825-5.85 GHz. Among the changes being proposed are two additional bands totaling 195 MHz

for unlicensed operation: 5.35-5.47 GHz and 5.85-5.925 GHz. The Amateur Radio Service has a secondary allocation at 5.65-5.925 GHz, including an Amateur Satellite Service uplink allocation of 5.65-5.67 GHz and a downlink allocation of 5.83-5.85 GHz. Read more here <http://www.arrl.org/news/fcc-proposes-more-spectrum-at-5-ghz-for-unlicensed-broadband>.

==> + ON THE AIR: ARRL INTERNATIONAL DX PHONE CONTEST: MARCH 2-3

With the CW portion of the ARRL DX Contest <http://www.arrl.org/news/ride-the-wave-in-the-2013-arrl-international-dx-cw-contest>
now a series of fading dits and dahs in the memories of participants, preparations for the Phone portion of the ARRL International DX Contest <http://www.arrl.org/arrl-dx> the weekend of March 2-3 are already underway. The high bands were in good form for the CW contest two weeks ago, with many stations reporting hundreds of QSOs on 15 and even 10 meters. Will these good conditions last into early March? Find out!

Just like the CW DX Contest, the Phone competition is relatively easy: US and Canadian stations only work DX, and DX stations only work US and Canadian stations. The contest exchange is a signal report and your state or province for US and Canadian stations, while DX stations send signal reports and their transmit power.

The 2013 ARRL International DX SSB Contest <http://www.arrl.org/arrl-dx> runs from 0000 UTC Saturday, March 2 through 2359 UTC Sunday, March 3. Logs must be e-mailed or postmarked no later than 2359 UTC Tuesday, April 2, 2013. Submit your Cabrillo-formatted electronic logs via e-mail <dxphone@arrl.org>; paper logs should be sent to ARRL DX Phone Contest, 225 Main St, Newington, CT 06111 USA.

==> + ARRL RECOGNIZES: NOMINATIONS NOW OPEN FOR ARRL TECHNICAL AND EDUCATIONAL AWARDS

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL awards, which are designed to recognize educational and technological pursuits in Amateur Radio, including an award that honors a young Amateur Radio operator. ARRL members may nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-now-open-for-arrl-technical-and-educational-awards>.

==> + ARRL EXECUTIVE COMMITTEE TO MEET IN TEXAS NEXT MONTH

The ARRL Executive Committee will meet Saturday, March 9 in Irving, Texas. ARRL President Kay Craigie, N3KN, serves as Chairman of the

Executive Committee. Five Division Directors who are elected by the ARRL Board of Directors are also on the committee: Northwestern Division Director Jim Fenstermaker, K9JF; Central Division Director Dick Isely, W9GIG; Rocky Mountain Division Director Brian Mileshosky, N5ZGT; Pacific Division Director Bob Vallio, W6RGG, and West Gulf Division Director David Woolweaver, K5RAV. ARRL Chief Executive Officer David Sumner, K1ZZ, and ARRL First Vice President Rick Roderick, K5UR, are non-voting members of the Executive Committee. Click here <http://www.arrl.org/news/arrl-executive-committee-to-meet-in-texas-next-month>
for the meeting's agenda.

==> + SILENT KEY: PAT HAWKER, G3VA (SK)

RadCom columnist and RSGB Life Vice President Pat Hawker, G3VA, of London, England, passed away February 21. He was 90. For 50 years -- 1958-2008 -- Hawker penned the bi-monthly "Technical Topics" column in RadCom, the member journal of the Radio Society of Great Britain, focusing on many new techniques and devices that came into being and were enjoyed by radio amateurs in the second half of the 20th century.

Born in Minehead, Somerset in 1922, Hawker's schoolboy interest in radio never left him. He heard his first amateur station on 20 meters in the autumn of 1935. He obtained the "artificial aerial" license 2BUH at age 14 and became G3VA in October 1938, at the then-minimum age of 16. Hawker was involved in many aspects of radio, beginning in World War II as a member of the Radio Security Service (RSS) and its connections to MI5 and MI6. After the Allied invasion of Europe, he spent time with British intelligence services, as well as time with Holland's Bureau of National Security. In 1948, Hawker became an assistant to RSGB General Secretary John Clarricoats, G6CL (SK).Read more here <http://www.arrl.org/news/pat-hawker-g3va-sk>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: This past week, we saw a decline in the solar and geomagnetic indices: The average daily sunspot number dropped nearly 21 points to 57.7, while the average daily solar flux softened by 4.7 points to 100.9 and the average daily planetary A index declined 6.4 points to 5.1. This isn't much of a change, but geomagnetic activity was low already, and this is even lower. The predicted solar flux for the near term is 105 on February 28, 110 on March 1-3, 105 on March 4-6, 100 on March 7, 95 on March 8-14, 100 on March 15-16, 105 on March 17, and rising to 110 on March 18-20. The solar flux then reaches a peak of 120 on March 25-27, and on March 28-April 6, it looks like it will hover around 113. The predicted planetary A index is 5, 12 and 8 on February 28-March 2, 5 on March 3-4, 8 on March 5, 7 on March 6-7, 5 on March 8-10, 7 on March 11-12, and back down to 5 on March 13-20. This weekend is the ARRL International Phone DX Contest <http://www.arrl.org/arrl-dx>, which runs from 0000 UTC March 2 to 2359 UTC March 3. Look for more on the ARRL website on Friday, March 1. For more information concerning radio propagation, visit the ARRL Technical

Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> + HAMMOND MANUFACTURING TO TAKE OVER DAHL TRANSFORMER LINE

Hammond Manufacturing <http://www.hammfg.com/> of Cheektowaga, New
York, has announced that it will take over the Peter W. Dahl line of
transformers from Harbach Electronics <http://harbachelectronics.com/>.
Upon his retirement in 2007, Peter Dahl, K0BIT (SK), sold his company
to Harbach Electronics, but earlier this month, that company announced
<http://www.arrl.org/news/harbach-electronics-to-discontinue-dahl-transformer
s>
that it would no longer support Dahl products and was in negotiations
with other manufacturers to take over the Dahl product line of
transformers and magnetics. According to both Harbach Electronics and
Hammond Manufacturing, finalization of the acquisition and transfer of
assets will take place over the next few weeks, with the transfer to be
completed by March 31, 2013.

==> THIS WEEK IN RADIOSPORT

This week:

- March 2 -- Wake Up! QRP Sprint
- March 2-3 -- ARRL International DX Contest (SSB)
<http://www.arrl.org/arrl-dx>
- March 3 -- DARC 10 Meter Contest
- March 5 -- AGCW YL-CW Party
- March 6-7 -- AWA John Rollins Memorial DX Contest

Next week:

- March 9 -- AGCW QRP Contest
- March 9-10 -- Idaho QSO Party; RSGB Commonwealth Contest; AWA John
Rollins Memorial DX Contest; EA PSK63 Contest
- March 10 -- North American Sprint (RTTY)
- March 10-11 -- Wisconsin QSO Party
- March 13 -- NAQCC-EU Monthly Sprint
- March 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 8-9 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfe
st-1>,

RAC Bulletin 2013-008E - Review of Amateur Radio Exam Questions*
2013-02-27

As a result of its response to a Request for Proposals from Industry Canada, Radio Amateurs of Canada has been awarded a $20,000 contract by Industry Canada to review the questions used for examinations to qualify radio amateurs in Canada. The work began on 28 January 2013 and the final product will be delivered to Industry Canada on 17 April 2013. Radio Amateurs du Quebec Inc. (RAQI) is working with RAC on the French language component.

More than 3000 questions are being reviewed: 965 questions in English and in French for the Basic qualification and 545 in English and in French for the Advanced qualification. Some current questions were revised in 2007 but many questions date from much earlier. The present work will be the first comprehensive review in more than a decade.

The objective of the review is to identify questions and answers no longer relevant as well as those requiring modifications to correct grammatical errors or improve clarity. The review should also lead to new questions on aspects of amateur radio that have changed in recent years. The curriculum for the qualifications (Basic and Advanced) is not changing so while individual questions may be changed the main areas of knowledge required for certification will not change.

Both RAC and Industry Canada have recognized for some time that a thorough review of the questions was required. Last summer a RAC bulletin invited radio amateurs to provide comments and suggestions on the current questions by the end of August. Responses highlighted some incorrect questions and pointed out several others that were vague or confusing. These comments provided a good starting point for the current review.

RAC is pleased to have RAQI working on this project. The team conducting the review has experience not only in conducting amateur radio exams but also in designing and delivering amateur radio courses in both official languages. It is well qualified to deal with technical issues and assess clarity and grammar of the questions in both official languages.

Industry Canada is responsible for the amateur radio certification and will make the final decision changes to the questions. The project led by Radio Amateurs of Canada with the assistance of RAQI will ensure

that the experience of active radio amateurs will guide
recommendations to improve the questions that will be used for amateur
radio certification in the future.

For more information contact Glenn MacDonell, Project Manager,
Question Bank Update Project and Deputy Director Ontario North East,
(ve3xra@rac.ca).

Greetings!

The ARRL Education & Technology Program has announced the schedule for two sessions of our professional development workshop, the Teachers Institute on Wireless Technology (TI-1) being offered during July 2013.

We are also pleased to announce that Dayton Amateur Radio Association will be supporting and hosting a new professional development opportunity, an advanced Teachers Institute (TI-2) on Remote Sensing and Data Gathering, at their new educational facility. A March QST article <http://www.arrl.org/files/file/Teachers%20Institute/TI%20stories/Better%20Educated%20Teachers-%20QST-Mar-2013.pdf> includes a description of this new workshop.

Please visit the ARRL website at: http://www.arrl.org/teachers-institute-on-wireless-technology for more information about Teachers Institute curriculum content, participant requirements, dates and locations and other details. Go to www.arrl.org/teachers-institute-application to download an application.

Tuition, resources and most expenses to attend the Teachers Institute are paid by donations to the ARRL Education & Technology Fund. Donate <http://www.arrl.org/education-and-technology-fund> to support Wireless Technology Literacy <http://www.arrl.org/what-is-wireless-technology-literacy> today!

Not too much news this issue, however a reminder to get your voting papers completed and posted to the Returning Officer before 20th March.

Please remember to place your name address and call sign details on the outer (larger/prepaid) envelope, to ensure your vote is valid.

Talk soon…Debby ZL2DL

Technology Convention, Easter, Auckland 2013

It’s now time to register for Technology Convention, to be held at the Western Springs Garden Community Hall, Auckland over March 30 and 31 (Easter).

The programme includes presentations on a Loop antenna design and experimental tuning tool; Using the maritime AIS system as a propagation indicator; Digital ATV – the Wellington and Auckland experiences to date; Oscillators and their design; Weaver method of SSB generation; Digital mobile radio technology update; forum – you opportunity to discuss current issues; a mobile rally and much more.

On Saturday night come and socialise with your partner at a “Meal and Movie”. On Easter Monday a visit to the Warkworth AUT Radio Telescope has been arranged for those of you who are staying on.

Full weekend registration is $50.00 plus $25 per person for Saturday night. Day only registration is $30.00. Further information and a

registration form is available at www.qsl.net/zl1bq If paying by internet banking, please make payment to account 12-3020-0473626 and include your name/callsign with “Easter” in the reference field. If you prefer, registration with payment can be made to “Easter Convention”, PO Box 10138, Dominion Road, Auckland 1446.

FMTAG NOTES

Proposals

None this time.

FINAL RECOMMENDATION TO NZART COUNCIL

Published as a Proposal in HQ Infoline number 267, for the information of, and seeking comments from, members. No comments have been received.

ZL2WHO has applied for a 2-metre beacon at Waipuna, co-located with the existing 6-metre beacon, at TOPO50 BJ33 890.46 298.11. The frequency will be 144.271 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST NEWS

DX Weekend 2013 Contest Results

Our thanks to the 47 stations that took part in the contest.

Congratulations to the overall winning 2-man team ZL1AA (10678 points), closely followed by single operator ZL2BKC (9851 points), and by the 2-man team ZL4AA (3694 points).

The full results are available at: www.vhf.org.nz

THE NEXT CONTEST

The next contest is the Low Band Contest, all bands 50 MHz to 440 MHz, on Saturday the 6th and Sunday the 7th of April 2013. This is the weekend after Easter. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

DIGITAL TELEVISION TEST TRANSMISSIONS FROM MT BELMONT

Transmission of the unmodulated CW carrier continues on 506 MHz, with horizontal polarisation. The maximum EIRP is +20 dBW (100 Watts) towards the North East.

Calibrated coverage measurements, at more than twelve locations, confirm that the transmit antenna is performing as expected. Reception reports are welcome.

The transmission is receivable over a 180° arc, from the North West, through North East, to South East. There are two minimas: one in the direction of Titahi Bay and the other in the direction of Seaview. Transmissions over the other 180° arc, from South East, through South West, to North West are about 20 to 26 dB weaker.

The “breadboard” version of the digital modulator was completed on Wednesday (27th February) and is now undergoing intensive quality testing.

Components have been ordered for constructing the permanent power amplifier.

For more information, and frequent updates, go to: www.vhf.org.nz

DARC HAMVENTION 2013

The 64th Lake Constance Convention and the HAM RADIO 2013, both organised by DARC, Germany's most prominent amateur radio club, will take place

from Friday, June 28th until Sunday, June 30th, 2013 in Friedrichshafen on Lake Constance.

We very much hope that many representatives of the IARU member societies will be able to join us this year.

As in previous years we have been able to obtain a discounted rate for you at the “Seehotel”. Further details can be found in the attachment.

You can register and also make a hotel reservation by emailing or faxing the attached reservation form to Mrs. Simone Blümer at DARC.

We would also be very pleased to welcome you at the “Informal International Meeting for Representatives of IARU Member Societies”.

This year it will be held at the Zeppelin-Museum (www.zeppelin-museum.de) on Friday, June 28th at 18:30. We will organize a shuttle bus that will take you there from the exhibition halls.

Further details will be communicated in due time.

Please note that thanks to Bob Inderbitzen, NQ1R and his team at ARRL we will again be having a booth in Dayton this year, so please make sure that you stop by and say hello.

Otherwise, you are of course always welcome to contact me by email.

Looking forward to meeting you in Friedrichshafen (and in Dayton)!

OVER THE HORIZON RADAR HEARD ON 10 METERS

2013 RSGB COMMONWEALTH CW CONTEST 9 -10 March

MAR 15-17 VK JOHN MOYLE FIELD DAY WEEKEND

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAR 03 2013.

Digital TV for all of Australia

It will be a very busy time this year when only digital television becomes
available throughout all of Australia, as it continues to turn off old
analogue TV transmitters.

Adelaide, Tasmania and Perth will switch-over during April, then Brisbane
in May and Darwin this July. Leaving the most populated areas to last, Sydney
is on December 3, and December 10 when Melbourne is due.

An exception is the Melbourne and Geelong Community Broadcaster C31 that
went digital-only in March last year on Channel 44, after getting Federal
Government funding.

Many regional areas, starting with Mildura in Victoria's Sunraysia district in June 2010, have switched progressively which means only reception is available using a digital TV or set-top box.

Digital TV gives a better picture and sound quality, and greater choice. Many commercial and national outlets have two or more channels which run different programs.

HAMS ACROSS AUSTRALIA.

VK1

ACMA have now formally issued VI 100 ACT to the CRARC for the month of March 2013.

The year 2013 is Canberra's centenary year and the month of March marks 100 years since Lady Lyne (pronounced Line) named Canberra at Capital Hill, the site of Parliament House.

The Canberra Region Amateur Radio Club has been granted a special event callsign vi 100 ACT in recognition of this event.

(Submitted by Andrew Vk1DA on behalf of the Canberra club)

VKG Roundup http://www.police.nsw.gov.au/news

Amateur Radio NSW will commence its upgrade course tomorrow night the 4 th March at the VK2WI site. It will be held each Monday evening until about the end of the year except on public holidays.

VK3
web service:- http://www.amateurradio.com.au/news/

Standard Bridging Course by Amateur Radio Victoria

Enrolments are now open for the Standard Licence theory course that starts soon on Wednesday nights at Ashburton. It and ends with a revision Saturday and assessments on Sunday.

To enrol you must already have a Foundation Licence as the quality instructor, Kevin Luxford VK3DAP / ZL2DAP, covers the additional knowledge of the Standard Licence syllabus.

The class over a number of years has had a very high pass rate on the 50-question theory assessment.

For further detail contact the Education Team Leader, Barry Robinson VK3PV vk3pv@amateurradio.com.au or 0428 516 001 or see the Amateur Radio Victoria website.

(Jim Linton VK3PC)

Only half a dozen trading tables remain for this years big friendly hamfest the EMDRC White Elephant Sale on Sunday the 24th of March at the Great Ryrie Primary School Great Ryrie Street Heathmont. If you are a commencial trader and are yet to book your table then you better get in quick for one of these last remaining tables.

For table bookings contact Max VK3WT today on 03 90059251 or email him at wes2013@emdrc.com.au

Last year one trader had three tables of AV gear from a commercial AV hire company, there was enormous interest from the ATV community in his tables with pro cameras, video switchers line amplifiers and the suchlike. That same trader has booked again and tells us he will be bringing more ex commmercial hire AV gear. For full details check out the clubs website www.emdrc.com.au

TARC does the JMFD 2013

theTARCinc will be participating in the John Moyle Field Day weekend from Friday afternoon 15th to Sunday afternoon 17th March 2013 at the Girl Guides Association of Queensland Baden Powell Campsite and Training Centre, Toolakea Beach Road, Bluewater.

(newsreader help - Toolakea pronounced Too - la - key - a :-))

Portable operation is the go so make sure you bring plenty of batteries and whisper quiet generators if you can.

VK6

Martin VK6ZMS says that this years Hills Amateur Radio Group HARGfest WILL TAKE PLACE AT 1PM May 11.

Running until 5pm the annual HARG swap meet's, entry fee is $5.

The venue is the HARG club rooms 5 Sanderson Rd Lesmurdie.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Successful launch for Amateur Radio STRaND-1 Smartphone Satellite

The first UK CubeSat, STRaND-1, was launched last Monday, February 25.

Deployment from the launch vehicle into a 785 km orbit took place about 20 minutes later.

Signals from STRaND-1 were received by Nader Omer ST2NH in Sudan at 1555 UT and by the Surrey Space Centre during Monday evening.

The innovative STRaND-1 CubeSat will demonstrate the feasibility of using cheap smartphone electronics to control a spacecraft.

STRaND-1 carries an amateur radio AX.25 packet radio downlink on 437.568 MHz using 9k6 bps FSK modulated data HDLC frame, NRZI encoding.

Malaysia Airlines installs HF to extend services into India

Malaysia Airline's current VHF and satellite communications could not provide coverage to its routes to India, so the airline decided to install a serviceable HF system that would provide suitable voice communications.

The airline's operations dispatch centre operated with VHF communications (coverage is only available up to 200 nautical miles off Kuala Lumpur) and satellite communications (SATCOM) which were not available in the B737-800 aircraft fleet they planned to use for these new flights.

As a result, it was necessary for the operations dispatch centre to have a serviceable HF system for voice communications when the aircraft are flying over the Gulf of Bengal en route to the Indian airports.

Barrett 2075 1KW HF systems were selected for this project as thes system has been developed and installed in airports throughout the world.

RSGB Beta website Try to Break It evening

The RSGB invited members to hack and break their new beta website during a 1 hoour window last Wednesday. A great idea to try and absolutely prove the reliability of a system.

http://www.rsgb.org/news/articlelinks.php?id=0454

AMERICAN RED CROSS PHASE OUT EMERGENCY COMMUNICATION RESPONSE VEHICLES

The American Red Cross has made the decision to phase out and decommission its Emergency Communication Response Vehicles (ECRVs) due to changes in technology, as well as a new satellite system and other factors regarding the vehicle fleet. "Retrofitting the decade-old vehicles with new equipment is not a good use of donated funds, as the long-term strategy is to move to more portable systems," American Red Cross Disaster Services Technology Manager Keith Robertory, KG4UIR, told the ARRL. "This is consistent with the trends in the telecom and technology industries."

The American Red Cross will be removing the Amateur Radios from the ECRVs as part of the decommissioning process. These radios will either become part of the deployable inventory or provided to the local American Red Cross chapter to build local capacity.

AMATEUR-CREATED "VARICODE" ADOPTED AS ITU RECOMMENDATION

The Director of the Radiocommunication Bureau of the International Telecommunication Union announced the simultaneous adoption and approval by

correspondence of a new Recommendation entitled Telegraphic Alphabet for Data Communication by Phase Shift Keying at 31 Baud in the Amateur and Amateur-Satellite Services.

The alphabet -- commonly called "Varicode" because the more frequently used characters (in the English language) occupy fewer bits was developed by Peter Martinez, G3PLX, in the 1990s.

In ITU parlance, it now becomes Recommendation ITU-R M.2034.

www.arrl.org/news/amateur-created-varicode-adopted-as-itu-recommendation

Central Scotland Mini Ham Radio Convention

If you are planning holidaying in "Bonnie Scotland" in June, then "listen up."

The Central Scotland Ham Radio Conventions committee has announced that the 2013 Central Scotland Mini Ham Radio Convention will take place on Saturday 8th June at the Crofthead Farm Community Education Centre, Templar Rise, Livingston

Further details are available at uk.groups.yahoo.com/group/cshrc

NEWS FROM ARNEWSLINE USA

OVER THE HORIZON RADAR HEARD ON 10 METERS

The IARU Region 1 Monitoring Service reports on a mysterious Over The Horizon radar causing interference in the 28 MHz amateur radio band. The mysterious signal disturbs the 28 to 29 MHz segment of 10 meters often with signals are 60 kHz wide, and jumping in bursts.

The location of the transmitter appears to be someplace in the Middle East but so far getting precise bearings have proven to be difficult.

The entire report covering this situation and other intruders to our ham bands can be downloaded free of charge at tinyurl.com/iarums-jan2013

COURT RULES RFID NOT MARK OF THE BEAST

A very interesting court case that pitted a students religious beliefs versus communications technology has been decided.
Skeeter Nash, N5ASH, is near Houston with more:

A Texas student who refused to wear a radio tag that tracked her movements on campus has lost a federal court appeal against her school's ID policy.

According to news reports, the 15 year old
declined to wear the RFID badge on religious
grounds, saying it was the "mark of the
beast." After she stopped wearing it she was
suspended and went to court where she won a
temporary injunction to continue her studies at
the school without the RF tag.

Now a federal court ruling has overturned the
lower court. It says that if she is to stay at
the particular school, she would be required to
wear the badge. Otherwise, she would have to transfer to a new school.

The radio tags are used to track attendance,
which in turn helps secure school funding.

Im Skeeter Nash, N5ASH.

DEAD RISE AS HACKERS TARGET EAS NATIONWIDE

Inside Radio reports that the FCC, FBI and several state and local law
enforcement agencies are investigating what now
appears to have been a widespread hack attack on
the United States Emergency Alert or EAS
System. One that claimed that the dead were
rising from their graves.
Amateur Radio Newslines Steffan Kinford, N8WB, has the details:

--

The full extent of the phony zombie EAS attack
isn't yet clear, but several stations recently
aired a bogus EAS message about zombies attacking
people and warning the public to stay clear of them.

Engineers say the hackers apparently had a solid
knowledge of exactly how the EAS operates and how
to breach it. One of these is Bonneville
director of engineering John Dehnel. He says the
company's Salt Lake City stations were among the
targets. While the fake message never made it
to KSL 1160 AM which is the primary message
distribution or LP1 station for the area or its
sister station KSL-TV, the bizarre communication
was broadcast on the cluster's three secondary or HD2 stations.

Dehnel believes the culprit was EAS activation
boxes that were left set to factory-installed
default passwords to accommodate tech support
crews. His guess is that before the attack you
would likely have found most everyone still had

the default password on it. The FCC has since
issued a warning notice to broadcasters and other
EAS decoder users for them to immediately change
the passwords to ones that are propriety and secure.

The Bonneville HD2 stations reportedly fowarded
the bogus EAS messages about one hour before a
Great Falls, Montana television station that
actually was the one that made the news headlines
for airing the phony message. Several other
stations also aired a fake EAS message, including
TV stations in Albuquerque and Marquette,
Michigan. It's possible other stations also
broadcast the alert but if there were any they
are not known as this newscast is being prepared.

For the Amateur Radio Newsline, Im Stephan, Kinford, N8WB, in Wadsworth, Ohio.

OPERATIONAL NEWS - DATELINE 2013

2013 RSGB COMMONWEALTH CW CONTEST 9 -10 March

The Commonwealth Contest or BERU as it was known, is the longest running
DX Contest in Amateur Radio and promotes contacts between stations in the
Commonwealth and Mandated Territories. A more relaxed contest environment
gives the opportunity to work some choice DX.

Full rules, history, and details of planned DX can be found on Web Site: -

beru.org.uk

MAR 15-17 VK JOHN MOYLE FIELD DAY WEEKEND

WW International Museums Weekends June 15/16 and 22/23

Now Ed VK2JI

Several people have thanked me for organising the Mini Contest University at Wyong.

I would like to give my personal thanks to all 22 attendees and the presenters who literally fought their way through some of the worst storm weather I have seen.

Everyone who was registered attended.

I was also impressed how the attendees with more experience in contesting were happy to join in and explain items in more detail to those new to contesting. The events aim was exactly this, to give an insight to newcomers.

This was the first time such an event has been held in Australia and the feedback I have received is positive. That's not to say that we can't improve next year and a large number of the attendees have filled in and handed to me the questionnaire from their attendee pack. I will be going through the suggestions listed and see if I can incorporate them in a bigger and better "Wyong Weekend" next year.

Now, if I could only find some way to fix the weather ....

Thanks again to all who attended to make this such a successful event.

73 this is Ed, VK2JI on behalf of the Central Coast Amateur Radio Club.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

As we tweeted last week the VK0RTM 6m beacon is now on air

Craig Hayhow who is signing VK0JJJ from Mawson, has the 6m beacon VK0RTM on 50.300 MHz.

The 6m propagation beacon runs 50w.

While at Mawson Station, MacRobertson Land, Antarctica for about 12 months, he plans to be active on bands from 80m to 6m with priority given to 6m operation.

On 6m he will be on 400 watts and VK3ZAZ is QSL manager.

The main listening frequency is 50.110 MHz.

For the HF bands on SSB phone and digital modes he uses a terminated sloping triangle antenna, on 6m its a 5 element yagi and for 2m and 70cm satellites an Arrow antenna.

(sourced to Jim Linton VK3PC via southgate arnews)

Important information regarding Digital DXCC applications

The DXCC Blog reports: "Before proceeding with an Online DXCC application
you 'must', first, have Mozilla Firefox installed on your computer.
Online DXCC is not compatible with Internet Explorer.

For the complete announcement, go the DXCC Blog page.

No-Name Group Net

Gavin VK7VTX contacted the VK7 Regional News editor to remind him of the
NoName Group net that is held on 3.59400MHz from 6-7:30am VK7 Time each
morning.

The NoName Group has been going for 10-15years and no one could come up
with a suitable name so the "NoName" group stuck...HIHI

A couple of weeks ago they had Khvicha 4L1HD from Georgia in Europe call
in with a good signal via the gray line.

8N119T - celebrating the 65th anniversary of the Tokyo Fire Department
(119 is the emergency fire/ambulance number in Japan)
23 Dec to 25 Mar active on all HF bands and modes.

F6ITD will be on the air stroke FG from Guadeloupe and two islands
until March 25th. He will be using SSB and the Digital modes during his stay.
Logs will be uploaded to both ClubLog and Logbook of the World.
QSL via his home call either direct or via the bureau.

8J6HAM - celebrating the 12th West Japan Ham Fair on AS-077 Kyushu
10 Dec to 3 Mar

AWARDS

Hello I'm Bob VK3SX the WIA Federal Awards manager with some excellent news.

Our first class Awards have now been brought into the Digital age making them
the very best in the world.

With much excellent work by Marc VK3OHM and the entire Awards committee . The
MMode DXCC/ MB DXCC /Grid Square and the VHF/UHF Century Awards have never
been easier to obtain.

Users who have embraced the Electronic logging can now upload their
ADIF 2 / 3 log files to the new spread sheets , taking minutes instead of
hours to complete.

Importantly we now accept LOTW confirmations (subject to criteria) and
Authenticity Guaranteed EQsl only confirmations subject to the rules.
Traditional Paper qsl's are still accepted for the old school amateurs.

All the information and down loads are on the Awards Web pages along with the
important Rule changes, I will bring you more information in the following
weeks.

When All Else Fails - Ham Radio - San Francisco 1989

Phil Brunson AA 0 PB has made available a video he produced in 2003 about the 1989 San Francisco Earthquake

The YouTube description reads:

"In 2003 I was given a school project about effective communications. This is the video I did.

It demonstrates some of the reasons why we as hams get involved during times of emergencies."

Watch When All Else Fails - Ham Radio - 1989 San Francisco Earthquake

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

77.5 GHz ham radio moon bounce echo achieved

Last Sunday, February 17, Sergei RW 3 BP tried his first amateur radio Earth-Moon-Earth echo test on 77.5 GHz

He posted this report on the Moon-Net reflector:

"The weather was good for the test. No clouds, temperature -7C, humidity 85%.

Transmitted signal was simple "E" - 25% on and 75% off with 0.7s period.

Three periods to transmit and five periods pause to switch TX/RX and to receive.

Echo signal was -20...-22 dB under noise in ref to 3 kHz BW."

To detect echo signal he used the M.W.C.W. program.

AMATEUR SATELLITE ALLOCATIONS ON THE R-1 AGENDA AT VIENNA

The IARU Region 1 2013 Interim Meeting slated for
Vienna, Austria in April will be discussing two
proposals of importance to Amateur-Satellite
Service and weak signal users.

One that's not very controversial is an amendment to the 28 MHz
Bandplan to remove of the downlink only
restriction in the 29.300 to 29.510 MHz satellite
segment. But the other has raised some eyebrows.

This one proposes the introduction of a new satellite downlink band
for CW and SSB transponders at 144.000 to 144.035 MHz.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

AF-109. (New IOTA)

Members of the Egyptian Radio Amateur Society for Development (ERASD) plan
to be active as SU8N from Geziret Disuqi (aka Nelson's Island), an island in
the Nile Delta and Sinai Region Group, during May 3-10th.

"Nelson's Island" is approximately 20 kilometers east of the Egyptian port
of Alexandria, four kilometers north of Cape Aboukir.

Nelson's Island is approximately 350 meters by 150 meters.

Activity will be on most HF bands.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Now Clive VK6CSW.

Tomorrow is the first Monday of the month and that means it's time for the
Radio Amateurs Old Timers Club of Australia's March bulletin to go to air.

Tomorrow's feature is the story of how Maskelynne, well known Magican ,
used QRM from his spark transmitter to upset a lecture on Marconi's
syntony system being given by Professor Ambrose Fleming back in 1903.

The principal HF transmission is on 20 metres on 14.150 MHz USB.
At 0100 UTC the transmission is beamed north from Melbourne for
Eastern states listeners and at 0200 UTC the transmission is beamed
westward for VK6 listeners.

Also at 0200 UTC Barry VK6WF will be transmitting on 40 metres on 7050 kHz
LSB for WA country listeners beyond our linked repeater system coverage.
South Australian listeners may well be able to copy this transmission, too.

Numerous other local relays occur throughout the day on various HF and VHF
frequencies. To find the times and frequencies for your area please visit
the RAOTC website at www.raotc.org.au

Everyone, RAOTC members and non-members alike, is invited to listen to this
interesting half-hour of Old Timer news, information and stories, and of
course, call backs afterwards from all listeners are very welcome.

So once again, the RAOTC monthly bulletin can be heard tomorrow, Monday

73, Clive VK6CSW.

DISCUSSION POINT

What use is an f-call?

In the Amateur Radio Licensing regime before the current one where we have a Foundation License, a Standard License and an Advanced one, there was a requirement to know Morse Code before you could obtain some Amateur Licenses.

I don't have the exact details, but suffice to say that Morse Code is no longer a licensing requirement to be able to enjoy Amateur Radio.

You'll note that I said that it's no longer a Licencing Requirement, but that doesn't mean that your use of Amateur Radio and your participation within the community wouldn't benefit from knowing the dits and dahs that make up letters, combined making words or codes.

For example, when you key a local repeater, not for all, but the majority of them, you'll hear a series of beeps. If you spoke morse, you'd be able to discern what call-sign is being transmitted and you'd know what repeater you were keying up.

Across the globe is a network, in-fact multiple networks, of beacons which transmit a series of beeps at different power on a particular frequency. So, for example one network, a beacon in Venezuela transmits its call-sign, followed by a beep at 100 Watts, then a beep at 10 Watt and finally a beep at 1 Watt. Then in the next 10 second block, the next station at the United Nations does it, followed by one in Canada, the United States, Hawaii, New Zealand, and so on, until a whole range of beacons have beeped around the world.

Why should you care? Three Words, Propagation, Propagation, Propagation.

If you can hear a beacon with a known power level, then there is an excellent chance that you can transmit with similar power to a station in the same area as the beacon that you heard. Of course in our technology dense world, there are iPhone and Android apps that will tell you what beacon is transmitting right now, but if you knew morse, all you'd need to do is tune your radio to the appropriate frequency and listen for the call-sign.

Ho-hum you might say. Of course, but you don't need to wait for a beacon. You could tune to a CW calling frequency and see what stations you might hear.

You'd get a higher density of propagation information and you might get a QSO out of the experience.

So, even though you no longer need to know about dits and dahs to get your license, doesn't mean that the skill is obsolete.

My morse is up to 8 letters and with those letters I can already say 262 words. It's not much, but it's more than it was last week. dit dit dit dit dit dit, dit dit dit dit dit dit

HAM RADIO IN SPACE: STRAND ONE CELLPHONE BASED HAMSAT NOW ONORBIT

A new ham radio satellite based on a smart phone is now onorbit as we hear in this report:

--

The United Kingdom first CubeSat named STRaND-1 was launched on Monday, February 25 on the PSLV-C20 booster. This from the Indian Space Research Organization Space Launch Center. Successful deployment from the STRaND-1 into a 785 km orbit took place about 20 minutes later.

Signals from STRaND-1 were received by Nader Omer, ST2NH, in the Sudan at 15:55 UTC and by the Surrey Space Centre later in the day. Soon afterward on Hector Martinez, CO6CBF, in Cuba used an AMSAT-UK FUNcube Dongle to receive the satellite.

STRaND stands for Surrey Training, Research and Nanosatellite Demonstration. STRaND 1 and was built in only three months using a Google Nexus One smartphone with an Android operating system. This to demonstrate the feasibility of using such an inexpensive device to control a spacecraft.

STRaND-1 carries an amateur radio AX.25 packet radio downlink on 437.568 MHz. It also uses a 9k6 bps Frequency Shift Keying in an High Level Data Control frame and NonReturn-to-Zero Inverted encoding.

The overall STRaND program is intended to be a long-term arrangement between the space company SSTL and academic researchers at the Surrey Space Centre. STRaND-1 is the first of a long line of STRaND smartphone based nanosatellites.

According to the latest reports hams around the world have responded to the request for telemetry data from the STRaND1 satellite controllers. Information on how to receive the satellites telemetry data is available at tinyurl.com/hearing-strand-one.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The STRaND-1 team has asked if radio amateurs can assist in collecting telemetry from around the world to help them determine the health and attitude of the spacecraft. Again, the downlink uses amateur radio AX.25 packet radio on 437.568 MHz using 9600 bps FSK modulated data with an HDLC frame and NRZI encoding. Reports go by e-mail to Dr. Chris Bridges at C (dot) P (dot) Bridges (at) surrey (dot) ac (dot) uk.

(AMSAT-UK, STRaND)
**

RADIO LAW: FCC PROPOSES MORE SPECTRUM AT 5 GHZ FOR UNLICENSED BROADBAND

The FCC has released a Notice of Proposed Rulemaking or NPRM in ET Docket No. 13-49, seeking to revise the Part 15 rules governing unlicensed national information infrastructure devices in the 5 GHz band. These devices presently operate in the frequency bands 5.15-5.35 GHz and 5.47 to 5.825 GHz. They use wideband digital modulation techniques to provide a wide array of high data rate mobile and fixed communications for individuals, businesses and institutions. Slightly different rules apply to 5.825 through 5.85 GHz.

Among the changes being proposed in the February 20th document are the creation of two additional bands totaling 195 MHz for unlicensed operation. These are 5.35 to 5.47 GHz and 5.85 to 5.925 GHz. It should be noted that the Amateur Radio Service has a secondary allocation at 5.65 to 5.925 GHz. This includes an Amateur Satellite Service uplink from 5.65 to 5.67 GHz and a downlink from 5.83 to 5.85 GHz.

The FCC will be accepting comments on its NPRM due no later than 45 days after publication in the Federal Register, as well as reply comments due 30 days later. No date has yet been set for the Federal Register release. The NPRM can be found on the web at tinyurl.com/fcc-broadband-five. (ARRL, VHF Reflector, W0WOI)

WORLDBEAT: AMATEUR-CREATED 'VARICODE' ADOPTED AS ITU RECOMMENDATION

The ARRL report that Varicode, developed by Peter Martinez, G3PLX, has been adopted as an International Telecommunications Union Recommendation. On Tuesday, February 19th, Francois Rancy who is the Director of the Radiocommunication Bureau of the I-T-U announced the simultaneous adoption and approval of the Recommendation entitled Telegraphic Alphabet for Data Communication by Phase Shift Keying at 31

Baud in the Amateur and AmateurSatellite Services.

This digital mode alphabet is commonly called "Varicode" because the more frequently used characters in the English language occupy fewer bits. It was developed by G3PLX in the 1990's. For his effort Martinez was awarded the ARRL Technical Innovation Award for the year 2000 for his development of PSK31, which uses Varicode for transmission efficiency.

Varicode now becomes Recommendation ITU-R M.2034. More on it is on the web at www.arrl.org/psk31-spec (ARRL)

**

WORLDBEAT: CANADA LAUNCHES MOTOTRBO DIGITAL AUDIO C BRIDGE INTERCONNECT

Hams in Canada have taken their first step toward the creation of a national amateur radio Division Multiple Access or DMR network. This with the launch of the first inter-provincial DMR networking server on Saturday, February 23rd. Amateur Radio Newslines Stephan Kinford, N8WB, has the details:

--

The server, more commonly known as a "c-Bridge" was manufactured by Rayfield Communications and will serve as a network hub for Canadian amateur radio DMR repeaters. It will not only allow them to reliably link to one another but also to the growing DMR-MARC global network using Internet connectivity.

The DMR-MARC global network is an all-digital group of Mototrbo DMR repeaters in the USA, Germany, Australia, South Africa, New Zealand, Switzerland, Spain, Austria, Finland, Sweden and of coarse Canada. The backbone networking is being created by amateur radio operators many of whom are Motorola Solutions employees, Motorola Service Station employees, dealers, system installers, and just plain Motorola equipment aficionados. Repeaters on this network are connected around the clock.

And for those listeners who are unfamiliar with Mototrbo system, this is a Motorola digital radio product marketed primarily to business and industrial users, but which has found its way into some public safety uses and now to ham radio. The format is based on and compatible with the European 2-slot DMR standard and uses Time Division Multiple Access to accommodate two simultaneous users. Therefore a single 12.5 kHz channel is able to carry two simultaneous and independent conversations or simultaneous and independent voice and data paths each with 6.25 kHz equivalency. More about the world-wide DMR-MARC global ham radio network is on-line at www.dmr-marc.net.

The Canadian c-Bridge is located in Montreal and is currently supporting several DMR repeaters in Ontario and Quebec, including the

VA3XPR digital DMR repeater located in downtown Toronto. For more information on the new Canadian digital interconnect and how your organization can connect their DMR system to it, please visit tinyurl.com/canada-cbridge.

For the Amateur Radio Newsline, I'm Stephan, Kinford, N8WB, in Wadsworth, Ohio.

--

And before you ask, Mototrbo and D-Star radios cannot talk directly to one another. This is because each uses a different and incompatible digital voice encode and decode technology. (VA3FXT via QRZ.com, DMR-MARC)

**

WORLDBEAT: THE VK0RTM 6M BEACON ON AIR FROM NEAR THE SOUTH POLE

A new 6 meter propagation should now be on the air from near to the South Pole. Craig Hayhow who is signing VK0JJJ from Mawson Base in Antarctica is reported to have brought with him a beacon transmitter with the call VK0RTM that is now operational on 50.300 MHz.

The VK0RTM transmitter runs 50 watts. It was donated for this very special operation by David Craig, N3DB, who is the Secretary and Treasurer of The 6 Meter Beacon Project.

But the beacon will not be the only 6 meter signal coming to the air. While at Mawson Station for about 12 months, Hayhow plans to be active on all bands from 80 through 6 with priority given to 6 meter operation.

VK0JJJ is a senior telecommunications engineer from West Australia. He is a member of the Antarctica Australian National Antarctic Research Expedition due to return home in January 2014. (VK3PC, QRZ.com)

ENFORCEMENT: UNLICENSED BROADCASTER SUED BY GOVERNMENT TO COLLECT $20000 FINE

A Florida resident whose unlicensed radio station interfered with air traffic control at Palm Beach International Airport is being sued for collection of a $20,000 fine by the federal government. This as

Federal prosecutors file documents in federal court instructing Robins Cheriza, to respond to action demanding that he pay the fine issued against him last year by the FCC. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

According to the February 9th court filing Robins Cheriza has ignored the Federal Communications Commission's order to pay the fine since last April. This after the regulatory agency found that he had willfully and repeatedly transmitted a radio signal without a license in the spring of 2011.

According to FCC records, the sounds of a party being broadcast from Cheriza's home interrupted air traffic control at Palm Beach International Airport on April 1, 2011. That incident prompted the Federal Aviation Administration to file a complaint with the FCC. Agents with the FCC's Miami Enforcement Bureau used direction finding to locate an antenna mounted to the West Palm Beach home of Cheriza.

The agents performed a station inspection and found a complete broadcast facility on an enclosed patio connected to the antenna. At that point Cheriza told agents he owned the studio and its equipment. He also admitted to having operated the station on 107.3 MHz for about a month even though he was aware that operating an unlicensed FM station was illegal.

That lead to his being issued a $20,000 Notice of Apparent Liability which was affirmed on April 3rd of 2012. At that time he was given 30 days to pay or to appeal. But the FCC says that Cheriza ignored the notice, leading to the Federal suit for collection.

The litigation which was filed by the U.S. Attorney's Office for the Southern District of Florida directs that Cheriza pay the $20,000 fine plus court costs and interest and that he does so within 21 days.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Whether or not Cheriza has paid the $20,000 fine is unknown as we go to air. (FCC, published news reports)

**

RESCUE RADIO: AMERICAN RED CROSS TO PHASE-OUT ECRV OPERATIONS

The ARRL reports the American Red Cross will be phasing out out its Emergency Communication Response Vehicles also known as ECRV's. According to American Red Cross Disaster Services Technology Manager Keith Robertory, KG4UIR, every communication capability of the Emergency Communication Response Vehicles already exists, or will soon exist as a rapidly deployable kit. These says Robertory can be loaded

on any vehicle that is owned or rented by the American Red Cross, providing more flexibility in shaping its response to match the disaster.

Robertory told the ARRL that retrofitting the decade old vehicles with new equipment is not a good use of donated funds, as the long-term strategy is to move to more portable systems. This says KG4UIR is consistent with the trends in the telecommunications and technology industries.

As to the ham radio gear currently installed in these vehicles, it is not going away. Rather it will be removed and will either become part of the deployable inventory or provided to the local American Red Cross chapter to build local capacity. A more in-depth look at this decision by the Red Cross and its impact on ham radio can be found on line at tinyurl.com/b84tn88 (ARRL)

**

RESCUE RADIO: HAMS HELP TRAIN EMERGENCY RESPONDERS IN CONNECTICUT

The Ridgefield Press in Connecticut says that amateur radio operators from the city's volunteer disaster communications team have been assisting in the development of a communications training video. This for use by fire, police and emergency medical first responders.

The new training video will focus on the importance of including ham radio in emergency planning and operations. It will also demonstrate the capabilities of amateur radio equipment and disaster-trained ham radio operators.

Ridgefield's Emergency Operations Center and many other centers and hospitals throughout the region are equipped with amateur radio equipment that provides backup communications when normal channels are out of service. The complete story on this new video can be found at tinyurl.com/rescue-radio-video (RP.com)

**

HAM HAPPENINGS: HAM RADIO CLUB TO CELEBRATE LEGION BIRTHDAY

The American Legion Amateur Radio Club will operate special event station N9L on March 15, between 10 a.m. and 4 p.m., and March 16 between 9 a.m. and 4 p.m. Eastern Standard Time. This to commemorate the 94th birthday of The American Legion

The primary frequency to look for N9L will be 14.270 MHz on 20 meters and locally on 146.46 in Central Indiana. The station will also be available via IRLP Node 4816.

A full-color certificate will be sent upon receipt of a 9-by12-inch self-addressed stamped envelope to the American Legion National Headquarters, Attn: TALARC, 700 North Pennsylvania Street, Indianapolis, Indiana 46204. More is on-line at

www.legion.org/hamradio. (TALARC)

**

HAM HAPPENINGS: HAM RADIO COMMEMORATES THE BATAAN DEATH MARCH

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating Special Events Station K5B on March 17th. This in conjunction with the 24th annual Bataan Memorial Death March Marathon event to be held at the White Sands Missile Range.

K5B will operate from 1000 UTC to 2300 UTC on or near 21.337, 14.330, 7.225, and 3.893 megahertz. A commemorative QSL card will be available by request. If you make contact send your QSL with a self addressed stamped business sized envelope to Special Events Station K5B in care of the Mesilla Valley Radio Club, P. O. Box 1443, Las Cruces, New Mexico, 88004.

All QSL requests must be received by Friday, April 26th. More information about this special operation is on line at www.n5bl.org/bataan. (Mesilla Valley Radio Club)

**

HAM HAPPENINGS: ST PATRICK'S DAY SPECIAL EVENT

Irelands West Tyrone Amateur Radio Club will be taking part in the St. Patrick's Day celebration on Monday March 18th in the city of Omagh by operating special event station GB1SPD. This from the Strule Arts Centre in the Heart of Omagh Town during the Omagh District Council St. Patrick's Day Parade and Festival. You can listen out for GB1SPD world-wide on the High Frequency bands as well as Echolink. Commemorative QSL cards will be available to those who wish to have a conformation of the QSO. More details available at www.wtarc.org (WTARC, Southgate)

**

NAMES IN THE NEWS: WIND UP RADIO DEVELOPER SEEKING UK GOVERNMENT PROTECTION FOR ALL INVENTORS

Some names in the news. The developer of the famed FreePlay wind-up radio is calling on the British government to step-in to protect the interests of inventors. The Daily Telegraph reports that inventor Trevor Baylis says he faces having to sell his house after failing to make money from his wind-up radio that many say helped to revolutionize public emergency notifications and there-by save lives in emerging nations. The full story on how Baylis' situation came about and the intellectual rights protection he is seeking for all inventors is on-line at tinyurl.com/baylisradio (UK Telegraph)

**

NAMES IN THE NEWS: YOUNG BOY SCOUT RECEIVES AMATEUR RADIO PATCH

The Jamestown New York Post-Journal reports that Robert Miles, KD2BWZ, is one of the youngest scouts to receive the Boy Scouts of America's Amateur Radio Operating Patch.

Robert and his father Aaron Miles KD2BWY both received these patches at an event attended by Wayne Schuver Jr. who is the senior district executive of the Boy Scouts of America's Alleghany Highlands District. John Mueller K2BT, who is the Western New York section manager for the American Radio Relay League.

As previously reported the Amateur Radio Operating Patch is a recent addition for the Boy Scouts and recognizes the scout's availability as an amateur radio operator for communications services for events and activities as well as in emergencies. All registered youth and adult members who also hold a valid FCC issued amateur radio license of any class are eligible to earn and wear the patch. The full PostJournal story along with a photo of the presentation is at tinyurl.com/scouting-patch (Post-Journal)

**

NAMES IN THE NEWS: W2TRR LEAVING WOR FOR CONSULTANT BUSINESS

Noted Broadcast Engineer Tom Ray, W2TRR, is leaving WOR -AM, in New York City after more than 15 years with the station. Ray had been Chief Engineer of WOR and Director of Engineering of Buckley Broadcasting until the station was sold to Clear Channel late last year. His current title is AM Chief Engineer.

During Ray's tenure at WOR, he had taken the station from an older analog facility into the digital world, culminating in the move of the WOR studio to a new locality in Manhattan. He next built WOR a new transmitter facility in the New Jersey Meadowlands, retiring the former Lyndhurst, New Jersey facility that had served WOR for 40 years. Ray will now head up his own broadcast consultancy firm. (RW, QRZ.com)

CHANGING OF THE GUARD: PAT HAWKER MBE G3VA

SILENT KEY

Pat Hawker, MBE, G3VA, who for 50 years wrote the Technical Topics column in the RSGB publication RadCom, passed away on February 21st at age 90.

Hawker was first awarded a UK an 'artificial aerial' license and call sign 2BUH in 1936. He received his transmitting license and the call G3VA in 1938.

During his lifetime Pat Hawker was involved in many aspects of radio. Tis ranged from World War 2 with the United Kingdom's military intelligence organizations through to his time working for the RSGB, then as the editor of Electronics Weekly and the Royal Television Society Journal.

The extraordinary career of Pat Hawker, G3VA, is described in a book by Steve White, G3ZVW, titled A Bit of Controversy, Pat Hawker - A Radio Life. And for those not aware, the title MBE stands for Member of the Most Excellent Order of the British Empire. (GB2RS)

**

WORLDBEAT: CANADA'S BRIT FADER SCHOLARSHIP

Canadian hams in need of educational financial assistance listen up. The Brit Fader Scholarship established in 1993 by the Halifax Amateur Radio Club is now accepting applications for the 2013 to 2014 educational year.

This Scholarship will be provided for attendance at an accredited Canadian post-secondary technical school, college or university, with preference given to applicants who have been accepted into a program in the field of electronics, electrical engineering, or a related area.

An applicant for this scholarship must be a Canadian citizen and hold an active Basic Class or higher grade of Canadian Amateur Radio license.

A zipped application package is available for down-loading from the Halifax Amateur Radio website at www.Halifaxarc.org. Follow the link to the Brit Fader Scholarship from the home page under Education.

Application submissions must be postmarked no later than July 12th. The amount of the 2013 award will be $1000. (HARC)

**

WORLDBEAT: INTERNATIONAL RADIO FESTIVAL SEPT 4 - 8 IN ZURICH

The 2013 International Radio Festival will be held September 4th to the 8th at the famed Schloss Sihlberg Castle in Zurich, Switzerland. Participating broadcasters so far include the BBC, Switzerland's DRS3, Portugal's Antena 3, Raadio 2 of Estonia and the Czech Republic's Radio

Wave. Planners say that this years event will feature industry speakers flying in from all parts of the world. You can follow developments by joining their page at facebook.com/internationalradiofestival. (RW, others)

**

WORLDBEAT: INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND GROWS

An update on pre-registration for the 2013 International Lighthouse and Lightship Weekend operating event. So far there have been some 150 registrations from 25 countries. Germany has the most with 35 closely followed by Australia accounting for 34.

This years International Lighthouse and Lightship Weekend is on August the 17th and 18th. More information on this fun event along with registration details is on line at www.illw.net. (VK3PC)

**

HAM RADIO IN SPACE: AMSAT AND VIRGINIA TECH SIGN COLLABORATION AGREEMENT

AMSAT and the Virginia Polytechnic Institute have signed a Collaboration Agreement that establishes a relationship for future projects. This in the development of space hardware, software, algorithms, documentation of same and an agreement to protect each other by protecting International Traffic in Arms Regulations or ITAR-covered materials and identifying same for the other. The agreement was signed on February 4th by AMSAT President Barry Baines, WD4ASW and Virginia Tech Assistant Vice President for Sponsored Programs Administration John Rudd. (ANS)

**

SCIENCE AND SPACE: METEOR THAT HIT RUSSIA TRAJECTORY IDENTIFIED

Scientists from Colombia believe they have pinpointed the origin of the giant meteor that smashed into a remote region of Russia last month. Using some of the dozens, if not hundreds, of videos that captured the once-in-a-century event, the scientists have calculated the Chelyabinsk meteor's trajectory, tracing it back to a group of Earthcrossing objects known as Apollo asteroids. Researchers Jorge Zuluaga and Ignacio Ferrin, from the University of Antioquia then used trigonometry to calculate the height, speed and position of the rock as it fell to Earth.

To reconstruct the meteor's original orbit around the sun, they used six different properties of its trajectory through Earth's atmosphere. They then plugged all of that data into specialized astronomy software developed by the U.S. Naval Observatory. The computers then confirmed that it was from the Apollo group.

Unlike the more stable objects in the Asteroid Belt which lies between Mars and Jupiter, Apollo asteroids tend to sideswipe Earth's orbit, posing a risk of collision like the one I Russia. According to the International Astronomical Union's Minor Planet Center, more than 4,800 Apollo asteroid close approaches that have been identified to date. (Science Now)

**

RADIO IN SPACE: NEW LANDSAT SATELLITE NOW ON-ORBIT

A new satellite to keep an eye on our planets changing landscape was launched into orbit on Monday, February 11th. This eighth and most sophisticated Landsat spacecraft blasted off at 1802 GMT aboard an unmanned Atlas 5 rocket from Vandenberg Air Force Base in California. The Landsat Data Continuity Mission will join the sole operational fourteen year old Landsat 7 spacecraft in providing visible and infrared images from an orbital perch 438 miles above Earth.

The new satellite circle the planet every 99 minutes, relaying pictures by radio that show details down to about the size of a baseball diamond. The images, which are distributed at no charge, are used by federal, state and local governments and planning boards worldwide to monitor crops, assess damage from fires, floods and other natural disasters. They also track changing coastlines, glaciers and other areas impacted by global warming. (Science OnLine)

**

ON THE AIR: SPECIAL EVENT N4WIS DURING WISCONSIN QSO PARTY

On the air, word that K9UTQ will activate the USS Wisconsin Battleship station N4WIS. This during the Wisconsin QSO Party on March 9th. QSL's go via N4WIS. For more details and updated information, please visit www.n4wis.org on the World Wide Web. (OPDX)

**

DX

In DX, W0FK will be active from Longboat Key between March 2nd and the 16th. No word on times or frequencies. If you work him QSL via his home callsign, direct or by the Bureau.

EI7CC will be operational from Lesotho as 7P8PB from March 6th to the 26th. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL via EI7CC either direct or via the bureau. Logs will be uploaded to Logbook of the World immediately upon his return to Ireland.

N6MW and N6TQ, who were expected to be on the air stroke KH8 from March 19th to the 28th from American Samoa have postponed this operation indefinitely. No reason for the cancellation was given.

KV1J will once again be operating stroke FP from Miquelon Island between July 6th to the 16th. His activity will be on 160 through 6 meters using CW, SSB, RTTY and PSK31 generally be on the highest frequency band that is open. Also, look for him on the satellites, weather permitting. QSL via KV1J, direct, via the bureau or electronically using Logbook of the World.

JL1UTS and L3PFH will be active as KH0TH and KH0TG, respectively, from the Saipan between May 2nd to the 5th. Their operation will encompass all of the High Frequency bands and modes. QSL via their home callsigns, either direct or the JARL Bureau.

AE1C will be active stroke VE9 from Grand Manan Island between August 18th to the 25th. Activity will be holiday style on the HF bands using 200 watts and a vertical antenna. QSL via his home callsign using Logbook of the World, eQSL or direct.

Lastly, word that the Sri Lanka 4S7DXG and Maldives 8Q7VR operations in 2008 and 2011 have been approved for DXCC credit. If you had request rejected for contacts with these dates only, send an e-mail to dxccrules@arrl.org to be put on the list for an update. Contacts before or after these periods cannot be accepted.

(Above from various DX News Sources)

**

THAT FINAL ITEM: RESCUE RADIO: FOLLOW-UP - NPR LABS EMERGENCY ALERT FOR THE DEAF EXPERIMENT TO GO FORWARD

A follow up to our recent report on an Emergency Alerting system being proposed for the deaf and hart of hearing using radio. Amateur Radio Newsline's Bruce Tennant, K6PZW. is here with the details:

--

NPR Labs has been awarded a contract from the U.S. Department of Homeland Security and the Federal Emergency Management Agency to demonstrate the delivery of emergency alerts to people who are deaf or hard-of-hearing in the Gulf Coast states. This through local public radio stations and the Public Radio Satellite System.

This pilot system is intended to demonstrate that all individuals, including those who are deaf or hard-ofhearing, can rely on battery-powered radios to stay informed in emergencies when electricity, Internet and other communications channels are unavailable.

NPR Labs is the technology research and development group of National Public Radio. It will work with DHS and FEMA to identify 25 public radio outlets in Alabama, Florida, Louisiana, Mississippi and Texas to participate in the pilot. The distribution network of the Public Radio Satellite System will be used to test the effectiveness of the message delivery system. The Gulf region was chosen because it is frequently subjected to extreme and sudden weather conditions. Once proven, the

system could be rolled out nationwide on the public radio stations served by the Public Radio Satellite System, which reach 95% of the United States population.

In the demonstration project, FEMA will transmit emergency alert messages using the Common Alerting Protocol. The Public Radio Satellite System network operations center will re-transmit the warning via the Radio Broadcast Data System on the participating 25 public radio stations on a dedicated digital alerting channel. The stations will broadcast the emergency alert to receivers capable of displaying text messages. Deaf or hard-of-hearing project volunteers will be alerted to the message by a flashing indicator on their radios or a bed-shaker triggered by their radios, to ensure the message is received day and night.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW in Los Angeles.

--

NPR Labs plans to identify 500 individuals who are deaf or hard-of-hearing in the listening areas of the 25 participating stations. The volunteers will be surveyed periodically to determine the efficacy of the warnings. This is the first effort to deliver real-time accessibilitytargeted emergency messages, such as weather alerts, via radio broadcast texts. (RadioOnLine, RW)

Posting-Frequency: posted quarterly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1102
BID: $OPDX.1102
March 4, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2VU, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K6VVA, KH6BZF, NA6L, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 4Z4KX, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, GM3WOJ, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, OZ6OM & 50 MHz DX News, ON6OM, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, UN8GC, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd-February, through Friday, 1st-March there were 231 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8BB from the "Institute Superieur de L'Animation Pour la Jeunesse et la Culture" station in Tunis, during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.info

3V, TUNISIA (Op/Web Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, who are planning a second IOTA DXpedition to Djerba Island (AF-083, WW. Loc. JM53KT, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI (will receive license in March) between April 29th and May 6th (see OPDX.1100 & OPDX.1101), have announced that they will now be active on all HF bands, including the 30/17/12/6 meter bands using CW, SSB, RTTY and PSK31/63/125 modes. The team is still in need of sponsors and individual contributions. Contact: ik7jwx2003@yahoo.it
For more info and updates, watch the following Web pages:
http://www.qrz.com/db/TS8TI/
http://www.arilimbiate.it/
https://www.facebook.com/notifications#!/alfredo.denisi

8Q, MALDIVES. Wolfgang, OE1MWW, will be active as 8Q7WK between March 9-23rd. Activity will be holiday style on the HF bands. QSL via his home callsign.

9X, RWANDA (Update/Reminder). Look for Nick, G3RWF (5X1NH), to be active from Rwanda between March 4-12th. He has requested the callsign 9X0NH, and the license should be valid for 2013 because he could return later in the year. Activity will be from Kigali on most HF bands and will be mainly CW with some SSB using 100 watts and wire antennas. There will be no 160m, but he will be on 6 meters. QSL via G3RWF. Nick will upload his log daily on LoTW.

CQ NEWS. Richard, W2VU, Editor of CQ Amateur Radio, sent out the following press release on February 28th: CQ Launches Online Photo Gallery (Hicksville, New York) -- CQ magazine today announced the launch of the online CQ Photo Gallery to supplement photos published in the magazine.
"We shoot photos at many events, and receive many photos from readers, that we don't have space to put in the magazine," said CQ Editor Rich Moseson, W2VU. "But we still want to share them with our readers. The new CQ Photo Gallery allows us to do that."
The photo gallery resides on the flickr.com web site and is organized into albums called "sets." Initial sets include CQ cover images; the "CQ Garage," featuring ham radio license plates from all over; news photos from the FCC's field hearing on communications lessons from Superstorm Sandy, and reader-submitted photos. Moseson recommended that readers check into the gallery site frequently, as new photos will be added regularly. The CQ Photo Gallery may be accessed at:
http://www.flickr.com/photos/cqphotogallery/sets
CQ <www.cq-amateur-radio.com> is the world's leading independent amateur radio magazine, serving the amateur radio community worldwide

since 1945. It is published in three languages (English, Spanish and Portuguese) and in both print and digital editions.

EF8, CANARY ISLANDS. Carlos, IK1HJS, will be active as EF8U from Las Palmas Contest station during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or by the Bureau.

HOLYLAND CONTEST 2013. Mark, 4Z4KX, wants to remain everyone that the "Holyland Contest 2013" starts at 2100z on April 19th, and ends at 2100z on April 20th (24 hours!). This year's contest goal will be to have as many Israeli mobile stations activating many different and rare squares for the "Holyland Award". Complete contest details and last year's results are available at:
http://www.iarc.org/~4z1pf/HOLYLAND%20CONTEST%202012%20RESULTS.pdf

HC8, GALAPAGOS ISLANDS. "DX-World.net" reports that Adam, K7ST, is currently operating from a moored boat at the Galapagos Islands. This does not count for DXCC. However, during the weekend he will be on land for the ARRL SSB DX Contest (March 2-3rd) as K7ST/HC8 where it will be good for DXCC.

HR, HONDURAS. After being active from the 5X8C DXpedition, Gerard, F2FD, is now again active as HR5/F2JD from Copan between now and May 20th. He states that he will be active as much as possible on CW, SSB and RTTY. QSL via F6AJA or LoTW. QSOs will be on ClubLog. Also, visit his Web page at: http://f2jd.free.fr

IOTA DXPEDITIONS (Corsican). Operators Vincent/F4BKV, Gil/F4FET, Christian/ EA3NT and Laurent/TK4LS will activate the following Corsican IOTAs between March 23-28th, with individual callsigns:
EU-100 - Between March 23-26th; Callsign TK0INT; Cerbicales Islands; 10th most wanted IOTA in Europe; Reference numbers DIFM TK-032 and WFF FFF945. The island is a natural reserve and the group only has access during the daytime at this time of year. Island was activated 7 years ago.
EU-104 - Between March 24-25th; Callsign TK1INT; Sanguinaires Islands; 5th most wanted IOTA in Europe; Reference numbers DIFM TK-002 and ARLHS COR003.
EU-164 - Between March 27-28th; Callsign TK2INT; San Ciprianu and Lavezzi Islands; 27th most wanted IOTA in Europe; Reference numbers DIFM TK-037 and WFF FFF253; DIFM TK-011 and WFF FFF068.
Operations will be limited to daytime hours only with up to 3 stations on the air. Activity will be on any band that is open; 40/30/20/17/15/12/10 meters using verticals and vertical dipoles. QSL Manager is EA5KA. A OQRS will be available on their Web site. The group is looking for sponsors/ donations for this project. For more details and updates, visit their Web page at: http://f4bkv.net/corsica2013
Also, a Twitter Page at: https://twitter.com/IOTAcorsica

IOTA NEWS.....
EU-038. Marcel, PD5MVH, will once again be active as PD5MVH/P from

Vlieland Island between March 2-16th. Activity will be on
40/20/10 meters SSB. QSL via his home callsign, direct or by
the Bureau. NO LoTW or eQSL.

EU-038. Dirk, DL5DCL, will once again be active as PA/DL5DCL from
Ameland Island for 5 days starting April 1st. Activity will
be CW only on the HF bands. QSL via his home callsign, direct
or by the Bureau.

EU-137. Lars, SM6CUK, will be active as SA6G/7 from Ven Island (WLOTA
0780) between June 10-17th. Activity will be holiday style on
the HF bands. QSL via SM6CUK, by the Bureau or direct.

EU-172. Ric, DL2VFR, will be active use a special callsign, OU1RAEM,
from Samso Island (DIA JY-008, WLOTA 0726) between May 18-24th.
While there Ric will activate a new WFF reference number for
the World-Wide Flora and Fauna program (OZFF-new, to be
decided). Activity will be on the HF bands and mainly CW.
QSLs will automatically be sent for all QSOs via the Bureau.
QSL OU1RAEM via DF5LW.

NA-034. Lou, W0FK, will be active from Longboat Key (USI FL053S,
Sarasota County, FL) between March 2-16th. Activity will be
on or near the usual island and IOTA frequencies on the HF
bands. QSL vai W0FK, direct or by the Bureau. Also via LoTW.

OC-042. Operators Jose/DU1BP, Torsten/DL2KGS and Rag/LA6FJA will be
active as DZ1B from Luzon Island during the CQWW DX SSB Contest
(October 26-27th) as a Multi-2 entry. QSL via DU1BP.

OC-161. (Update) Members of the Indonesian Amateur Radio Organization
of North Sumatra Area will be active as YB6N from Nias Island
between March 8-13th. The following operators will also sign
homecall/6: Ady/YB6VK (Team Leader), Alex/YB0SAT, Hendra/YB1HK,
Imam/YB4IR and Anton/YB5QZ. Activity will be on the HF bands.
QSL via YB4IR (see QRZ.com).

KH0/AH0, MARIANA ISLANDS. Operators Sam/JE1XUZ (KH0XH) and Tama/JQ2WTT
(KH0XW) will be active from Saipan, Northern Mariana Islands (OC-086),
between March 10th and April 1st. Both operators are undergraduates at
a JA university. QSL via the operator's home callsign, by the JA Bureau
or direct. Also, the duo plans to be active as AH0BT (Saipan BBQ Contest
Club callsign) during the CQWW WPX SSB Contest (March 30-31st). QSL
via 7L1FPU, LoTW, by the JA Bureau or direct. Do NOT send to the W0
Bureau and the KH0 address.

KH2/NH2, GUAM. Operators Masanori/JA1OZK/W6LJ, Ryuji/JG1ITH/NY8A, Aki/
JR3QFB/W3JH, Masaru/AI2K and Masatoshi/AH6KY/JA1MFR will be active as
NH2KY (Ibaraki Net Amateur Radio Club callsign) between March 29th and
April 2nd. QSL via JR3QFB. The team will use the callsign KH2KY (Guam
Japanese DXer Club callsign) during the CQ WW WPX SSB Contest (March
30-31st) as a Multi-2 entry. QSL via JA1MFR.

QSL C6AVA via N6AWD. Activity was from IOTA NA-048 and NA-054.

QSL RECEIVED VIA LoTW: 3D2NB, 3V8BB, A5A, FP/VE3DZ, TO2U, V31YK, VP9/WW3S, XU7ACQ, YI1RZ, Z21BB and ZL9HR

QSLS RECEIVED VIA MAIL: 5T0SP, 7O6T, 8Q7AU, 9M6XRO, 9Q6CC, EG5PSP/mm, FM5AN, FR5HA, GD6IA, JT1CO, LU9EO/d, MO5BFL, SP6IXF, T30PY, T32WW, TL8ES, TZ6BB, VU7M, XU1A, XX9THX and ZL9HR

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S2, BANGLADESH. Vadym, UT6UD, will be active as S21XV from Dhaka between March 1-7th. Activity will be on all HF bands with a focus on NA. QSL via UT6UD.

S7, SEYCHELLES (Update). Nobby, G0VJG, will be active S79VJG from the Seychelles (AF-024) between April 4-16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

SN3, POLAND. Operators Bogdan/SP3RBR, Rod/SP8GQU and Jakub/SQ8J will be active as SN3R during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Single entry. QSL via SP3KEY.

TX5, CLIPPERTON ISLAND (Update). The TX5K team arrived at Clipperton Island at 0430z, February 27th, in the dark (and even with a full moon they can only just make out the island), so offloading onto the island did not start until day break. The TX5K Blog page states, "No one got sick on the way down &#65533; all are doing well and have enjoyed the wonderful food and hospitality of the Shogun Crew." Excerpts from the blog state that the team will need a whole day and part of the next day to offload and set up. This means do not expect the start of the DXpedition until late in the day (Pacific Time) on February 28th (it will most likely be March 1st in some time zones) &#65533; which is as planned. The team sends their thanks to everyone for your support of this DXpedition and send their love to their families. Then on February 28th, it was posted, "after spending hours circling the island looking for a suitable and safe place to land" the team began landing at 1300z. Later in the day, they posted "they have all life support, 2 out of 3 tents up, 20 members of the team on the island and that they have generators and lights that they can use to do some work into the night. They will set up radios tomorrow &#65533; so this is all great news. All are tired &#65533; but in very good spirits and doing well. It is hot there."
By the time you read this, the TX5K activity will probably have started and it will be on 160-6 meters using using CW, SSB and RTTY. Frequencies were listed in last week's bulletin (OPDX.1101). Just a reminder that they will also have a quality QRO 6m station with a dedicated operator (Lance, W7GJ, - <http://www.bigskyspaces.com/w7gj/TX5K.htm>) ready to do EME and terrestrial QSOs. Needless to say &#65533; this is huge news for the 6m community!
QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA

Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V3, BELIZE (Update). Operators Lee/N8LJ, Stan/AC8W and Jim/KB8TXZ will be active as V31LJ, V31AC and V31VJ, respectively from Belize between now and March 5th. The trio will be in the ARRL DX SSB Contest (March 2-3rd) as a Multi-Single entry. The contest callsign was not provided. Activity outside of the contest will be on 160-6 meters using CW and RTTY. QSL V31LJ via K8ESQ. QSL V31AC and V31VJ via KB8TXZ.

VK9C, COCOS KEELING ISLANDS (Update/New Callsign). Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) will be active from Cocos Keeling Island (OC-003), using a new callsign that was issued, VK9CZ (not VK9C/GM2MP), between March 30th and April 13th. Activity will be on SSB and CW, with some RTTY. It is hoped to have a real-time logging system and daily LoTW uploads if possible. More details to follow. A new Web page will be available soon at: http://www.vk9cz.com

VP5, TURKS AND CAICOS ISLANDS (Update/Change). A team of operators (mentioned Geoff/W0CG, Scott/K0MD and possibly more) will be active as VP5H from Providenciales Island (NA-002, WLOTA 2003) during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Op/All-Band/High-Power entry. QSL via his home callsign and LoTW.

WP3, PUERTO RICO. Jamie, WP3A, will be active during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. QSL via NP3O.

XE, MEXICO. Brian, N3IQ, will be active as XE3/N3IQ from Cancun during the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/All-Band/QRP entry. He will use a KX3 and little vertical. QSL via N3IQ. By the way, Brian is celebrating his wedding anniversary on this trip.

XU, CAMBODIA. Eddy, ON4AFU, will be active as XU7AFU between March 3-14th. Activity will be CW using 100 watts and wire antennas. QSL via home callsign, direct or by the Bureau. Visit his Web page at: http://www.on4afu.net

ZF, CAYMAN ISLANDS. Chris, HB9ELV, will be active as ZF2EL from the Grand Cayman Island during the ARRL DX SSB Contest (March 2-3rd). QSL via LoTW.

The following stations are expected to be active in the
ARRL DX SSB Contest (March 2-3rd, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 ARRL DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at: http://www.ng3k.com/Misc/adxs2013.html (By callsign)

http://www.ng3k.com/Misc/adxsd2013.html (By entity)

Go Green! Opt-in for Digital QST Only
<http://www.arrl.org/qst-print-edition-opt-out-form>

*Go Green! Simplify your life and help the environment with just a few clicks. Switch to **Digital /QST/ only!**
*
Going green saves trees, and reduces pollution and waste.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/qst-print-edition-opt-out-form>.
Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.

ARRL Members: Why opt-in to the Digital Edition of /QST/ only?
When you opt-out of the print edition, you still have access to the digital interactive edition of /QST/ on your computer, laptop, and Apple iOS mobile devices every month. Every issue of /QST/ is archived and searchable.
Plus, you'll receive monthly email notifications when each issue is available online.
Opt-in for Digital /QST/ Only Now <http://www.arrl.org/qst-print-edition-opt-out-form>

*Disclaimer: Choosing to opt-out of the print edition of/QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Propagation Forecast Bulletin 9 ARLP009
>From Tad Cook, K7RA
Seattle, WA March 1, 2013
To all radio amateurs

SB PROP ARL ARLP009
ARLP009 Propagation de K7RA

Solar and geomagnetic activity over the past week (Thursday through Wednesday, February 21-27) declined, with the average daily sunspot number dropping nearly 21 points to 57.7. Average daily solar flux softened by 4.7 points to 100.9, and average daily planetary A index declined 6.4 points to 5.1. This isn't much of a change, but geomagnetic activity was low already, and this is even lower.

Predicted solar flux for the near term is 110 on March 1-3, 105 on March 4-7, 100 on March 8, 95 on March 9-14, 100 on March 15-16, 105 on March 17, and 110 on March 18-20. Solar flux then reaches a peak of 120 on March 25-27, and on March 28 through April 6 maintains an average around 113.

The predicted planetary A index is 12 and 8 March 1-2, 5 on March 3-4, 8 on March 5, 7 on March 6-7, 5 on March 8-10, 7 on March 11-12, and 5 on March 13-20.

OK1HH predicts quiet to active geomagnetic conditions on March 1, mostly quite March 2, quiet to unsettled March 3, quiet on March 4, mostly quiet March 5, quiet to unsettled March 6, quiet to active March 7, quiet on March 8, mostly quiet March 9-10, quiet to active March 11-12, quiet to unsettled March 13-16, mostly quiet March 17-18, quiet to unsettled March 19-21, active to disturbed March 22 and quiet on March 23-24.

It is interesting to note that OK1HH predicts active to disturbed conditions on March 22, but NOAA and USAF predict a benign planetary A index of only 5 on that date.

This weekend is the ARRL International Phone DX Contest, from March 2, 0000z to March 3, 2400z. If you are on the West Coast, and use Pacific Standard Time, that would begin at 4:00 PM on Friday, ending at 4:00 PM on Sunday. For more info, check

http://www.arrl.org/arrl-dx.

With February ended, let's look at some updated averages. Our most recent 3-month moving average does not impress. The three months centered on January 2013 had an average daily sunspot number of 73.6. This is below every three-month moving average for last year, except the three months centered on March 2012, which was 71.2. The 3-month moving averages of daily sunspot numbers centered on January 2012 through January 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4, 82.8 and 73.6.

Jim Henderson, KF7E sent a link to an impressive NASA clip of solar activity from last July. Note that you can set this video to HD resolution, and it looks great on full screen. See it at http://apod.nasa.gov/apod/ap130226.html.

Also check out the photo gallery of solar events at http://news.cnet.com/2300-11386_3-10015988.html and note the dramatic composite image number 4.

Walt Knodle, W7VS sent an article about artificial ionosphere produced by the HAARP facility in Alaska with a 3.6 megawatt signal on 69 meters. Note that they are only able to produce the effect for 45 seconds. Read about it at http://phys.org/news/2013-02-scientists-densest-artificial-ionospheric-plasma.html.

I think the Wikipedia page at http://en.wikipedia.org/wiki/High_Frequency_Active_Auroral_Research_Program gives a pretty good overview of the HAARP project.

Also the September 1996 issue of QST has a nice article by K3NS titled, "The High Frequency Active Auroral Research Program." ARRL members can find and download it from the ARRL website with a search at http://www.arrl.org/arrl-periodicals-archive-search.

Jim Smith, K3RTU operated on HF CW from Ridley Creek State Park in Southeast Pennsylvania (FM29) on February 25. He wrote, "I hooked up with EA8BVP in the Canary Islands. 'Bal' EA8BVP was using a FT-817 and a vertical, and I was using my FT-817 and my trusty Buddistick vertical. This CW QSO took place early in the afternoon on 18.086 MHz. I had been trying to make a contact on 20 meters and was having no luck so I QSYed to 17 meters and almost within minutes heard EA8BVP calling CQ. Both of our signal levels were S4 to S5. I frequently operate on 17 meter CW while out backpacking and more often than not it provides me with good long distance contacts."

It looks like the path from the park to the Canary Islands would be good in the early afternoon, with the best 17 meter signals that day from 1200-2200 UTC. 17 meters does look like a better bet, with 20 meters not catching up until after 2000 UTC.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 21 through 27 were 75, 79, 56, 25, 59, 49, and 61, with a mean of 57.7. 10.7 cm flux was 108.5, 107, 99.6, 94.9, 95.4, 98.7, and 102, with a mean of 100.9. Estimated planetary A indices were 6, 9, 6, 3, 3, 5, and 4, with a mean of 5.1. Estimated mid-latitude A indices were 5, 9, 6, 2, 3, 4, and 4, with a mean of 4.7.

//
Amateur Radio Experiences DIY Renaissance:

Posted: 01 Mar 2013 02:12 AM PST
http://www.eham.net/articles/29813

When amateurs began experimenting with radio more than a century ago, they had no choice but to build everything they needed. Some went on to become successful entrepreneurs, selling their creations to fellow hobbyists who were more interested in operating radios than in constructing them. Others built their own receivers and transmitters either from economic necessity or for the fun and satisfaction of being able to say, "I did it myself." After World War II, the market was flooded with surplus electronic components that could be bought in bulk for less than the cost of manufacture. The Heath Company parlayed these riches into a successful business by designing kits that could be built at home by anyone with simple tools and a soldering iron. Step-by-step instructions virtually eliminated the risk of failure. No one embraced Heathkits more enthusiastically than the amateur-radio community. At the time, electronic manufacturing still involved point-to-point wiring and was very labor intensive, so hams could buy a kit for less than the cost of an equivalent factory-assembled unit and -- as a bonus -- experience the joy of putting it together. Other companies also offered kits, but Heathkit is virtually synonymous with the era. The advent of solid-state devices, printed circuit boards, and automatic parts insertion removed the price advantage that kits enjoyed. By the time the Heath Company closed its doors in 1992, most amateur-radio equipment was being manufactured in Japan. But Heathkit's demise did not spell the end of home construction in amateur radio. Anyone who has ever made a two-way radio contact with simple equipment they built on their own workbench or kitchen table will tell you that it's a thrilling

experience. One of the many thriving subcultures in amateur radio is the QRP community, named for the international Morse code signal for "decrease power." QRPers pride themselves on being able to communicate all over the world with less than 5 watts of transmitter power, often with homemade gear. Their clever equipment designs -- offered as kits by clubs and small businesses -- have led to a renaissance in kit building. There are so many kits available from so many suppliers that, if you set out to build them all, you would never finish!

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS SUNDAY 03 March 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret that the passing of two radio amateurs must be announced this morning.

Radio amateurs around the world will be saddened to learn of the death of Pat Hawker MBE, G3VA, on 21 February 2013. He was 90 years old. His son and daughter, Philip and Virginia, were with him at the time. Pat was first licensed in 1936 as 2BUH, becoming G3VA in 1938. We send our deepest condolences to Pat's family and close friends. Amateur radio has lost one of its legends.

The key of Bernard Tyler, ZS1TYL, ex-ZS4CW, went silent on Thursday 28 February 2013. Bernie was 83 and was an SARL member for 65 years. We extend our sincere condolences to his wife Joey, family and many friends.

(PAUSE)

IN THE NEWS TODAY:

BOOKING FOR THE SARL NATIONAL CONVENTION WILL OPEN ON MONDAY

ARE YOU KEEPING A LOG BOOK?

SOLAR CYCLE 24 MAY HAVE A DOUBLE PEAK

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

BOOKING FOR THE SARL NATIONAL CONVENTION WILL OPEN ON MONDAY

The 2013 SARL national convention bookings will open on Monday when the registration forms and programme details will be available on www.sarl.org.za. The event starts on Friday evening 26 April with a welcoming function at the West Rand Amateur Radio Club. The guest speaker is Kenny Neville from West Rand Astronomy Club. If the weather is clear you may even have an opportunity to look at the stars.

The Annual General Meeting will be held on Saturday morning 27 April at SULLA VIA conference centre overlooking the Cradle of Mankind. Registration for the annual general meeting is free and starts at 08:00. The meeting itself will start at 09:00. During the registration the SA Amateur Radio Development Trust bookstore will be open offering some of the latest ARRL publications.

On Saturday afternoon there is a visit to the Hartbeeshoek satellite tracking station where many international satellites are tracked and managed. You will also be able to see the SumbandilaSat ground station.

On Saturday evening it is back to Sulla Via for the SARL Annual Awards Dinner. The booking for the dinner includes lucky draws for a number of prizes including a ICOM 2 metre handheld and two dual band 2 m and 70 cm antennas sponsored by Sam Ford of Radio Accessories and Data Modems.

You can select from a number of B@B near SULLA VIA to stay for the weekend, and while there is no formal programme on Sunday, why not visit the Cradle of Mankind before heading home. Incidentally Sulla Via means "on the way", on the way to the Cradle of Mankind!

ARE YOU KEEPING A LOG BOOK?

The Frequency Spectrum Regulations for Amateur Radio require that you keep a logbook for all HF contacts. Section 4 of the regulation states: (1) The licensee must keep a log book recording the activities of the amateur radio station used by him or her or any other person under the supervision of the licensee, except when operating a station in the VHF and UHF bands or mobile. (2) Details recorded in the log book referred to in sub-regulation (15) must include- (a) the date, time and nature of each transmission: provided that the date with regard to each individual day's operation need to be recorded only once and for the purposes of this paragraph "time of each transmission" shall mean the time that a specific station is called and the time at which the communication with such station is terminated; (b) the full name and address of the person making the transmission: provided that the name of the licensee who regularly uses the amateur radio station need to be recorded only once in the log book with an explicit statement that all transmissions are made by him, except where stated otherwise; (c) the call sign of every station: provided that it need not be recorded repeatedly for calls made to the station during the course of the communication; (d) the transmitter power that is used; (e) the frequency band that is used: provided that it need to be recorded in the log book only once until a change of frequency to another authorized band takes place; and (f) the address from where the transmission takes place: provided that such address needs to be

recorded only once, should the place of transmission not change. The regulations further warns that any person who fails to comply with these regulations is liable on conviction by the Complaints and Compliance Commission to a fine not exceeding R200 000 unless stated otherwise in regulations.

SOLAR CYCLE 24 MAY HAVE A DOUBLE PEAK

Something unexpected is happening on the sun. 2013 is supposed to be the year of Solar Max, the peak of the 11-year sunspot cycle. Yet 2013 has arrived and solar activity is relatively low. Sunspot numbers are well below their values in 2011, and strong solar flares have been infrequent for many months.

The quiet has led some observers to wonder if forecasters missed the mark. Solar physicist Dean Pesnell of the Goddard Space Flight Centre has a different explanation: "This is solar maximum," he suggests. "But it looks different from what we expected because it is double peaked."

Conventional wisdom holds that solar activity swings back and forth like a simple pendulum. At one end of the cycle, there is a quiet time with few sunspots and flares. At the other end, Solar Max brings high sunspot numbers and solar storms. It's a regular rhythm that repeats every 11 years.

Reality, however, is more complicated. Astronomers have been counting sunspots for centuries, and they have seen that the solar cycle is not perfectly regular. For one thing, the back-and-forth swing in sunspot counts can take anywhere from 10 to 13 years to complete; also, the amplitude of the cycle varies. Some solar maxima are very weak, others very strong.

Pesnell notes yet another complication: "The last two solar maxima, around 1989 and 2001, had not one but two peaks." Solar activity went up, dipped, then resumed, performing a mini-cycle that lasted about two years.

The same thing could be happening now. Sunspot counts jumped in 2011, dipped in 2012, and Pesnell expects them to rebound again in 2013: "I am comfortable in saying that another peak will happen in 2013 and possibly last into 2014," he predicts.

Another curiosity of the solar cycle is that the sun's hemispheres do not always peak at the same time. In the current cycle, the south has been lagging behind the north. The second peak, if it occurs, will likely feature the southern hemisphere playing catch-up, with a surge in activity south of the sun's equator.

Watch a 4 minutes NASA video on www.sarl.org.za.

APPLICATIONS FOR MEMBERSHIP

The following persons have applied for membership of the SARL: Stefan Terblanche ZSL1059 Johann Andre Marais ZSL1060 Willie Coetzee ZSL1061

Hannes Strydom ZSL1062

Members are reminded that membership is not automatic on application, but subject to council approval. Objections to any application must reach the Secretary before the Tuesday after the SARL News bulletin in which the application was announced.

CONTEST NEWS

Results of the February leg of the SARL National Field Day.

The committee received 19 logs of which fifteen of these stations headed for the outdoors and set-up field stations at resorts or camping areas. The new Class E drew 2 participants.

Class A - Field Station - Multi operator. 1st Welkom ARC, ZS4WRC - 89 208 points 2nd Bloemfontein ARC, ZS4BFN - 66 096 points 3rd Magalies ARK, ZS6MRK - 63 720 points.

Class B - Field Station -Multi operator - QRP. No entries.

Class C - Field Station -Single Operator. 1st Marius Snyman, ZR6MS/4 - 24 576 points 2nd Andries Visagie, ZS6VL/4 - 13 320 points

Class D - Field Station -Single Operator - QRP. 1st Dick Hayter, ZS6RSH - 10 800 points

Class E - Ultra light portable. 1st Pierre van Deventer, ZS6A - 10 350 points 2nd Eddie Leighton, ZS6BNE - 3 510 points

Class F - General stations 1st Pravin Kumar, ZS5LT - 11 088 points 2nd Ken Gurr, ZR5KW/6 - 9 792 points

Well done to all the participants and congratulations to the Class winners. The full results were published in HF Happenings 546. Start your planning now for the November leg of the National Field Day. It is scheduled for the weekend of 16 and 17 November 2013.

This afternoon between 12:00 and 14:00 UTC the SARL Hamnet 40 m Simulated Emergency Contest will be on the air with phone activity in the band segments 7 063 to 7 100 kHz and 7 130 to 7 200 kHz. This contest is open to all radio amateurs in South Africa, Namibia, Botswana, Zimbabwe, Swaziland, Mozambique, Lesotho, Marion Island and South African Antarctica. Only contacts with these areas will count. Participation can be as a Single operator stationary mobile, a Single operator portable, a Multi-operator portable or a Single operator base station. The exchange is a signal report followed by a three-figure number determined by the class of participation. Read from page 26 of the 2013 SARL Contest Manual for the contest rules and details on antennas, power, the exchange and scoring. Logs must be submitted by 11 March to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth, 6025 or by e-mail to contest@peham.co.za.

The March leg of the SARL VHF/UHF analogue and digital contest will be on the air from 10:00 UTC on Saturday 16 March to 10:00 UTC on Sunday 17 March with the aim to promote activity on the VHF/UHF and microwave bands, to encourage people to work greater distances than usual by operating portable and/or improve antenna systems and to provide opportunities for people to activate or work new grid squares. Activity will take place on 6, 4 and 2 metres, 70 and 23 cm and higher using CW, SBB, FM and the digital modes. Participation can be as a base station, a field station, a club or multi operator station, a rover station or a 4 hour limited category station. The contest exchange consists of the call signs, signal report and six-digit grid locator. All the exchange information shall be copied at the time of the QSO. Read from page 28 in the 2013 SARL Contest Manual for all the details.

ELECTRONIC RADIO ZS

SARL Members using a Kindle or the Kindle app on an iPad can receive their copy of Radio ZS on that tablet. Please provide the editor with your Kindle e-mail address and update your Kindle profile to receive mail from radiozs@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. There remains a chance for C-class Solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 42.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

24 February - That is today, the SARL Digital Contest 13:00 UTC to 16:00 UTC. 03 March - SARL Hamnet 40 m Simulated Emergency Contest 12:00 to 14:00 UTC. 03 March - Logs for the SARL Digital Contest to be in to contest@sarl.org.za. 11 March - Logs for the SARL Hamnet 40 m Simulated Emergency Contest must be in to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth, 6025 or by e-mail to contest@peham.co.za. 16/17 March - SARL VHF/UHF analogue and digital contest 10:00 UTC 16 to 10:00 UTC 17 March.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Orinda's Vice Mayor a Real Ham:

Posted: 02 Mar 2013 05:16 AM PST
http://www.eham.net/articles/29817

One of Orinda's newest amateur radio operators is also a familiar face at city council meetings: Vice Mayor Sue Severson. Severson recently earned her Technician class amateur radio license, and was assigned the call sign KK6CFY. Her husband Ralph and daughter-in-law Pam Severson also earned their Technician class licenses. Severson said her "basic emergency concerns" and membership on the Orinda School Board of Trustees led over time to her participation in the Orinda City Disaster Council as well as taking training to become a Community Emergency Response Team volunteer. She earned her latest certification through an intensive, short-term "ham cram" class taught through her church. Instructor Richard Bailey said his students first visit amateur radio websites online, then meet from 6 p.m. to 10 p.m. Friday, and 8 a.m. to 1 p.m. Saturday. They are tested at 2 p.m. Bailey said Severson's class had 24 students enrolled, 21 of whom earned licenses. Severson found the class fast-paced but not intimidating, although she admits "it didn't thrill me to see so many [basic electrical] formulas."

The "P-250" award

Posted: 02 Mar 2013 07:04 PM PST
http://forums.qrz.com/showthread.php?382025-The-quot-P-250-quot-award&goto=newpost

The "-250" award is founded by group of radio fans s.Boguchany in memory of an outstanding Soviet designer of radioreception devices Savelyev Anton Antonoviche also it is devoted to the 100 anniversary from the date of its birth. For reception of the award it is necessary to type 100 points for radio communications with radio fans of Krasnoyarsk region.

For radio communications with stations s.Boguchany UA0ADX and UA0AJX it is charged on 25 points, for a radio communication with children's collective radio station s.Boguchany UA0AXX 50 points are charged, for radio communications with stations of Krasnoyarsk is charged 10 points, for communications with other stations of Krasnoyarsk region is charged on 5 points. One is obligatory QSO with station from s.Boguchany.

Radio communications since January, 1st 2013 are set off. Repeated QSO - on different ranges, and also different kinds of modulation. For the radio communications lead on April, 1st in birthday of Savelev A.A., points are doubled. To observers the award stands out for bilaterial supervision on similar conditions.

The "P-250" award free-of-charge, stands out in an electronic kind, the application is made out in the form of an extract from hardware magazine and sent manager Sergey Motjavin to addresses: ua0adx@mail.ru or motyavin@mail.ru

Design of the award and the detailed information look here:
http://www.epc-ru.ru/index.php?optio...513&Itemid=103

Le diplôme "-250" est institué par le groupe des amateurs sans-filistes de s.Boguchany en mémoire de l'ingénieur donné Soviétique des installations Savel'ev réceptrices Anton Antonovich est consacré au 100-anniversaire depuis sa naissance. Pour la réception du diplôme il est nécessaire de taper 100 lunettes pour les radiocommunications avec les amateurs sans-filistes du bord De Krasnoïarsk.

Pour les radiocommunications avec les stations de s.Boguchany UA0ADX et UA0AJX est calculé selon 25 lunettes, pour la radiocommunication avec le poste de radio d'enfant collectif de s.Boguchany UA0AXX on calcule 50

lunettes, pour les radiocommunications avec les stations de de Krasnoïarsk on calcule 10 lunettes, pour les liaisons avec d'autres stations du bord De Krasnoïarsk est calculé selon 5 lunettes. Une est obligatoire QSO avec la station de s.Boguchany.

On passe en compte les radiocommunications avec le 1 janvier 2013. Réitératif QSO - sur de différentes gammes, ainsi que de différents aspects de la modulation. Pour les radiocommunications faites le 1 avril à l'anniversaire de Savel'ev A.A., les lunettes doublent. Le diplôme est donné aux observateurs pour les observations bilatérales sur les conditions analogues.

Le diplôme "-250" gratuit, est donné dans l'aspect électronique, la demande est régularisée en manière du relevé de la revue de matériel et est expédié au manager à Sergey Motjavin aux adresses : ua0adx@mail.ru ou motyavin@mail.ru

Le design du diplôme et l'information détaillée regardez ici: http://www.epc-ru.ru/index.php?optio...513&Itemid=103

Sunday 3rd March 2013

Pat Hawker G3VA Silent Key

Radio amateurs around the world will be saddened to hear of the death on 21 February of Pat Hawker G3VA. Pat, who was 90 years of age, wrote the Technical Topics column for fifty years. The first of these columns was published in the then RSGB Bulletin in April 1958 which in January 1968 was renamed Radio Communications. Compendia of items from the Technical Topics columns were published in at least four volumes starting in 1968 and these books are on the shelves of many radio amateurs worldwide. They form an invaluable source of reference on an extraordinarily wide range of topics. We extend our sincerest sympathy to Pat's son Philip and his daughter Virginia as well as to his extended family and friends. Amateur radio has lost one of its legends. May he rest in peace.

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Dundalk Amateur Radio Society EI7DAR

The AGM of DAR will take place Wednesday 6th March at the Society premises, 'Larkin House', 113, Castletown Road, Dundalk, commencing at 8pm sharp. Everyone welcome and a reminder to members that membership subscriptions are now due. For more details please visit www.ei7dar.com.

North Cork Radio Group

North Cork Radio Group kick-starts its busy year of activities this Sunday, 3rd March and will be active from Blackrock Castle from 2 - 5pm

as part of Engineers Week . CASHOTA chasers may want to pencil this date in their diaries as the Castle will be operating under the reference EI009/C for those seeking to collect the location.

For those of you unavailable on this date, we are also operational from Ballynamona Beach, near Ballycotton, on bank holiday Monday, 18th March from 11.30am - 4pm approx. If you wish to take part, or indeed try the bands for the first time, feel free to come and visit us, we look forward to seeing, and working, you all.

We also have the pleasure in announcing our annual Radio & Electronics Fair which is to take place at the Commons Inn, Blackpool, Cork on Sunday, 15th Sept 2013. Doors open at 11am and entry fee is 5 per adult (children free). More details to follow but if anyone wishes to make enquiries, please feel free to contact Edwin EI2HEB at 086 3885741 or via email ei2heb /at/ ei1nc.com

---

Cork Radio Club AGM

Cork Radio Club's Annual General Meeting held at Vienna Woods Hotel on Monday February 25th had almost 30 members in attendance. Following a period of inactivity by the club that generated some lively discussion, a full programme of events including monthly talks, special events and field day activites was agreed for the year ahead. Tributes were paid to retiring Chairman Jeremy EI5GM and retiring Treasurer Dick EI6HH, both of who gave outstanding long service to the club. Cormac EI4HQ is the new Chairman with long serving Finbarr EI1CS as vice-chairman. Dave EI4BZ continues as secretary and Jim EI8GS takes over as treasurer. Tom EI2KA is the new QSL Manager and also event manager for International Marconi Day at Brow Head in April. The new committee members are Jack EI7HO, Dave EI9FBB and Don EI8DJ. The monthly meetings will rotate throughout the county to facilitate members who are located from the Beara Peninsula in the West to Youghal in the east, a spread of about 110 miles. Members will be kept informed via the club reflector and the IRTS News service. Enquiries about the club should be directed to the secretary or any committee member.

South Dublin Radio Club AGM 26th of March

This years South Dublin Radio Club AGM will take place on Tuesday 26th of March. All members are asked to attend.

South Eastern Amateur Radio Group

The AGM of the South Eastern Amateur Radio Group took place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 25th February at 8.00 p.m. There was a large attendance present with some familiar faces and some new faces also there. Outgoing Chairman David EI6GVB who subsequently got re-elected as Chairman thanked all members for attending and also welcomed the new members to

the club. The club then observed a minutes silence for the late Michael Hoban EI5DCB who sadly passed away in March 2012. David then went on to tell everyone present that 2012 had been a very successful year for the club in general with the club taking part in many outdoor events during the year. David also thanked the outgoing committee for their work thought 2012 and hoped that 2013 would be an even more successful year for the club. Outgoing club treasurer Mark EI7IS who subsequently got re-elected also told the members that the club was in a good financial position and membership was at an all-time high and was looking forward to more members joining during the year. He gave a brief talk about how the expenditure of the club works discussing both incoming and outgoing expenses. The following members were then deemed elected for Committee positions for the year 2013. Chairman David Gainda EI6GVB, Vice-Chairman Nicky Madigan EI3JB, Secretary Dennis Drennan EI2HSB, Treasurer Mark Wall EI7IS, PRO Seany Byrne EI2HZB, Officer 1 John Tubbritt, Officer 2 John McCarthy EI8JA and Officer 3 John Ronan EI7IG. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

DX News

A multi-national team will activate the Spratly Islands in the South China Sea from 10 - 18 March. The callsign will be 9M4SLL. They will operate all bands 160 - 10m on SSB, CW and RTTY. This counts as a separate entity for DXCC purposes and also for the IOTA Award AS-051. QSL manager is M0URX.

Another multi-national DXpedition will visit the Solomon Islands from 8 - 25 March. The callsign for this one is H44G and they hope to be QRV on all bands 160 - 6m. QSLs go via DL7DF.

Nick G3RWF has appeared from a number of DXCC entities over the years. In recent times he has been active as 5X1NH from Uganda. He plans to be in Rwanda from 4 - 12 March and has applied for the callsign 9X0NH. He operates mainly on CW and QSLs go via his home call.

Four experienced Scottish operators will be on the island of Tuvalu in the Pacific from 12 - 23 March. The callsign will be T2GM and they will be very active on all bands. The QSL Manager is GM4FDM.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

GB2RS NEWS

Sunday 3rd March 2013

The news headlines:

UK's first CubeSat launched

GD100RSGB back for 1 day

Varicode adopted by ITU

The UK's first CubeSat, named STRaND-1, was launched on 25 February into a 785km orbit. Signals from STRaND-1 were received by the Surrey Space Centre later in the day. STRaND 1 was built in only three months using a Google Nexus One smartphone with an Android operating system. It carries an amateur radio AX.25 packet radio downlink on 437.568 MHz using 9600 bps FSK modulated data with an HDLC frame and NRZI encoding. The STRaND-1 team has asked if radio amateurs can assist in collecting telemetry from around the world to help them determine the health and attitude of the spacecraft. Reports go by e-mail to Dr Chris Bridges at C.P.Bridges@surrey.ac.uk.

The special event callsign celebrating the RSGB Centenary stays in Region 4 this week. Today, 3 March, sees Tynemouth ARC operating from North Shields on the HF bands as well as 2m and 70cm using SSB, CW and data. Then on Monday 4th the callsign goes back to the Isle of Man and GD100RSGB will be on the air from Douglas on both HF and VHF using CW, SSB and data. Humber Fortress Club will put the callsign on the air from Fort Paull, near Hull on the 5th and 8th using HF and VHF, look out for their CW, SSB, FM and data signals. On 6 March, Bishop Auckland Radio Amateurs Club, operating in Crook, County Durham, will use the 80, 40, 20 and 2m bands with SSB, FM and PSK31 signals. York Radio Club will have an HF station running SSB, CW, FM and data on 7 March. Then on 9 and 10 March, Durham & District ARS will run HF and VHF stations using SSB and PSK 31 from Durham. Details of how to get your QSL card are on the website, www.rsgb.org.uk.

On 19 February the International Telecommunication Union announced the simultaneous adoption and approval by correspondence of a new Recommendation entitled Telegraphic Alphabet for Data Communication by Phase Shift Keying at 31 Baud in the Amateur and Amateur-Satellite Services. The alphabet, commonly called Varicode because the more frequently used characters in the English language occupy fewer bits, was developed by Peter Martinez, G3PLX, in the 1990s. Adoption of the Recommendation is the culmination of work conducted in ITU-R Study Group

5 and its Working Party 5A during 2011 and 2012. Working Party 5A is responsible for studies of techniques and frequency usage in the Amateur and Amateur-Satellite Services, as well as certain aspects of the land mobile and fixed services.

The IARU amateur radio satellite frequency coordination panel has announced the frequencies for the OSSI-1 CubeSat developed by Hojun Song, DS1SBO. It has a beacon in the 145MHz band, a data communications transceiver in the 437MHz band and carries a 44 watt LED optical beacon to flash Morse code messages to observers on Earth. The IARU coordinated frequencies are for a downlink on 145.980MHz and an uplink/downlink on 437.525MHz. OSSI-1 is planned to launch on 19 April into a 575km 64.9° inclination orbit.

.

A new 6m beacon should now be on the air from near to the South Pole. Craig Hayhow, VK0JJJ from Mawson Base in Antarctica is reported to have brought with him a beacon transmitter with the callsign VK0RTM that is now operational on 50.300MHz. The VK0RTM transmitter runs 50 watts. The beacon will not be the only 6m meter coming to the air. While at Mawson Station for about 12 months, Hayhow plans to be active on all bands from 6m to 80m with priority given to 6m band operation.

The Sri Lanka 4S7DXG and Maldives 8Q7VR operations in 2008 and 2011 have been approved for DXCC credit. If you had a request rejected for contacts with these dates only, send an e-mail to dxccrules@arrl.org to be put on the list for an update. Contacts before or after these periods cannot be accepted.

The Over The Horizon Radar from Iran is daily transmitting on our 10m band, often long lasting on 28.245MHz. You can hear a high and a low tone, corresponding to the sweep rates of 870 and 307 sweeps per sec. The system is about 60kHz wide, the splatters are covering +-250kHz. The Austrian, Dutch, Swiss and German PTTs have been informed.

And now for the details of rallies and events for the coming week

It's a busy time for rallies today with four events spread over the whole country.

Today, Sunday 3 March, sees the BRATS Rainham Radio Rally take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Doors open at 10am. More from Trevor, G6YLW on 07717 678 795.

The Cambridge & District Amateur Radio Club Rally is also on today, 3 March, from the Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester, Cambs PE29 2NH. Doors open at 10am and the entry is ?3. There will be trade stands and a Bring & Buy as well as special interest groups and a licensed bar. Details from David, M0ZEB on 01353 778 093.

In Devon, the Exeter Radio & Electronics Rally will be held today, 3 March, at the America Hall, De La Rue Way, Pinhoe Exeter EX4 8PW. Doors open at 10.30 and the admission is ?2. There will be trade stands and a Bring & Buy. Information from Pete, G3ZVI on 07714 198 374.

The Spring Militaria & Electronics & Radio Amateur Hangar Sale is the final rally taking place today, 3 March, at Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and there will be civil, military & vintage radio equipment, vehicle spares & more on display. Details from Rod Siebert on 01270 623 353.

On 5 March, the Friskney & East Lincolnshire Communications Club Desktop Sale takes place at Friskney Village Hall, Church Road, Friskney, Lincolnshire PE22 8RD. Doors open 6pm for traders and 7pm for the public. Tables are ?3.50 and entry is ?1.50 with free tea and coffee. More information from Ian Donnelly, 2E0XOD on 07554 362 020.

Wythall RC Radio and Computer Rally will be held on 10 March at the Woodrush Sports Centre, Shawhurst Lane, Hollywood, nr Birmingham B47 5JW. The venue is on the A435, 2 miles from J3 M42. Talk in will be on S22. Doors open at 10am and admission is ?2.50. there will be trade stands and a Bring & Buy. More details from Chris, G0EYO on 07710 412 819.

Now for the news of special events

.

And now the DX news compiled from 425 DX News and other sources

KK4GV will be active as J79GV from the northeast side of the island of Dominica between 8 and 17 March. His operation will be holiday style and SSB only. QSL via his home callsign either direct or by the Bureau.

W0FK will be active from Longboat Key until 16 March. QSL via his home callsign, direct or by the Bureau.

EI7CC will be operational from Lesotho as 7P8PB from 6 to 26 March. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL via EI7CC either direct or via the bureau. Logs will be uploaded to Logbook of the World immediately upon his return to Ireland.

A group of three Japanese operators will be QRV from the island of Rodrigues until 10 March. Their callsign will be 3B9DX and they will be active on all bands from 10 to 80m using SSB, CW, RTTY and PSK31. QSLs go via EA5GL.

H44 Solomons and H40 Temotu are the destinations for a group of nine German and Polish operators. H44G will be activated from 8 to 25 March while part of the group will operate as H40T from 12 to 23 March. They will have several stations on the 10m to 160m bands using CW and SSB. There will also be a station dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF.

9M4SLL will again be active from Layang-Layang, Spratly Islands, which is IOTA AS-051, on all bands from 10 through to 160m using CW, SSB and RTTY from 10 to 18 March inclusive. The operators include John, 9M6XRO, Steve, 9M6DXX and Don, G3BJ. The group will use several stations with linear amplifiers to vertical antennas all within a few metres of the ocean. QSL Manager for this operation is Tim, M0URX either via OQRS, direct, bureau or Logbook of The World. Logs will be uploaded to LoTW as quickly as possible after the DXpedition.

Now the contest news

The SSB leg of the ARRL International Contest ends after 48 hours at 2359UTC today, 3 March, on the 1.8 to 28MHz bands, the exchange is signal report and transmitted power. W stations will send their State and VE station their Province too.

Also today, 3 March, the first of five UK Microwave Group Low Band series of contests takes place. The bands for this one are 23cm, 13cm and 9cm. Running from 1000 to 1600UTC, the exchange is signal report, serial number and locator.

The data leg of the 80m Club Championships takes place on between 2000 and 2130UTC on 4 March. The exchange is signal report and serial number.

On 5 March it's the 144MHz UK Activity Contest. Taking place from 2000 to 2230UTC and using all modes, the exchange is signal report, serial number and locator.

The Commonwealth Contest is a worldwide 24-hour CW event that's largely free of Continental European activity, because the only contacts that count are between Commonwealth countries. Every year some quite rare entities are activated by DXpeditioners and this year will be no different. A list of Commonwealth Call Areas can be found at www.rsgbcc.org/hf/information/codes.shtml. Running from 1000 on 9 March to 1000UTC on 10 March, the event uses all bands from 3.5 to 28MHz and the exchange is signal report and serial number. HQ stations also send HQ.

The 2nd 70MHz Cumulative contest takes place on 10 March from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 22nd to Thursday the 28th of February, compiled by Neil Clarke, G0CAS on Friday the 1st of March.

At first solar activity was at low levels with five small C class solar flares taking place on the first three days. Solar activity then declined to very low levels. Normally, B class solar flares do not get a mention in this report but, on the 25th, a long duration B class flare took place and lasted for approximately nine hours. This took place from a large sunspot group that rotated out of view two days before. This flare would have been much stronger if it was on the Earth facing side of the Sun and the associated coronal mass ejection would have headed

our way. Solar flux levels declined from 107 units on the 22nd to 95 by the 24th and the 25th. Levels increased slightly by the end of the period and the average was 101 units. The 90 day solar flux average on the 28th was 114 units, that's one unit down on last week. X-ray flux levels varied little day to day and averaged B2.5 units. Geomagnetic activity was quiet everyday. The most disturbed day was the 22nd with an Ap index of 8 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw slow solar wind speeds at first but towards the end of the period increased to around 400 kilometres per second. Particle densities were low at first but on the 25th increased to 46 particles per cubic centimetre and 25 on the 27th and 90 on the 28th. Bz varied between minus 3 and plus 2 nanoTeslas on the quietest day and between minus 8 and plus 7 nanoTeslas on the most disturbed day.

And finally the solar forecast for the coming week. There are a number of sunspot regions that will rotate into view during the coming week. Solar activity is expected to be mostly low, however, there is the possibility that activity could increase occasionally. Solar flux levels should be slightly around the 100 mark or maybe higher if any of the sunspots groups are large. No coronal hole activity is expected this week so geomagnetic activity is expected to be quiet everyday. As always, around sunspot maximum, a coronal mass ejection could head our way and increase activity due to a number of reasons. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. The best time to try the path will be between 1000 and 1300 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

Today, 3 March, Wythall Radio Club is holding a club net on 1450225MHz at 8pm. Monday is session 6 of the Intermediate course and the data leg of the 80m Club Championships and Tuesday sees a Morse class and final preparations for the Wythall Rally take place as well as participation in the 144MHz UK Activity Contest. On Friday there is a shack social night. Next weekend sees rally set up on Saturday from 2pm and Sunday it's an early start for those on rally detail as activity starts at 6am. Details from Chris, G0EYO, on 07710 412 819.

On Monday 4 March Friskney and East Lincolnshire Communications Club will hold a VHF SSB club net on 144.165MHz USB using vertical polarisation. Tuesday is the club's desktop sale at 7.30pm and Wednesday there's an M3 and M6 club net on the GB3FR repeater. Finally, for this week, on Friday the club has a VHF net on 145.450MHz. For more details, contact the FELCC Information Line on 07554 362 020.

On Monday 4 March South Birmingham Radio Society has a Wythall Rally planning meeting, then on Wednesday there's a talk at 8pm. On Thursday there are training classes with Dave, G8OWL and Shack and aerial work on Friday the 8th. On Saturday the club is loading the trailer for the Wythall rally and on Sunday the club has a stand at the rally. More information from Mick Cleary, G7RRP on 07595 696 359.

On Monday 4 March Sutton Coldfield Amateur Radio Society has a 2m net on 145.250MHz from 7 30pm, all are welcome. Then on Sunday 10th members will be visiting Wythall rally. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 5 March South Notts Amateur Radio Club has members taking part in the 2m Contest from home then, on Wednesday, there is a talk on the spectrum analyser with M0RIA. More details from Terry, M0RIA on 01159 372 942

On Wednesday 6 March Lincoln Short-Wave Club will put G5FZ on the Air in Shack with a natter night at the club, then on Thursday there's a repeater net on 145.725MHz at 8pm. Saturday sees a surgery and mentoring session from 9am as well as the Foundation training at 12 noon, the exam will be held on Sunday 10th. For more information contact Pam Rose, G4STO on 01427 788 356.

On Wednesday 6 March Midland Amateur Radio Society plans an open meeting with the shack on the air and training classes. On Sunday 10th, the club is attending the Wythall rally. Details from Norman, G8BHE on 07808 078 003.

On Monday Aldridge & Barr Beacon Amateur Radio Club is looking at antennas for VHF UHF. Contact Albert, G0KFS, on 01922 614 169 for further details.

On Monday Gloucester Amateur Radio & Electronics Society has a safety talk on Sticking Plaster to CPR. Contact Anne, 2E1GKY on 01242 699595 daytime, for more information.

On Tuesday Derby & District Amateur Radio Society is holding a Junk Sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Dudley and District Amateur Radio Society has a 2m contest night. Further details from Miles Hall G4GSB, by e-mail to g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club Annual is holding the club dinner. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 6 March Telford & District Amateur Radio Society is holding a committee and Hamfest meeting, the club station will also e on the air. Contact Mike, G3JKX, on 01952 299 677.

On Friday 8 March Coventry Amateur Radio Society is having a Project 2013 construction night. Contact John, G8SEQ, on 07958 777 363 for more infromation.

On Friday 8 March Hucknall Rolls Royce Amateur Radio Club is holding the usual club meeting starting at 8:30pm and this will be followed by a quiz set by Pete. M0ZCW. Further details from Dave Wilde, G1YAI, by e-mail to treasurer@hrrarc.com.

On Saturday 9 March Rugby ATS members will be watching a DVD and taking part in a technical discussion. More information from Steve, G8LYB on 01788 578940

NEWS FOR THE NORTH OF ENGLAND

On Monday 4 March Angel of the North Amateur Radio Club is holding its AGM. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a social night and taking part in the 80m Club Contest as G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group Club is holding an on the air night. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is having a talk by the construction competition entrants. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Stockport Radio Society is holding a Foundation/new licensee evening. Details from Nigel Roscoe on 07973 312 699.

On Wednesday members of Bishop Auckland Radio Amateurs Club will be putting G100RSGB on the air from 9am to 10pm from Stanley (Crook) Village hall, Crook, County Durham DL15 9SN. Operations will include at least 80m, 40m, 20m and 2m using SSB, FM, PSK31 and CW. Visitors are welcome to pop in at any time during the day. For more information contact Bob Dingle, G0OCB on 07710 023 916

On Wednesday Denby Dale Radio Club will hold the annual surplus auction sale with refreshments and a licensed bar. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday Mid-Cheshire Amateur Radio Society is having a calibration evening with Foundation & Intermediate course training taking place too.

Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday South Lancashire Amateur Radio Club has Chris Forber,M0ZLK giving a talk about DX and Competition. Further details from Allan Green, 2E0RAG on 07533970841

On Thursday South Manchester Radio and Computer Club is holding Ron's CW Clinic. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is having a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday Tynemouth Amateur Radio Club is having a talk on Low band DX from your garden. More information from Bob, M0KLO by e-mail to mail@g0nwm.com.

NORTHERN IRELAND

On Tuesday 5 March Mid Ulster Amateur Radio Club is having a shack night and there will be on-going Intermediate training. Sunday 10th sees a meeting reviewing the club's involvement in the recent BBC high altitude balloon launch by Graeme 2i0WGM. Details from Brian Burns, MI0TGO by e-mail to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday 5 March Dundee Amateur Radio Club is having a club night. Information from Paul, GM0BKC on 07846 412 862.

On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is holding a pre-IOTA planning evening. Details from Tom Ferguson, GM1OST on 01292 532 088.

On Thursday Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday Moray Firth Amateur Radio Society has a general meeting to appoint a new Honorary Secretary and to discuss plans for the continued development of the Club. More information from Barry Horning, GM4TOE on 01807 580376

NEWS FOR THE SOUTH EAST and EAST ANGLIA

Today, 3 March, East Kent Radio Society will be attending the Rainham Rally. On Monday there is a talk on the wildlife of Madagascar by Ann Thomas. Details from Karl Davies, M1DFM, on 01227 710 120.

Today, 3 March, Worthing & District Amateur Radio Club is holding the monthly breakfast meeting at the Goring Caf&#65533; starting at 9am. On Wednesday there is a surplus equipment sale. Contact John, G8FMJ, on 01273 593 232.

On Monday 4 March Farnborough & District Radio Society has an 80m slow Morse net at 1pm on 3.57MHz and a top Band net on 1.995MHz at 8pm. On Wednesday there's more slow Morse on 1.995MHz at 8pm and a 2m net on 144.675MHz on Friday at 8pm. All are welcome to join in. Details from Neville, G4SPD on 01252 404816.

On Monday Norfolk Amateur Radio Club RSGB is also taking part in the 80m club championship. The, on Wednesday, Dave Lawley G3BUO is giving a talk on the Olympic Radio Station 2O12L. Details from Chris Danby, G0DWV, on 01603 898 678.

Today, 3 March, Bredhurst Receiving and Transmitting Society is attending the Rainham Rally, doors open 10am. Details from Charles G4VSZ on 07982 244 788.

On Sunday 3 March Thames Amateur Radio Group has a club net starting at 8pm on GB3DA. More information from Pete Sipple, M0PSX on 07940 579 116

On Monday Braintree & District Amateur Radio Society is holding a Morse evening with keys, programs and getting on the air. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is holding its AGM. Contact Dave, G4XDU, on 01628 625 720.

On Monday Felixstowe & District Amateur Radio Society is having a talk entitled Flash, Bang, Wallop by Colin, M5AEH. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships data leg. Contact Rob, G4LMW, on 01635 862 737.

On Monday Southdown Amateur Radio Society is having a talk by Alistair G4RUL on antenna construction. Details from John, G3DQY, on 01424 424 319.

On Monday Surrey Radio Contact Club is holding a surplus sale. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is in the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Stevenage & District Amateur Radio Society has a construction competition. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Banbury Amateur Radio Society is holding its AGM starting at 7.30pm. More details from John, G8OZH, on 07774 525818.

On Wednesday Chesham & District Amateur Radio Society has a general meeting and a night on the air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Dover Radio Club is having a talk on antenna analysers by Ian G3ROO and Pete M0PKH. More information from Pete, M0PKH by e-mail to peter.halloway@sky.com

On Wednesday Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Thursday Cray Valley Radio Society is holding a construction contest, presided over by Chris G0FDZ. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Horsham Amateur Radio Club is holding a junk sale. Details from Alister, G3ZBU on 01932 242243.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the Shack. More information from Tim Ward, 2E0TJW on 07810 481182.

On Thursday Shefford & District Amateur Radio Society is holding its AGM. Contact John Burnett, 2E0OAK on 07860 804 793.

On Friday Cambridge & District Amateur Radio Club has a new club equipment demonstration. Details from David, M0ZEB on 01353 778093

On Friday Chelmsford Amateur Radio Society has an evening of professional aerials for radio amateurs. Contact Martyn, G1EFL, on 01245 469 008.

On Friday Itchen Valley Amateur Radio Club is holding its AGM. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is having an HF evening in the club shack. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Friday Wimbledon & District Amateur Radio Society is examining Members' Reflections on 50 years of our Radio Society. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Sunday Bromley & District Amateur Radio Society is running a Foundation course. Details from Andy, G4WGZ, on 01689 878 089.

NEWS FOR THE SOUTH WEST

On Monday 4 March Exeter Amateur Radio Society has a Monday HF net on 3.675MHz at 7.45pm. On Tuesday the net is on 145.575MHz at 7.45pm, then on Thursday it's a 4m net on 70.425MHz starting at 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday Riviera Amateur Radio Club has a club meeting and MX0RIV will be on the air. There is a club 2m net on 145.425MHz at 8pm on Friday. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday Cornish Radio Amateur Club is holding a committee meeting with the main club meeting on Thursday. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club has a rally planning meeting with a club net on 2m starting at 8pm on Friday. Contact Tony, G0WMB, on 01454 417 048.

On Thursday Saltash & District Amateur Radio Club has a talk on the Carradon Hill Repeaters. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club has a talk on the DX Challenge by Tom M3TWJ. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club has an evening of Members' Mini Talks. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Torbay Amateur Radio Society is having a natter night with a TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

Today, 3 March, Pencoed Amateur Radio Club are holding a table top sale at 9.30 in the Pencoed Rugby Club, Felindre Road CF33 5PB. All inquiries to Gerry Day on 01656 860761.

On Monday 4 March Dragon Amateur Radio Club is holding a club matters evening. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Monday Llanelli Amateur Radio Society has an on the air night with GB4SDD, along with a junk sale and club raffle Details from Craig, MW0MXT on 01269 845773.

On Tuesday Carmarthen Amateur Radio Society is setting up the shack. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is holding the AGM. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
25 February - 03 March 2013

Solar activity was very low for most of the week, with only B-class
flares observed. The majority of the B-class activity was split
between Regions 1682 (S18, L=299, class/area=Dai/240 on 01 Mar) and
1683 (S16, L=202, class/area=Eai/210 on 02 Mar) both of which
developed beta-gamma magnetic characteristics during the week.
Activity increased to low levels on 02 Mar, when Region 1687 (N06,
L=166, class/area=Cro/30 on 03 Mar) produced a C1 flare at 1511 UTC
and again at 1847 UTC. All three of the regions mentioned remain on
the visible disk at the time of this report.

A greater than 10 MeV proton enhancement was observed from a long
duration B9 flare which occurred on 25 Feb at 1151 UTC and was
attributed to old Region 1678 (N11, L=069) which had rotated around
the West Limb two days earlier. The proton flux enhancement began on
27 Feb, reached a peak of 0.995 pfu at 28/0440 UTC, and returned to
background levels early on 01 Mar.

The greater than 2 MeV electron flux at geosynchronous orbit was at
low to moderate levels until 02 Mar when it rose to 3800 pfu in
response to the arrival of a significant coronal hole high speed
stream. Flux remained at high levels through the end of the period.

Geomagnetic field activity was quiet for most of the week. However,
on 28 Feb around 15-17 UTC, a corotating interaction region (CIR)
and subsequent high speed solar wind stream (HSS) became
geoeffective. Solar wind speed which had been in the mid 300 km/s
range began rising and eventually peaked at 675 km/s early on 02
Mar. Bt rose to 18 nT by 01/0817 UTC while Bz ranged from +14 to -16
nT. The Phi angle shifted from a positive (away) orientation to a
negative (towards) orientation. The magnetosphere responded with
unsettled levels late on 28 Feb. Geomagnetic activity quickly
climbed to active levels for most of 01 Mar, punctuated by one
```

period of minor storm levels during the 09-12 UTC synoptic period. This response was no doubt exacerbated by the favorable orientation described by the Russel-McPherron effect. Solar wind speed declined abruptly between 02/11-15 UTC, dropping from about 590 to around 480 km/s, then began a slow decline back to around 400 km/s by the end of the week. After an active first period on 02 Mar, the remainder of the week saw quiet to unsettled activity levels.

Forecast of Solar and Geomagnetic Activity
04 March - 30 March 2013

Solar activity is expected to be very low to low with a slight chance for an isolated M-class event. The threat of an M-class flare is most probable between 11 and 23 Mar with the return of old Region 1675.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to begin the period at high levels in response to the continued presence of a recurrent coronal hole high speed stream but decline to normal to moderate levels after 06 Mar. High levels are possible again in the last day of the forecast period with the return of a recurrent coronal hole high speed stream.

Geomagnetic field activity is expected to be predominantly quiet to unsettled. Active periods are possible on 28 March with the return of a recurrent coronal hole high speed stream.

Solar Cycle Update: Twin Peaks?

Posted: 02 Mar 2013 04:08 PM PST
http://www.eham.net/articles/29819

March 1, 2013: Something unexpected is happening on the sun. 2013 is supposed to be the year of Solar Max, the peak of the 11-year sunspot cycle. Yet 2013 has arrived and solar activity is relatively low. Sunspot numbers are well below their values in 2011, and strong solar flares have been infrequent for many months. The quiet has led some observers to wonder if forecasters missed the mark. Solar physicist Dean Pesnell of the Goddard Space Flight Center has a different explanation: "This is solar maximum," he suggests. "But it looks different from what we expected because it is double peaked." Conventional wisdom holds that solar activity swings back and forth like a simple pendulum. At one end of the cycle, there is a quiet time with few sunspots and flares. At the other end, Solar Max brings high sunspot numbers and solar storms. It's a regular rhythm that repeats every 11 years. Reality, however, is more complicated. Astronomers have been counting sunspots for centuries, and they have seen that the solar cycle is not perfectly regular. For one thing, the back-and-forth swing in sunspot counts can take anywhere from 10 to 13 years to complete; also, the amplitude of the cycle varies. Some solar maxima are very weak, others very strong. Pesnell notes yet another complication: "The last two solar maxima, around 1989 and 2001, had not one but two peaks." Solar activity went up, dipped, then resumed, performing a mini-cycle that lasted about two years. The same thing could be happening now. Sunspot counts jumped in 2011, dipped in 2012, and Pesnell expects them to rebound again in 2013: "I am comfortable in saying that another peak will happen in 2013 and possibly last into 2014," he predicts. Another curiosity of the solar

cycle is that the sun's hemispheres do not always peak at the same time. In the current cycle, the south has been lagging behind the north. The second peak, if it occurs, will likely feature the southern hemisphere playing catch-up, with a surge in activity south of the sun's equator.

12m 24895 24965 24925 12m 24890 24940 24920
10m 28015 28450 28090 10m 28005 28400 28080
6m 50103 6m 50103
QSLs via DL7DF. http://www.dl7df.com/h4/index.php

I, Italy:
The ARI club Livorno will activate the special callsign II5IDK
(ARMI #969) until March 17 in all modes. QSLs are sent automatically.
http://arilivorno.jimdo.com/

JA, Japan:
8N1MOMO is a special callsign for the 37. Momo-(Peach Blossom)
Festival and the 20th Fire Baloon Contest from Koga (JCC 1404)
in the Ibaraki prefecture on Honshu (AS-007, WLOTA
2376) until April 5th. QSL via bureau.

Until May 31st, the special station 8J4G can be heard on the
bands on the occasion of the 64th National Tree Planting Ceremony
in Tottori prefecture (Chugoku region) on Honshu (AS-007, WLOTA
2376). QSL via bureau.

On the occasion of the 62nd "Tonegawa River System Association
Flood Drill", the special station 8J1W will show up on the bands
from March 10 to May 18. QSL via bureau.

LZ, Bulgaria:
The "Balkan Sports Club" (LZ1KZA) celebrates the 135th anniversary
of the liberation of Bulgaria from turkish yoke by Russia and
re-establishment of Bulgaria with the special event callsign
LZ135LO from Karlovo. Activities will take place on HF until the
end of March. SL via LZ1KZA.

S2, Bangladesh:
Vadym, UT6UD, is QRV until March 7 as S21XV from Dhaka
on the HF bands with a focus to NA QSOs. QSL via UT6UD.

VE, Canada:
Dave, VE3AAQ will use the club station VO2WL in Labrador City
(WW Loc. FO62nw) signing VO2AAA on all bands in CW and SSB from
March 7 - 10. A participation in the RSGB Commonwealth Contest
(BERU) is planned. QSL via VE3AAQ, preferred direct.

Ron, VA3RVK will use the special callsign CF3A from Toronto from
March 9 through April 7 to celebrate the 250th jubilee of the
postal services in Canada. QSL via homecall.

Peter, VE3JPP will use VX3Z on the same occasion until March 28.
QSL via Homecall.

VK0, Antarctica:
Craig is on the air as VK0JJJ from the "Australian Antarctic
Division" (AAD) station Mawson and recently put a 6m beacon
into operation, using the call VK0RTM on 50.300 MHz.
http://www.southgatearc.org/news/february2013/vk0rtm_6m_beacon_on_air.htm

W, USA:
Gene, K9UTQ plans to be QRV from the "USS Wisconsin Battleship BB-64"
during the Wisconsin QSO Party (March 9th) using the club call
of the "USS Wisconsin Radio Club", N4WIS. QSL only direct (QRZ.com).

====

Island Activities

AF-014; CT3; Madeira Archipelago: Rosel/DL3KWR and Hardy/DL3KWF will
once again be active from Madeira (DIP MA-001, PIP MD-001, WLOTA 0053).
From March 7 to April 3 they will be QRV as CT9/homecall in
CW and the digital modes, with a focus on the WARC bands. QSL
via homecall, eQSL; bureau QSLs can be requested at callsign@darc.de

AS-013; 8Q; Maldives: Wolfgang, OE1MWW, will work as 8Q7WK in holiday
style from March 9 to 23. QSL via Homecall.

NA-002; VP5; Caicos Islands: Urb/W1UL and his wife Patricia/W2PKV
will sign VP5/W1UL and VP5/W2PKV respectively, March 7 - 13, from
Providenciales Island (WLOTA 2003). Urb will work CW while
Patricia will work SSB on the HF bands and 6m. QSL for both
calls via W1UL (d/B).

NA-079; W4; Florida State (Dry Tortugas Islands) group: Pete/VE3IKV
plans another activity from W4. If the weather permits, he will
show up on the bands as VE3IKV/W4 on March 11 - 14 from Dry
Tortugas Islands. Pete works in CW on 30, 17 and 6m.
QSL via VE3IKV (d/B).

NA-101; J7; Dominica: From March 8 to 17, Rick/KK4GV will spend his
holidays on Dominica and plans to be QRV as J79GV in holiday
style on the HF bands. QSL via LoTW and KK4GV (d/B).

NA-105; FS/PJ7; Sint Maarten: Andy/DK5ON is on Saint Martin (DIFO FS-001,
WLOTA 0383) from March 10th to 29th and plans to get on the air as
FS/DK5ON on 80 - 6m. He'll also pay a visit to the other side of
the island and sign PJ7/DK5ON from there. QSL via DK5ON (d/B).

OC-015; T2; Tuvalu Island: Members of the GMDX group, Gavin/GM0GAV,
Clive/GM3POI, Robert/GM3YTS and Tom/GM4FDM, plan to be QRV as
T2GM from Tuvalu (WW Loc. RI91ol) from March 12 to 23. They will
operate with two stations on the HF bands. Bureau QSLs can be
requested by email (tgwylie[at]virginmedia.com), OQRS via
Clublog. http://t2gm.org

OC-086; KH0; Northern Mariana Is. (incl. Rota, Saipan, Tinian,
etc.): Sam, JE1XUZ (KH0XH), and Tama, JQ2WTT (KH0XW), will,
from March 10 to April 3 be QRV from Saipan (USi NI002S, WLOTA
1333). From the location of the "Saipan BBQ Contest Club"
they will take part in the CQ WPX SSB Contest (March 30/31)
as AH0BT (QSL via 7L1FPU). QSL via homecalls.

OC-161; YB6; Nias and Batu Islands: From March 8 to 13, Imam/YB4IR
will be QRV from Nias Islands as YB6N. QSL via YB4IR (d).
http://www.yb4ir.blogspot.de/

OC-245; YB5-6; Sumatras Coastal Islands North: Adhi/YB3MM organizes
an adventure trip to Rondo Island (WW Loc. NJ76nb). Activities
are planned from March 9 to 17, using the special callsign YE6A.
It also counts for the Pulau Rondo Lighthouse (ARLHS IDO-369,

WLOTA 0501, Admiralty F1300). QSL via IZ8CCW (d/B).
http://www.mdxc.org/oc-245/

SA-099; PJ2, Curacao: Mike W1USN (RNARS #3889), Bob AA1M, and Scott,
W1SSR, will sign PJ2/homecall from March 8 - 22 from Curacao
(SA-099, WLOTA 0942) on 160 - 10m in SSB, CW, PSK and RTTY.
They plan to upload their logs daily to LotW.
QSLs via Homecall.

Any "Pacific Northwests" here on the Zed going to be in Puyallup on
Saturday?

Posted: 04 Mar 2013 04:57 PM PST
http://forums.qrz.com/showthread.php?382280-Any-quot-Pacific-Northwests-quot-here-on-the-Z

ed-going-to-be-in-Puyallup-on-Saturday&goto=newpost

I'll be there! Along with my friend Russ (WA6TLK)... prowling for old bits and pieces

for homebrew projects (probably my favorite aspect of ham radio these days - making things!)

Anyone here going to be there?

I'll be on my FT-250R on 52 simplex (along with half the attendees I'm sure!)

Give me a shout - would love to meet up with fellow Zedders!!

:)

Dave

Last Man Standing to Feature Amateur Radio Storyline

Posted: 05 Mar 2013 10:26 AM PST
http://forums.qrz.com/showthread.php?382361-Last-Man-Standing-to-Feature-Amateur-Radio-Storyline&goto=newpost

Ham Radio in Hollywood: Last Man Standing to Feature Amateur Radio Storyline

In an episode tentatively scheduled to air Friday, March 15, the hit ABC comedy Last Man Standing -- starring Tim Allen as Mike Baxter, KA0XTT -- will feature a secondary ham radio storyline. This is the first time that the show will highlight Amateur Radio in its plot, showing various cast members on the air and communicating via ham radio.

In Episode 217 -- called ☐The Fight☐ -- Mike☐s daughter Mandy (played by Molly Ephraim), gets her cell phone taken away as punishment. She discovers Mike☐s home shack in the basement and uses ham radio to make faraway friends. According to Last Man Standing Producer John Amodeo, NN6JA, the home shack is a brand new set built just for this episode. The ARRL provided many of the awards and certificates -- including 5 Band DXCC, 5 Band Worked All States, 5 Band Worked All Continents, VUCC (for 50 MHz), the Diamond DXCC Challenge and the Morse Code Proficiency Certificate -- seen on Mike Baxter☐s home shack wall.

Two other regular cast members -- Mike☐s boss Ed Alzate (played by Hector Elizondo) and Mike☐s co-worker Kyle Anderson (played by Christoph Sanders) -- will also have Amateur Radio call signs and be shown on the radio.

☐As a ham, I am very excited to be able to have an episode that presents our hobby in an upbeat and positive way,☐ Amodeo told the ARRL. ☐As a television producer, I am pleased to present a very funny episode for our more than 7 million viewers. This episode will feature more ham gear than seen in mainstream movies such as Frequency, Contact and Super 8 -- all great films that had Amateur Radio in them. It☐s worth noting that although hams will enjoy the episode, it was written with our 7 million non-ham viewers in mind. Please be prepared for some inconsistencies related to Amateur Radio, but enjoy the show nevertheless.☐

Last Man Standing is produced by 20th Century Fox for the ABC Television Network and airs on Friday nights at 8 PM Eastern and Pacific and 7 PM Central.

VK3DOG/P VK3FT/P VK3TZ/P Activation of Phillip Island OC-136

Posted: 06 Mar 2013 03:12 AM PST
http://forums.qrz.com/showthread.php?382454-VK3DOG-P--VK3FT-P--VK3TZ-P--Activation-of-Phil
lip-Island-OC-136&goto=newpost

Graham ☐ VK3DOG, Keith ☐ VK3FT and Tony ☐ VK3TZ are planning a radio
weekend away to Phillip Is, IOTA OC-136 on the weekend of 15-18 March,
2013. They have identified a farmlet which should provide a nice low noise
environment and a good take-off over salt water in nearly all directions.

They will be active on all bands from 160m -10m, both ssb & cw. Simple
rotatable dipoles on the high bands and full size verticals on 40m and 80m.
On 160m they should have a vertical array (22m tall) with some parasitic
elements, beverages and loops for receive.

They will probably be operating with only a single TX at a time but should
be active approximately 20 hours a day, with resting ops spending their off
time surfing, relaxing or sampling some beers or rum. :).

Callsigns will be homecall /P. They are looking especially for EU contacts
on top band at their sunrise and also keen to work Stateside on 75m phone,
and ZS on 10m if band conditions permit.

[tnx VK3TZ]

MMMonVHF Newsletter No. 1/ WEEK 10 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-03-06
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo
from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol
on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters
Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating
EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be

ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

UPDATE from Rene, Eeltje and Johan.
Good news! We have our single entry visa for Ghana! It took a whole day travelling to the Ghanese embassy and waiting, getting interviewed, filling in the right answers (in capitals)
and showing the proof of our returnticket and yellow fever vaccination, but eventually we got
a sticker in our passports. All on schedule now! This was not cheap. The three of us in total ?360 (450$).
Such a waste.... But with help of our sponsors the damage is less painful though donations still are more than welcome!

Thank for your votes for the best EME VHF DXpedition 2012. The two men DXpedition operated by
PA3CEE Eltje and Ren? PE1L to Uganda (5X1EME) won. We're proud that all our African DXpeditions
since 2009 got the first place. It's clear that we do our best, never resting and persisting in
getting all of you in the log and we want to promise you that our policy hasn't changed for 9G5EME.
You know us by know. We won't give up! Thanks for your trust gents! We're proud!

For 144 MHz we do use the same setup as we used in Gambia and Uganda, 2 x 8 Xpol a WA2ODO preamp and modest power.
If all ok we will have a small 70cm AND 23 cm setup with us.

Our schedule:
144 MHz start april 12th till april 14th (condx are not that great but OK for the bigger stations)
1296 MHz april 19th

144 Mhz april 20th (ARI contest)
432 MHz april 21th
144 MHz april 22nd till april 27th (22-24 good condx for smaller stations)

Power shutdowns are common in Africa so schedule can change and don't wait to make a contact with us till the last day.
Visit our website www.emelogger.com/ghana/

Johan, Eltje and Rene

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: 5H ; Tansania ; Square: KI94 ; start 2013-04-20

Activity from 5H on HF and EME
>From april 20 to april 28 Bode DF8DX is QRV as 5H1DX on HF and EME.
Main activity is in CW on HF band from 10m to 160m. I will do some EME on 70cm and 23cm with single yagi and 100W.

For EME is JT65 preferred but CW is welcome if your signal is strong enough and you can copy me.

SOURCE: tnx to Bodo, DF8DX, direct to MMMonVHF

** DXCC: MJ ; Jersey Isl. ; Square: IN89 ; start 2013-05-24

Several Belgian hams will be qrv from Jersey, IN89ve, between the 24 till 30 may 2013 , the aim is to be qrv on 2M, 6M, from 10m to 160 m , SSB and CW, PSK with an emphasis on the higher bands ,
conditions permitting.

SOURCE: tnx to ON4CKM direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on 50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH

We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the
manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

SOURCE: tnx to Bernd, DF2ZC, direct to MMMonVHF

Radio Amateurs Asked to Collect STRaND-1 Telemetry Data:

Posted: 05 Mar 2013 04:02 PM PST
http://www.eham.net/articles/29824

The STRaND-1 team have asked if radio amateurs can assist in collecting telemetry from around the world to help them determine the health and attitude of the spacecraft.
The telemetry downlink is amateur radio AX.25 packet radio on 437.568 MHz using 9600 bps FSK modulated data with HDLC frame, NRZI encoding.

//
Solar Flares: Solar Maximum Expected To Occur In May:

Posted: 04 Mar 2013 04:09 PM PST
http://www.eham.net/articles/29823

Solar flares have been predicted to be stronger in 2013 due to the Sun reaching the peak of its 11-year cycle. A scientific panel recently noted that the Sun is currently experiencing its "deepest minimum" in almost 100 years. The researchers also indicated that the next solar maximum may occur in May. If expectations are accurate, solar flares which are weak now, could intensify as we head closer toward the summer months. So far in 2013, solar activity has remained relatively low, PHYS.org News reports. Sunspots have also been below average values since 2011. The lack of solar flare activity has reportedly prompted some solar storm observers to ponder about the accuracy of scientific forecasts.

RAC Bulletin 2013-009E - RAC Field Organization, Industry Canada meet
in Ottawa*
2013-03-06

Recently, a meeting was held at Industry Canada's Ottawa headquarters,
a follow up to last year's Canadian Amateur Radio Advisory Board
(CARAB) where an offer to meet on operational issues was made.

During the meeting RAC shared documents relating to the Field
Organization Review Project that explained the operational structure
and purpose of the project and spoke about our Training working
group's work. Industry Canada presented an outline of their District
Emergency Telecommunications (DET) emergency telecom organization and
their roles and responsibilities. They also explained their
initiatives relating to use of their HF radio system, voice and
digital for exercises, regular drills and emergencies, expressing an
interest in building on their interactions in this area with RAC members.

Both parties agreed at the end of the meeting that regular informal
exchanges could be of value.

WIANEWS WEEK COMMENCING MARCH 10 2013.

THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA IS FOR WEEK COMMENCING MAR 10 2013.

The year 2013 is Canberra's centenary year and the month of March
marks 100 years since Lady Denman, wife of the then Governor General
Lord Denman, named the federal capital "Canberra" at Capital Hill,
now the site of Parliament House.

The Canberra Region Amateur Radio Club has been granted a special
event callsign vi100ACT (V I one hundred A C T) in recognition of this
event.

Look out for "VI 100 ACT" on the bands during March and possibly
the rest of the year 2013.

VK2 school gets ARISS contact this week

The Illawarra Amateur Radio Society, in conjunction with ARISS - Amateur
Radio on the International Space Station - is organising for students at
Mt Ousley Public School in Wollongong NSW, to talk to astronaut Kevin Ford
KF 5 GPP while he is on board the International Space Station.

The International Space Station is in orbit above Earth at a height of over 380 kilometres and is travelling at a speed of 27,000 kilometres per hour. The Amateur Radio connection to the Space Station will be provided by Claudio IK 1 SLD located in Italy and then connected to the Mt Ousley Primary School via the worldwide NASA conferencing system.

Students from Kindergarten to Year 6 have had to vote for two questions from each Year to be read aloud to Astronaut Kevin Ford, with the student who thought-up the question having the honour of talking to the astronaut while in outer space.

The event is planned for Tuesday the 12th of March at 6:35pm local time or 07:35 UTC.

For listeners in the Wollongong and Sydney area, the historic event will be relayed onto the VK 2 RMP repeater on 6850 at Maddens Plains. For interstate or overseas listeners, the event will be relayed onto IRLP Node 9010 and on Echolink via the AMSAT Conference Bridge.

Why not have a listen and hear what sort of challenging questions our younger generation might ask an astronaut and be aware that their questions are far more interesting than the usual "how do you go to the toilet while in space?".

(Rob VK2MT President - Illawarra Amateur Radio Society)

Mobile phone jammer at Lithgow Jail

In a trial sanctioned by the Australian Communications and Media Authority, the jamming of mobile phones is to be permitted by the New South Wales Department of Corrective Services.

It is already a crime for an inmate to have a mobile phone, and they are prohibited to be taken in by visitors.

The Lithgow Correctional Centre, in the Central Tablelands of New South Wales, has been selected as an appropriate site to trial mobile phone jammers.

Tenders have been called to use CJAM jammers in the prison, due to their ability to stop signals in a precise perimeter.

The tender covers the equipment, installation, materials and antenna system.

The Department is working closely with mobile phone carriers and the ACMA, to ensure that the trial does not affect other mobile phone services in the area.

The ACMA granted an exemption to its over-all ban on mobile phone jammers, by allowing the restricted trial under a 12-month licence valid from July the 1st this year.

(Jim Linton VK3PC)

GlobalSET to be held twice

There will be Global Simulated Emergency Tests on Saturdays, April the 13th and the 20th.

And why on two days? Both straddle World Amateur Radio Day on Thursday April the 18th, which this year is themed, 'Amateur Radio: Entering Its Second Century of Disaster Communications'.

International Amateur Radio Union Region 1 Emergency Coordinator, Greg Mossop G0DUB says the first Saturday will repeat the format of 2011 using 'local time? for each station.'

This will give a good chance of messages moving towards the regional Headquarters Stations.

The second Saturday will answer the messages, starting from the Headquarters Stations, being sent back to the countries that originated them.

All of those who register for the GlobalSETs have access to the full set of rules.

GlobalSET is open to all three IARU regions, on or near about the the emergency centre of activity frequencies on the 80, 40, 20, 17 and 15 metre bands.

The Amateur Service continues to play an important asset in emergency and disaster response, as shown by many natural disasters.

GlobalSET is an opportunity to increase the common interest in emergency communications, create practices for international emergency communications and the relaying of messages.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications Committee)

The cause of "tin whiskers" explained

Peter Ellis VK1PE says that reports are being published in various places about award-winning research at the University of South Carolina that explains "tin whiskers". These strands of tin grow out of solder, and can bridge the gap between components and cause circuit failures.

PhD student, Yong Sun, used a process called digital image correlation to track the de-formation of the surfaces around solder, and was able to prove the growth of whiskers are caused by high-strain gradient built up inside the device.

Standard theory training available soon

Enrolments are being taken by Amateur Radio Victoria for the Standard Licence bridging theory course, held weekly on Wednesday nights at centrally located Ashburton.

To enrol you must have a Foundation Licence. The instructor, Kevin Luxford VK3DAP / ZL2DAP, covers the additional Standard Licence syllabus knowledge.

It does require some self-study in between the classes, but those who have attended can attest that it has a very high pass rate.

For full details contact the Education Team Leader, Barry Robinson VK3PV vk3pv@amateurradio.com.au or 0428 516 001.

Technology Convention, Easter, Auckland 2013

If you are visiting the 'shaky isles Easter timer, register for the
Technology Convention, to be held in Auckland over March 30 and 31.

The programme includes presentations on a Loop antenna design and
experimental tuning tool; Using the maritime AIS system as a propagation
indicator; Digital ATV - the Wellington and Auckland experiences to date;
Oscillators and their design; Weaver method of SSB generation; Digital mobile
radio technology update; forum - your opportunity to discuss current issues;
a mobile rally and much more.

Day only registration is $30.00.
Further information and a registration form is available at
www.qsl.net/zl1bq

SOLAR CYCLE 24 MAY HAVE A DOUBLE PEAK

Something unexpected is happening on the sun.

2013 is supposed to be the year of Solar Max, the peak of the 11-year sunspot
cycle. Yet 2013 has arrived and solar activity is relatively low. Sunspot
numbers are well below their values in 2011,and strong solar flares have been
infrequent for many months.

The quiet has led some observers to wonder if forecasters missed the mark.
Solar physicist Dean Pesnell of the Goddard Space Flight Centre has a
different explanation: "This is solar maximum," he suggests. "But it looks
different from what we expected because it is double peaked."

Conventional wisdom holds that solar activity swings back and forth like a
simple pendulum. At one end of the cycle, there is a quiet time with few
sunspots and flares. At the other end, Solar Max brings high sunspot numbers
and solar storms.

It's a regular rhythm that repeats every 11 years.

Sunspot counts jumped in 2011, dipped in 2012, and Pesnell expects them to
rebound again in 2013: "I am comfortable in saying that another peak will

happen in 2013 and possibly last into 2014," he predicts.

SA AMATEUR RADIO DEVELOPMENT TRUST AWARDED THREE RAE BURSARIES

The South African Amateur Radio Development Trust has awarded three bursaries for young people to study for the RAE to be written in May. The bursaries are each valued of R1 000.

were awarded to Sisters Michelle, who is in grade 9, and Nicole, in grade 11.

The third bursary was awarded to Karel, ZU6KB. He achieved the best results in the 2011 Class B examination with a 98% pass. He loves contesting and won the SARL youth sprint last year and came 22nd in the CW WW SSB 10 Metre assisted class 3 contest in Africa.

ARREST MADE IN UK UNLICENSED RADIO STATION RAID

A United Kingdom man has been arrested in a raid on an unlicensed radio station in Wolverhampton.

Police and officials from communications regulator Ofcom raided the premises and seized microphones, a mixer, a computer and associated cabling.

The 33 year old man was arrested on suspicion of offences under the UK's Wireless Telegraphy Act 2006.

WIND UP RADIO DEVELOPER SEEKING UK GOVERNMENT PROTECTION FOR ALL INVENTORS

The developer of the famed Free-Play wind-up radio is calling on the British government to step-in to protect the interests of inventors.

The Daily Telegraph reports that inventor Trevor Baylis says he faces having to sell his house after failing to make money from his wind-up radio that many say helped to revolutionize public emergency notifications and there-by save lives in emerging nations.

NEWS FROM ARNEWSLINE USA

UNLICENSED OPERATOR ARRESTED FOR THREATS AGAINST TEXAS RADIO CLUB

A man arrested on allegations he used amateur radio to threaten to kill members of a local amateur radio club has been released on bail from the Bexar County Texas Jail.

Twenty-nine year old John David Watkins III, posted a $4,000 bond and was freed before noon Sunday February 17th. This after his having been taken into custody the previous night on two counts of making terroristic threats.

An arrest affidavit states Watkins, known on radio frequencies as "White Noise," was creating

interference and illegally transmitting without
having the required radio operator license. A
member of a radio club met with Watkins in
January and told him to stop or the group would
report him to the Federal Communications Commission.

Officials said that the next day Watkins
allegedly made threats against the person who
visited him and against other members of the
club, saying he would kill them with an AK-47
rifle. These threats were reported to the police
who provided security at the club's next meeting.

At airtime, what motivated Watkins to make the
alleged threats or if the matter will go to trial
is unknown.

OPERATIONAL NEWS - DATELINE 2013

RSGB COMMONWEALTH CW CONTEST This Weekend 9 -10 March

MAR 15-17 VK JOHN MOYLE FIELD DAY WEEKEND

WW International Museums Weekends June 15/16 and 22/23

Win a Centenary morse key

The Commonwealth Contest takes place on 9th and 10th March and the RSGB have
donated one of the Centenary Keys for the prize draw.

All stations that enter the contest and make at least 75
good QSOs after adjudication are entered into the free
prize draw. This is a 24hour CW contest on the 10 to 80m
bands. The exchange is simply a report and serial number
and there is free software to make the logging, sending and
entry very easy.

Only QSOs between call areas in the Commonwealth count, so
have a look at the call area list in the rules.

Check out the website www.beru.org.uk.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Southgate news in the UK say that Banjo Patterson vk4mik is running his
AM and CW for ANZAC DAY again this year, 2013.
Suggested CW freqs during April 25 are
7020, 7025, 14038 and 14051 from 0300Z to 0700Z.

4S7DXG and 8Q7VR approved for DXCC credit

The Sri Lanka 4S7DXG and Maldives 8Q7VR operations in 2008
and 2011 have been approved for DXCC credit.

If you had a request rejected for contacts with these dates
only, send an e-mail to dxccrules@arrl.org to be put on the
list for an update.

HAM RADIO CLUB TO CELEBRATE LEGION BIRTHDAY

The American Legion Amateur Radio Club will operate special event station
N 9 L March 15, and March 16 to commemorate the 94th birthday of The
American Legion. (Similar objects as the Ussie RSL).

The primary frequency to look for N 9 L will be 14.270 MHz on 20 meters.

A multi-national team will activate the Spratly Islands in the South China
Sea from 10 - 18 March. The callsign will be 9 M 4 SLL.

They will operate all bands 160 - 10m on SSB, CW and RTTY.

This counts as a separate entity for DXCC purposes and also for the IOTA
Award AS-051.

QSL manager is M 0 URX

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

STUDIO: Peter Ellis VK1PE has found an interesting article that explains
1/f noise in electronics.

vk1pe: For around 90 years the phenomenon of "1/f noise", or "pink noise",
has been observed in electronics, and studied and debated. 1/f noise is
'louder' at lower frequencies and decreases with increased frequency, unlike
white noise that is constant with frequency.

Pink noise has emerged as one limiting factor in electronic circuits using
very small conductor diameters. The debate has been whether 1/f noise comes
from the surface of the conductor or the 'volume' of the underlying material.

The debate may be over, following research using graphene sandwiches down to one layer thick of carbon atoms. The paper is: Direct Probing of 1/f Noise Origin with Graphene Multilayers: Surface vs. Volume, by Guanxiong Liu, Alexander A. Balandin, et al, http://arxiv.org/abs/1211.5155. (Also see: "Graphene sheds light on ubiquitous phenomenon", MaterialsToday.com, 4 March 2013, http://www.materialstoday.com/view/31025/the-mystery-of-the-1-f-noise/)

Increasingly, electronics manufacturers are moving to thin 'wires' of dielectric of around 1 nanometer in ICs. Graphene layers, and carbon nanotubes, are also beginning to be used in ICs. 1/f surface noise is thus becoming a dominant issue, especially as it can be often amplified in later circuits.

The research shows that both surface conduction and volume effects contribute to 1/f noise. The team showed that surface noise dominates for fewer than 7 layers of graphene, and above that 'volume' noise takes over.

So, viable counter measures for 1/f noise will now be sought.

For National Radio News,

Peter Ellis VK1PE

" Prospective: Apart from the fundamental science importance of testing directly the origin of 1/f-noise, the obtained results are very important for electronics applications. The progress in information technologies and communications crucially depends on the continuing downscaling of the conventional devices, such as main stream silicon complementary metal-oxide-semiconductor (CMOS) technology.

As the feature size of CMOS devices is scaled down to achieve higher speed and packing density, the 1/f noise level strongly increases and becomes the crucial factor limiting the ultimate device performance and downsizing. The increase in 1/f noise is detrimental not only for transistors and interconnects in digital circuits but also for the high-frequency circuits such as mixers and oscillators, where 1/f noise upconverts into the phase noise and deteriorates the signal-to-noise ratio in the operational amplifiers and analogue-digital &#65533;" digital-analogue converters. With typical dielectric thicknesses in modern transistors of the order of a nanometer, it is important to understand when 1/f noise is becoming a pure surface noise. Although the exact thickness may vary from material to material, the length scale at which the transistor channel or barrier layer becomes the surface from the noise prospective is valuable for design of the next generation electronics. The obtained results are also crucial for the graphene applications. Graphene does not have a band-gap, which seriously impedes its prospects for digital electronics. However, graphene revealed potential for the high-frequency analog communications, interconnects and sensors.

These applications require low level of 1/f noise, which is up-converted via unavoidable device and circuit non-linearity. Therefore, the knowledge of the scaling law for the 1/f noise in graphene multilayers is very important for most of realistic graphene applications in electronics."

DISCUSSION POINT

What use is an F-call?

Recently I went looking for a place to set-up my radio during lunch time. The location I've been looking for needs a couple of things.

Most importantly, it needs to be reachable within my lunch break - being self-employed, that's a little more flexible for me than for some, but it shouldn't be a 30 minute drive there and another 30 minutes back. For me, the location needs to be near water, accessible by car; I should be able to park next to the water, so my antenna ground-plane can reach the water and it needs to be away from houses with plasma screens.

In case you're wondering how my antenna system has been constructed, it's quite simple. I use a 12m squid-pole, think fishing rod on steroids, it's called a Spider-Beam. A local manufacturer made me a steel-plate with a pipe welded to it. I park a wheel of my car on the steel plate, put the squid-pole over the welded pipe and run a piece of wire to the top. At the bottom I have an SGC tuner, an SG-237, which plugs into the wire going up the pole and plugs the other end of the antenna into a ground-plane. Depending on where I am, the ground plane is a single wire running into a body of water, or it's a construction of 16 wires laid out in a ground mat. The Tuner plugs into my radio, the radio plugs into a battery pack and I can be on-air in less than 10 minutes.

It's clearly not a mobile set-up, and I don't use it at home where my radio is really only used on 2m and 70cm.

In order for me to use this contraption during lunch, I need to be able to get to the location, set up in short order and get on air and listen to stations around the bands.

I did in fact find such a location and plan to set-up there to start some listening tests. I found that Google Maps was very helpful in having a look-see before going physically to the actual site and the photographic data provided by Nearmap was helpful in determining how busy the location might be.

Looking for locations to set-up can be challenging. My current hit-list contains boat-ramps as a preference. Perhaps this might help you locate a place to get some QSO's during your lunch break too.

I'm Onno VK6FLAB

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

METEOR THAT HIT RUSSIA TRAJECTORY IDENTIFIED

Scientists from Colombia believe they have pinpointed the origin of the giant meteor that smashed into a remote region of Russia last month. Using some of the dozens, if not hundreds, of videos that captured the once-in-a-century event, the scientists have calculated the trajectory, tracing it back to a group of Earth-crossing objects known as Apollo asteroids.

They then used trigonometry to calculate the height, speed and position of the rock as it fell to Earth.

To reconstruct the meteor's original orbit around the sun, they used six different properties of its trajectory through Earth's atmosphere. They then plugged all of that data into specialized astronomy software developed by the U.S. Naval Observatory. The computers then confirmed that it was from the Apollo group.

SCIENTISTS OFFER SUPPORT FOR NASA'S NEXT MARS ROVER

Scientists have applauded a NASA decision to send another rover to Mars in 2020. At the same time they are stressing that the mission should pave the way to return Martian rocks to Earth.
Amateur Radio Newsline's Heather Embee, KB3TZD, said that the Planetary Society and the American Astronomical Society's Division for Planetary Sciences applauded the announcement.

At the same time both strongly suggested that the mission should have the capability to collect and store Martian rock samples.

NASA has released very few details on the proposed new rover plan. Because of this it's still unclear whether the robot WILL be able to collect Martian rock samples intended to be brought back to Earth.

It should be noted that most plans for returning Mars samples are multi-phase, with an initial mission to collect and store the rocks. Later missions would rendezvous with the collector and return the samples to Earth.

RESCUE RADIO: FOLLOW-UP - NPR LABS EMERGENCY ALERT FOR THE DEAF EXPERIMENT TO GO FORWARD

A follow up to our recent report on an Emergency Alerting system being proposed for the deaf and hard of hearing using radio.

Amateur Radio Newsline's Bruce Tennant, K6PZW has said that a pilot system is intended to demonstrate that all individuals, including those who are deaf or hard-of-hearing, can rely on battery-powered radios to stay informed in emergencies when electricity, Internet and other communications channels are

unavailable.

NPR Labs is the technology research and development group of National Public Radio. It will work with DHS and FEMA to identify 25 public radio outlets in the USA to participate in the pilot.

In the demonstration project, FEMA will transmit emergency alert messages using the Common Alerting Protocol. The Public Radio Satellite System network operations centre will re-transmit the warning via the Radio Broadcast Data System on the participating 25 public radio stations on a dedicated digital alerting channel.

The stations will broadcast the emergency alert to receivers capable of displaying text messages.

SPECIAL INTEREST GROUPS - LOW DOWN

Distance challenge is out on new band

Following the World Radio Conference held in 2012, the band 472 kHz to 479 kHz or a wavelength of 630 Metres, became available to radio amateurs in many countries.

Jim Linton VK3PC told us that the International Amateur Radio Union won the new secondary allocation on the basis it used ground wave propagation resulting in reliable communication over medium and large ranges, and is not dependent upon the ionosphere.

According to research by Nick Hacko VK2DX only 19 Australian stations are capable of receiving the band, just seven can also transmit and out of those only five have made two-way contacts.

The current two-way distance record is just under 290 km. Those who have already tried it find the band to be most challenging.

Nick VK2DX is looking for a bunch of enthusiastic VK, ZL and Pacific radio amateurs to be active on the new band, and of course tilt the distance record books.

If you are serious about the band subscribe to the Yahoo mailing list

(600m-subscribe@yahoogroups.com)

or visit the website http://groups.yahoo.com/group/600m/

(Jim Linton VK3PC)

About The WIA Email Address

What Is The WIA Email Address
http://www.wia.org.au/members/email/about/

The WIA though it's email server allows you to establish "yourcallsign@wia.org.au" with all emails sent to this address automatically forwarded to either your home or work email account..

This provides YOU with ONE consistent email address. And should you ever change ISP, then having a WIA address means your friends and colleagues will still be able to email you without the need for individually providing them with your new address. All YOU need to do is to simply advise us of your new address, through form on our website and we do the rest. It couldn't be easier !! A further benefit of having a WIA address, is in receiving informative Amateur Radio news as it breaks, sent directly to YOUR inbox..

How Does it Work?

The WIA Email server simply forwards all emails addressed to your WIA email address to you own ISP email account of your choice. If you ever change ISP's then simply click on Apply For Your WIA Email Address in the menu bar on http://www.wia.org.au/members/email/about/ and fill out the online form. All requests for new or changed email address's are generally completed within 48 hours.

http://www.wia.org.au/members/email/about/

FEEDBACK

I have a problem with the broadcast content over the last 6 months or so and that is the negativity of the American additions. There is a lot irrelevant, non amateur information included such as arrests, killings, and general bad behaviour of the public in America. We already have too much of this pushed on to us via public TV and radio so why do we also have to listen to it over the amateur radio? The WIA subjects are amateur based and of good quality content relative to the hobby, bad American behaviour is not. I have heard other local amateurs with similar concerns. If the added input from the States is to be included, can it be edited to cut out the nasty bits to make it more relevant?
Thanks Phil.
The week before last (24/2/13) the added content was good.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

N4WIS USS Wisconsin Mar 9 & 10, 2013

Posted: 06 Mar 2013 09:56 AM PST
http://forums.qrz.com/showthread.php?382496-N4WIS-USS-Wisconsin-Mar-9-amp-10-2013&goto=newpost

USS Wisconsin Radio Club (N4WIS) is going on air this weekend

www.n4wis.org/

Look on or near

7.264Mhz

14.264Mhz

Maybe

21.364Mhz

28.364Mhz

28.464Mhr

Since the battleship is BB-64 that is why we try to work frequencies ending in 64.

Sat 10am-430pm EST

Sun 12pm-430pm EST

The purpose of the USS Wisconsin Radio Club is to promote public interest in the Battleship USS WISCONSIN, BB-64, the United States Navy, Nauticus National Maritime Center, the Hampton Roads Naval Museum and Norfolk, Virginia. We serve as volunteer Goodwill Ambassadors for the Tidewater community. We strive to display our wonderful hobby, Amateur Radio, to the public in a favorable way and to help educate young people about Radio Communication and its usefulness to the Navy. By means of ☐Ham Radio☐ many persons throughout the United States and the world will learn about the presence of this great ship in our Historic Seaport.

==> + FCC ENFORCEMENT NEWS: ALLEGED DELIBERATE INTERFERENCE LEADS TO
$25,000 FINE FOR FLORIDA HAM

On March 1, the FCC issued a Notice of Apparent Liability for
Forfeiture (NAL) in the amount of $25,000 to Terry L. VanVolkenburg,
KC5RF, of Cocoa, Florida. The FCC alleged that VanVolkenburg
"apparently willfully and repeatedly violated Sections 301 and 333 of
the Communications Act of 1934, as amended..., by operating a radio
transmitter without a license on...465.300 MHz and for interfering with
licensed communications." VanVolkenburg holds an Advanced class
```

license.

According to the Commission's Forfeiture Policy Statement and Section 1.80 of the rules, the base forfeiture amount for operation without an instrument of authorization is $10,000, and the base forfeiture amount for interference is $7000. In assessing the monetary forfeiture amount, the FCC must also take into account statutory factors that include the nature, circumstances, extent and gravity of the violations, and with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay and other such matters. "We find Mr VanVolkenburg's misconduct particularly egregious because his unlicensed operation involved willful and malicious interference to the communications of the Brevard County Sheriff's Department, which included threats against the officers, after being told (multiple times) to cease his interfering communications," the FCC stated in the NAL. "Thus, we find that an upward adjustment of $8000 to the combined base forfeiture of $17,000 is warranted. Applying the Forfeiture Policy Statement, Section 1.80 of the rules and the statutory factors to the instant case, we conclude that Mr VanVolkenburg is apparently liable for a forfeiture in the amount of $25,000." Read more here <http://www.arrl.org/news/florida-ham-issued-25-000-fine-for-operating-an-unlicensed-radio-transmitter-and-interfering-with-li>.

==> + AMATEUR RADIO AND THE LAW: MONTANA GOVERNOR SIGNS LEGISLATION TO LIMIT ANTENNA RESTRICTIONS, PROTECT HAMS FROM DISTRACTED DRIVING REGULATIONS

On February 28, Montana Governor Steve Bullock (D) signed House Bill 148 into law. Montana State Representative Pat Connell, WA7PDC, had submitted the bill -- Clarifying Local Government Authority to Regulate Amateur Radio Operations -- on the 2013 Montana legislative docket in order to protect Amateur Radio operators in Montana from distracted driving laws. The new law prohibits local governments from regulating licensed Amateur Radio operations from a motor vehicle and also establishes a 100-foot by-right height below which local jurisdictions may not regulate Amateur Radio towers. Read more here <http://www.arrl.org/news/montana-governor-signs-legislation-to-protect-mobile-amateur-radio-operations-from-distracted-drivin>.

==> + HAM RADIO IN HOLLYWOOD: LAST MAN STANDING TO FEATURE AMATEUR RADIO STORYLINE

In an episode scheduled to air Friday, March 15, the hit ABC comedy Last Man Standing -- starring Tim Allen as Mike Baxter, KA0XTT -- will feature a secondary ham radio storyline. This is the first time that the show will highlight Amateur Radio in its plot, showing various cast members on the air and communicating via ham radio.

In Episode 217 -- called "The Fight" -- Mike's daughter Mandy (played by Molly Ephraim), gets her cell phone taken away as punishment. She discovers Mike's home shack in the basement and uses

ham radio to make faraway friends. According to Last Man Standing Producer John Amodeo, NN6JA, the home shack is a brand new set built just for this episode. The ARRL provided many of the awards and certificates -- including 5 Band DXCC, 5 Band Worked All States, 5 Band Worked All Continents, VUCC (for 50 MHz), the Diamond DXCC Challenge and the Morse Code Proficiency Certificate -- seen on Mike Baxter's home shack wall. Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-last-man-standing-to-feature-amateur-radio-storyline>.

==> + FLORIDA HAMS PROVE THAT HAM RADIO WORKS WHEN CELL PHONES DON'T

After a day of exploring the Green Swamp Wildlife Management Area -- which covers 50,692 protected acres in Florida's Lake, Polk and Sumter Counties -- with his grandson, Joe Cody, KE4WDP, of Winter Haven, Florida, saw that the roads were flooding and becoming hazardous. As he tried to drive out of the area, Cody's small pick-up truck got bogged down in the mud. Since he was out of cell phone range, Cody tried calling for help on the Dade City 146.880 repeater. Richard Parker, KF4ORW, of Dade City, Florida, heard the call and answered. Read more here <http://www.arrl.org/news/florida-hams-prove-that-ham-radio-works-when-cell-phones-don-t>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of February -- takes a look at the 2013 ARRL Field Day, scholarships administered by the ARRL Foundation, Section Manager election results, updates from the ARRL Development Office, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-55>.

==> ARRL RECOGNIZES: NOMINATIONS NOW OPEN FOR ARRL TECHNICAL AND EDUCATIONAL AWARDS

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, including an award that honors a young Amateur Radio operator. ARRL members may nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-now-open-for-arrl-technical-and-educational-awards>.

==> + MORE THAN 20,000 ARRL.NET, ARRL.ORG E-MAIL ADDRESSES BLOCKED BY MICROSOFT

The ARRL IT staff has been notified that Microsoft is blocking e-mail to the more than 20,000 members who use the arrl.net e-mail forwarding service to forward e-mail to Microsoft domains (hotmail.com, msn.com, live.com and outlook.com). In addition, the blockage is also affecting those members of the ARRL's Field Organization and other ARRL volunteers who use an arrl.org alias e-mail address to have e-mail delivered to an address with a Microsoft domain. According to ARRL Information Technology Manager Michael Keane, K1MK, the IT staff is working to have these blocks lifted and e-mail delivery restored to normal operation as quickly as possible.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Both the averages of daily sunspot numbers and solar flux rose, with the sunspot numbers up nearly 36 points to 93.3 and the solar flux up nearly 12 points to 112.6. The most active geomagnetic day was Friday, March 1, when the planetary A index was 27 and the mid-latitude A index was 23; Alaska's high latitude College A index was a whopping 64. The latest forecast from NOAA/USAF puts the average solar flux for the next five days -- March 7-11 -- at 117. The predicted solar flux is 115, 112 and 118 on March 7-9, 120 on March 10-11, 118, 115 and 110 on March 12-14, 95 on March 15-17, 100 on March 18-20, and back down to 105 on March 21-24. The predicted planetary A index is 8 on March 7-8, 5 on March 9, 8 on March 10-13, 5 on March 14-20, 8 on March 21, and back down to 5 on March 22-27. Look for more on the ARRL website on Friday, March 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: JOHN WHITE, VA7JW, AND KEN TAPPING WIN FEBRUARY QST COVER PLAQUE AWARD

The winners of the February QST Cover Plaque award are John White, VA7JW, and Ken Tapping for their article "The Penticton Solar Flux Receiver
<http://www.nxtbook.com/nxtbooks/arrl/qst_201302/index.php#/40>."
Congratulations John and Ken! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the March issue today .

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Is your primary FM transceiver a single- or dual-band model?
- Do you consider your local Amateur Radio club dues to be too low, too high or just right?
- Does your flat screen TV generate interfering signals?

- How often do you back up the data in your station computer?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the May 2013 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- March 9 -- AGCW QRP Contest
- March 9-10 -- Idaho QSO Party; RSGB Commonwealth Contest; AWA John Rollins Memorial DX Contest; EA PSK63 Contest
- March 10 -- North American Sprint (RTTY)
- March 10-11 -- Wisconsin QSO Party
- March 13 -- NAQCC-EU Monthly Sprint
- March 13-14 -- CWops Mini-CWT Test

Next week:

- March 15 -- NCCC Sprint
- March 16 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- March 16-17 -- Virginia QSO Party; Russian DX Contest
- March 16-18 -- BARTG HF RTTY Contest
- March 17 -- North American Sprint (SSB)
- March 18 -- Run for the Bacon QRP Contest
- March 21 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

Amateur Radio Newsline(tm) Report 1856 - March 8 2013

The following is a QST. Scientists say Solar Cycle 24 may have two separate peaks; APRS found to extend the range of underground communications; a United Kingdom ham finds a long abandoned satellite that has come back to life; Last Man Standing to feature an episode with ham radio and Amateur Radio Newsline opens the nominating season for the 2013 Young Ham of the Year Award. Find out the details are on Amateur Radio Newsline(tm) report number 1856 coming your way right now.

(Billboard Cart Here)

**

PROPAGATION: SOLAR CYCLE 24 MAY HAVE A DOUBLE PEAK

Will 2013 be the year of the Solar maximum of Cycle 24 or have we already seen one and is there another prak yet to come. Some researchers think that the best has not happened yet because this could be another double cycle. Amateur Radio Newslines Heather Embee, KB3TZD, has the details:

--

Something unexpected appears to be happening on the sun. 2013 is supposed to be the year of Solar Max also known as the peak of Cycle 24. Yet 2013 has arrived and solar activity is relatively low. Sunspot numbers are well below their values in 2011, and strong solar flares have been infrequent for many months. The quiet has led some observers to wonder if forecasters missed the mark.

Dean Pesnell is a Solar physicist at the Goddard Space Flight Centre in Greenbelt, Maryland. He suggests that this is the solar maximum, but it looks different from what we expected because it will be double peaked.

Conventional wisdom holds that solar activity swings back and forth like a simple pendulum. At one end of the cycle, there is a quiet time with few sunspots and flares. At the other end, the Solar Max brings high sunspot numbers and solar storms with a regular rhythm that repeats every 11 years.

Reality, however, is more complicated. Astronomers have been counting sunspots for centuries, and they have seen that the solar cycle is not perfectly regular. For one thing, the back-and-forth swing in sunspot

counts can take anywhere from 10 to 13 years to complete. Also, the amplitude of the cycle varies. Some solar maxima are very weak while others can be very strong.

And as researcher Pesnell notes, there is yet another complication. He says that the last two solar maxima, around 1989 and 2001, had not one but two peaks. He says that solar activity went up, dipped, and then resumed while performing a mini-cycle within the Solar Max that lasted about two years.

Pesnell says that the same thing could be happening now. He notes that sunspot counts jumped in 2011 and dipped in 2012. As such, he expects them to rebound again saying that another peak will happen in 2013 and possibly last into 2014. Lets hope he is right.

For the Amateur Radio Newsline, I'm Heatrher Embee, KB3TZD, in Burwick, Pennsylvania.

--

Another curiosity of the solar cycle is that the sun's hemispheres do not always peak at the same time. In the current cycle, the south has been lagging behind the north. The second peak, if it occurs, will likely feature the southern hemisphere playing catch-up, with a surge in activity south of the sun's equator. (SARL, NASA)

**

RADIO WRITING: ARRL'S DAVE SUMNER K1ZZ EXPLAINS DIY RENAISSANCE IN HAM RADIO

The resurgence in ham radio may partly be due to a renaissance in home building coupled with a need on the part of radio amateurs to serve their community. So says ARRL Executive Vice President Dave Sumner, K1ZZ's, in a recent article appearing in the Urgent Communications on-line newsletter.

In his commentary Sumner notes that when amateurs began experimenting with radio more than a century ago, they had no choice but to build everything they needed. Some went on to become successful entrepreneurs, selling their creations to fellow hobbyists who were more interested in operating radios than in constructing them. Others built their own receivers and transmitters either from economic necessity or for the fun and satisfaction of being able to say, "I did it myself." This in turn lead to the era of kit building with such giants as Heathkit becoming household names in ham radio.

K1ZZ notes that the advent of solid-state devices, printed circuit boards, and automatic parts insertion removed the price advantage that kits enjoyed. By the time the Heath Company closed its doors in 1992, most amateur-radio equipment was being manufactured in Japan. But this has not stopped ham radio operators from continuing the art of home construction and this in itself has lead to a resurrection in the art

of kit building. And this in turn has made portable emergency communications ability more attainable in the hobby.

As Dave Sumner notes, society has come to rely on a fragile telecommunications infrastructure that is susceptible to overload and outright failure. And while ham radio operators cannot substitute for all that infrastructure hams can communicate, no matter what. + You can read K1ZZ's entire article on-line at tinyurl.com/amateur-radio-renaissance. (Urgent Communications)

HAM RADIO IN SPACE: UK HAM LOCATES 1965 SATELLITE AS IT RETURNS TO LIFE

An American satellite, abandoned in 1967 as a piece of space junk has begun transmitting again after 46 years and a ham radio operator is responsible for finding it. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

Phil Williams, G3YPQ, is an Amateur Radio Astronomer in North Cornwall in the U.K.. According to reports he accidentally picked up the signal and after cross checking with various lists, he identified it as LES 1.

LES 1 was built by the Massachusetts Institute of Technology and launched in 1965. The satellite failed to reach its intended orbit owing to a wiring error and has been drifting out of control ever since.

Williams ran across it while monitoring near 237 MHz when he noticed a signal with a peculiar signal drift caused by the bird tumbling end over end every 4 seconds as the solar panels became shadowed by the satellites engine. Williams said that gives the signal a particularly ghostly sound as the voltage from the solar panels fluctuates.

The LES 1 satellite is about the size of a small car and is not likely to re-enter the atmosphere for a long time as the orbit is still relatively high. It poses no threat other than that caused by the thousands of other pieces of space junk currently in orbit. By now its likely that the on board batteries have now disintegrated so its likely that some other component failure has caused the transmitter to start up when its in sunlight bringing the ghost satellite back to life.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

G3YPQ says its remarkable to think that electronics built nearly 5 decades ago, 12 years before Voyager 1, and long before microprocessors and integrated circuits, is still capable of working in the hostile environs of space. He adds that listening to the signal one can easily imagine the craft tumbling over and over every 4 seconds and the

transmitter starting up as the sun rises on its solar panels. (G3YPQ)

**

RADIO SCIENCE: APRS EXPERIMENT EXTENDS UNDERGROUND COMMUNICATIONS

APRS works to extend communications range underground. So says the modes developer Bob Bruninga, WB4APR, who reports on an experiment that took place on March 2nd . One where he and several other hams tested the use of APRS as a means to extend radio communications underground in Mammoth Cave, Kentucky. Amateur Radio Newsline's Stephan Kinford, N8WB, reports:

--

According to Bob Bruninga, WB4APR, typically, VHF and UHF radio in underground caves are limited to only a few hundred feet and strictly line-of-sight making their routine use of little value. But with APRS radios acting as packet digipeaters, these few hundreds of feet can be extended by an order of magnitude.

Bruninga says that in the test a total of 14 APRS equipped radios were used in the cave to establish a network almost a mile long providing real-time position and text message communications along the route. Cavers carried a map of the cave marked with a Latitude and Longitude grid so they could manually enter their position into their handheld APRS-equipped transceivers. Texting via APRS provided communications end to end.

Among the interesting findings were that UHF worked about 13% better than VHF withan average link distance of about 450 feet even in the large subway sized passages of Mammoth Cave. Also power did not seem to matter much. The Kenwood TH-D72 walkie-talkie performed as well as several portable 10 watt mobile radios housed in boxes.

Another advantage of using UHF for this APRS network was that individual links in other caves can just as easily be pre-tested by unlicensed cave explorers using inexpensive FRS radios. This way, all cavers can plan and individually test the topology of an APRS network before actually gathering the required APRS equipment and setting up the actual expedition.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

Bruninga says that the system could even include e-mail into the topside global APRS system. (WB4APR)

YHOTY: NOMINATIONS SOUGHT FOR 2013 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR

The nominating season for the 2013 Amateur Radio Newsline Young Ham of the Year Award is now open.

Created in 1986, this award is offered to recognize the accomplishments of a radio amateur age 18 or younger for his or her accomplishments in service to the nation, his or her community or to the advancement of the state of the art through amateur radio.

Nominees must reside in the United States 50 states or its possessions or in any of the 10 Canadian provinces.

As in years past, corporate underwriter Yaesu USA will transport the winner to the Huntsville Hamfest in Huntsville , Alabama, where the award will be formally presented. Yaesu will also provide Hotel accommodations as well as convention tickets and a prize of Yaesu amateur radio equipment to the winner. CQ Magazine will again treat this year's recipient to a week at Spacecamp-Huntsville. Heil Sound Ltd. will be gifting this year's winner with an additional prize. Last but by no means least; Amateur Radio Newsline will present the winner with the official Young Ham of the Year Award plaque which is underwritten by Dave Bell, W6AQ, of DBA Entertainment in Hollywood, California.

Complete details, rules and a required nominating form in Adobe .pdf format are available on our website at www.arnewsline.org/yhoty. Nominating forms can also be obtained by sending a self addressed stamped envelope to Amateur Radio Newsline Inc., 2013 Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California, 91350.

Again the cutoff date for nominations is May 30, 2013. And please note that all nominating forms and support materials become the property of the Amateur Radio Newsline and cannot be returned. (ARNewsline(tm))

**

ENFORCEMENT: FORMER HAM ISSUED $10000 NAL FOR UNLICENSED OPERATION ON 20 METERS

The FCC has notified Jared A. Bruegman of Bolivar, Missouri, a $10,000 Notice of Apparent Liability. This for his alleged operating of an unlicensed radio transmitter in the 20 meter band.

On December 18, 2012, in response to a complaint of interference to amateur radio communications, agents from the Enforcement Bureau's

Kansas City Office monitored a male voice transmitting on 14.312 MHz. They used direction finding to locate the source of the radio transmissions to an antenna mounted on a pole next to a residence in Bolivar, Missouri.

The agents quickly determined that the signals on 14.312 MHz exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. The Commission's records showed that no authorization was issued to the address for operation of a radio transmitter on that frequency at that location.

Immediately after locating the source of the signals the agents inspected the unlicensed radio transmitter, which was located in a bedroom in the residence. The FCC says that Jared Bruegman was the only person present in the bedroom and the only male in the residence during the inspection.

At that time Bruegman admitted to the agents that he owned the radio transmitter. The agents observed that the transmitter was turned on and tuned to 14.311 MHz. Bruegman told the agents that he had no current Commission licenses, but that he previously held an Amateur Radio license with the call sign KC0IQN. Bruegman then told the agents he would remove the microphone from his transmitter and only use it as a receiver.

On February 25th the FCC issued the $10,000 proposed fine to the former ham. In doing so it noted that the evidence in this case is sufficient to establish that Jared A. Bruegman violated Section 301 of the Communications Act. He was given the usual 30 days to pay the amount in full or to file an appeal. (FCC)

**

RADIO LAW: FCC TELLS STATIONS TO CHANGE EAS PASSWORDS

Several broadcast groups are taking precautions to ensure their emergency alert units are secure. That's in the wake of someone hacking into a station's Emergency Alert System or EAS encoder/decoder through its connection to the Internet and programming a fake alert. One which the device then automatically transmitted.

Soon after the incident the FCC issued an order telling stations that they must change the passwords for their EAS encoders/decoders. This being especially urgent if the devices are still set with the factory default password.

As previously reported, the bogus alerts, which were initially broadcast over TV stations in Montana and Michigan, warned viewers of zombie attacks. The fake alerts occurred when someone knew or figured out the default password of EAS equipment and inserted the fake message into the EAS automatic forwarding system. (RW)

**

COMMUNICATIONS VANDALISM: LOCK GLUER HITS COLORADO SPRINGS TV STATION

A traffic reporter for Colorado Springs, Colorado station KXRM found he couldn't get into the downtown studio on Monday morning March 4th. This was because the locks on the building had been vandalized by filing them with glue.

Police told KXRM that a substance had been placed in the locks causing them to malfunction. The lock gluer also hit a Presbyterian church, the El Paso Democratic Party offices, City Hall and the Colorado Springs Independent newspaper.

Authorities say that they have identified a possible suspect despite the downtown surveillance cameras not working at the time. (BCF)

**

RADIO BUSINESS: HAMMOND MANUFACTURING TO TAKE OVER DAHL TRANSFORMER LINE

A follow-up on our recent story concerning the decision by Harbach Electronics to discontinue the manufacture of the Peter Dahl line of high performance transformers. Transformers that are used in the design and manufacture of many high power amplifiers around the world.

Late word is that Hammond Manufacturing of Cheektowaga, New York will be taking over the Peter Dahl line of from Harbach. According to both Harbach and Hammond, the two are working swiftly on the finalization of the acquisition and that the transfer of Peter Dahl brand assets will take place over the next few weeks.

Both Harbach and Hammond hope to have everything completed no later than March 31st. Keep an eye on the Hammond website at www.hammfg.com for the latest updates. (Hammond Mfg.)

**

RADIO BUSINESS: MOUSER ELECTRONICS SIGNS INTERNATIONAL DISTRIBUTION AGREEMENT WITH COILCRAFT

Mouser Electronics, a name well known in the ham radio do it yourself movement, has announced the signing of a new international distribution agreement with Coilcraft, a leading magnetic component manufacturer, across the regions of Europe, Asia, Mexico and South America. Through this partnership, announced at Embedded World in Germany, Mouser is now stocking a wide range of Coilcraft's magnetic and inductive products for immediate shipment.

Coilcraft provides magnetic components including high-performance RF chip inductors, power magnetics and filters in a variety of packages and a wide range of values. Designer's kits are offered to help engineers learn the capabilities of these high-performance inductors.

According to Mouser President and CEO Glenn Smith, this agreement with Coilcraft helps further his company's commitment to providing the

newest products and technologies for design engineers from industry-leading suppliers. Smith adds that Mouser and Coilcraft are looking forward to a long-standing and successful partnership together. (Mouser Electronics, Power Systems Newsletter)

**

HAM HAPPENINGS: DARC HAMVENTION 2013

On the social scene, the 64th Lake Constance and the HAM RADIO 2013 Convention, both organized by Deutscher Amateur Radio Club will take place from Friday, June 28th through Sunday, June 30th, 2013 in Friedrichshafen, Germany. This event has long been considered Europe's premiere ham radio gathering with attendees from around the world coming to take part.

One of the highlights of this years HAM RADIO gathering will be an informal international meeting for representatives of IARU member societies. It will be held at the Zeppelin Museum on Friday, June 28th. Event planners say that they will provide a shuttle bus that will take those attending from the exhibition halls to the museum.

If you are planning to attend from outside of Europe, the closest major city to fly into would be Munich. From the United States it is served by several major airlines including non-stop service from New York's JFK International and Los Angeles International airports on Lufthansa and United.

More information on HAM RADIO 2013 can be found in the German language at www.hamradio-friedrichshafen.de. Planners say that they hope that you can be there this year. (DARC, DF2OO)

**

HAM HAPPENINGS: THE SARL NATIONAL CONVENTION APRIL 26 - 28

The 2013 South African Radio League's National Convention and Annual General meeting will be held April 26th to the 28th at the Sulla Via Venue not far from Johannesburg. This years gathering will be hosted by the West Rand Amateur Radio Club with Kenny Neville from West Rand Astronomy Club as the featured guest speaker. If conditions are clear Neville's talk may be followed by a sky gazing party. More information, further program details and reservation forms should be on-line right now at will be available on www.sarl.org.za. The planners hope to see many ham radio operators there. (SARL)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: WORLD AMATEUR RADIO DAY 2013

World Amateur Radio Day is April 18th and according to the International Amateur Radio Union that sponsors the event the theme this year is Amateur Radio: Entering Its Second Century of Disaster Communications. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

According to the IARU announcement, the theme for 2013 of Amateur Radio: Entering Its Second Century of Disaster Communications is an excellent opportunity for amateur radio emergency communications groups to take advantage of the event to highlight the role amateur radio plays in disaster response.

Among the suggestions are for IARU member societies to arrange ham radio demonstrations in public places such as parks or shopping areas. The IARU says that such demonstrations in public areas usually generate inquiries and questions from the public about amateur radio. It adds that this makes it a great opportunity to attract new people to become members of the ham radio community.

The IARU notes that in 2013, April 18th is a weekday but that should not keep public activity from taking place either on the weekend before or after that date. Also, if you plan on holding a public demonstration, the IARU says not to forget to include some young people to show all ages are a part of this growing world wide public service oriented hobby.

For the Amateur Radio Newsline, I'm Cheryl Lasaek, K9BIK, in Zion, Illinois.

--

More information on World Amateur Radio Day is on the web at www.iaru.org. (IARU)

**

WORLDBEAT: BBC ACCUSES CHINA OF JAMMING ITS BROADCASTS

The BBC World Service says that its radio broadcasts in English are being jammed in China, suggesting the Chinese authorities were behind the disruption.

In a statement issued on Monday, February 24th the BBC said that it has received reports that World Service English shortwave frequencies are being jammed in China. It continued by stating that it strongly condemns this action which is designed to disrupt audience's free access to news and information.

China, which enforces restrictions on its domestic media, has been accused by several foreign media distributors of trying to stop their news reports reaching Chinese audiences. A duty officer at China's foreign ministry had no immediate comment. (BBC)

**

HAM RADIO IN SPACE: IARU ANNOUNCES FREQUENCIES FOR KOREAN CUBESAT OSSI

In ham radio space related news, the IARU amateur radio satellite frequency coordination panel has announced the frequencies for the OSSI-1 CubeSat developed by Hojun Song DS1SBO. The 2 meter downlink will be on 145.980 MHz with an uplink and downlink on 437.525 MHz.

OSSI-1 is currently planned to launch on April 30th into a 575 kilometer 64.9 degree inclination orbit on a Soyuz-2-1b booster from the Baikonur launch facility in Kazakhstan. Other satellites to be launched on this mission include the Bion-M1, SOMP, BEESAT 2, BEESAT 3 and the Dove-2 satellites. (IARU Satellite Coordination)

**

HAM RADIO IN SPACE: VANDERBILT-AMSAT RADFXSAT CUBESAT SELECTED FOR NASA ELANA PROGRAM

A joint satellite venture of AMSAT and Vanderbilt University has been selected as one of the winning projects for the fourth round of their CubeSat Launch Initiative.

AMSAT partnered with the Institute for Space and Defense Electronics at Vanderbilt University to develop its winning proposal. The official name of the project is RadFxSat and it was selected at priority 15 out of the 24 winners.

Project selection was based on technical feasibility and the assessed merit for conducting technology demonstrations, education, and science research. The selected projects are eligible for a free launch on NASA Educational Launch of Nanosatellite missions as auxiliary payloads on launches planned for 2014, 2015 and 2016. The 24 winning CubeSat proposals came from universities, a Florida high school, non-profit organizations and NASA field centers. (ANS)

**

RADIOSPORT: HOLYLAND CONTEST 2013 - APRIL 19 - 20

On the air, word that the 2013 Holyland Contest 2013 will be held from 2100z UTC on April 19th, and ends at 2100 UTC on April 20th. This year's contest goal will be to have as many Israeli mobile stations activating many different and rare squares for the "Holyland Award". Complete contest details and last year's results are available at tinyurl.com/holyland-contest-2013. (4Z4KX, IARC)

**

ON THE AIR: DL100OUI CELEBRATES 100 YEARS SINCE FIRST DL -US RADIO CONTACT

And keep an ear open for the German special event callsign D-L-100-Oh-U-I which will be on the air throughout 2013. This is in celebration of the 100th anniversary of the first commercial radio contact between that nation and the United States from village of Eilvese near the city of Hannover. OUI were the call letters of the German station at that time. The US station was located in Tuckerton, New Jersey. QSL this one as directed on the air. (Southgate)

**

DX

In DX, word that TA1HZ will be in Somalia on a humanitarian mission from March 23rd to April 4th with the organization Yeryuzu Doktorlay. His primary purpose is as a doctor and but also plans some on the air time likely from the city of Mogadishu using the call T5TC. His operation will be on the High Frequency bands using a Kenwood radio and a Windom antenna. If you work him QSL to TA1HZ as per the details found in www.qrz.com.

OE1MWW will be active from the Maldives as 8Q7WK between March 9th to the 23rd. His operation will be holiday style on the High Frequency bands. QSL via his home callsign.

DF8DX will be operational from Tanzania as 5H1DX from April 20th to the 28th. Late reports say that he will be active from different islands including Pemba. QSL via his home call.

G3RWF will be on the air from Rwanda through March 12th likely usi8ng the call sign 9X0NH. Activity will be on most High Frequency bands using mainly CW with some SSB. Logs will be uploaded daily to Logbook of the World. QSL via G3RWF.

F2FD is now active stroke HR5 from Honduras and should be there through May 20th. He states that he will be active as much as possible on CW, SSB and RTTY. QSL via F6AJA or Logbook of the World.

SM6CUK will be operational as SA6G/7 from Ven Island between June 10th and the 17th. Activity will be holiday style on the HF bands. QSL via SM6CUK, direct or via the bureau.

Lastly, G0VJG will be on the air S79VJG from the Seychelles between April 4th to the 16th. Activity will be on the 40 through 10 meters using SSB. QSL via G4DFI.

**

THAT FINAL ITEM: MARCH 15TH EPISODE OF LAST MAN STANDING TO FEATURE HAM RADIO

And finally this week, Friday, March 15th is the date that ABC will air an episode of its hit situation comedy Last Man Standing that will

involve amateur radio.

The episode is titled The Fight. In it, central character Mike Baxters daughter Mandy gets her cell phone taken away. She then uses Mikes home shack and amateur radio to make friends over the airwaves.

The shows producer John Amodeo, NN6JA. He tells Newsline that while he hopes amateur radio operators will enjoy watching, that they have to remember the episode was written keeping in mind the shows 7 million non-ham viewers who will be tuned in. Even so, he hopes that ham radio-wise the story line might serve an even more important purpose;

--

Amodeo: "Episode 217 of Last Man Standing is written about ham radio, but of coarse its written for the general public; so hams will probably notice some inconsistencies or inaccuracies. But what's most important is that non hams ask questions about ham radio and perhaps learn something about ham radio; then we've accomplished something."

--

Last Man Standing stars Tim Allen as Mike Baxter, who holds the fictitious call KA0XTT and has ham radio as his hobby. The show is produced by 20th Century Fox Television for the ABC Television Network and airs on Friday nights at 8 PM Eastern and Pacific and 7 Central. Check your local listings for the ABC station that carries Last Man Standing in your area. (ARNewsline(tm))

HamRadioNow: Will the REAL Ham Radio Please Stand Up?... and QCWA update

Posted: 06 Mar 2013 07:09 PM PST
http://forums.qrz.com/showthread.php?382568-HamRadioNow-Will-the-REAL-Ham-Radio-Please-Stand-Up-and-QCWA-update&goto=newpost

HAMRADIONOW.tv

Episodes 64 & 65

Episode 64: Will the REAL Amateur Radio Please Stand Up?

This one is 90 minutes of pure Ham Radio Punditry. If that turns you off, stay far, far away. On the other hand, if that's your cuppa joe, drink up.

CQ Editor Rich Moseson W2VU, and HAMRADIONOW's Jeff & Gary ask if REAL Ham Radio needs RF (all the time). Think Echolink, IRLP, D-STAR and QsoNet.

Then we compare the current Chinese "invasion" of cheap VHF/UHF radios to what happened when Japan started shipping ham rigs to the US (and the world) around 1970. If you don't recall, the US manufacturers.... all of them except then-newcomer TEN-TEC... either quit, sold out, or just stopped making ham equipment.

Finally the talk turns more digital as we ponder what Ham Radio will sound line (and look like) if we ever get really digital on HF.
Remember "Regulation by Bandwidth"? We do (Rich remembers it better than Gary does). Gary even defends AM! Or at least makes their case, since no AMers were at the table.

Episode 65: QCWA Update

QCWA has discovered the Internet! OK, that's a little unfair. But this year for the first time you can join QCWA online. And their magazine, the QCWA Journal, has now all-digital, no longer being printed on dead trees. More good news.... (just seeing if you're paying attention...), it is now monthly rather than quarterly. Executive Administrator Ken Simpson W8EK guides us through the changes.

Watch these episodes at our web site, www.HamRadioNow.tv.

>From Tad Cook, K7RA
Seattle, WA March 8, 2013
To all radio amateurs

SB PROP ARL ARLP010
ARLP010 Propagation de K7RA

The averages of daily sunspot numbers and solar flux over the reporting week (February 28 through March 6) both rose, with sunspot numbers up nearly 36 points to 93.3 and solar flux up nearly 12 points to 112.6, in comparison to the previous seven days. The most active geomagnetic day was Friday, March 1, when the planetary A index was 27 and the mid-latitude A index was 23. Alaska's high latitude college A index was a whopping 64. The upset was sparked by a stream of high speed solar wind.

The latest forecast from NOAA/USAF puts average solar flux for the next five days (March 9-13) at 118.2, higher than average solar flux for the reporting week, which was 112.6.

Predicted solar flux is 112 and 118 on March 8-9, 120 on March 10-11, 118 on March 12, 115 on March 13-14, 105 on March 15, 95 on March 16-17, 100 on March 18-20, 105 on March 21-24, 110 on March 25 through April 1, and 105 on April 2-5.

The predicted planetary A index is 8 on March 8, 5 on March 9, 8 on March 10-12, 5 on March 13-20, 8 on March 21, 5 on March 22-27, then 18, 10, 5 and 10 on March 28-31 and 8 on April 1-4.

F.K. Janda, OK1HH predicts quiet geomagnetic conditions on March 8-9, mostly quiet March 10-11, quiet to unsettled March 12, quiet to active March 13, quiet on March 14, quiet to unsettled March 15-17, quiet on March 18, mostly quiet March 19-20, active to disturbed March 21-22, quiet March 23-24, mostly quiet March 25, quiet March 26-27, quiet to active March 28-30, and quiet to unsettled March 31.

Have we mentioned recently that for HF propagation, we generally want higher sunspot numbers but low geomagnetic indices at the same time?

At http://solarscience.msfc.nasa.gov/predict.shtml you can see the latest NASA solar cycle prediction. They revised the forecast downward again. Last month they said that the cycle should peak this Fall with a smoothed sunspot number of 69. That was revised down by three points, and now they say it will peak at 66. These are International Sunspot Numbers, which have a lower scale than the Boulder numbers we use in this bulletin, which run about 35% higher.

Many readers wrote in concerning the news about a possible double-peak for the current solar cycle. There seemed to be a peak in activity around the end of 2011, then activity fell off last year. If true that the cycle peaks this Spring or Fall, we don't seem to be trending toward that activity yet.

Check http://www.youtube.com/watch?v=6j4bl57D_1U for a video from NASA explaining this. Note you can watch the video in HD and full screen by selecting options at the bottom.

Thanks to John Campbell, K4NFE, Elwood Downey, WB0OEW, Gary Johnson, K5SWW, and David Dary, W5ZAX, for the tips on the story.

If you go to http://www.swpc.noaa.gov/weekly/pdf/prf1957.pdf for the latest Preliminary Report and Forecast and turn to page 15, you can check the numbers for the latest prediction from Boulder. It shows a peak in September and October 2013, with levels about 27% higher than solar activity last month, February 2013.

See also that the peak in activity at the end of 2011 is represented by the higher numbers (smoothed, so the peak is not pronounced), then gradually declining. The averaging function seems to have moved that peak out to February and March of 2012. But the predicted peak this year is quite a bit higher than the previous peak. Let's hope that the second peak is indeed much more robust, as predicted.

At http://www.swpc.noaa.gov/weekly/pdf/prf1953.pdf the forecast from last month shows higher values for the end of 2012 and the first few months of 2013. These reflect estimated future sunspot numbers, which would drag the average down. The numbers for each month are an average for a year's worth of data, six months forward, and six months back. The estimate for March 2013 went from 77 last month to 73 this month. The latest figure represents one more month of real recorded data than last month's prediction.

Note also on the next page that the solar flux prediction shows the peak for that parameter in August 2013.

Julio Medina, NP3CW of San Juan, Puerto Rico wrote, "Just to let you know that today 01 March 2013 from 1826-1837z I worked VU3WIJ and VU3WII on 20 meter SSB with 5x9 reports both way. I was using a vertical antenna at ten feet above the ground and 100 watts. Both stations had pile ups and they copied my signal very easily."

I replied, "On that day I would expect the band to just begin to open at that time, but signals should reach a peak from 2100-2300z."

Steve Hawkins, NG0G wrote: "On March 5 at 2213Z I had just worked TX5K (Clipperton Island) on 24 MHz CW. I live in Boone Iowa and it was getting on toward late afternoon." (See http://www.tx5k.org/ for the Clipperton DXpedition.)

"After working TX5K I stumbled across XT2TT (Burkina Faso) on the same band. Since by then it had been dark in Africa for hours I was very skeptical and thinking pirate. But I adopted the standard 'Work now, worry later' mode.

"I'll admit it took tweaking everything built into my FT-1000 MKV Field, and listening so hard there may have been arcing inside my skull, but I could hear them. I called and worked them about the 3rd call. At first I thought 'noooooooo, this must be a pirate,' as with my wimpy vertical, and the solar flux as low as it is, 24 MHz should not be open to Africa from Iowa at 2213Z. I was astounded when not only did they answer me, but I quickly showed up in their online log.

"I could almost hear http://www.youtube.com/watch?v=NzlG28B-R8Y (cue the Twilight Zone theme music.)

"Despite feeling like the guest on a certain late night talk show, I quickly launched into my best post-back surgery version of the 'Happy Dance.'

Talking later with a friend, K0KT, he reminded me that near to the equator, the MUF can be surprisingly high up to midnight."

Actually when running the numbers on W6ELprop, propagation over that path at that time on that band is not unusual. I entered 42.07 degrees North, 93.88 degrees West for Steve's location, and found the XT2TT DXpedition QTH at, http://www.i2ysb.com/idt/index.php?option=com_content&view=featured&Itemid=101.

That page shows a grid square location of IK92fi, so I entered this into the AMSAT grid square conversion tool at http://www.amsat.org/cgi-bin/gridconv.

This yielded 12.3542 degrees North, 1.54167 degrees West for XT2TT. This turns out to be only 25 miles north of the default Burkina Faso coordinates in W6ELprop.

Based on these coordinates, the station is in the southwest portion of Ouagadougou, Burkina Faso's capitol city. I checked this at 4:17 AM Seattle time today, which is 12:17 PM in Burkina Faso and also 1217z. The temperature was 102 degrees F with humidity of only 11% in Ouagadougou. The annual rainfall there is only 35 inches, and the high temperatures between March and May reach 113 degrees F.

The path length is 5,767 miles (9,281 km), and on March 5 W6ELprop shows an opening beginning with a B rating (available 50-75% of the time) and signal-to-noise ratio of 40 dB at 1330z, changing to an A rating (opening 75-100% of the time) by 1430z. By 1830z the s/n

ratio is 43 dB and it gradually increases to a peak of 48 dB at 2300z. Signals stay at that level, but availability degrades to a B rating at 2330-0000z, C rating (25-50% availability) at 0030z and D rating (1-25%) at 0100-0130z.

Sunset at XT2TT was 1812z on March 5, and at NG0G it was 0006z. So that path opens about 45 minutes after sunrise at NG0G (1248z), gets better after sunset at XT2TT, and finally begins fading around sunset at NG0G. A half hour after sunset in Iowa, that path is done.

For more info on using W6ELprop, see references at the bottom of this page, or check http://www.arrl.org/files/file/Technology/propagation/W6elprop.pdf. You can download W6ELprop at http://www.qsl.net/w6elprop/.

Ken Miller, K6CTW of Rancho Cucamonga, California wrote, "I was up late last night working on the computer and saw that the Clipperton DXpedition was operating on 80 meter CW near the bottom end of the band. Just to satisfy my curiosity I turned on the 1960s station I've restored (Heathkit DX-60 with homebrew DDS-VFO and Drake 2-B receiver with 2-BQ Q-Multiplier feeding an inverted-vee dipole antenna) to see what I could hear. (Ken runs the old Novice power limit on this rig, just as he did on the same setup in 1967, 75 watts, or about 40-45 watts out.) Their signal here in Southern California was 20 over S-9 or better so I loaded up the DX-60 and gave a call after figuring out where the operator was listening (he was running JAs). Imagine my amazement when he came back to my call! I am always impressed that the operators at these DXpeditions can sort out a weak signal like mine out of the unbelievable racket. Thanks to them and also, what a surprise to see how good communications can be on the low bands late at night."

Ken wrote in a subsequent email: "I've restored this first DX-60 (and a Drake 2-B and 2-BQ Q-Multiplier) to get my feet wet. I am now in the process of rebuilding another DX-60 kit with all new parts. I re-plated the chassis and all the metal, and I've added an OA2 voltage regulator tube to the power segment of the 6CL6 oscillator section. That will prevent chirp on 10 meters.

"The VFO is a home brew DDS unit using the now 'retired' FCC-1 and FCC-2 from The NorCal QRP Club. For details, check the April or May issue of Electric Radio as Ray is publishing an article I wrote about my experience.

"I'm also home-brewing another improved version VFO using Jim, WA1FFL's DDS unit. This one is a significant upgrade to the unit described in the article."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at

http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 28 through March 6 were 63, 88, 90, 115, 103, 106, and 88, with a mean of 93.3. 10.7 cm flux was 105.5, 112.5, 111, 112, 114.3, 118.4, and 114.3, with a mean of 112.6. Estimated planetary A indices were 7, 27, 12, 7, 4, 4, and 3, with a mean of 9.1. Estimated mid-latitude A indices were 8, 23, 14, 6, 4, 3, and 4, with a mean of 8.9.

Fontana Students Enjoy being in Ham Radio Club:

Posted: 08 Mar 2013 03:08 AM PST
http://www.eham.net/articles/29843

In this technologically advanced age of communication which features such 21st century tools as Facebook and Skype, there remains plenty of interest in a method that is more than 100 years old -- ham radio. Students at Dorothy Grant Elementary School in Fontana are among the more than 2 million people worldwide who are ham radio enthusiasts. The local students have their own amateur radio club and have talked to people from many areas of the United States and other countries. This endeavor is coordinated by Bev Matheson, a fourth-grade teacher at Grant, along with David Collingham, a Fontana High School graduate who is a ham radio expert based in Maryland. "The club consists of 30 fourth and fifth grade students who come every Thursday for an hour after school to work the radio and to study the Technician Manual in hopes of getting their own FCC license," Matheson said. "The club has become so popular that more and more kids want to join, but I just don't have enough room. The kids are highly motivated and want to learn as much as possible about electronics, the radio and the science behind radio technology." The club members operate a high frequency radio with a 15-foot vertical antenna. The FCC issued them an official call sign, K6DGE, which is also the name of the group's website, K6DGE.com.

Behind the scenes of Last Man Standing show

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/CCoL9jAWDU4/behind_the_scenes_of_last_man_standing_show.htm?utm_source=feedburner&utm_medium=email

The hit ABC sitcom, 'Last Man Standing', starring Tim Allen as Mike Baxter, KA0XTT, has always had a real amateur radio station as part of the set. In Episode 217, the radios are no longer relegated to set dressing, but are actually used by several cast members, and form a major part of the storyline

SARL NEWS SUNDAY 10 March 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Edgar W Abraham, ZS6AFF, went silent recently. He was a past member and Chairman of the old Western Transvaal branch of the SARL.

Our sincerest condolences to his relatives and friends.

IN THE NEWS TODAY:

MAJOR BOOST FOR SARL ANTENNA DEFENCE FUND BREAKS THE R50 000 TARGET

ICASA APPOINTS NEW GENERAL MANAGER LICENSING

AFFILIATED CLUBS, INVIGILATORS AND HF ASSESSORS MUST REGISTER FOR 2013

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

MAJOR BOOST FOR SARL ANTENNA DEFENCE FUND BREAKS THE R50 000 TARGET

The SARL defence fund received a 900 Euro contribution from Barry Fletcher, ZS1FJ. In Rand value it equates to R10 270. Thanks to Barry and all the other contributors. The SARL Council set the original target at R50 000 but indications are that more may be needed. Keep your contributions coming. We need your support. Get detail about the campaign and who has contributed from www.sarl.org.za and select Antenna Defence Fund from the left hand menu.

ICASA APPOINTS NEW GENERAL MANAGER LICENSING

ICASA has appointed Ronnie Seeber as general manager licensing. Ronnie Seeber has had many years' experience in the telecommunications industry. Before starting his own Network consulting business a few years ago he was Government Relations Manager for Motorola.

ICASA - SARL LIAISON COMMITTEE MEETING HELD LAST THURSDAY

The meeting was chaired by Phil Molefe, who had been the Acting General Manager Licensing .The meeting was also attended by the new general manager licensing.

The establishment of cross border operation in SADC countries is now on the Agenda of the next CRASA meeting on 5 June. The SARL provided a document to ICASA who was tasked to prepare an agenda item for consideration at the next meeting of SADC regulators. There is currently a more cumbersome system in place where any visitor from SADC countries can apply for permission to operate in South Africa by sending a request to ICASA by email with a copy of their license.

ICASA has identified two 5 MHz frequencies for pilot studies by radio amateurs in preparation for the WRC 15 conference. The recommendation will go to the ICASA council for approval. They expect feedback from Council in the next few weeks. The proposal to the ICASA council also includes the allocation of the 479 kHz frequency on a secondary basis to radio amateurs.

A lengthy discussion took place around the possession of continuous tuning equipment. Although the SARL has made several attempts to get this clause removed, ICASA is not convinced. It was agreed that ICASA will have an internal discussion to re-look at the clause and report back to the SARL.

The SARL request for higher power which was tabled at the SARL - ICASA workgroup in December 2012 was reviewed. ICASA was not comfortable about 32 dBW but indicated that 30 dBW, which is 1 kW, on HF bands where Amateur Radio have exclusive use, could be considered. The SARL was asked, in preparation for revision of the regulations, to update the table of radio frequency spectrum for Radio Amateurs showing the higher power on those bands. This is only the start of the formal process and radio amateurs must not expect an early change in the regulations.

The question whether the HF logbook may be kept electronically was also discussed. ICASA was of the same opinion as the SARL that a log is a log and may be kept electronically.

A number of routine administrative issues were discussed. The main one is that ICASA now has three people dealing with amateur licensing, divided by section of the alphabet as shown at the end of this item. The details, email addresses and telephone number are available in the copy of SARL News available on the web at www.sdarl.org.za, look under News.

The SARL was represented at the meeting by Hans van de Groenendaal, ZS6AKV, Francois Botha, ZS6BUU, Fritz Sutherland, ZS6SF, Colin de Villiers, ZS6COL and Jaco le Roux ZS6PX.

NOTE TO BULLETIN READERS: DO NOT READ THE FOLLOWING TILL THE END OF THIS ITEM:

L-M-N-O-P-Q-V Delmar de Witt 011 566 3339 011 566 3340 DdeWitt@icasa.org.za

CLASS B EXAMINATION CHANGES

In line with the Class A radio amateur examination, students who enter the class B examination will be required to study the full set of revised regulations as published on the SARL Web site. The examination paper for the May examination will be based on these regulations. The regulations which apply to both the Class A and B radio amateur examination (RAE) can be downloaded from tinyurl.com/chshfzs or visit the SARL web at www.sarl.org.za and select licensing for full details of the examination process as well as free to download study guides.

AFFILIATED CLUBS, INVIGILATORS AND HF ASSESSORS MUST REGISTER FOR 2013

The closing date for affiliated clubs to register as an examination centre was 1 March 2013. The RAE manager has agreed to extend this date to 15 March 2013. Similarly Invigilators and HF Assessors should also register before 15 March. These registrations will be valid for the May and October 2013 examinations. Details, and the required vorms, can be found on www.sarl.org.za, select licensing and then scroll down to RAE Admin. If you require and further information send an email to rae@sarl.org.za.

VISITING EUROPE THIS WINTER? TAKE IN THE DARC HAMRADO

The 64th Lake Constance and the HAM RADIO 2013 Convention, both organised by Deutscher Amateur Radio Club will take place from Friday, 28 June to Sunday, 30 June 2013 in Friedrichshafen, Germany. This event has long been considered Europe's premiere amateur radio gathering with attendees from around the world. One of the highlights of this year's HAM RADIO gathering will be an informal international meeting for representatives of IARU member societies. It will be held at the Zeppelin Museum on Friday, 28 June. Event planners say that they will provide a shuttle bus that will take those attending from the exhibition halls to the museum. More information on HAM RADIO 2013 can be found at www.hamradio-friedrichshafen.de.

ANOTHER CLUB AFFILIATES WITH THE SARL

This week the SARL welcomes the Low Veld Amateur Radio Club with the call sign ZS6LOW as the 35th club to affiliate with the SARL this year. Welcome to you.

MEMBERSHIP APPLICATIONS

Applications for membership of the SARL have been received from the following radio amateurs: Marianne van Dijk, ZS6ANA (daughter of Ton van Dijk who took over her father's old call sign); Yvonne van Dijk, ZR6TBL; Michael Wade M0EDU (renewal). Any objections against the acceptance of the applications must reach the Secretary before or on the Tuesday after this bulletin.

HAMNET WESTERN CAPE

Hamnet in the Western Cape is gearing itself up again for some more important sporting event support. Today, 10th March, sees 8 of our members assisting with the communications along the important and tricky section of the Argus Cycle Tour along the Southern Seaboard at the back of Table Mountain. Communications there are difficult, and the organisers always rely on Hamnet operators to get the message through on that section.

Then, on Easter Saturday, Hamnet will also be activated to man the communications for the entire 2 Ocean's race day. The half Marathon and the 56 km race run simultaneously on that 30th March, and they will have 16 mobile stations reporting to their Joint Operations Centre at Tygerberg Hospital Disaster Ops Room. All vehicles will be tracked, and two repeaters and a simplex frequency used to maintain contact with all the operators.

Yet another example of Hamnet in the Western Cape setting the standard for Community support in our country.

MARION ISLAND

Two radio amateurs will be part of the over-wintering team and will be active on Marion Island from May 2013 to April 2014. ZS8C - Carson, ZR6CWI, has been appointed as the Space Weather Engineer and is employed for the next year by the SA National Space Agency (SANSA). ZS8Z - David, ZS1BCE, has finally been appointed as the radio technician after a delay due to a clerical error.

Important information: Expected modes will mainly be SSB and digital modes, They may only use the existing commercial broadband HF antenna, and their QSL Manager is ZS1HF. More information will be posted on their respective qrz.com sites once they have been created. We expect this information to be made available within the next 2 weeks. All enquiries via ZS1HF at this stage.

CONTEST NEWS

Results of the PEARS VHF/UHF Contest. The Contest Committee received 14 logs, made up of 11 analogue and 3 digital logs.

Analogue results. In the single operator base class, Nasri, ZS1NAZ, took first place in the 6 m and 23 cm categories; Ken, ZS2OC, took first place in the 4 m and 70 cm categories and Nico, ZS4N, took first place in the 2 m category.

In the single operator field station class, Terence, ZS2VDL, took first place in the 6 and 4 m categories; Terence, ZS2ABB, took first place in the 70 and 23 cm categories and Allan, ZS2BO, took first place in the 2 m category.

In the limited period field station class, Al, ZS2U, took first place in the 6 and 2 m and 70 cm categories.

The divisional winners are: 6 m - ZS1NAZ, ZS2OC, ZS2VDL and ZS6A; 4 m - ZS2OC and ZS2VDL; 2 m - ZS1NAZ, ZS2OC, ZS2BO, ZS4N and ZS6PX; 70 cm ZS1NAZ, ZS2OC, ZS2ABB and ZS6PX; 23 cm ZS1NAZ and ZS2ABB.

Digital results. In the single operator class, Nasri, ZS1NAZ, took first place in the 6 and 2 m categories. The divisional winners are ZS1NAZ, ZS2ACP and ZS6PX.

Congratulations to the winners.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. There remains a chance for M-class Solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 59.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

11 March - Logs for the SARL Hamnet 40 m Simulated Emergency Contest must be in to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth, 6025 or by e-mail to contest@peham.co.za. 15 March - Last date for clubs to register examination centres, invigilators and HF assessors at www.sarl.org.za. 16/17 March - SARL VHF/UHF analogue and digital contest 10:00 UTC 16 to 10:00 UTC 17 March.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

RFinder - The World Wide Repeater Directory now in Japanese!

Posted: 08 Mar 2013 01:23 PM PST
http://forums.qrz.com/showthread.php?382779-RFinder-The-World-Wide-Repeater-Directory-now-in-Japanese!&goto=newpost

RFinder - The World Wide Repeater Directory now in Japanese!

RFinder - The World Wide Repeater Directory (WWRD) already is
the first repeater directory covering the world of Amateur Radio, on
Android and iPhone, RT Systems Software, CHIRP, the web and POI's on most
GPS's.

Whether the repeater is coordinated or not, analog or digital,
linked by the internet or not, you can find the repeaters around you,
almost anywhere on the planet you are. So far 178 countries are in the
WWRD.

In our ongoing effort to make localized versions of RFinder
available, we are proud to announce the Android version of RFinder V3 now
is in Japanese. We have also loaded the canonical list of Japanese
repeaters across the Japanese nation, both Analog and D-Star into The
World Wide Repeater Directory. Just download RFinder from Google Play, and
if your device is using Japanese as it's language, RFinder will
automatically load in

Japanese.

iPhone version will be released in about 4 weeks, once Apple
approves it's release.

RFinder is already released in English, Spanish and French. We
are working on Italian, German and Portuguese next!

The World Wide Repeater Directory is available on Android,
iPhone, RT Systems Software, CHIRP, the web and POI's on most GPS's.
Windows Phone coming soon.

NASA Warns 'Something Unexpected is Happening to the Sun':

Posted: 08 Mar 2013 04:01 PM PST
http://www.eham.net/articles/29849

'Something unexpected' is happening on the Sun, Nasa has warned. This year was supposed to be the year of 'solar maximum,' the peak of the 11-year sunspot cycle. But as this image reveals, solar activity is relatively low. 'Sunspot numbers are well below their values from 2011, and strong solar flares have been infrequent,' the space agency says. The image above shows the Earth-facing surface of the Sun on February 28, 2013, as observed by the Helioseismic and Magnetic Imager (HMI) on NASA's Solar Dynamics Observatory. It observed just a few small sunspots on an otherwise clean face, which is usually riddled with many spots during peak solar activity. Experts have been baffled by the apparent lack of activity - with many wondering if NASA simply got it wrong.

Ohio/Penn DX Bulletin No. 1103

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1103
BID: $OPDX.1103
March 11, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W1SRD, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, AA6YQ, KH6BZF, N6PSE, NR6M, W6NV, WB6RSE, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, CO8ZZ, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA3BHK, F5NQL, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JG7PSJ, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, TA1HZ, UT5UGR, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), YC9MLL, ZL1LC and ZS1HF/ZS8M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-March, through Sunday, 10th-March there were 236 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FO/c, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 CASS AWARD WON. Rob Chipperfield, M0VFC, has won the 2012 Single-Operator Cass Award. The Cass Award is an incentive to encourage DX-

pedition operating excellence. From the remote South Atlantic island of Tristan Da Cunha as ZD9UW in October 2012, Rob worked 3362 unique stations over his 4-day DXPedition, demonstrating an outstanding effort to log as many individuals as possible. Michael, G7VJR, presented Rob with his plaque and prize in Cambridge, England on March 7, 2013.
<http://www.cassaward.com/M0VFC_G7VJR.jpg>
ABOUT THE CASS AWARD: Presented annually, the Cass Award encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the Single-Operator DXpedition that works the most unique callsigns. This award honors the wisdom and spirit of Cass WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers that DX IS! Congratulations to Rob, ZD9UW, on his achievement in winning this year's award. If you're interested in competing for or contributing to the 2013 Cass Award, visit: http://www.cassaward.com
The Cass Award Team (Michael G7VJR, Paul VE1DX, Dave AA6YQ)

4X, ISRAEL. Dimitry, UT5UGR, will be active as 4X/UT5UGR from Israel between March, 15-18th. He will use the callsign 4X0W during his activity in the Russian DX Contest. QSL via UT5UGR.

5H, TANZANIA (IOTA Op). Bodo, DF8DX, will be active as 5H1DX between April 20-28th. Activity will include the activation of several IOTAs (Pemba Island [AF-063] was mentioned). Operations will be on the HF bands and EME. QSL via DF8DX. Look for more details to be forthcoming. Visit his Web page at: http://www.qslnet.de/member/dl3och/index_e.htm

7O6T DXPEDITION VIDEO. Paul, N6PSE, from the Intrepid-DX Group, reports: "The 7O6T Team is glad to announce that our DXpedition video is now available for free download. We have uploaded the video to two different sites where you may view it:
1) You can view the High Definition version of this 12 minute video from this link: https://vimeo.com/61384528
2) You can also view the Standard Definition version of this video embedded on our web page. Please go to <www.intrepid-dx.com> select DXpedition Video, then select 7O6T DXpedition Video at: http://www.intrepid-dx.com/ For SD version.

Thank you for supporting the 7O6T DXpedition to Socotra Yemen."

8Q, MALDIVES. Operators Pai/VU2PAI and Krish/W4VKU will be active as 8Q7KP from Bodufinolhu, South Male Atoll (AS-013), between April 23-30th. Their plans are for 2 stations to be on the air using an Elecraft K3/ Acom 1000 and TS480Sat/Tentec Hercules II, into two Butternut HF9V and a 2 element SteppIR for higher bands. Operators plan to setup an OQRS and also upload logs to LoTW, eQSL and QRZ.com.

9L, SIERRA LEONE. Stephen, G7BXU, is once again planning to be active as 9L1BXU from Freetown this year sometime in December and early January 2014. Activity last time was on 12 and 10 meters using a FT-897 and G5RV. QSL via his home callsign.

9M4, SPRATLY ISLAND (Reminder). Just a reminder that operators John/
9M6XRO, Steve/9M6DXX, James/9V1YC, Don/G3BJ, Tony/KM0O, Ben/N6MU/DJ0YI,
Pista/HA5AO and George/HA5UK will be active as 9M4SLL from Layang Layang
Island (AS-051) between March 10-18th (See OPDX.1095 and OPDX.1101).
Look for 9M4SLL to be on the air with five stations simultaneously at
peak times, on 160-10 meters using CW, SSB and RTTY. Suggested fre-
quencies are (see Web page below for more details):
CW - 1811.5, 3523, 10110, 14035, 18087, 21035, 24907 and 28035 kHz
SSB - 3780/3803, 7058, 14210, 18165, 21295, 24985 and 28495 kHz
RTTY - 7033/7055, 10132, 14097, 18107, 21097, 24927 and 28097 kHz
QSL via M0URX. For more details and updates, see: http://m0urx.com/9m4sll

C5, THE GAMBIA. Pedro, ON7WP/ AA9HX will once again be active from Gambia,
in the Kololi area and also from inland Buntu village, between March
20-27th. He mentions that he just received his permanent license for 2013,
and will use the callsign C5WP. Pedro will use a FT-897 into multiple
dipole antennas. QSL via ON7WP, only direct. Pedro has plans to be active
again later in August. To see some pictures of his last activity, see:
http://www.qrz.com/db/C5WP

C9, MOZAMBIQUE. Gert, ZS6AYU, will be active as C91GR from Bilene between
May 7-11th. Callsign has been applied for but not yet issued. Activity
will be on 40-10 meters using CW only. His equipment is a FT857D with HL-550
amp (400w) into a Cushcraft R7000 vertical. QSL vis his home callsign,
direct or by the Bureau.

DAYLIGHT SAVING TIME (DST). Did you remember to change your clocks?
Countries who observe Daylight Saving Time, which took place on Sunday,
March 10th at 2:00 AM, were expected to move their "local clocks" forward
1 hour to 3:00:00 AM local time. Daylight Saving Time will end on Sunday,
November 3rd at 2:00 AM. For the history and details about DST, as well
as an interesting map of the world (showing the countries who observe DST),
see: http://en.wikipedia.org/wiki/Daylight_saving_time
ADDED NOTE: Hopefully, all amateur radio operators know not to change
their GMT/UTC/ZULU clocks. However, since most operators usually set their
computers to local time, some may have to change their settings on "some"
ham radio software (ex. logging, propagation, DXTelnet, etc..) programs.

E5, SOUTH COOK ISLANDS. Mauri, AG1LE, will be active as E51DXX on a holiday/
DXpedition from Rarotonga (OC-013) between April 1-13th. Activity will be
on the HF bands. QSL via his home callsign.

EH5, SPAIN (Special Event). Members of Team Cartagena will activate
special event station EH5SIP between March 17-31st. Operations will be
on all bands using SSB and the Digital modes (PSK31, RTTY, SSTV, etc.).
Activity is to commemorative the 125th anniversary of the launching of
the submarine Isaac Peral. All QSLs will be sent via Bureau, so save your
money if you are a member of the QSL Bureau. If not a member, send your
QSL and a SAE along with 1 USD or 1 €. QSL via EA5HRD, by the Bureau or
direct.

FS, ST. MARTIN. Ark, UA4CC, will be active as FS/UA4CC from Saint Martin
(NA-105, WLOTA 0383) between March 13-24th. Activity will be only during

his spare time (holiday style) with operations on 160-10 meters using CW, SSB, and RTTY. His equipment is a K2 and KPA500. QSL via his home callsign. If possible, logs will be uploaded to ClubLog. An OQRS is possible after this trip.

H40 & H44, TEMOTU AND SOLOMON ISLANDS (Reminder). By the time you read this, Sigi, DL7DF, and his crew will be active on their 2013 DXpedition which is being called a "Two Entities DXpedition - Solomon 2013". Sigi states on his Web page that they have chosen two destinations. The first destination will be the Guadalcandal (OC-047), Solomon Islands (H44), where the team will sign H44G between March 8-25th. During the time between March 12-23rd, part of the group will be active as H40T from Nendo (OC-100), Temotu Island (H40). Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are as follows:
H44G Frequencies

CW - 1825.5, 3505, 7005, 10115, 14005, 18070, 21005, 24890 and 28005 kHz
SSB - 7100, 14140, 18130, 21240, 24940 and 28400 kHz
RTTY - 10144, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50103/CW

H40T Frequencies

CW - 1818, 3515, 7015, 10122, 14015, 18077, 21015, 24895 and 28015 kHz
SSB - 7150, 14165, 18140, 21265, 24965 and 28450 kHz
RTTY - 10140, 14093, 18105, 21090, 24925 and 28090 kHz
6m - 50103/CW

They will have several stations on the air. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Their station equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, a lowband vertical for 160/80m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 element Yagi for 6m, some Beverage antennas as well as some laptop computers.
Operators mentioned are:
H44G Crew - Manfred/DK1BT, Wolf/DL4WK, Reiner/DL7KL and Juergen/DL7UFN
H40T Crew - Georg/DK7LX, Sigi/DL7DF, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI.
Pilot station is Bernd, DF3CB. QSL route is via DL7DF, direct or by the Bureau. For more details and updates, visit:
http://www.dl7df.com/h4/index.php

H40, H44 & YJ, SOLOMON ISLANDS, TEMOTU PROVINCE AND VANUATU (Update). Ralph, 5W0W/H44RK, has announced more plans for his upcoming IOTA tour which will start during the first week of June. He has added two operators to join him: Dom/SQ9KWW and Maggie/H44MK (the only local YL Ham). The callsign H40IOTA has been applied for the operation. The plan is to activate the following IOTAs in order as follows (specific dates were not provided):
OC-149 - New Georgia Islands; counts as Solomon Islands.

OC-168 - Russell Islands; counts as Solomon Islands.
OC-047 - Solomon Islands
OC-127 - Rennell Island; counts as Solomon Islands.
OC-285 - Stewart Island [aka Sikaiana Atoll]; never has been activated before; counts as Solomon Islands.
After OC-285, Ralph will continue his trip to Brisbane, Australia, on board the sailboat "SV Hafskip" via through the Temotu Province with plans to activate the following IOTAs as H40RK:
OC-065 - Reef Islands; counts as Temotu Province.
OC-100 - Nendo Island; counts as Temotu Province.
OC-163 - Vanikolo and Utupua Islands; counts as Temotu Province.
After the Temotu Province Islands, Ralph will head to Vanuatu (YJ) and activate two IOTAs there: Torres Island (OC-110) and Banks Island (OC-104). A callsign has not been announced yet for his Vanuatu opertions. Ralph's QSL Manager Rex, NR6M, reports, that Ralph and his team, will be donating much needed supplies and solar lighting packs to each chief of the villages they operate from. The team is requesting donations for their DXpedition, and look forward to you being a part of this trip, whether it be small or large to help support those most in need. If you would like to help, please contact Ralph at <ralph.honiara@gmail.com> which is also his PayPal address. Also mentioned, they are still looking to take on board one proficient CW operator for the OC-285 leg of the journey. All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates, it is suggested to watch: http://www.qrz.com/db/H40RK

HG42, HUNGARY (Special Event). Look for special event station HG52FC now active until May 31st. The activity is taking place during the 52nd FIRAC Congress event being held in Hungary. Operations will be on all HF bands using CW, SSB and the Digital modes. QSL via HA5BSW, by the HA Bureau, LoTW, EQSL and direct to the address on QRZ.com. The cards will be printed out after May 31st.

IOTA NEWS.............
EU-047. Sebastian, DL1AXX, will be active as homecall/p from Baltrum Island (DID/GIA N-06) between May 20-26th. Activity will be holiday style on the HF bands. QSL via home callsign, direct or by the Bureau. Visit his Web site at: http://www.mydarc.de/dl1axx

NA-174. The "DX-World.net" reports that David, VE3VID, is now active as VY0/VE3VID from the rare Igloolik Island (WW.Loc EP-99). He will be there for the next 3 weeks. Activity will be on SSB and RTTY. On QRZ.com, he also states that he will operate on PSK-31, and possibly more exotic digital modes like OLIVIA and HELL. QSL via his home callsign, direct or by the Bureau.

OC-042. Operators Jose/DU1BP, Torsten/DL2KGS and Rag/LA6FJA will be active as DZ1B from Luzon Island during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. QSL via LoTW.
ADDED NOTE: The CQWW DX SSB Contest (October 26-27th) operation mentioned in last week's bulletin is now off.

OC-136. Operators Graham/VK3DOG, Keith/VK3FT and Tony/VK3TZ will be active as homecall/p from Phillip Island between March 15-18th. Activity will be active on all HF bands 160-10 meters using a single transmitter into simple rotatable dipoles on the high bands and full size verticals on 80/40m. On 160m, they will try to have a vertical array (22m tall) with some parasitic elements, beverages and loops for receiving. The trio will be looking especially for Europe on the top band at their sunrise and also Stateside on 75m SSB. They plan to be active approx-imately 20 hours a day, while resting during their off time by surfing, relaxing or sampling some beers or rum.

OC-151. Leo, YC9MLL, who has been live on Flores Island for 8 years, informs OPDX this past week [edited], "...I have also improved my antenna. I put up a 33 ft vertical on top of our roof not with 13 radials (hope to increase it soon from wires recovered from a burnt transformer, hi!). It has an SG-239 auto tuner with a homebrew bias-tee for remote power. I would like to inform you that I am still on OC-151 and I am glad to be of service to any ham who would like to have a QSO. They can always contact me at this e-mail address <yc9mll@gmail.com> for a schedule. Or most of the time I operate on Saturdays and Sundays. I can transmit on 160, 80, 40, 20 (up to 14.150 MHz only), 15, and 10 meters. I have an old power supply operating a 22A radio at 100W and the power supply barely can supply the radio's demand. That might explains the often times QSB. I put a car battery in parallel to remedy the situation. I hope I can homebrew the MFJ-4403 like power conditioner. I have most all the materials except for the 25Farad capacitors and the 15KE15A and CL101 parts. I hope to find them soon so that my signal will be more stable. Our island's power is from several big generators in the center of the town. Another thing that I learned from last December was about RFI. There was a Swedish station that was trying to contact me. I cannot simply hear him, and he was using a yagi and a 1KW. There were too many cell phone chargers and other RFI generating devices plugged-in that time on the house power outlets. Now, I homebrewed another MFJ-like RFI filter from my junk box. I cannot have torroids to accommodate the 20-ish turns, but I was able to put in about 8-10 turns and the radio is quieter now, ready for another IOTA chasers round. These are the improvements I had on my 100W set-up. I hope I can reach out to the other IOTA chasers more. I am not a contester or any award chaser... I just have the eQSL eDX on my sight but not really an avid (yet) fan for awards." Leo can operate on CW, SSB, PSK31, RTTY and SSTV. QSL via his home callsign (see QRZ.com).

OC-236. Operators YB8HZ and Ram/YB8BRI will be active as homecall/p from Balang Lompo Islands between March 28-31st. Activity will be on 40/20/17/15/12/10 meters using CW, SSB and RTTY. QSL via YB8BRI.

SA-049. Members of the Radio Club Ushuaia (LU8XW) will activate the special callsign LT5X from Isla Redonda, beginning at 0000z on Saturday, March 23rd, until 1500z on Sunday, March 24th. Activity will be on 80/40/20/15/10 meters using CW, SSB and PSK. QSL via LU8XW. Isla Redonda is a small island in the mouth of the Bah&#65533;a Lapataia within the Department Ushuaia in Tierra del Fuego, Antarctica and South Atlantic Islands Province. It is surrounded by the waters of the Canal de Beagle and has an area of ??about 50 hectares. Its maximum length is 1022 meters and its maximum width is 840 meters. Its center is located at coordinates: 54 &#65533; 51'49 .26 "S - 68 &#65533; 28'54 .47" W. Grid Loc: FD55ue. On the island is installed a detachment of the Naval Prefecture Argentina that has been there more than 100 years.

JD1, OGASAWARA. Harry, JG7PSJ, will once again be active as JD1BMH from Chichijima Island (AS-031) between April 22nd and May 4th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via the Bureau to JD1BMH or direct to JG7PSJ. Visit his Web page for more details at:
http://sapphire.es.tohoku.ac.jp/jd1bmh

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between April 28th and May 4th. Activity will be on 40-6 meters, including the satellites, using CW, SSB and the Digital modes (NO 6m EME). QSL via his home callsign JI5RPT. His log search will be available on his Web site at:
http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at:
http://twitter.com/jd1bly

JW, SVALBARD. Ronny, LA3ZPA, is now active as JW3ZPA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) until March 13th. Activity will be on the HF bands. QSL via LA3ZPA. Check out the live Web cameras to see JW5E antennas, shack and harbor at:
http://longyearbyen.livecam360.com/flash/main.php
http://portlongyear.livecam360.com/flash/main.php

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on March 1st [edited]: "Press Release - Team Leader Lou, N2TU, and the Management Team of Joe/W8GEX, Craig/K9CT, and Joe/AA4NN are proud to announce they are planning a 'Commemorative DXpedition' to a rare DX entity. This DXpedition will be to Wake Atoll (KH9) [OC-053] in October 2013.
Joe and Craig were the co-leaders of the very successful DXpeditions to Swains Island NH8S in 2012, and Sint Maarten PJ7E in 2010. They were also team members of the Midway K4M DXpedition in 2009. AA4NN is a veteran of these as well as many other DXpeditions across the globe. Lou was also a member of the Swains NH8S team.
This operation is a 'Commemorative DXpedition' in that it combines a DXpedition and a commemoration of an event. 98 civilian contractors working for Morrison- Knutsen, lost their lives on the atoll in October 1943. The group has been named the 'Forgotten 98'. Our operation, observing the 70th anniversary of their deaths, will be dedicated to keeping their memory alive and honoring their sacrifice.
Wake Atoll ranks number 15 in 'ClubLog's Most Wanted Entities'. A highly experienced team of 12 operators is being formed. They plan to operate five stations over a 14 day period, 160 to 6 meters on all modes, using a callsign to be announced at a later date.
Team members include Lou/N2TU, Craig/K9CT, Joe/AA4NN, Joe/W8GEX, Jerry/WB9Z, Tom/ND2T, Mike/K9NW, John/K6MM, Hal/W8HC, Carl/K9CS, Dick/W3OA and Tom/N4XP.
Wake Atoll's access is extremely limited and the time frame is dictated by transportation issues. As such, official dates have not been set, but will be announced as soon as possible. The team will gather in Honolulu and then travel to Wake. Official landing permission has been obtained.
Our website, <www.wake2013.org>, developed by team member John, K6MM, will provide updates as they become available. Later, the group will also have an OQRS link on the website for easy QSLing.
We want to thank Elecraft, who will be supplying K3s and KPA500s for our use. Steppir will be supplying an assortment of versatile antennas, and we appreciate their help. This 'Commemorative Dxpedition' would not happen without the outstanding support of these companies. Others will be added and shown on our website as planning progresses.
Thanks also to Joe, AA4NN, who will be the QSL manager."

MJ, JERSEY. Kazu, JK3GAD, will be active as MJ0CFW from Jersey (EA-013) between March 15-17th. Look for activity in the Russian DX Contest (RDXC) and the BARTG HF RTTY Contest. QSL via LoTW or M0CFW.

P4, ARUBA (Update). Helmut, DF7ZS, will once again be active from Aruba (SA-036) between March 26th and April 3rd, and signing P40Z. Main activity will include the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band entry. Some casual operations will take place before and after the contest on 17/12 meters. QSL via W3HNK. Watch his home page at: http://www.df7zs.de

PJ4, BONAIRE. Operators Steven/W1SRD and Dean/N6DE will be active as PJ4/homecall from the "Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279) between March 26th and April 1st. They plan to

be active in the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry.
The contest callsign has not been issued yet. Operation before and after
the contest will be focused on RTTY. QSL via LoTW is preferred. Direct
to W1SRD with SASE/return postage for the contest callsign. QSL the QSOs
to their homecalls for contacts outside of the contest.

PIRATE ALERT. Xavier, EA3BHK, reports that a station signing FK8IK on
17m CW was active on March 9th, and was definitely a PIRATE station.
He contacted Mic, FK8IK, and he also states it was a PIRATE.

V73CW QSL INFO. Bruce, V73CW, reports, "Logs have been updated to LoTW.
If you prefer a QSL, please send DIRECT w/SASE to my home callsign AC4G."

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T2, TUVALU (Update/Reminder). Operators Gavin/GM0GAV, Clive/GM3POI,
Robert/GM3YTS and Tom/GM4FDM will be active as T2GM from the Vaiaku Lagi
Hotel on the lagoon side of Fongafale islet, Funafuti Atoll (OC-015)
between March 12-23rd. Activity will be 160-10 meters using CW, SSB and
RTTY. Suggested frequencies are:
CW - *1826.5, 3506, 7009, 10104, 14019, 18076, 21019, 24896 and 28019
kHz
SSB - 3790, 7079/7179, 14145, 18139, 21269, 24949 and 28469 kHz
RTTY - 7040, 10145, 18099, 21079, 24919 and 28079 kHz
* Up 3 kHz/World and Down 3 kHz JA
They will have two stations with Elecraft K3 and 500w amps using vertical
antennas placed either in or at the edge of the lagoon. If the InterNet
is available, logs will be uploaded to ClubLog and LoTW. QSL Manager will
be GM4FDM (QRZ.com), direct or by the Bureau. A OQRS will be available via
ClubLog. A Web Blog page is also available at: http://t2gm.org

T48, CUBA. Members of the "Las Tunas Contest Crew", T48K, will be active
during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Single entry
from the north coast of Las Tunas Province. Operators mentioned are
Hugo/F5FYO who will be a guest operator, and the rest of the crew includes
Alex/CO8KA, Alejandro/CM8AKY, Doug/CO8DM, Del/CO8DRG and Ra l/CO8ZZ. QSL
for this operation will be via F5FYO.

T5, SOMALIA. Tevfik, TA1HZ, will be travelling to Mogadishu to be a part
of a Turkish team on a humanitarian mission called Yeryuzu Doktorlari
(Doctors Worldwide - see <https://yyd.org.tr>) between March 23rd and
April 4th. As a doctor, his work is primary, but during his free time,
Tevfik hopes to be active as T5TC (callsign to be assigned). Activity
will be on all HF bands, depending on band conditions, using a Kenwood
TS-480 and Windom antenna. Tevfik also plans to be in the CQWW WPX SSB
Contest (March 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL via
TA1HZ, only direct, by the Bureau or LoTW and eQSL. QSL cards will be
printed late May. See QRZ.com for more info. PLEASE NOTE: Bureau QSLs
and uploading the log to LoTW/Eqsl will be done after direct requests
are fulfilled! Also, any donations for the hospital and food distrubition
centers can be sent via: https://www.yyd.org.tr/bagis/index.php

TX5, CLIPPERTON ISLAND (Update). The TX5K team on Clipperton Island is
now QRT, and they are packing things up to leave the island or probably
have left the island already. Here is a quick summary of things from the
TX5K Blog page that took place over the past weekend:
* Bob, KK6EK, reported on March 8th on the TX5K Blog page [edited],
"According to the schedule we will pack on Sunday, March 10th and
Monday, March 11th. If we are able to leave the island on Monday,
we will keep the schedule given on the website."
* Early Friday, March 8th, the TX5K team hit the 100k QSOs mark around

1213z.
* Then late Friday, March 8th, the team started some teardown early. The TX5K team announced, "We have decided to dismantle site B (mostly CW) today and pack it for transport to the boat. Site A will remain operating for at least a day, perhaps longer. Exact shutdown time is not yet determined."
* However, the TX5K team did go QRT at 0000z, Sunday, March 10th. As this was being written on March 10th, TX5K QSOs totals are as follows: 113844 QSOs (60227/CW, 45030/SSB and 8587/Digi)
QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V3, BELIZE. Operators Ron/WB1EAZ and XYL Elaine/KA1UCC will be active as V31RT and V31BE, respectively, from Belize between March 13-20th. Activity will be SSB with a focus on Europe, Oceania and Asia. QSL via WB1EAZ.

V7, MARSHALL ISLANDS. Tatsuhiko "Ted", JF1CCH, will be active as V73TS from Majuro Island (OC-029) resort hotel between March 21-26th. Activity will be mainly CW and the HF bands, 40-10 meters, and using a Delta Loop antenna. Power on 12 and 10 meters will be 100w, and 15 meters and down 400w. QSL via his home callsign and eQSL.

VK9C, COCOS KEELING ISLANDS (Web Page Updated). The VK9CA Web page has been updated for the operation to Cocos Keeling Island (OC-003) which will take place between March 30th and April 13th (see OPDX.1102). The Web page can be viewed at: http://www.vk9cz.com
Operator Keith, GM4YXI, has added a 4.8MB Powerpoint presentation to the Web page (under Latest news) with propagation charts for different parts of the world to VK9CZ which can be viewed or downloaded.

VK9L, LORD HOWE ISLAND. Oliver, W6NV, informs OPDX that he will be at Lord Howe Island between April 10-14th, to see the sights and join Seppo, OH1VR for some casual operations. Oliver has obtained the VK9LT callsign for his Lord Howe Island operation which was approved for re-issue by the WIA effective April 1st, 2013. He mentions, "We have confirmed reservations, however, the equipment logistics and propagation will be the determining factors." Seppo will operate as VK9/OH1VR between April 11-16th. Direct QSLs for VK9LT (operations for 2013 only) are to be sent to W6NV. QSL VK9/OH1VR via OH1VR only direct. More later on bands and modes, when equipment logistics is firm. ADDED NOTE: Look for them

to possibly participate in the Japan International DX Contest and the Yuri Gagarin International DX Contest over the weekend of April 13-14th.

ZD8, ASCENSION ISLAND. Mick, G1EUZ, will be active as ZD8RAF from Ascension Island between March 18-22nd. He will be taking an IC-7000, and a Vertical Horizontal dipole. He hope to make many contacts, especially with some fellow RAFARS members. QSL via his home callsign.

ZL7, CHATHAM ISLANDS (Update/Reminder). Jim, ZL1LC, will be active this week as ZL7LC from Chatham Island (OC-038) between March 14-20th, as a micro DXpedition and running PSK31 only (see OPDX.1094 and OPDX.1101). He informed OPDX on Saturday: "We are almost ready to go. We arrive late Thursday (0400z, March 14th) and will get the Windom up before dark so that I have an antenna for the night. The QRZ.com Web page for ZL7LC is up-to-date with all the info. PSK31 only. I'm using EB7DX as my QSL Manager and there is a note about donations, if you so desire. The pro-pagation conditions aren't brilliant. However, a couple of days ago, when the 10 meter forecast was POOR, there was a 10 meter opening from here into the USA and Asia for an hour or so. There was a slow deep fade, but you could work stations if you were quick. Look forward to catching you on the bands." Jim's rigs will be an Icom 7200 and 7000 with vertical antennas operating on 7035, 14070, 21070 and 28120 kHz. Remember, his QSL Manager will be EB7DX and direct (w/2 green stamps and SAE). NO Bureau QSLs. For more details and an online log (ClubLog), see QRZ.com.

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, informs OPDX that two radio amateurs will be part of the over wintering team and will be active on Marion Island between May 2013 to April 2014. Look for the following operators:

ZS8C - Carson, ZR6CWI, has been appointed as the Space Weather Engineer and is employed for the next year by the SA National Space Agency (SANSA).

ZS8Z - David, ZS1BCE, has finally been appointed as the radio technician. His appointment was delayed due to a clerical error.

Pierre states that the expected modes will mainly be SSB and the Digital modes. They may only use the existing commercial broadband HF antenna. Their QSL Manager is ZS1HF. More info will be posted on their respective QRZ.com sites once they have been created. They expect this info to be made available within the next 2 weeks. All inquiries are via ZS1HF at this stage.

Rob Chipperfield M0VFC has won the 2012 Single-Operator Cass Award

Posted: 08 Mar 2013 06:20 PM PST
http://forums.qrz.com/showthread.php?382817-Rob-Chipperfield-M0VFC-has-won-the-2012-Single-Operator-Cass-Award&goto=newpost

The Cass Award is an incentive to encourage DXpedition operating excellence.

From the remote South Atlantic island of Tristan Da Cunha as ZD9UW in October 2012, Rob worked 3362 unique stations over his 4-day DXPedition, demonstrating an outstanding effort to log as many individuals as possible. A picture of Rob (on the left) receiving his plaque and prize from Michael G7VJR in Cambridge, England on March 7, 2013 can be seen here

Presented annually, the Cass Award encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the Single-Operator DXpedition that works the most unique callsigns. This award honors the wisdom and spirit of Cass WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers that DX IS!

Congratulations to Rob ZD9UW on his achievement in winning this year□s award. If you□re interested in competing for or contributing to the 2013 Cass Award, visit http://www.cassaward.com .

73,

the Cass Award Team (Michael G7VJR, Paul VE1DX, Dave AA6YQ)

RFinder - The World Wide Repeater Directory now in Japanese!

Posted: 07 Mar 2013 09:27 PM PST
http://forums.qrz.com/showthread.php?382712-RFinder-The-World-Wide-Repeater-Directory-now-

in-Japanese!&goto=newpost

for Immediate Release

8/3/2013

from the shack of W2CYK

RFinder - The World Wide Repeater Directory now in Japanese!

RFinder - The World Wide Repeater Directory (WWRD) already is the first repeater directory covering the world of Amateur Radio, on Android and iPhone, RT Systems Software, CHIRP, the web and POI's on most GPS's. Whether the repeater is coordinated or not, analog or digital, linked by the internet or not, you can find the repeaters around you, almost anywhere on the planet you are. So far 178 countries are in the WWRD.

In our ongoing effort to make localized versions of RFinder available, we are proud to announce the Android version of RFinder V3 now is in Japanese. We have also loaded the canonical list of Japanese repeaters across the Japanese nation, both Analog and D-Star into The World Wide Repeater Directory. Just download RFinder from Google Play, and if your device is using Japanese as it's language, RFinder will automatically load in Japanese.

iPhone version will be released in about 4 weeks, once Apple approves it's release.

RFinder is already released in English, Spanish and French. We are working on Italian, German and Portuguese next!

The World Wide Repeater Directory is available on Android, iPhone, RT Systems Software, CHIRP, the web and POI's on most GPS's. Windows Phone coming soon.

For more information go to www.rfinder.net or email w2cyk@rfinder.net

Amateur Radio Newsline Report 1856 March 8 2013

Posted: 07 Mar 2013 06:57 PM PST
http://forums.qrz.com/showthread.php?382702-Amateur-Radio-Newsline-Report-1856--March-8-2013&goto=newpost

Amateur Radio Newsline☐ Report 1856 ☐ March 8 2013

The following is a QST. Scientists say Solar Cycle 24 may have two separate peaks; APRS found to extend the range of underground communications; a United Kingdom ham finds a long abandoned satellite that has come back to life; Last Man Standing to feature an episode with ham radio and Amateur Radio Newsline opens the nominating season for the 2013 Young Ham of the Year Award. Find out the details are on Amateur Radio Newsline☐ report number 1856 coming your way right now.

(Billboard Cart Here)

**

PROPAGATION: SOLAR CYCLE 24 MAY HAVE A DOUBLE PEAK

Will 2013 be the year of the Solar maximum of Cycle 24 or have we already seen one and is there another prak yet to come. Some researchers think that the best has not happened yet because this could be another double cycle. Amateur Radio Newslines Heather Embee, KB3TZD, has the details:

Virginia QSO Party - March 16,17

Posted: 09 Mar 2013 01:21 PM PST
http://forums.qrz.com/showthread.php?382913-Virginia-QSO-Party-March-16-17&goto=newpost

The Virginia QSO Party will be held during the 3rd weekend in March.

Saturday, 16 March 1400 UTC - Sunday, 17 March 0200 UTC

and Sunday, 17 March 1200 UTC - 2400 UTC.

For Virginians, this is Saturday 10 AM - 10 PM and Sunday 8 AM - 8 PM local
time.

Sponsors of the VQP are awarding 25 plaques this year, one more than last
year.

The new plaque is Single Operator Youth (18 or younger) sponsored by the

K4AMG Memorial Amateur Radio Club (http://www.k4mag.org).

The Virginia QSO Party web site is:

Sunday 10th March 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Summits On The Air

Last weekend we heard a number of summits in Donegal being activated by the "two Victors" - GI4ONL and MI0JST. We heard them on Slieve League - one of the better-known mountains in Donegal and famed for the fabulous sea views from the nearby cliffs - and also on Carnaween and Barnesmore. They were on 40 metres both CW and SSB and were attracting great interest from summit chasers.

Series 9 Incoming QSL Manager

Effective 1st March, the 9 series incoming QSL manager duties will transition from Dave Ei9FBB to Declan Ei9FVB. We would like to extend our appreciation to Dave Ei9FBB for his service as 9 series QSL manager over the past number of years.

Dundalk Amateur Radio Society EI7DAR

Dundalk ARS held their AGM on Wednesday 6th March with their officers for the year being duly elected. President insitu: Tom EI9CJ Chairman : Thos EI2JD Secretary: Brian EI8AJB Treasurer: Jim EI2HJB P.R.O: Seamus EI4KE/GI4SZW QSL Manager: Brian EI9GTB Society Rooms Manager: Ivan E11166

Dundalk ARS meets on the first and third Wednesday of the month /at/ 8pm in Larkin House, 113 Castletown Rd, Dundalk. We continue our series of talks on the 20th March with a visit from Brian MI0TGO and Graeme

MI0WGM, who will share their experiences and equipment used, with the SOTA, Summits On The Air programme. Visitors would be made very welcome.

Limerick Radio Club

Limerick Radio Club held a very successful rally last Sunday and would like to thank all who attended, especially those who traveled long distances. The raffle prize winners were: Joe Ryan EI9HG - Bhi Digital Speaker (donated by Bhi UK) Brian Canning EI8IU - Half size G5RV (donated by Stephen Boyd) Pat Fitzpatrick EI2HX - World band shortwave receiver (donated by Long Communications) Christopher Mann EI9CZB - Icom document folder & Icom USB Mouse (sponsored by ICOM UK) George Fitzgerald SWL - Souls of The Sea book (donated by Frequencydb.com) Kenwood UK also donated pens, lanyards.

Next meeting: The next meeting of Limerick Radio Club will take place next Wednesday evening 13 March at 7.30pm in the Limerick Institute of Technology and a talk will be given by David Magee EI2GBB on the Limerick Metropolitan Area Network.

Lough Erne Amateur Radio Club Annual Rally

The Lough Erne Rally takes place on Sunday March 24th 2013.

The location is The Share Centre, Lisnaskea, Co. Fermanagh, BT92, 0EQ. Usual clubs and organisations will be present. Bring and buy, Food and on site parking available. Everyone welcome. More details can be obtained from www.learc.eu.

A Tale of two Forts

Ireland has two radio museums based in coastal forts. Both will have exhibits at the inland Lough Erne Rally on Sunday 24 March in the SHARE Centre near Lisnaskea.

The older fort, with a fascinating collection of radio memorabilia, is the Vintage Radio Museum based in the Martello Tower in Howth. The younger fort, with a collection of vintage amateur and military radio equipment, is in Grey Point Fort on Belfast Lough.

DX News

Youngsters On The Air

During the summer of 2013, a youth radio camp "Youngsters On The Air" will be held near Tartu, Estonia from 5-12 August. There will be 10 teams participating from different European member associations of IARU R1. The camp is organised by the Estonian Radio Amateurs Union. During

this week teams of young radio amateurs from 10 different European countries will be participating in different activities: presentations, Contests, visiting radio stations, observatory, etc. Young operators or SWL's aged between 14-25, are being sought to represent Ireland, and should contact Ger McNamara, IRTS Youth Co-ordinator on 087 2532512 or by email to ei4gxb /at/ gmail.com

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

Pete EI7CC is now QRV from Lesotho as 7P8PB, and Aidan EI8CE will be QRV from Lesotho next week and will be signing 7P8AM. Both operators look forward to working stations from EI & GI.

IARU Region 1

IARU Region 1 President Hans, PB1T and IARU Region 1 Secretary, Denis ZS4BS, recently visited Gerry Gervin EI8CC/7P8CC in Lesotho. They were in Bloemfontein to start planning for the Region 1 Executive Committee meeting in May. Both of them travelled to Lesotho and also got a chance to operate from Gerry's shack. Issues discussed at their meeting with Gerry, included the work of the IARU and amateur radio in Southern Africa. Gerry recently had some storm damage to his shack but reports he is fully operational now.

New Social Networking Site for Radio Hams

If you like Morse code, you'll like Enigma code, too. Using a free website and an award- winning German WWII Enigma code simulator to send and receive social-networking messages to old friends and new ones worldwide. Take a look at www.enigmaworldcodegroup.com

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1103.1
BID: $OPDX.1103.1
March 10, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and the T2GM Web page for the following DX information.

T2, TUVALU (Update/Cancelled). Operators Gavin/GM0GAV, Clive/GM3POI, Robert/GM3YTS and Tom/GM4FDM, who were expected to be active as T2GM from the Funafuti Atoll (OC-015) between March 12-23rd, have announced on March 10th, the following on their Web page [excerpts/edited]: "Three of the team (Rob/GM3YTS, Gav/GM0GAV and Tom/GM4FDM) had extremely bad luck when their outward flight from Glasgow was cancelled due to an undercarriage problem. This had a knock-on effect for others flights they were due to catch, especially the connection from Fiji to Tuvalu which is now fully booked for the week ahead. They are very unhappy but nothing they can do about it. With Clive, GM3POI, already on route to Fiji they have now decided to be operational from there, probably starting activities on Wednesday, March 13th. [This blog will re-focus on their Fiji expedition and will update with callsign(s) and further info]."

Disaster Response Training:

Posted: 09 Mar 2013 04:09 PM PST
http://www.eham.net/articles/29854

Local residents from Tipton County and members of Tipton Amateur Radio Society received two full days of Disaster Response Training. The training classes were held Feb. 9, and Feb. 23. The Disaster Response Training was provided through the cooperative effort of the Tipton County Volunteer Organization Active in Disaster, in conjunction with the American Red Cross, with support of Tipton County Emergency Management Agency, Pleasant Grove Baptist Church, and Munford fire station. Tipton County ham radio operators continue to participate in disaster response training for the common purpose of providing organized emergency and/or auxiliary communications service to public safety and public service organizations.

r-Hamfest-March-9-2013-8am-VE-Session-11am&goto=newpost

Saturday, March 9 2013 8□11 AM Free admission

VE Licensing Exam at 11:30am

Cooperative Extension □Solar □ Bldg

50 West High St. (Rt 67 West)

Ballston Spa NY 12020

Here□s the perfect cure for cabin fever for

all area hams. The annual swapfest is a

great place to meet other operators and to

buy, sell, or trade gear.

If you□re planning to upgrade your license,

we□ll be holding an FCC exam for all

classes at noon, after we clear out the boat

anchors. Bring a photo ID (drivers license)

or two other forms of ID, your FCC license

(if you have one) and a photocopy, cash or

check for $15, and two pencils. A calculator

is OK if memories are erased.

Mark this on your calendar, and talk it up

on the air. There□s always a good crowd,

and somebody is going to win the door

prize □ a handheld radio.

Hope to see you there. :)

GB2RS NEWS2

Sunday 10th March 2013

The news headlines:

Rob M0VFC wins the Cass Award

G100RSGB lastest news

LES-1 satellite heard again

The Cass Award encourages DXpeditions to maximise the number of unique contacts made. It comes with a $1000 prize for the single-operator DXpedition that works the most unique callsigns within a 4-week period. This award honours the wisdom and spirit of Cass, WA6AUD, after whom this new award was named. The first winner of this award is Rob Chipperfield, M0VFC. From the remote South Atlantic island of Tristan Da Cunha as ZD9UQ in October 2012, Rob worked 3362 unique stations over his 4-day DXpedition, demonstrating an outstanding effort to log as many individuals as possible. Michael, G7VJR presented Rob with his plaque and prize in Cambridge, England on 7 March. Many of you will remember that Rob returned from his DXpedition and came straight to the HF Convention to give a much enjoyed talk to delegates, it was standing room only. Well done Rob.

The special event callsign celebrating the RSGB Centenary stays in Region 4 this week. Today, 10 March, sees Durham and District ARS putting an HF and VHF station on the air using SSB and PSK. On 11 March, GD100RSGB will be heard again as the callsign goes back to the Isle of Man with CW, SSB and data on HF and VHF. On Tuesday, Humber Fortress Club will be on the air from Fort Paull running CW, SSB, FM and data on the HF and VHF bands. Maltby and District ARS take the callsign to Rotherham on Wednesday running HF and VHF stations on CW, SSB and data with Pontefract and DARS adding FM to the mix for Thursday the 14th. Friday it's the turn of Sheffield ARC with a station running CW and data on all bands. Next weekend, 16th and 17th, Otley ARS are running an SSB and data station on the 10 to 80m bands from Otley. Details of how to get your QSL card are on the website, www.rsgb.org.uk.

Phil Williams, G3YPQ, an amateur radio astronomer in North Cornwall reports picking up a signal from the LES 1 satellite, a satellite launched in 1965. The satellite failed to reach its intended orbit owing to a wiring error and has been drifting out of control ever since. G3YPQ ran across it while monitoring near 237MHz when he noticed a signal with a peculiar signal drift caused by the bird tumbling end over end every 4

seconds as the solar panels became shadowed by the satellites engine. He said that gives the signal a particularly ghostly sound as the voltage from the solar panels fluctuates.

On 2 March, 54 candidates sat the Advanced Examination and 39 were successful. The next examination will be held on Thursday 2 May at 7pm. The closing date for applications is on 10 April. Congratulations to all those who were successful.

Pierre, F1SHS, President of Digital Radioamateur France, reports that all digital modes and experimentations are now possible for French amateurs. Until now, French radio amateurs had been banned from using digital modes such as D-Star. It is reported the new draft regulation was signed by the Minister on Wednesday morning, March 6.

Highlights of Solar and Geomagnetic Activity
04 - 10 March 2013

Solar activity ranged from very low to moderate levels. A majority
of the week was dominated by very low levels with only B-class
events observed on 04, 06 and 08 - 10 March. Activity increased to
moderate levels on 05 March when Region 1686 (S13, L=263, class/area
Dac/140 on 06 March) produced an impulsive M1/Sf flare at 05/0754
UTC. Associated with this event were weak, low frequency radio
emissions including a Type II signature with an estimated shock
velocity of 1011 km/s. Later on 05 March, this region produced a C1
event at 2044 UTC as well as another C1 event at 08/1644 UTC as it
rotated off the visible disk. The other spotted regions on the disk
were quiet and stable through the period. No Earth-directed CMEs
were detected during the week.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels 04 - 08 March, reaching a peak flux of 7905 pfu at
06/1925 UTC. Flux levels decayed to moderate levels on 09 - 10
March.

Geomagnetic field activity was at predominately quiet levels with an
isolated unsettled period observed at 05/0000 - 0300 UTC. Solar wind
speed, as measured at the ACE spacecraft, ranged from a high of
about 500 km/s early on 04 March and exhibited a slow, steady decay
in speed through the week, ending the period near 340 km/s. Total
field measurements ranged from 1 nT to 9 nT while interplanetary
magnetic field Bz ranged between +/- 5 nT. The Phi angle began the
period in a mostly negative (towards) orientation through about
06/0800 UTC. Through the remainder of the period, field orientation
was variable, shifting from negative to positive (away).

Forecast of Solar and Geomagnetic Activity
11 March - 06 April 2013
```

Solar activity is likely to be low through the period. A slight chance for M-class activity exists through 16 March while Region 1689 remains on the disk, and again from 21 March - 03 April with the return of old Region 1686 (S12, L=263).

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels through 28 March. Moderate to high levels are possible from 29 March - 04 April with the return of a recurrent coronal hole high speed stream (CH HSS). Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be predominately quiet to unsettled. Active periods are possible on 28 March due to CH HSS effects.

Registration for ARDF 2013 Now Open:

Posted: 10 Mar 2013 06:02 PM PDT
http://www.eham.net/articles/29855

Kota Batu - The Amateur Radio Direction Finding (ARDF) Competition' will be back for its second year, as announced during a press conference held at the Authority for Info-communications Technology Industry of Brunei Darussalam (AITI), where the competition this year will be held on April 14, located at Taman Riadah Tasik Sarubing, in Mukim Kota Batu. The event is organised in conjunction with AITI's 10th year anniversary. The ARDF competition allows participants to compete and show their skills in amateur radio direction finding. It requires the skills of orienteering and navigating of radio direction in locating hidden transmitters called 'beacons' or `foxes' within an area using the bearings of the transmitted signal in pedestrian mode. According to Hj Yahkup Hj Menudin, Chief Executive of AITI, "The objective of this event is to promote the use of amateur radio service in Brunei Darussalam and to create harmony and foster relations among radio enthusiasts. As one of the main events of AITI's 10th year anniversary celebration, we have put in attractive cash prizes for the fastest team to find the beacons and I hope to see an increase in participation from radio enthusiasts." The ARDF 2013 is open to 10 teams and every team shall consist of three members with at least one person in the team holding a valid amateur radio station licence. During the press conference, the media was briefed regarding the format of the competition, where last year's participants found ARDF 2012 less challenging, therefore AITI has designed this year's challenge to be much more difficult.

Research Inquiry from Tudor Place Historic House

Posted: 11 Mar 2013 11:08 AM PDT
http://forums.qrz.com/showthread.php?383184-Research-Inquiry-from-Tudor-Place-Historic-House&goto=newpost

Fellow HAMs,

Below is an email we received here at QRZ requesting our assistance identifying Amateur Radio artifacts belonging to the Tudor Place Historic House in Washington DC.

If you live in the Washington DC area, and can be of assistance, Erin will be directed to monitor this thread, so feel free to post below!

Quote:

Dear Mr. Lloyd,

Greetings! My name is Erin Kuykendall and I am the Curator at Tudor Place Historic House & Garden in Washington, D.C. This afternoon I spoke to one of your QRZ members, Mr. Clinton Gorman, K4krb, Curator of the Southern Appalachian Radio Museum in Asheville, NC. after exchanging emails last month. I have a question I would like to pose to members of QRZ living in the Washington, D.C. area.

Tudor Place collection includes approximately 34 wireless radios dating from ca. 1890 through the 1940s in addition to dozens of miscellaneous coils, batteries, receivers, and antennas. See for example, the image attached, a nitrate cellulose print taken by the last owner of Tudor Place, Armistead Peter 3rd, and the owner of the ham equipment, of his station. The second image, shows the young man using his wireless station ca. 1914. At present, this equipment is in storage and we are seeking assistance with the identification and research of these artifacts.

Might there be a way I can reach out to any QRZ users for assistance with this project? Is there a place that would be appropriate for me to post this announcement on your website?

With many thanks, and I look forward to hearing from you at your earliest convenience.

Sincerely,

~ Erin Kuykendall

Amateur Radio: A Hobby Sure to Survive:

Posted: 11 Mar 2013 06:11 PM PDT
http://www.eham.net/articles/29856

When the Internet, phones and electricity go out, communities can turn to local hobbyists for help. In Fort McMurray, amateur radio is becoming a popular hobby. Amateur radio provides more than an avenue to talk with people around the world: When emergency crews need information -- such as the Slave Lake forest fires or during the 9/11 attacks -- amateur radio operators and expansive networks are usually the ones to relay information to residents and authorities. In many ways, they are an "end-of-the-world" insurance policy for many communities. The Fort McMurray Amateur Radio Club is currently growing and looking for new members. The club meets every Saturday at 9 a.m. at the Royal Canadian Legion.

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Hamfest Happenings

The famed Friedrichshafen hamfest, properly known as the "Ham Radio 2013 Convention <http://www.hamradio-friedrichshafen.de/ham-en/>" will take place from Friday, June 28 through Sunday, June 30. Join 15,000 other visitors from around the world in this second largest of all ham radio gatherings!

Tickets for the Friday evening Contest Dinner at the International DX Convention <http://www.dxconvention.com/> in Visalia are now available for purchase <http://www.dxconvention.com/pages/dinners-contest.html>. Unlike previous years, no walk-up tickets will be available. None. Nada. Zip. As dinner organizer, Jeff WK6I suggests, "Please plan ahead!!!"

Dayton Dead Ahead! All of the details on the 2013 Hamvention Antenna Forum <http://www.hamvention.org/forums.php> and many more for 2013 are now posted online for your planning purposes. Contesting related events for all four days are posted <http://www.hamvention.org/events.php>, too. (Thanks, Tim K3LR)

Activity on the contesting.com Contest wiki seems to have expired. Nevertheless, the CQ World Wide Contest web site is actively maintained and includes a list of contest clubs <http://www.cqww.com/clubnames.htm>. Make sure your club's information is in the list - maybe there is a contester near you that needs a club! (Thanks, Randy K5ZD and Pete N4ZR)

On January 24th, the United States Naval Academy Alumni Association announced that Scott Redd, K0DQ will be recognized with the 2013 Distinguished Graduate Award <http://www.usna.com/page.aspx?pid=247> during a medal presentation ceremony on March 22 at the United States Naval Academy in Annapolis. You may also recognize Scott's U.S. Navy colleague, Ed N4OC in the video. Watch for more on K0DQ in an upcoming issue of the National Contest Journal <http://www.ncjweb.com/>. (Thanks, NCJ Editor, Kirk K4RO and Doug K1DG)

How do they do it? Here is an interesting blog
<http://cqww.com/blog/?p=67> on catching contest cheaters in the CQ
Worldwide contest. (Thanks, Daily DX <http://www.dailydx.com/>)

For those of you suffering from post-pileup depression, you might
benefit from the Onion-esque story Man Depressed Months After Contest
Ends
<http://www.noiseblankers.com/hijinks/2013/1/31/man-depressed-months-after-contest-ends.ht
ml>
on the Ham Hijinks page <http://www.hamhijinks.com> of the Noise
Blankers Radio Group website. Who shut down the Super Bowl? All
explained here. (Thanks, Kevin K5KVN)

Best pre-contest announcement ever - "four ops, maybe five if Dave's
defendant pleads out at trial and he gets to the station in time."

After every contest, what could be more fun than hearing the sad tales
of woe from friends and foes alike - especially foes. And sharing
yours, too! The Mt. Airy VHF Radio Club <http://www.packratvhf.com/> -
better known as the Packrats - has formalized this great tradition in
their Cheese Bits newsletter's "Crying Towel" feature. Great reading no
matter which end of the towel you're on!

AMSAT <http://www.amsat.org/> is now preparing for two launch
opportunities under the NASA Cubesat Launch Initiative. This is a great
example of the STEM (Science, Technology, Engineering, and Mathematics)
training ham radio can provide to students and faculty alike. Hams
pioneered the Cubesat concept - now the most-launched type of
satellite! The AMSAT engineering team expects to complete the
satellites Fox-1 in 2013 and have RadFxSat ready in the 2nd half of
2014. Both are designed with U/V-mode FM analog transponders, workable
with dual-band handheld radios and hand-held "Arrow" antennas. Lots
more technology will be aboard, of course, check out the AMSAT web site
for more information. (From AMSAT bulletin ANS-069)

How can you tell if a contest is right for you? The Potomac Valley
Radio Club conquers this conundrum with a clever calculation
<http://pvrc.org/k3tn/find_contest.pdf>. (Thanks, John K3TN)

The movie "Lincoln" featured true-to-life telegraphy at various
critical points throughout, leading many to wonder whether the
depiction was really accurate or not. The article "NOW STARRING
...TELEGRAPHY!" by James Wades WB8SIW published in the March issue of
the Potomac Valley Radio Club <http://www.pvrc.org/> newsletter goes
into some detail about the movie's depiction of our Morse progenitors.

Web Site of the Week - With sprint contests gaining in popularity right
and left, the schedule for the 2013 Spring VHF+ Sprints
<https://sites.google.com/site/springvhfupsprints/2013-announcement-rules>
has been released:

-
-
-

-
-

Get on for these short events and have fun! (Thanks, Darryl WW7D)

WORD TO THE WISE

Read the rules FIRST! In a 24 March webinar
<https://www2.gotomeeting.com/register/499861946>, CQ Contest Director
Randy K5ZD will provide an overview of the rule changes for the
upcoming CQ WPX 2013 contests and will answer questions from the
audience. (Thanks, Ken K4ZW)

==> SIGHTS AND SOUNDS

In memory of Gene Zimmerman W3ZZ, the Delmarva VHF and Microwave
Society (DVMS), K8GP and the Grid Pirates Contest Group (GPCG) are
republishing a webinar given by Gene on VHF Contesting - "What To Do
and How To Win <http://k8gp.net/>". The presentation, originally given
in 2010, is about 90 minutes long and covers station siting, station
design, station integration, winning strategies, digital modes and the
ideal stations. (Thanks, Chuck W4XP)

The open house tours of W3LPL are legendary but if Maryland is just
a bit too far away for you to attend, Frank has provided this video
tour <http://www.youtube.com/watch?v=j-Y6td01okQ> of his station. Don't
miss Frank's Mar 18th webinar <http://www.wwrof.org/> on the 1921
Transatlantic Tests!

And speaking of satellites as in the news section, just how DO you
build one, anyway? This BBC video
<http://www.youtube.com/watch?v=LFCMnxG12C8&feature=results_main&playnext=1&list=PL1DCA5E9
CF8DD8A8A>
"How To Build a Satellite" explains the basics - now get ready for
launch! (Thanks, Bryce KB1LQC)

"My old man's a radio 'am" - no, it's not Herman's Hermits with a
remake of "Henry the Eighth" but a brand-new original song
<http://soundcloud.com/steveontherock/radio-ham-song> about GJ2A's ham
radio adventures. (Thanks, Tim K3LR)

What did Bill Nye the Science Guy <http://www.billnye.com/> do before
he was famous? He was a real-life engineer and local TV comic
personality in Seattle, writing and performing in skits like this spoof
horror episode of "Date With An Engineer
<http://www.king5.com/entertainment/almost-live/Date-with-an-Engineer-120309589.html>"
on the KING-TV "Almost Live" show.

==> RESULTS AND RECORDS

Official results have been recently posted for two more WRTC-2014
<http://www.wrtc2014.com> qualifying events and the updated WRTC-2014
Event Scores are now posted online
<http://www.wrtc2014.org/qualifying/qualification-standings/>. Results

from the 2012 All Asian DX CW and SSB contests have been applied and several scores were adjusted or reassigned. Eight qualifying events have taken place for which official results are not yet available. Many Selection Area races are coming down to the wire as ARRL DX Phone was the last qualifying event! Look for the focus to switch to determining the Team Leaders, their Team Mates, and the pool of Referees. Just over 16 months are left until WRTC-2014! (Thanks, WRTC-2014 Team Selection Director, Dan K1TO)

Your ARRL DX Contest writeup authors would like to hear about your experiences in the recent contests. Do you have an exciting story, a tale of woe, or just good times? Large, medium, and small - it makes no difference 'cause we love them all! Send your material to Rick WW1ME <ww1me@roadrunner.com> (ARRL DX CW) or your editor <n0ax@arrl.net> (ARRL DX Phone) and be sure to post your photos on the ARRL Soapbox <http://www.arrl.org/soapbox> page, as well!

The results of the 2012 CQ VHF contest
<http://www.cq-amateur-radio.com/cq_contests/cq_ww_vhf_contest/2012_cq_ww_vhf_contest/2012_cq_ww_vhf_contest_results.pdf>
have been posted online and are also in the winter issue of CQ VHF Magazine (this year only). The 2013 contest results will be back in CQ next year. (Thanks, CQ VHF Contest Director, Steve N8BJQ)

The LQP (Locust QSO Party <http://www.k6vva.com/lqp>) results are now available. The Locust (a.k.a. Rick K6VVA) extends his congratulations to all the Category Winner entrants who will each receive a one year National Contest Journal <http://www.ncjweb.com/> subscription or renewal.

While the contests are never over until the log checkers say they're over, it sure looks like the K3LR teams have pulled off a sweep of the Big Four - CQ WW CW & SSB and ARRL DX CW & Phone. A sweep has been accomplished seven times, the last having been in the 2002/2003 contest season by the KC1XX team. Are there similar accomplishments from the DX side?

Here's an update on some serious DX - The long-distance low power record is held by KL7YU and W7BVV using one micro-watt on 28 MHz over a distance of 1,650 miles between Alaska and Oregon in 1970 - According to Rich Arland, K7YHA (now K7SZ), in WorldRadio magazine (Feb. 1990, pp. 46-47.) 1.6 billion miles per watt! (Thanks, Mark K6UFO)

OPERATING TIP

Be prepared - run through a station checklist well before the contest, including for the operator! Then be ready for problems during the contest because Murphy is never far away. Multi-operator station hosts know this well - sometimes there are repairs that have to be done during the race! K3LR had ring rotators freeze up with icing during ARRL DX Phone - the rotators were freed with torches on the tower at midnight - three times during the weekend, in fact! Every big station

host deserves a tip of the contester's cap in recognition of and appreciation for what keeps those state-of-the-art signals sounding so superb.

==> TECHNICAL TOPICS AND INFORMATION

HFTA author Dean Straw N6BV writes to let us know, "Sometime in the last few month USGS has greatly changed their NED "Seamless" data site, requiring the instructions for finding and downloading terrain data to be re-written in HFTA.pdf. The new data site is called the "National Map."" Dean has updated the instructions for HFTA in a new PDF file available for download at in the Supplemental Information and Tools area of the ARRL Antenna Book <http://www.arrl.org/arrl-antenna-book-reference> website.

Tom KD8DEG, an experienced cable-puller, suggests that when pulling multiple cables through conduit, stagger the leading ends of the cables by five to seven inches. That avoids trying to get all of the cable ends through a sweep (use sweeps and not elbows) at once. For lubrication, he endorses the Polywater <http://www.polywater.com/lubricants.asp> line of products, leaving no residue and widely carried by electrical supply houses. And Gene AD3F reminds us to "Leave a pulling rope inside the conduit for (inevitable) future installs. You can install this rope along with the last coax pull."

Looking for cheap LEDs? You can "repurpose" the strings of solid and mixed color of LEDs available for a few dollars from department stores. Depending on the manufacturer, they may have from 50-100 LEDs. (Thanks, Kurt KD7JYK)

Speaking of LEDs, here's a great lighting ring design <http://www.instructables.com/id/Make-your-own-LED-ring-for-dremel/> to help you see clearly on the workbench when using a drill or grinding tool.

Whither Cycle 24? It's the cycle that just doesn't seem like it will ever get into high gear. NASA weighs in with the story "A Quiet Interlude in Solar Max <http://earthobservatory.nasa.gov/IOTD/view.php?id=80572>" on the interesting Earth Observatory website.

Much is made of technical literacy - here's an example of a web site promoting software literacy <http://www.code.org/> for kids growing up in a largely software-driven world. I can think of other examples of critical technologies that are little understood but on which a great deal of modern life depends - such as electricity and wireless technologies. (Thanks, Jim K9JF)

If you've ever worked with a crane, it's critical to have an accurate distance measurement from where the crane will set up to where the load is going. In the past you'd have to climb roofs or sometimes estimate blind distances and hope your estimate is a good one. Due to the

amazing abilities of smartphones, Steve K7LXC reports that the days of guesstimates are over. His crane operator used an Android app called Map Ruler to quickly get an accurate distance between a tower base and the crane location. It works for all kinds of site planning or measurement. These are examples of what is known as a "theodolite app" - some use a camera shot and some require sighting along an edge of the phone. They're not a replacement for the more accurate surveying equipment but for most amateur uses, they offer plenty of precision. (Thanks also to Jim W6RMK)

More on satellites, Mike DK3WN has produced a summary <http://www.dk3wn.info/p/?page_id=29535> of all active amateur radio satellites with frequencies and links to more detailed information. (From AMSAT <http://www.amsat.org/> bulletin ANS-069)

Technical Web Site of the Week - Watt's In a Name? Some time ago, Roy W7EL published an insightful perspective on "RMS Power <http://www.eznec.com/Amateur/RMS_Power.pdf>" on his website. Hint, this term doesn't have much meaning although it is widely used. (Thanks, Paul W9AC)

==> CONVERSATION

The RBN...and You

Following the ARRL DX CW contest, there was a lot of online discussion about the perceived quality of spotting information generated by CW Skimmers <http://www.dxatlas.com/cwskimmer/> operating around the world and relayed to the world-wide spotting networks. While the information may not have been any worse than the usual human-generated false data, its volume made it more noticeable. Since many Skimmer-generated spots came through the Reverse Beacon Network <http://www.reversebeacon.net/>, I offered this space to RBN leader, Pete N4ZR, to discuss the issue.

73, Ward N0AX

I'm delighted to be a guest writer for this issue because of the large audience of exactly the folks I hope to reach.

Let me begin by clarifying a little of what the RBN is and how it works. The spots forwarded by the RBN are collected by over 200 volunteer "Skimmers" worldwide. Each "beacon" is set up and paid for by individuals, and their setups range from simple single-band Softrocks to the sophisticated 7-bands-at-once QS1R, used by some 60 of our most active contributors. Antennas are anything from simple dipoles to the massive antenna farms at W3LPL and K3LR.

Throughout its lifetime, the RBN has functioned basically as a "mother ship", collecting all of these spots and redistributing them through two Telnet nodes, which in turn provide them to hundreds of DX cluster nodes worldwide. We also provide raw data for research and tools for comparing signals, but spots are our main line of business.

We're very concerned about the quality of the spots we provide. Each "Skimmer" is constantly being told how well the frequencies being reported compare with reference stations. When we notice (or are told about) stations with problems, we go to work with them to deal with the problem. After the ARRL DX CW contest, for example, we noticed that a couple of prolific Skimmers had image problems - the same station spotted simultaneously on two frequencies. We worked with the owners to resolve those problems quickly, and the RBN will be the better for it.

But what about busted spots? Well, under ideal conditions, I believe the Skimmer software's decoding is probably more than 99.9 percent accurate, far better than human spotters. But when you have 100+ Skimmers, operating under far from perfect circumstances, all contributing spots to a common stream which is forwarding around 2 million spots in a 24-hour period, there will be a fair amount of junk. We confronted this early on, and decided to rely on users constructing their own filters - more to come on this. We're currently evaluating whether this policy can be successful and may decide to make two streams available - one filtered and the other raw.

Okay, on to the "you" part. As a user of RBN spots, a lot of the raw stream will be unusable - what do you care what someone on the other side of the planet is hearing? A few of the big multis will want to see everything and do their own filtering, but for the rest of us, limiting the spots you see to those you can probably hear makes sense. I use a node that has AR Cluster Version 6 software installed, and can easily limit spots to those from Skimmers in the states surrounding my QTH. AR also has a very handy filter ("Unique>x") that only reports spots that meet your other conditions and have been heard by more than "x" Skimmers world-wide. Use a combination of these filters and you will virtually eliminate busted spots, even late in the contest when you've worked the bands dry of run stations.

For a contester who wants to be spotted often and correctly, here are a few simple suggestions. The use of the keywords "CQ" and "Test" has already been discussed at length elsewhere, but remains critical. You can even use this knowledge to reduce the size of your pileups, by omitting the keywords sometimes, using them at others.

Whatever you do, send everything at the same speed, and be sure to use correct spacing - if you send N4ZRTEST instead of N4ZR TEST, or send the "TEST" 15 wpm faster, you'll deserve what you get, or don't. If your call sign is unusual, in length or makeup of the prefix, you may need to send your call sign two or more times during each CQ - this is because CW Skimmer uses a table of prefixes and suffix lengths to determine how "picky" to be about what it copies - an odd call takes more validation before it is accepted.

One thing that affects both users and Skimmers is the various sources of spurious signals. If you are operating and Skimming at the same time, you'll need to disable your Skimmer receiver during transmit, or it will spot all sorts of weird variations of your call sign because of overload. If you want to be spotted on your actual frequency, make sure

that your signal is free of key clicks and harmonics.

That's pretty much the whole story. I hope it's helpful.

73, Pete N4ZR

==> CONTESTS

13 March through 26 March

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint--Phone, from Mar 17, 0000Z to Mar 17, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/sprintrules.php>

CWops Monthly Mini-CWT Test--CW, from Mar 13, 1100Z to Mar 14, 0400Z. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Feld-Hell St Patrick's Day Sprint--Digital, from Mar 16, 12 PM to Mar 16, 2 PM. Monthly on 3rd Saturday. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

BARTG HF RTTY Contest--Digital, from Mar 16, 0200Z to Mar 18, 0200Z. Bands (MHz): 3.5-28. Exchange: 3-digit serial and 4-digit time. Logs due: May 1. Rules <http://www.bartg.org.uk/>

Russian DX Contest--Phone,CW, from Mar 16, 1200Z to Mar 17, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or oblast abbr. Logs due: See web. Rules <http://www.rdxc.org/>

Oklahoma QSO Party--Phone,CW,Digital, from Mar 16, 1300Z to Mar 17, 0200Z. Multiple operating periods. Bands (MHz): 3.5-28, 50, Frequencies: CW 35 kHz above band edge; Phone 3.860, 7.195, 14.260, 21.335, 28.470, 50.130 MHz. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.k5cm.com/okqp.htm>

Virginia QSO Party--Phone,CW,Digital, from Mar 16, 1400Z to Mar 17, 0200Z. Bands (MHz): 1.8-28, 50-440, Frequencies (MHz): CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, clg freq 144/220/440. Exchange: Serial and VA county/city or S/P or "DX". Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

QCWA Spring QSO Party--Phone,CW,Digital, from Mar 16, 1800Z to Mar 16, 1800Z . Bands (MHz): 1.8-28, 50+. Exchange: Call,year lic'd,name,QCWA chap or S/P/C. Logs due: 30 days. Rules

<http://www.qcwa.org/qso-party.htm>

Run For the Bacon--CW, from Mar 18, 0200Z to Mar 18, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

CLARA and Family HF Contest--Phone,CW, from Mar 19, 1700Z to Mar 24, 1700Z. Multiple operating periods. Bands (MHz): 3.5-28. Frequencies (MHz): CW 3.688, 7.033, 14.033, 21.033; Phone 3.750, 3.900, 7.033, 7.200, 14.120-130, 14.288, 21.288, 28.488 MHz . Exchange: RS(T), name, QTH, and if CLARA mbr. Logs due: Apr 15. Rules <http://www.clarayl.ca/>

NAQCC Monthly QRP Sprint--CW, from Mar 21, 0030Z to Mar 21, 0230Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

FOC QSO Party--CW, from Mar 23, 0000Z to Mar 23, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, name, FOC nr if member. Logs due: 7 days. Rules <http://www.g4foc.org/>

Lighthouse Spring Lites QSO Party--Phone,CW,Digital, from Mar 23, 0001Z to Mar 30, 2359Z. Bands (MHz): 1.8-28. Exchange: ARLHS number or serial, name, S/P/C. Logs due: 12 days. Rules <http://arlhs.com/>

Alaska QSO Party--Phone,CW,Digital, from Mar 23, 1800Z to Mar 24, 2359Z. Bands (MHz): 1.8-28. Exchange: Serial, call sign, first name, 4-char grid square. Logs due: 2 weeks. Rules <http://www.kl7yk.us/akqso.htm>

VHF+ CONTESTS

Worldwide EME Contest--Phone,CW, from Mar 16, 0000Z to Mar 17, 2400Z. Bands (MHz): 144, 432. Exchange: TMO/RS(T) and "R". Logs due: Jul 14. Rules <http://www.dubus.org/>

Oklahoma QSO Party--Phone,CW,Digital, from Mar 16, 1300Z to Mar 17, 0200Z. Multiple operating periods. Bands (MHz): 3.5-28, 50, Frequencies: CW 35 kHz above band edge; Phone 3.860, 7.195, 14.260, 21.335, 28.470, 50.130 MHz. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.k5cm.com/okqp.htm>

Virginia QSO Party--Phone,CW,Digital, from Mar 16, 1400Z to Mar 17, 0200Z. Bands (MHz): 1.8-28, 50-440, Frequencies (MHz): CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, clg freq 144/220/440. Exchange: Serial and VA county/city or S/P or "DX". Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

QCWA Spring QSO Party--Phone,CW,Digital, from Mar 16, 1800Z to Mar 16, 1800Z . Bands (MHz): 1.8-28, 50+. Exchange: Call,year lic'd,name,QCWA chap or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

FOC QSO Party--CW, from Mar 23, 0000Z to Mar 23, 2359Z. Bands (MHz):
1.8-28, 50+. Exchange: RST, name, FOC nr if member. Logs due: 7 days.
Rules <http://www.g4foc.org/>

DXNL 1823 - March 13, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Fabian Kurz, DJ1YFK
(e-mail: dj1yfk@darc.de)

3D2, Fiji:
The T2GM DXpedition announced in the previous DXNL had to be
cancelled; instead the operators will try to get on the air
from Fiji. http://t2gm.org/

4X, Israel:
Dimitry, UT5UGR, will sign 4X/UT5UGR (March 15-18) and take
part in the Russian DX Contest as 4X0W. QSL via UT5UGR.

6W, Senegal:
Hans, PB2T, president of IARU Region 1, will be QRV as 6W/PB2T
from March 17 through 21. QSL via PB2T.

DL, Germany:
DR10EDBG is a special callsign of the ham radio group of
the General-Steinhoff barracks (DK0GSK) in Berlin-Gatow.
Throughout the year they will activate the special callsign
on the occasion of the 10th anniversary of the radio club.
The suffix EDBG is the former ICAO code of the Berlin-Gatow
airport. QSL via bureau.

The DARC district Baden celebrates its 60th anniversary with
the special callsign DL60BADEN and the S-DOK 60DA until the
end of the year. QSL via bureau.

EA, Spain:
Members of the "Team Cartagena" remember the launch of the submarine
"Isaac Peral" 125 years ago with the special call EH5SIP from March
17 to 31. Activities are planned in SSB and the digital modes. QSLs
will be sent automatically via bureau; direct QSLs up to 3 months
after the end of the activity via EA5HRD.

EP, Iran: Mohsen, EP3SMH, was heard on 15m and 20m between 1500 - 1600
UTC in RTTY. QSL only direct (9 GS + 1 IRC, QRZ.COM).

G, England:
Brian, G8GMU, Adam, G1ZHD, Steve, 2E0WZO (CW) and guests will use
the special call GB6CGC on March 16/17 to celebrate the 60th
jubilee of the "Coventry Gliding Club".
http://www.theglidingcentre.co.uk/

75 years ago the "HMS Belfast" was launched; this event will be
remembered from March 16 - April 12 with the special call sign
GB75HMS. QSL via bureau, direct via G0TOC.
http://www.gb2rn.org.uk

GI, Northern Ireland:
The "Foyle and District Amateur Radio Club" (MN0AKU) celebrates
"Saint Patrick's Day" (March 17) with the call GB5SPD. QSL via bureau.

HA, Hungary:
On the occasion of the 52nd FIRAC congress the special station
HG52FC will be on the HF bands in all modes until May 31st.
QSL via HA5BSW, LoTW, eQSL.

LY, Lithuania:
Throughout March, the special callsign LY63S remembers the 150th
anniversary of the Polish-Lithuanian uprising against Russia.
QSL via LY3BY, LoTW.

PA, Netherlands:
On March 17the special station PD70AW will be on the air from
the "Bunkermuseum Den Haag". QSL via PD2RKG (B).
http://www.bunkermuseumdenhaag.nl/index.php?page=contact-pagina

Joop, PD0RKA, celebrates his 70th birthday with the special call
PD70JT. He'll be on the HF bands from March 16 to April 13 and
send QSLs automatically via bureau. LotW and eQSL will be uploaded
too.

TA, Turkey:
Fraom March 16 to 18 the special call TC18M remembers the Naval
Victory of March 18, 1915. QSL via bureau. http://www.tcswat.org/

UA9, Asisatic Russia:
Victor, RA9ODR/m, (RDA NS-29) was worked on 20m SSB.

UK, Uzbekistan:
Takhir, UA1ZEY, will be QRV throughout March as UK/UA1ZEY from
Samarkand in his free time. He's QRV on the HF bands in CW/SSB.
QSL via home call, direct only.

V3, Belize:
Ron, WB1EAZ, and XYL Elaine, KA1UCC, will sign V31RT and V31BE
respectively from March 13 to 20. They are QRV in SSB with a
focus on EU, AS and OC contacts. QSL direct only.

VK, Australia:
The "Canberra Region Amateur Radio Club" (CRARC) takes part in
the 100th anniversary celebrations of Canberra with the special
callsign VI100ACT. QSL via VK1ACA (bureau).
http://www.crarc.ampr.org/index.php

W, USA:
The "American Legion Amateur Radio Club" celebrats its 94th
anniversary on March 15/16 with the special callsign N9L.
They will be QRV on 14270 kHz +/- 5 kHz (SSB) and 21040 kHz (CW).
QSL direct only. http://www.legion.org/hamradio

CW-OP wanted:
For a DXpedition to OC-285 in June, Ralph, H44RK is looking for
a CW operator (ralph.honiara[@]gmail.com).

7O6T Video:
A video of the 7O6T DXpedition is now available:
https://vimeo.com/61384528 http://www.intrepid-dx.com/

DXCC and IOTA:
The following DXpeditions were accepted for DXCC/IOTA credit:
T48RRC (NA-218), T47RRC (NA-086), T46RRC and T46T (NA-204).

Upcoming Contests

14.03. YL-Activity-Party
15.03. YL-Activity-Party
16.03. Mecklenburg-Vorpommern-Contest
16.03. AGCW-DL VHF/UHF-Contest
16./17.03. DARC HF-SSTV-Wettbewerb
16./17.03. Russian DX Contest
16.-18.03. BARTG HF RTTY Contest
17.03. North American Sprint
17.03. UBA Spring Contest

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island Activities

AF-003; ZD8; Ascension Is.: Mick, G1EUZ (RAFARS #1848), plans an
activity from Ascension (WLOTA 1491) as ZD8RAF with a IC-7000,
LDG IT-100, Alinco DM-W330MW PSU, Spiderbeam and dipoles. The
activation will take place between March 18 and 22.

AF-014; CT3; Madeira Is.: Peter, G3TKK will be QRV from Madeira from
March 12 to 22 and work as CT9/G3TKK in holidaystyle (CW/digital).
QSL via G3TKK.

EU-013; GJ; Jersey: Kazu, M0CFW, will be QRV from Jersey from March
15 to 17 as MJ0CFW. A participation in the Russian DX Contest and
the BARTG HF RTTY Contest is planned. QSL via home call, LoTW.

EU-115; EU-115; EI, GI; Ireland/Northern Ireland (Achill and other Coastal Is.): The "West Tyrone ARC" will, on"St. Patrick's Day" (March 18) be QRV from the city centre of Omagh in Tyrone (WLOTA 2484) with the special call GB1SPD. QSL via bureau. http://www.wtarc.org/

EU-120; G/M; English Coastal Islands: Terry/G3VFC, Keith/M0KJA, Fred/M0RFD, Rob/M0VFC, Dave/M6KOM, Maureen/M6VFC and Richard/2E1EVK will sign GX5MW/P from March 16 to 23 from the Isle of Wight (WLOTA 2985). QSL via M0FRD (d/B).

NA-105; FS/PJ7; St. Maarten: Randy/N0TG, Ron/AA4VK and Jeff/N1SNB planen vom 15. - 23. March von Sint Maarten (WLOTA 0711) QRV zu plan an activity from Sint Maarten (WLOTA 0711) from March 15 to 23. They will sign PJ7/homecall on the HF bands in all modes. QSL via direct or LotW.

Ark, UA4CC, will be QRV as FS/UA4CC from March 13 to 25 in holiday style from Saint Martin (WLLOTA 0383) with a K2 and a KPA500. Activity will take place on all bands in all modes. QSL via homecall, LoTW.

NA-106; KP2; Virgin Island: From the St. Croix Islands (USi VI002S, WLOTA 2477) Munekazu/JI3DNN (KP2/KI3DNN), Aki/JR3QFB (KP2/W3JH), Yoshiro/JL3SIK (KP2/K2JA), Take/JS6RRR (KP2/JS6RRR) and KP2/NH2KY (QSL via JR3QFB) will be QRV March 13 -19. QSLs via JA-Homecalls (d/B).

NA-174; VE8; N.W.T. (Foxe Basin) group (Air Force, Igloolik, Prince Charles, Rowley, Winter): David, VE3VID, will, during the next three weeks, activate the rare island Igloolik (Grid EP99) as VY0/VE3VID in SSB, RTTY and other modes (PSK-31, OLIVIA, HELL). QSL via home call.

OC-015; T2; Tuvalu: Tim/NL8F plans to be on the air from Tuvalu from March 19 to April 2, mostly in SSB. The callsign is not known yet. QSL via K8NA.

OC-038; ZL7; Chatman Islands: Jim/ZL1LC will visit Chatman Island (WLOTA 1627, WW Loc. AE16ug) from March 14 - 20 and plans to be active in PSK31 only as ZL7LC on the bands. This activity also counts for ARLHS CHA-009. QSL direct via EB7DX .

OC-086; KH0; Northern Mariana Islands: Masa/JN3MXT will be QRV from the Saipan Rental Shack on Saipan (USi NT002S, WLOATA 1333) from March 13 to 19 as KH0/JN3MXT. QSL via JN3MXT (direct preferred).

OC-136; VK3; Victoria State Centre group (incl. French, Phillip, etc.): Graham, VK3DOG, Keith, VK3FT, and Tony, VK3TZ, are planning to spend the next weekend (March 15-18) on Phillip Island. From a quiet location close to the sea they will be QRV with vertical antennas on the low bands and rotary dipoles for HF. QSLs via homecall.

The cable was there first, so perhaps "British Telecom is having
trouble with a mast erected underneath one of its cables by a Bridgend
radio ham" would be a more appropriate headline?

At one time, I believe that the GPO had automatic wayleave rights on -
and over - your property. ISTR that if they put a telegraph pole on your
land, they had to pay you a nominal 1 shilling rent per annum - although
possibly that was later superseded by a once-and-for-all single payment.

However, in this case, the main problem seems to be the neighbour, who
won't allow his phone line to be moved. Presumably BT don't have the
guts to tell him, "You have the choice of us moving it, or disconnecting
it."

Alternatively, why don't BT get into the 21st century, and run Mike
phone line underground. After all, cable companies like Virgin Media do
it 100% of the time - and I doubt if it costs anything like ï¿½900.

What's the saying .....? "Can we do it? No we can't!"

PS: Where's "Brig End"?

We know. They all moved to Scotland, and some of them can still be
seen posting to uk.r.a on a daily basis.

These days there are farmers and landowners making a packet for
hosting and powering mobile phone towers.

MMMonVHF Newsletter No. 1/ WEEK 11 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-03-13
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the
island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe
DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV
from 4 April to 18 April 2013 however, for Central Europe the EME window will open only
around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: EA8 ; Canary Isl. ; Square: IL38 ; start 2013-04-10

I will be back in EA8 from 10-17 April, for the last 2 or 3 visits I have given
priority to 70cm EME, this time I will get the 2m JT65 station qrv again as it
has been a few years since I did this. The station remains 350w - mgf1302 - 9 el
yagi with pol rotation. I will try and be qrv on N0UK if I have a internet
connection from Apr 11th onwards. Grid is IL38.

SOURCE: tnx to Dave EA8/G4RGK direct to MMMonVHf

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

UPDATE from Rene, Eeltje and Johan.
Good news! We have our single entry visa for Ghana! It took a whole day travelling to the Ghanese embassy and waiting, getting interviewed, filling in the right answers (in capitals)
and showing the proof of our returnticket and yellow fever vaccination, but eventually we got
a sticker in our passports. All on schedule now! This was not cheap. The three of us in total ?360 (450$).
Such a waste.... But with help of our sponsors the damage is less painful though donations still are more than welcome!

Thank for your votes for the best EME VHF DXpedition 2012. The two men DXpedition operated by
PA3CEE Eltje and Ren? PE1L to Uganda (5X1EME) won. We're proud that all our African DXpeditions
since 2009 got the first place. It's clear that we do our best, never resting and persisting in
getting all of you in the log and we want to promise you that our policy hasn't changed for 9G5EME.
You know us by know. We won't give up! Thanks for your trust gents! We're proud!

For 144 MHz we do use the same setup as we used in Gambia and Uganda, 2 x 8 Xpol a WA2ODO preamp and modest power.
If all ok we will have a small 70cm AND 23 cm setup with us.

Our schedule:
144 MHz start april 12th till april 14th (condx are not that great but OK for the bigger stations)
1296 MHz april 19th
144 Mhz april 20th (ARI contest)
432 MHz april 21th
144 MHz april 22nd till april 27th (22-24 good condx for smaller stations)

Power shutdowns are common in Africa so schedule can change and don't wait to make a contact with us till the last day.
Visit our website www.emelogger.com/ghana/

Johan, Eltje and Rene

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via

MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: 5H ; Tansania ; Square: KI94 ; start 2013-04-20

Activity from 5H on HF and EME
>From april 20 to april 28 Bode DF8DX is QRV as 5H1DX on HF and EME.
Main activity is in CW on HF band from 10m to 160m. I will do some EME on 70cm and 23cm with single yagi and 100W.
For EME is JT65 preferred but CW is welcome if your signal is strong enough and you can copy me.

SOURCE: tnx to Bodo, DF8DX, direct to MMMonVHF

** DXCC: MJ ; Jersey Isl. ; Square: IN89 ; start 2013-05-24

Several Belgian hams will be qrv from Jersey, IN89ve, between the 24 till 30 may 2013 , the aim is to be qrv on 2M, 6M, from 10m to 160 m , SSB and CW, PSK with an emphasis on the higher bands ,
conditions permitting.

SOURCE: tnx to ON4CKM direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on

50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

Amateur Radio Ops Come Together for Field Training, Emergency Preparedness:

Posted: 13 Mar 2013 04:29 AM PDT
http://www.eham.net/articles/29858

WCARES is a group of about 40 amateur radio operators who volunteer their time, equipment and expertise to serve Washington County when the need for emergency communication arises, such as a natural disaster, blackout or other event causing the loss of Internet, cell phone or landline service. Every member is a qualified operator trained in incident communications, message handling and communications traffic control. The group also provides non-emergency communications support for events including Ironman St. George, Huntsman World Senior Games, Zion 100/50 marathon and St. George Marathon. "WCARES fills a communications gap," WCARES Emergency Coordinator Jim Ashby said. "Our motto is 'When all else fails, amateur radio is there.' We will be there when the need arises to keep the lines of communication open and clear."

Scientists Use DNA to Create Nano-Encrypted Morse Code:

Posted: 13 Mar 2013 04:28 AM PDT
http://www.eham.net/articles/29857

Hidden in a tiny tile of interwoven DNA is a message. The message is simple, but decoding it unlocks the secret of dynamic nanoscale assembly. Researchers at the University of Illinois at Urbana-Champaign have devised a dynamic and reversible way to assemble nanoscale structures and used it to encrypt a Morse code message. Led by Yi Lu, the Schenck Professor of Chemistry, the team published its development in the Journal of the American Chemical Society. Scientists and engineers who work with nanoscale materials use an important technique called programmable assembly to strategically combine simple building blocks into larger functional components or structures. Such assembly is important for applications in electronics, photonics, medicine and much more. The researchers started with a template of DNA origami -- multiple strands of DNA woven into a tile. They "wrote" their message in the DNA template by attaching biotin-bound DNA strands to specific locations on the tiles that would light up as dots or dashes. Meanwhile, DNA bound to the biotin derivative filled the other positions on the DNA template. Then they bathed the tiles in a streptavidin solution. The streptavidin bonded to both the biotin and its derivative, making all the spots "light up" under an atomic force

microscope and camouflaging the message. To reveal the hidden message, the researchers then put the tiles in a solution of free biotin. Since it binds to streptavidin so much more strongly, the biotin effectively removed the protein from the biotin derivative, so that only the DNA strands attached to the unaltered biotin kept hold of their streptavidin. The Morse code message, "NANO," was clearly readable under the microscope.

I'm not surprised!

"My equipment consists of a Perseus type communications receiver and an array of 3000 foot long antennas,
one of which is pointing at your direction.

"Circumstances are ideal up in Finland's northern region Lapland, far above the Arctic Circle, because there is
space for long antennas, and hardly any man-made electrical noise or interference."

So now you know...

RAC Bulletin 2013-010E - TCA late thiss month
2013-03-`13

I just spoke to the printer and TCA was sent to Canada Post late last week and should have been getting delivered as of Monday. RAC's copies of the magazine are still at the printer and they will be delivered there soon.

The online version of TCA has been prepared by me and is now in Paul Burggraaf's capable hands for posting. I also need to update the TCA webpages but Paul and I were trying to synchronize it with the mail delivery. I'm going to update the pages later this afternoon but I don't know when Paul plans to go live with the eTCA.

The delivery is a bit late this time because RAC wanted to wait until after the February planning meeting before going to press.

The online version of the The March-April 2013 eTCA will be available soon to members on the RAC website.

N2IS (NJ) Wins Appeal - Can Erect 96' Crank-Up

Posted: 12 Mar 2013 08:20 PM PDT
http://forums.qrz.com/showthread.php?383386-N2IS-(NJ)-Wins-Appeal-Can-Erect-96-Crank-Up&goto=newpost

New Jersey Ham Wins Appeal - Can Erect 96☐ High Antenna System

In April 2012, Ira Saber, DMD, N2IS, filed an application for a building permit in Morris Township, NJ. Over a month later, the Township☐s Code Enforcement Officer informed Saber that the proposed 96☐ high private radio antenna system, on his modest ¼ acre property, may violate the height requirement in the zone. On appeal to the Zoning Board of Adjustment, Saber submitted a ☐Showing of Need for Height of an Amateur Radio Antenna Support Structure,☐ prepared by Dennis Egan, W1UE, an ARRL pamphlet entitled ☐Antenna Height and Communications Effectiveness,☐ prepared by N6BV and K1TD, and a brief by his lawyer, Fred Hopengarten, K1VR.

In December 2012, after soliciting opinions by the township☐s RF consultant, the township planner, and the attorney to the Board of Adjustment, the Zoning Board of Adjustment held a hearing. Saber and Hopengarten appeared. The Board voted unanimously that Saber☐s building permit should be issued as requested.

The Board of Adjustment attorney wrote in his opinion letter: ☐it is apparent that the essence of the FCC☐s preemptive intent as expressed in PRB-1 was to guarantee that each amateur radio operator could install functional antennas for all amateur frequency bands, at the licensee☐s residence.☐

The full decision, and the opinion of the Board☐s attorney, may be found under "Resolution of Findings and Conclusions, Ira J. Saber☐ at www.antennazoning.com/main/page_amateur_radio_legal_library.html

The building permit has now been granted.

Anyone able to help? Peter Le Quesne ZL4TCC has a request for information as follows:

There was a Ham who got the first message out of Napier by Radio on 3rd February 1931 when the earth quake hit. at 11am his messages were received in Canterbury/Otago at 1pm

Can you assist me in locating any article that may have been published in Break In, I have a feeling there was an article many years ago.

His name was G.E. (Dick) Tyler ZL2GE Vigour Brown Street, Napier.

Peter Le Quesne. ZL4TCC email: paleq@clear.net.nz

Election results will be advised as soon as possible after votes are counted on the 20th March here at NZART headquarters.

A full list of Council members and their biographies will be included in the June Break In.

Talk soon…Debby ZL2DL

Technology Convention, Easter, Auckland 2013

Don’t forget to register for Technology Convention, to be held at the Western Springs Garden Community Hall, Auckland over March 30 and 31 (Easter).

See last Infoline or http://www.qsl.net/zl1bq/ for details

Review of 70 cm Bandplan

In response to concerns expressed by a significant number of radio amateurs NZART Council has resolved that there is to be a review of the New Zealand band plan for the 70 cm band. A copy of the current NZART plan is appended below.

At the NZART Council Face to Face Meeting in Wellington on Saturday the 16th of February a working group was formed comprising of Councillors Warren Harris ZL2AJ, Neill Ellis ZL1TAJ and Phil King ZL1PK with members of FMTAG David Andrews ZL2SX, Doug Ingham ZL2TAR and Terry Thomas ZL4TAE. It is intended that it also be discussed at the 2013 Technology Convention over Easter in Auckland.

Submissions are invited from all NZ radio amateurs so that this can be achieved. Please send all submissions either by e-mail to 70cmreview@nzart.org.nz or by posting to “70 cm Bandplan Review, NZART HQ, PO Box 40525, Upper Hutt 5140.”

All submissions should contain your callsign and contact address.

Some matters you might like to consider in your submission are:

Any issues with the current plan with a solution if possible.

Amateur Television operation in the 70 cm band including both Digital and Analogue and the effects on weak signal operators on the band (Satellite, EME and DX).

Interference to 70 cm operations from Low Interference Potential Devices allowed under the GURL.

70 cm Repeater inputs being in the frequency range of the Low Interference Potential Devices.

Compatibility of our plan with the Wireless Institute of Australia plan, noting that Australia has an additional 10 MHz of spectrum (see below).

Compliance with the IARU Region 3 plan (see below).

Any significant usage or suggestions for future usage that is not covered in the current plan.

Please make your submissions by 20th April 2013.

Jock White Field Day Logs

I have so far received a few logs but there are still a lot more to arrive!

It is vital that I receive all logs for field stations (i.e. if you gave out a branch number other than zero) as it makes my job considerably easier for working out who was a valid multiplier/branch point.

If you do not wish to submit an entry I would appreciate just the raw log sheets. If you are having any difficulty scoring your entry please feel free to contact me at the e-mail address below.

The closing date for logs is the weekend of the 23rd of March. I am flexible so late entries will be accepted within reason but it would be appreciated if you can work to the above date.

Thanks for your help and participation

BRANCH 74 – WELLINGTON VHF GROUP DIGITAL TELEVISION TEST TRANSMISSIONS FROM MT BELMONT

Transmission of the unmodulated CW carrier continues on 506 MHz, with horizontal polarisation. Reception reports are welcome.

Adjustment and testing of the digital modulator is complete. The prototype power amplifier module has been constructed and is now undergoing quality testing. Once testing is complete another three modules will be constructed. The four modules will operate in parallel.

For more information, and frequent updates, go to:

www.vhf.org.nz

FMTAG NOTES FOR HQ INFOLINE 269

FINAL RECOMMENDATION

At its March 2013 meeting, NZART Council approved the following application:

ZL2WHO has applied for a 2-metre beacon at Waipuna, co-located with the existing 6-metre beacon, at TOPO50 BJ33 890.46 298.11. The frequency will be 144.271 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

IARU E-LETTER

The International Amateur Radio Union

IARU Electronic Newsletter

1 March 2013

In this Issue:

World Amateur Radio Day 2013

IARU Michael J. Owen VK3KI Award

UK Amateurs Gain Increased Access to 5 MHz

World Amateur Radio Day 2013

Each year the IARU Administrative Council selects a theme for World Amateur Radio Day (WARD) for the following year. WARD takes place each year on April 18. At the November, 2012 Administrative Council meeting the AC adopted the following proposal: "The theme 'Amateur Radio: Entering Its Second Century of Disaster Communications' was adopted for the next World Amateur Radio Day, April 18, 2013."

The selected theme for 2013 is a excellent opportunity for amateur radio emergency communications or disaster communications groups to take advantage of the WARD to highlight the role amateur radio plays in disaster communications and disaster response. IARU member-societies could arrange amateur radio demonstrations in public places such as parks or shopping areas. Prepared handouts could explain the benefits of amateur radio in times of emergency or disaster. A ham radio demonstration in public areas usually generates inquiries and questions from the public about amateur radio and it also provides a great opportunity to attract new ham radio operators. If you plan on such a demonstration, don't forget to include some young people from your society so that young people who happen by the demonstration can see that amateur radio activity can be enjoyed by people of all ages.

In 2013, April 18 is a weekday. However, that doesn't prevent the public activity from taking place on the weekend before or after April 18. The idea is to gain as much exposure and publicity for amateur radio as possible.

Emergency communications groups might also combine a public demonstration for WARD with a simulated emergency test (SET).

WARD also provides an opportunity for amateurs to give presentations about ham radio to such groups as civic organizations, charitable groups, etc. For example, Rotary Clubs and Lions Clubs are only two of many worldwide organizations who have weekly meetings and these organizations are always looking for interesting and informative programs to present to their membership. There are very few experienced hams who can't talk for 15 or 20 minutes about ham radio in a positive

fashion. Don't make the talk too technical. Stress the fun aspects of ham radio and the opportunity to assist in times of disaster. Keep the presentation to about 20 minutes to allow time for questions.

The fact that World Amateur Radio Day only happens one day each year shouldn't prevent IARU member-societies from promoting ham radio all during the year of course. Some member-society officials have expressed concern about a decrease in the number of new amateurs entering ham radio in their country. Upon further examination and discussion, it turns out there are many activities that societies could be involved in to increase public exposure to amateur radio but many are not taking advantage of those opportunities. WARD provides an opportunity to get out and make the effort to show the public what ham radio is about.

And, if your member-society is involved in promoting amateur radio on a regular basis and it has been a success, let me know. I will publicize the activity in this newsletter so that other member-societies can benefit from activities that have attracted people to amateur radio.

IARU Michael J. Owen VK3KI Award

The IARU Administrative Council created the IARU Michael J. Owen VK3KI Award in November, 2012. The Administrative Council Summary Record states: "10.13. The AC created the IARU Michael J. Owen VK3KI Award. A recipient of the award will be named from time to time and the award will be restricted to those individuals who perform above and beyond their volunteer roles either for a specific task or for long standing involvement on behalf of IARU. Nominations for this award should be directed to the IARU Secretary and will be forwarded to the AC for consideration at an AC meeting."

Michael was the President of the Wireless Institute of Australia at the time of his death in September, 2012. He started his involvement in IARU affairs in mid 1970's as a member of the newly formed IARU Region 3 Association, an organization of IARU member-societies in the Asia-Pacific region. He was involved in WARC 1979 when amateur radio gained bands at 10, 18 and 24 MHz. He was heavily involved in WRC 2003 and the Article 25 re-write which contain the rules that apply specifically to the amateur and amateur-satellite services. From 1989-1999, Michael served as IARU Vice President. After stepping down as IARU VP, he became involved in WIA and had an important role in transitioning the WIA from a confederation to a national amateur radio society. He then turned his attention once again to IARU Region 3 and served as Chairman of IARU Region 3 since 2006 until the time of his death.

Michael's enthusiasm and experience was beneficial to all of the IARU member-societies and his passion for amateur radio will remembered well by those who had the good fortune to know Michael.

If you know an any deserving individual who has contributed time and effort to the IARU and the IARU member-societies, please send along the

information about the person to me as IARU Secretary and the individual will be considered for the award by the Administrative Council.

Amateur Access to 5 MHz for UK Hams

After 1 January 2013, UK amateurs who hold a "full" license have been allowed to apply to operate on frequencies within the 5 MHz band. Following a request from the Radio Society of Great Britain for increased access to the 5 MHz (Experimental) Band, Ofcom (the UK independent telecom regulator) secured the agreement of the primary user to increase spectrum access from the current 7 spot frequencies of 3 kHz each. Details of the change can be found at http://www.rsgb.org/committees/spectrumforum/5mhz.php Congratulations to the RSGB for their effort to gain additional access to 5MHz. Let's hope this news encourages some of the other IARU member-societies to approach their telecom authority with a request for access to the 5 MHz if they currently have no operating privileges in that band. (Credit: RadCom, March 2013 issue and RSGB)

73, Rod W6ROD

Distribution Of This E-Letter

This electronic newsletter is sent to many IARU member-societies headquarters around the world. Individual amateurs should encourage their IARU national society to forward the newsletter to its own members. The newsletter can also be read and downloaded from the IARU web site at www.iaru.org.

If you are an ARRL member, you can subscribe to this E-Letter directly on the ARRL web site. When you log into the ARRL web site, go to the page where you can edit your profile and choose the electronic newsletter options that are available.

If you have any information that would be appropriate to publish in this electronic newsletter, please contact me at w6rod@iaru.org.

Rod Stafford W6ROD

IARU Secretary

The IARU E-Letter is published on behalf of the Administrative Council of the International Amateur Radio Union by the IARU International Secretariat. Editor: Rod Stafford, W6ROD, IARU Secretary. Material from The IARU E-Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The IARU E-Letter and The International Amateur Radio Union.

Enigma World Code Group and website

The attached flyer and website was designed especially for those interested in learning about and using the German WWII Enigma code. This subject seems to appeal to amateur radio enthusiasts because of the use of code. I encourage all hams to try it out!

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the March/April issue of Break-In-closes on 10 May 2013.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy. All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 5 May 2013 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail:
zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on Sunday 31st March 2013. Next HQ-Infoline e-mailed on FRIDAY 5th April 2013. Closing date for this is Thursday 4th April 2013.

News will return March 28.

==> + SOLAR CYCLE 24 MAY HAVE "DOUBLE PEAKS," SAYS NASA SOLAR PHYSICIST

<http://www.arrl.org/images/view/News/doublepeak.jpg> According to
NASA, the current solar cycle -- Solar Cycle 24 -- should hit its
"solar max" sometime in this year, but so far, solar activity has been
relatively low. According to an article by NASA's Dr Tony Phillips,
this period of quiet has led some observers to wonder if forecasters
missed the mark. But solar physicist Dean Pesnell of NASA's Goddard
Space Flight Center has a different explanation: "This is solar
maximum. But it looks different from what we expected because it is
double peaked." Pesnell noted similarities between the current cycle
and Solar Cycle 14, which happened between February 1902 and August
1913 and experienced a double peak. If the two cycles are in fact
```

twins, he said that "it would mean one peak in late 2013 and another in 2015." Read more here <http://www.arrl.org/news/solar-cycle-24-may-have-double-peaks-says-nasa-solar-physicist>.

==> + AMATEUR RADIO IN THE CLASSROOM: DARA TO PROVIDE FINANCIAL SUPPORT FOR ADVANCED TEACHERS INSTITUTE SESSION

The ARRL is preparing to present the 2013 sessions of its popular Teachers Institute on Wireless Technology this summer. For the fourth year in a row, the Dayton Amateur Radio Association (DARA) will provide financial support for the advanced session of the Teachers Institute (TI-2). The TI-2 session -- Remote Sensing and Data Gathering -- will be held July 22-25 at DARA's new classroom facility at their clubhouse in Dayton, Ohio. In addition, there will be two basic Teachers Institute sessions (TI-1) this summer: One at ARRL Headquarters in Newington, Connecticut (July 8-11) and one at Parallax, Inc in Rocklin, California (July 15-18). Read more here <http://www.arrl.org/news/dara-to-provide-financial-support-for-advanced-teachers-institute-session>.

==> + BOB BRUNINGA, WB4APR, TAKES APRS UNDERGROUND

Bob Bruninga, WB4APR, led a group of radio amateurs earlier this month to Mammoth Cave -- the world's longest known cave system -- at Mammoth Cave National Park in Kentucky to test how the Automatic Packet Reporting System (APRS) can be used as a means to extend radio communications underground. "When used underground, VHF and UHF radios can only work within a few hundred feet of each other and only when in the line of sight of another radio," Bruninga explained. "This makes routine use of these radios of little value when underground; however, when APRS radios act as packet digipeaters, these few hundreds of feet can be extended by an order of magnitude." Bruninga, a senior research engineer at the US Naval Academy, developed APRS as a global, on-air protocol for supporting handheld position reporting and text messaging via VHF radio. Read more here <http://www.arrl.org/news/bob-bruninga-wb4apr-takes-aprs-underground>.

==> + AMATEUR RADIO IN SPACE: ASTRONAUTS RETURN TO EARTH FROM ISS; WATCH LIVE ON NASA TV

After spending 143 days in space, Expedition 34 Commander Kevin Ford, KF5GPP, Russian Soyuz Commander Oleg Novitskiy and Russian Flight Engineer Evgeny Tarelkin (both of the Russian Federal Space Agency) will begin their voyage home to Earth on Thursday, March 14, marking the end of Expedition 34 on board the International Space Station (ISS). The trio will undock their Soyuz spacecraft at 8:30 PM EDT (0030 UTC on Friday, March 15) for the flight home. They are scheduled to arrive in Arkalyk, Kazakhstan almost four hours later at 11:57 PM EDT (0357 UTC on Friday, March 15). NASA will televise the farewell ceremony, as well as the undocking of the Soyuz craft, its launch and its landing in Kazakhstan live on NASA TV. Read more here

<http://www.arrl.org/news/astronauts-return-to-earth-from-iss-next-week-watch
-live-on-nasa-tv>.

==> TWO NEW BOOKS FOR YOUR AMATEUR RADIO LIBRARY

The ARRL has released two new books: Ham Radio for Arduino and PICAXE <http://www.arrl.org/shop/Ham-Radio-for-Arduino-and-PICAXE/> edited by Leigh L. Klotz Jr, WA5ZNU, and Radio Science for the Radio Amateur <http://www.arrl.org/shop/Radio-Science-for-the-Radio-Amateur/> by Eric Nichols, KL7AJ.

Ham Radio for Arduino and PICAXE

Microcontroller technology has exploded in popularity among ham radio operators. The new generation of single-board microcontrollers is easier than ever to use, bringing together hardware and software for project building that radio amateurs can easily dive into. With inexpensive microcontroller platforms -- such as the popular open-source Arduino board -- readily available parts, components and accessory boards, you can create beacon transmitters, keyers, antenna position control, RTTY and digital mode decoders, waterfall displays and more.

Editor Leigh L. Klotz Jr, WA5ZNU, has assembled this first edition of Ham Radio for Arduino and PICAXE to help introduce radio amateurs to the fun and rewards of experimenting with microcontrollers. Klotz and other contributors have designed projects that will enhance your ham radio station and operating capabilities, or you can use these projects as a launch pad for creating your own projects.

Radio Science for the Radio Amateur

In Radio Science for the Radio Amateur, Eric Nichols, KL7AJ, explores and explains the often profound differences between science and technology, dispelling the notion that we know all there is to know about radio. Using a fresh, playful approach, Nichols guides readers through some of the most fascinating "nooks and crannies" of the radio universe. Along the way, you'll find out how solving long-standing mysteries of radio -- of which there are still many -- doesn't require expensive hardware, but merely a scientific mindset and attention to detail.

These new publications are available from your ARRL Dealer <http://www.arrl.org/arrl-publication-dealers> or the ARRL Store <http://www.arrl.org/shop/Ham-Radio-for-Arduino-and-PICAXE/>. Ham Radio for Arduino and PICAXE <http://www.arrl.org/shop/Ham-Radio-for-Arduino-and-PICAXE/> (ARRL Order No. 3244), ISBN 978-0-87259-324-4, $34.95 retail, special ARRL Member Price $29.95, plus shipping; Radio Science for the Radio Amateur <http://www.arrl.org/shop/Radio-Science-for-the-Radio-Amateur/> (ARRL Order No. 3381), ISBN 978-0-87259-338-1, $27.95 retail, special ARRL Member Price $24.95, plus shipping.

==> + W1AW ANNOUNCES 2013 SPRING OPERATING SCHEDULE

With the switch from Standard Time to Daylight Saving Time this past weekend, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. Your local standard times have not changed, but the UTC times they reference have. Read more here <http://www.arrl.org/news/w1aw-announces-2013-spring-operating-schedule>.

==> + ARRL, MICROSOFT RESOLVE E-MAIL BLOCKAGE

After more than 20,000 ARRL members had their arrl.net and arrl.org e-mails blocked by Microsoft <http://www.arrl.org/news/more-than-20-000-b-arrl-net-b-b-arrl-org-b-e-mail-addresses-blocked-by-microsoft>,
the issue has been resolved. According to ARRL Information Technology Manager Michael Keane, K1MK, Microsoft told the ARRL that the mail blockage from ARRL servers to Microsoft domains (including msn.com, hotmail.com, live.com and outlook.com) was mitigated as of Sunday, March 10.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar indicators were mixed this week, with the average daily sunspot number down 8.4 points to 84.9, while the average daily solar flux rose 5.9 points to 118.5. Geomagnetic indices were much quieter, with the average planetary A index down 4.7 points to 4.4 and the average mid-latitude A index down 5 points to 3.9. The predicted solar flux for March 14-15 is 120, then 115 on March 16-17, 110 on March 18-20, 105 on March 21, 95 on March 22-24, 100 on March 25-26, 105 on March 27, 110 on March 28-31, 115 on April 1-3, and then peaking around 120 on April 4-11. The predicted planetary A index on March 14-16 is 8, 20 and 12, indicating more geomagnetic activity similar to March 1-2. The predicted planetary A index is 5 on March 17-20, 8 on March 21, 5 on March 22-27, 18 and 10 on March 28-29, and back down to 5 on March 30-April 16. Look for more on the ARRL website on Friday, March 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + US POSTAL SERVICE INTRODUCES GLOBAL FOREVER STAMP

In addition to an increase <http://www.arrl.org/news/postage-rates-to-rise-this-month> in postal rates in January 2013, the US Postal Service introduced a new Global Forever First-Class Mail International stamp <http://about.usps.com/news/national-releases/2013/pr13_011.htm>. Priced at $1.10 each and offered in a pane of 20, the new stamp offers a single price for any First-Class Mail International 1-ounce letter to any country in the world, as well as 2-ounce letters to Canada. The stamp is available online <http://www.usps.com/stamps>, at post offices in the US or by calling 1-800-782-6724. -- Thanks to ARRL Oklahoma Section Manager Kevin O'Dell, N0IRW, for the information.

==> BRITISH HAM RECEIVES 2012 CASS AWARD

Rob Chipperfield, M0VFC/ZD9UW, of Cambridge, England, received the 2012 Single-Operator Cass Award. The Cass Award <http://www.cassaward.com/> -- a monetary award of $1000 -- is offered as an incentive to encourage DXpedition operating excellence, and to encourage DXpeditions to maximize the number of different DXers worked. Chipperfield received the award for working 3362 unique stations over his four-day DXpedition to Tristan da Cunha in October 2012. In order to qualify for the award <http://www.cassaward.com/#rules>, he had to use radio transmitting and receiving equipment that he brought to Tristan da Cunha, as well as antennas that he either brought to Tristan da Cunha or that he constructed from local materials. The Cass Award is named in honor of Hugh "Cass" Cassidy, WA6AUD (SK), who published the West Coast DX Bulletin from 1968-1979.

This Week in Radiosport

This week:

- March 15 -- NCCC Sprint
- March 16 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- March 16-17 -- Virginia QSO Party; Russian DX Contest
- March 16-18 -- BARTG HF RTTY Contest
- March 17 -- North American Sprint (SSB)
- March 18 -- Run for the Bacon QRP Contest
- March 21 -- NAQCC Straight Key/Bug Sprint

Next week:

- March 22 -- NCCC Sprint
- March 24 -- UBA Spring Contest (SSB)
- March 27 -- SKCC Sprint
- March 27 28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

Upcoming ARRL Section, State and Division Conventions and Events

- March 16 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-2>, Lincoln, Nebraska; ARRL West Texas State Convention <http://www.arrl.org/hamfests/west-texas-section-convention-58th-annual-st-patrick-s-day-hamfest>,
Midland, Texas
- March 23 -- ARRL South Texas State Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-3>,
Rosenberg, Texas
- March 29-30 -- ARRL Maine State Convention

<http://www.arrl.org/hamfests/maine-state-convention-3>, Lewiston,
Maine
- March 30 -- ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
-2>,
Raleigh, North Carolina
- April 13-14 -- Communications Academy
<http://www.arrl.org/hamfests/communications-academy-2013>, Seattle,
Washington
- April 19-20 -- Southeastern VHF Society Conference
<http://www.arrl.org/hamfests/svhfs-conference>, Cocoa Beach, Florida
- April 19-21 -- International DX Convention
<http://www.arrl.org/hamfests/international-dx-convention-2>, Visalia,
California
- April 20 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-northeast-louisiana-
regional-ham-radiofest>,
Monroe, Louisiana
- April 26-28 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-3>, Boise, Idaho
- May 4 -- ARRL South Carolina Section Convention
<http://www.arrl.org/hamfests/south-carolina-section-convention-upstate-hamfe
st-1>,
Spartanburg, South Carolina
- May 17-19 -- Dayton Hamvention
<http://www.arrl.org/hamfests/dayton-hamvention-4>, Trotwood, Ohio
- June 1 -- ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest-1>,
Marietta, Georgia
- May 31-June 2 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>,
Seaside, Oregon
- June 7-8 -- ARRL West Gulf Division Convention

Amateur Radio Newsline(tm) Report 1857 - March 15 2013

Please note that this is an extended newscast that runs 34 minutes 58 seconds from the tone. Mark (1 sec tone)

The following is a closed circuit and not necessarily for air. With a report on the current state of Amateur Radio Newsline's financial picture, heres our producer Bill Pasternak, WA6ITF:

--

Thanks to a number of you who provide month to month contributions it's been quite a long time since I've been here to ask for widespread support for the Amateur Radio Newsline operations. And while we deeply appreciate our ongoing contributors, the income we derive from their generosity is simply not enough to see us through the long term. And that long term is very quickly sneaking up on us. Simply said, Amateur Radio Newsline needs widespread support right now if we are to stay in operation to bring you these weekly newscasts and only you our friends and listeners can provide it.

To that end, we try to make it as simple as possible to make your tax deductible donation to us. Simply go to our website at www.arnewsline.org and click on the Pay Pal button to make a donation electronically. Or, if you rather, you can send us a check at the address heard at the end of this week's newscast. Either way, the all volunteer team at Amateur Radio Newsline once again says thank you in advance for your ongoing generosity and your support.

Im Bill Pasternak, WA6ITF, and hers Jim Damron, N8TMW, with this week's newscast.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1856 with a release date of March 8 2013 to follow in 5-4-3-2-1.

The following is a QST. 2013 will see two Global Simulated Emergency Tests in April; France approves digital voice for its ham community; a review of Canada's ham radio examination questions is underway; comments on WRC 2015 close on March 22nd; Dayton announces Hamvention 2013 award winners and the legendary CBS World News Roundup turns 75. Find out the details are on Amateur Radio Newsline(tm) report number 1857 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: TWO GLOBAL SIMULATED EMERGENCY TESTS IN APRIL

There will be two Global Simulated Emergency Tests taking place on the Saturdays either side of World Amateur Radio Day which is slated for Thursday April the 18th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has more:

--

Greg Mossop, G0DUB, is the International Amateur Radio Union Region 1 Emergency Coordinator. He says the first Global Simulated Emergency Test will happen on Saturday April 13th will repeat the format of 2011 using 'local time' for each station. This will give a good chance of messages moving towards the regional Headquarters Stations to be delivered. The second Saturday, April the 20th, will see answers to those messages, starting from the Headquarters Stations and being sent back to the countries that originated them.

According to Jim Linton, VK3PC, the Global Simulated Emergency Test also known as GlobalSET is an opportunity to increase the common interest in emergency communications, create practices for international emergency communications and the relaying of messages. Linton who is the Chairman of the IARU Region 3 Disaster Communications Committee says that GlobalSET is open to all three IARU regions and will be held on or near the emergency Center of Activity frequencies on the 80, 40, 20, 17 and 15 meter bands. VK3PC adds that the full rules concerning this emergency training operating event are available to those who register through their IARU Regional Coordinator.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, down-under in Nelson, New Zealand.

--

Again those dates are April 13th and 20th for the twin edition of thr 2013 Global Simulated Emergency Test. It will be followed June 25th to the 28th by the Global Amateur Radio Emergency Conference or GAREC 2013 in Zurich, Switzerland. (VK3PC)

**

RESTRUCTURING: FRANCE APPROVES USE OF DIGITAL VOICE AND OTHER DIGI MODES

France has finally approved the use of digital modes by its ham radio community. According to word from Digital Radioamateurs of France president F1SHS, the new draft regulation was signed by the Minister on Wednesday, March 6th. Until now French radio amateurs had been banned from using digital modes including D-STAR and the like. F1SHS calls this great news for the French amateur radio community following a lot of work on the part of the organization. (F1SHS, Southgate)

**

RESTRUCTURING: REVIEW OF CANADIAN AMATEUR RADIO EXAM QUESTIONS UNDERWAY

As a result of its response to a Request for Proposals from telecommunications regulator Industry Canada, Radio Amateurs of Canada has been awarded a $20,000 contract. This to review the questions used for examinations to qualify radio amateurs in that nation.

The actual work began back on January 28th with the final product will be delivered to Industry Canada on April 17th. More than 3000 questions are being reviewed. Of these 965 are in English and in French for the Basic qualification. Another 545 in English and in French for the Advanced qualification.

The objective of the review is to identify questions and answers no longer relevant as well as those requiring modifications to correct grammatical errors or improve clarity. The review should also lead to new questions on aspects of amateur radio that have changed in recent years.

The present work is the first comprehensive review of the Canadian question pool in more than a decade. While some current questions were revised in 2007 many questions date from much earlier. Radio Amateurs du Quebec Inc. is working with Radio Amateurs of Canada on the French language component of this question pool revision and overhaul. (RAC)

**

INTERNATIONAL: LAST CHANCE TO FILE COMMENTS WITH FCC ON WRC 15

Comments are due March 22nd on FCC draft recommendations regarding issues to be considered at the 2015 World Radiocommunication Conference or WRC. These discussions generally involve international spectrum related agreements. You can read the current recommendations at tinyurl.com/fcc-wrc-15.

The commission is also seeking comment on National Telecommunications and Information Agency's draft proposals to WRC-15. The NTIA is the Executive Branch agency that is principally responsible for advising the President on telecommunications and information policy issues. You can read its proposals at tinyurl.com/ntia-wrc-15

The FCC says that public input will help the commission in its upcoming talks with the Department of State and the N-T-I-A in developing United States positions for WRC-15. It should be noted that the FCC's International Bureau is inclined to support most of the suggestions provided by the WRC-15 advisory committee. Filed comments should reference IB Docket No. 04-286. (FCC, RW)

**

RADIO LAW: MONTANA HAMS WIN EXEMPTION FROM DISTRACTED DRIVING LAW AND MORE

Hams in Montana now have both antenna height limit and protection from distracted driving laws. The ARRL reports that on February 28th Governor Steve Bullock signed House Bill 148 into law to provide protections to the states ham radio community.

Montana State Representative Pat Connell, WA7PDC, had submitted the bill titled Clarifying Local Government Authority to Regulate Amateur Radio Operations to the 2013 Montana legislative docket. The new law prohibits local governments from regulating licensed amateur radio operations from a motor vehicle. It also establishes a 100-foot height limit below which local jurisdictions may not regulate ham radio towers and antennas.

You can read more details on this good news for Montana hams on-line at the ARRL website using the shortcut tinyurl.com/Montana-Antenna-Win

And oh yes: We you aware that the Montana state fossil is Maiasaur also known as the Duck-billed Dinosaur? According to Wikipedia it is, and we thought you would like to know. (ARRL, ARNewsline(tm), Wikipedia Commons)

BREAKING NEWS: HAMVENTION ANNOUNCES 2013 AWARD WINNERS

I'm Bill Pasternak, WA6ITF, with word that the Dayton Hamvention has announced this years winners of its famed Hamvention Awards. The news was made public on the March 13th edition of Ham Nation by past Hamvention General Chairman Michael Kalter, W8CI, with a well known ham from Germany garnering the top spot:

--

W8CI: Our Amateur of the Year is Mustapha Landoulsi, DL1BDF. He was actually born in Tunisia and has set up six amateur radio stations in Tunisia and has brought them into the IARU. He's worked tirelessly to help Middle-Eastrern countries and African counties in amateur radio. He also sped uo and organized the delivery of emergency medical equipment and medicine to African and other third world countries, and he is so well known throughout the world that his work actually embodies what amateur radio is about. He tries to bring peoples together from different countries and his heart is one hundred percent into amateur radio.

--

Recognized as this years Special Achievement Award recipient was George Thomas, W5JDX, of Ridgeland, Mississippi. For those few of you not aware, George the producer of the Internet TV show known as amateurlogic.tv. He also co-hosts Ham Nation with Bob Heil K9EID and Gordon West WB6NOA on TWiT TV. And he took the opportunity to thank those who have been working with him over the past few years:

--

W5JDX: "You know I couldn't do this without my partners Tommy, Jimmy and Peter and of coarse Bob and Gordo."

--

Sharing the 2013 Technical Achievement Award are Dave Whitten, KD0EAG and David Rowe, VK5DGR. They are being honored for their combined work in developing a free digital voice program that can encode high quality digital voice into a 1.25 kHz bandwidth for use on the High Frequency bands,

Rounding out this years winners is the West Palm Beach Amateur Radio Club in Florida. It was chosen for its ongoing outreach program to the local community that includes a 7 day a week manning of a ham radio at the South Florida Museum. Also noted was the clubs sponsorship of an ARISS contact that was made available live and in real time to a record 250,000 students across the state.

This years winners will receive their awards at Hamvention 2013 that runs from May 17th through the 19th at the Hara Arena the world ham radio capitol of Dayton Ohio. Its planners say that they hope to see you there.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. (Hamvention, Ham Nation)

**

ENFORCEMENT: COCOA BEACH FLA HAM ISSUED $25000 NAL FOR INTERFERENCE TO PRISON COMMUNICATIONS

A Cocoa Florida ham has been hit with a $25,000 Notice of Apparent Liability for allegedly causing interference to the Brevard County Sheriff's Department. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

According to the March 1st Notice of Apparent Liability issued to Terry L. VanVolkenburg, the FCC says that it used radio direction finding to locate a signal interfering with communications at the Brevard County Sheriff's Department jail in Sharpes, Florida. The FCC says that VanVolkenburg, whom the agency notes holds an Amateur Service license and the call sign KC5RF was the source of the interference to the prison complex which is licensed to use 465.300 MHz for its communications.

By way of background, in September of 2012, the Enforcement Bureau's Tampa Office received a complaint of radio interference from the Sheriff's Department. According to the complaint, on at least 14 days during the months of September and October of 2012 that law enforcement agency experienced intermittent interference to its communications at the jail on 456.300 MHz. Audio recordings taken by the Sheriff's Department suggests that a male individual interfering with the prison's communications by transmitting vulgar language, sound effects, previously recorded prison communications, and threats to prison officials over the prison's radio communications system.

In response, on October 28th of 2012 agents from the Tampa Office used direction-finding and traced the source of the interference to a residence in Cocoa, Florida. The agents also recognized VanVolkenburg's voice as the one interfering with the prison's communications system.

Approximately two hours after locating the source of the transmissions, the agents inspected the radio stations in the VanVolkenburg residence. The FCC says that VanVolkenburg initially showed the agents an amateur radio station that was incapable of transmitting on 465.300 MHz. However when pressed buy the investigators he eventually produced an Alinco DJ-C5 portable radio transceiver that could operate on 465.300 MHz.

Initially VanVolkenburg did not specifically admit that he had interfered with the prison's communications system. But when asked about the transmissions on 465.300 MHz and the interference to the prison he stated that he chose 465.300 MHz because the prison's transmissions on that frequency were strong. Also that he was only using 300 milliwatts and did not think that he could talk over anyone and therefore wasn't interfering with anyone. At that point VanVolkenburg is also reported to have declared that the interference would not happen again.

But in issuing the proposed fine the FCC is essentially saying that it does not buy Van Volkenberg's defense. It sates that while VanVolkenburg holds an amateur license and the call sign KC5RF, that this license does not authorize him to operate on public safety frequencies.

The FCC says that the bottom line is that the evidence in this case is sufficient to establish that VanVolkenburg violated the FCC rules on 14 different days during September and October of 2012. As such he is eligible for the proposed $25,000 fine.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

VanVolkenburg was given the usual 30 days from to pay the proposed fine or to file an appeal. (FCC)

**

ENFORCEMENT: FCC UPHOLDS $25000 FINE TO ALLGED MALL COMMUNICATIONS JAMMER

The FCC says that California resident Kevin Bondy will have to pay a $24,000 fine. Back in 2011 the commission issued a forfeiture order against Bondy for operating in the General Mobile Radio Service and unlawfully causing interference to licensed radio operations. He was also charged with refusing to allow the FCC to inspect his radio gear.

The commission said Bondy's radio equipment interfered with the two way radios used by The Oaks Shopping Center in Thousand Oaks, California. During its investigation FCC agents also found an unlicensed and unauthorized repeater transmitter in a secured radio communications facility on Oat Mountain in the Santa Susana Mountains. The transmissions effectively jammed Oaks' operations on two of its frequencies.

Now in its Memorandum Opinion and Order the FCC states that Bondy was supposed to file his appeal by July 6, 2011. While he did e-mail a copy to the local Enforcement Bureau, before that date the agency says there's no evidence Bondy sent a copy to the Commission Secretary as required by law. As far as the FCC is concerned this means that the appeal was not properly filed and the agency considers it as being procedurally defective.

In its release dismissing the appeal the FCC notes that Bondy raised no new arguments in the version that it did receive. Based on all the evidence before it the agency said as it decided to reaffirm and gave Bondy the customary 30 days from the February 15th release date of the Memorandum Opinion and Order to pay the amount in full. (FCC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: DRONE SEEN NEAR JFK INTERNATIONAL AIRPORT MAY HAVE BEEN A WAYWARD RADIO CONTROLLED MODEL PLANE

Federal officials say a small aircraft that reportedly looked like a drone and violated the airspace at John F. Kennedy International Airport in New York on March 4th was probably a radio controlled model aircraft sent aloft from Long Island that lost its way. Amateur Radio Newslines Steffan Kinford, N8WB, has more:

--

Whatever the object was, the FBI and the Federal Aviation Administration issued an alert on Tuesday March 5th. One seeking the public's assistance in identifying the operator and the aircraft which a nearby pilot described as black in color, about 3 feet wide with four propellers.

The unidentified aircraft was spotted about 1:15 p.m. Eastern Time on Monday March 4th by the pilot of an Alitalia airliner as it approached runway 31 Right at JFK International. Because no flight plan was filed with the FAA for the mystery aircraft, authorities believe it probably was a radio remote controlled model sent aloft by a hobbyist. Officials speculate that the craft likely took off from somewhere along the south shore of Long Island had drifted off course when the operator lost radio contact with it. It then flew in the direction of JFK International on its own.

In his report to the control tower, the Alitalia pilot said that he had seen what appeared to be a drone aircraft. At the time of the sighting he said the aircraft had an altitude of about 1,500 feet and was about three miles from his plane. That would put it well above the 400 foot height restriction for radio controlled model aircraft and well within restricted airport airspace.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, a few hundred miles West of JFK International in Wadsworth, Ohio.

--

Les Dorr is a spokesman for the Federal Aviation Administration. He says that regardless of whether someone is operating as a public agency or a person flying a model for recreational purposes, they always have to give way to any aircraft in the vicinity. In other words, you are not supposed to be flying anywhere near or over a major airport. (ThisWeek.com, HuffPost and other published news reports)

**

HAM RADIO ON THE SCREEN: MODERN AMATEUR RADIO FROM CANADA

Modern Amateur Radio is the title of a new, bi-lingual video produced in Canada by Donald Boucher, VE2XT. Boucher put the show together in full wide screen High Definition and it includes some truly breathtaking aerial footage of the Canadian countryside.

VE2XT tells Newsline that he owns a video production company in Montreal and that he shot the video last year in his spare time. Posting of the video to Youtube was done by CQ Propagation Editor Thomas Hood, NW7US.

What makes Modern Amateur Radio unique is its international flavor. While the narration is in English most of the natural sound background conversations are in French. But you do not have to understand the French language to truly enjoy this Canadian look at our great hobby.

You can see it for yourself at tinyurl.com/modern-amateur-radio (ARNewsline(tm))

**

HAM RADIO ON THE SCREEN: SPECIAL EVENT STATION 2O12L VIDEO NOW AVAILABLE

The organizers of 2O12L, the amateur radio special event station celebrating the London Olympic and Paralympic Games in the Summer of 2012 have now released a 45 minute DVD of the event. Produced by Fred Curtis G3SVK, the DVD goes behind the scenes of the event, telling the story of how those 69,644 QSOs were made possible. Details can be found at www.2o12l.com under the `News' link. (Southgate)

**

RADIO READING: CQ LAUNCHES ONLINE PHOTO GALLERY

CQ magazine has announced the launch of the online CQ Photo Gallery to supplement photos published in the magazine.

According to Editor Rich Moseson, W2VU, the magazine shoots photos at many events. It also receives many photos from readers that it does not have space to put in the magazine. But CQ still wants to share these with its readers and the new CQ Photo Gallery will allow it to do just that.

Moseson says that the new photo gallery is on the flickr.com web site and is organized into albums called sets. Initial sets include CQ cover images; the CQ Garage featuring ham radio license plates; news photos from the FCC's field hearing on communications lessons learned from Superstorm Sandy, and reader-submitted photos. New pictures will be added regularly.

The CQ Photo Gallery may be accessed at www.flickr.com/photos/cqphotogallery/sets but you can also reach it using the shortcut tinyurl.com/cq-photos-online. (CQ)

**

NAMES IN THE NEWS: M0VFC NAMED WINNER OF CASSADAY AWARD

Some names in the news. First up is Rob Chipperfield, M0VFC, who has been selected as the first recipient of the Cass award. This, in recognition of his DX operation from the remote South Atlantic island of Tristan Da Cunha as ZD9UQ in October of 2012. During his short four day operation Chipperfield worked 3,362 unique stations and there-by demonstrating an outstanding effort to log as many individuals as possible.

The Cass Award was created and named in memory of the late DXing legend Hugh Cassady, WA6AUD. It is meant to encourage DXpeditions to maximize the number of unique contacts made and comes with a $1,000 prize for

the single operator DXpedition that works the most unique callsigns within a four week period. More information about the award program is available at www.cassaward.com (GB2RS)

**

NAMES IN THE NEWS: RCA NAMES PATRICIA KOZIOL AS ITS EXECUTIVE SECRETARY

The Radio Club of America has appointed Patricia Koziol as its Executive Secretary effective February 25th. RCA President, Bruce R. McIntyre also announced the assignment of Ms. Koziol's firm, Peak Management Solutions for Associations, to manage the administrative and programmatic activities of the association. Patricia Koziol currently manages seven other trade associations and two national and regional trade events. (RCA)

**

NAMES IN THE NEWS: CBS WORLD NEWS ROUNDUP HIT 75

The legendary CBS Radio World News Roundup has turned 75.

The first broadcast took place on the evening of March 13, 1938. That's when legendary CBS radio newsman Robert Trout reported from New York that the Nazis were "driving with all their might to bring Austria under complete Nazi domination." Then, in what has become a historic moment in broadcast history Trout stopped talking so listeners could hear live reports from correspondents throughout Europe. One of these was Edward R. Murrow in Vienna, who went on to become another CBS broadcast legend.

Over the years, the CBS Radio World News Roundup has been there night after night, bringing all of us the news live and direct from the scene. And even in the age of instant reporting over the Internet and bloggers proliferating while spewing opinion as news, the CBS World News Roundup stands apart as one of the most accurate, concise and listened to news sources in the world. Its also a credit to those at C-BS who created it seven and a half decades ago.

Ironically, you can read the full story about this iconic radio news service on-line at tinyurl.com/cbs-news-at-75. And if we may be permitted to add our own tiny voice, we say happy 75th to this ongoing radio legend. (ARNewsline(tm) from published reports)

HAM TECHNOLOGY: RFINDER - THE WORLD WIDE REPEATER DIRECTORY ADDS JAPANESE LANGUAGE

Yet another expension of RFinder and the World Wide Repeater Directory. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

RFinder has added the Japanese language to its operational ability. In their ongoing effort to make localized versions of RFinder available, the creators have announced the Android version of RFinder Version 3 and have also loaded the canonical list of analog and D-Star repeaters across Japan nation into the systems World Wide Repeater Directory.

To use it, just download RFinder from Google Play. If your device is using Japanese as it's language, RFinder will automatically load in Japanese.

RFinder is already available in English, Spanish and French. Italian, German and Portuguese are in development and are said to be next.

The World Wide Repeater Directory database is the first repeater directory covering the world of amateur radio on Android, iPhone and RT Systems Software. It also works with CHIRP, the World Wide Web and can loaded into Points of Interest on most GPS's. This makes it of special interest especially to the globe-trotting ham,

For the Amateur Radio Newswline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

So far 178 countries are included in the World Wide Repeater Directory. More information about RFinder and the database system is on the web at www.rfinder.net/blog/ (W2CYK)

**

HAM RADIO IN SPACE: USAF APPROVES AMSAT REQUEST FOR REDISTRIBUTION OF KEPS

The Keps will keep on coming. So says AMSAT North America after a deal was reached between the Amateur Radio Space Agency and the Air Force Space Command that will permit AMSAT to continue to re-distribute Keplerian elements from the latter's SpaceTrack service.

Keplerian elements. sometimes called by the acronym Keps are the basis for all satellite tracking. According to AMSAT's Orbital Data Manager Ray Hoad, WA5QGD, the re-distribution agreement was approved on March 7 for the period April 1, 2013 to April 1, 2014. (ANS)

**

RADIOSPORTS: ALASKA QSO PARTY MACH 23 - 24

>From the radiosports file, remember to mark down March 23rd as the date of the 2013 Alaska QSO party. The event runs from 18:00 UTC and continues to 23:59 UTC on the 24th. This is an H-F only contest on 160, 80, 40, 20 and 10 meters using CW, SSB, PSK31 and RTTY. A similar event for the VHF bands will be held July 15th through the 16th with the same hours. More information on both QSO party's is on line at kl7yk.us/akqso.htm. (KL7YK)

**

ON THE AIR: MOMO ON THE AIR CELEBRATIONS IN JAPAN

On the air, 8N1MOMO is a special callsign celebrating both the 37th Momo Peach Blossom Festival and the 20th Fire Baloon Contest in the Ibaraki prefecture on Honshu Island. Honshu is Japan's largest island and the station will be operational until April 5th. QSL only via the JA bureau. (DX News)

**

ON THE AIR: CELEBRATING THE RESTORATION OF GREY POINT FORT IRELAND

And a group of hams who are working to restore Grey Point Fort will be operating a special event stations from 1700 UTC on May 31st to 1700 UTC on June 2nd. Grey Point Fort is a World War One Coastal Defense Fort located in Helens Bay, Northern Ireland. The special event operation will be using three yet to be announced special event call signs. More information will be posted on-line at tinyurl.com/greypoint-2013 or by e-mail to greypointfort (at) hotmail (dot) co (dot) uk. (GI4RNP)

**

In DX, word that JQ2WTT and JE1XUZ who are KH0XH and KH0XW respectively will be active from Saipan, in the Northern Mariana Islands through April 1st. Both are university undergraduates. QSL via each operator's home callsign either direct or via the J-A Bureau.

An international team of seven operators are currently on the air from the Solomon Islands signing H44G. Several stations will be operating simultaneously on various bands between 160 through 6 meters using CW und SSB, RTTY, PSK31 and SSTV. It all comes to an end on March 25th. QSLs go via DL7DF

GM3WOJ and GM4YXI will be active from Cocos Keeling Island from March 30th through April 13th using the new callsign of VK9CZ. They plan to be on SSB and CW, with some RTTY and hope to have a real-time logging system and daily Logbook of the World updates. More updates on this operation will be found on-line at www.vk9cz.com

Lastly, a group of Italian operators along with members of the Associationdes Radio Amateurs Tunisiens and the Engineering University of Gabes are planning a DXpedition to Djerba Island using the call

TS8TI between April 29th and May 6th. Operation will be on all HF bands plus 6 meters using CW, SSB, RTTY and several digital modes. More information on this operation is on-line at www.qrz.com/db/TS8TI

(Above from various DX News Sources)

**

THAT FINAL ITEM: SPACE UPDATE: MORE ON US PRIVATE MISSION TO MARS

And finally this week, a follow up to our story of a few weeks ago concerning a privately funded United States mission to the planet Mars. Now its been revealed that it wont be to Mars, but rather a sightseeing round trip around the red planet. Amateur Radio Newsline's Skeeter Nash, N5ASH, has the details:

--

According to news reports, a team led by millionaire and former space tourist Dennis Tito plans to send what it calls a tested couple to Mars and back in a privately funded mission. The Inspiration Mars Foundation plans to start its one-and-a-half-year mission in January 2018 providing that it can raise funding for the mission.

The foundation has carried out a study which it says shows that it is feasible to achieve such a mission using existing technology. Among those involved in the project is Jane Poynter, who spent two years locked away in a sealed ecosystem with seven other people in 1991.

Mission planners wanted the crew to consist of an older couple whose relationship would be able to withstand the stress of living in a confined environment for two years.

I'm Skeeter Nash, N5ASH.

--

More on this story is on-line at tinyurl.com/mars-round-trip.
(Published news reports)

WIANEWS WEEK COMMENCING MARCH 17 2013.

BOM DRM RADIO 5.960 IN VICTORIA

WIA National Field Day

ARISS IN OPERATIONS DOWNUNDER

Ban on all shortwave broadcasts

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAR 17 2013.

The Australian Bureau of Meteorology has a DRM test underway from a site in
Victoria.

They're running a useful DRM mode called Journaline which is a non-telephony
mode for text & images meant to provide news e.g. a crawler on the screen
while you are listening to a radio program.

I think Radio NZ International use Journaline along with their audio.

The technical details are:
Freq: 5960 kHz
Mode: C/10 kHz

SDC/MSC: 4 QAM
Data: 8.64 kb/sec

The opening screen identifies the service as "BOM Data". Going into Journaline mode opens up a series of pages with full identification and a "Geoscience Test" where real-time data on seismic activity around the Pacific and south-east Asia is presented.

I'm seeing pages of text describing the position, magnitude and depth of seismic activity for the Vanuatu Islands, New Britain region, south coast of PNG, Java, Philippine Islands and the Fiji Islands. Now Newcastle (NSW) and Koorda (WA) get an entry.

There is a strong possibility that the source of these signals is the Broadcast Australia site (previously Radio Australia) at Shepparton Victoria.

Wi-Fi bid for all Aussie hotels

Tourism Australia wants thousands of hotels and tourist resorts to have free guest Wi-Fi access, instead of them paying additionally for access.

The move follows the trend towards free Wi-Fi access at food outlets, transport and even public areas in central business districts.

Internet access that includes smartphones and social media, all bundled into the overall room charge, will be a major marketing point of difference.

(Jim Linton VK3PC)

PIRATES!

Microsoft and Adobe are said to be suing the Bill Caralis owned Super Radio Network alleging copyright infringement over the unauthorised use of their software.

An article by Ben Grubb of Fairfax Media has revealed that 4 stations are currently being sued, including 2DU, Zoo-FM, 2LF and Roccy FM, but there is a separate case against 25 other Super Radio Network stations including 2GF.

More online when you read www.radiotoday.com.au

Peter VK1PE poses this question,

"What do the Sistine Chapel in the Vatican City and Lithgow Correctional Centre at Lithgow, NSW, have in common?

Mobile phone blockers!

During the Conclave, and soon at Lithow as you heard here on VK1WIA news last week the blockers will stop calls being made and SMSs being sent.

BOB THE BUILDERS

A 'couple of bob's" have been hard at work in VK6.. We'll have the FULL story here next week when we hear of how the old AWA 6DL regional transmitter was trucked to Wubin in the WA wheatbelt and reassembled in the Wheat Bin Museum

in the Dalwallinu Shire last week.

Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA National Field Day

On Saturday the 13th and Sunday the 14th of April 2013.

Amateur Radio enthusiasts from all over Australia will be showcasing Amateur Radio in prominent locations throughout their local area. This activity, now in its third year, will be a good opportunity to break out your field day equipment, demonstrate emergency preparedness, but most importantly engage the public.

Most people in the general public would give our hobby a second thought if they knew a little more about it. This is the opportunity to showcase our capabilities.

Does your club have the capacity to run your station on solar or wind power for the day?

Can you borrow some space in the local shopping centre car park?

Does the local sports complex run hot on a Saturday or Sunday?

Does the date align with a local community festival or school fete?

The opportunities are endless. Are you up to the challenge?

And I certainly thank Gavin VK4ZZ from the TARCinc for advising us of this WIA activity.

ARISS IN OPERATIONS DOWNUNDER

Christ the King Catholic School in Warradale, Adelaide is geared with a linkup Wednesday (March 20) at 5.45pm Central summer time.

The contact will be done using the ARISS telebridge network, a worldwide network of amateur radio ground stations that enable students to contact the ISS. The ground station selected for this linkup will be I K 1 SLD operated by Claudio Ariotti in Italy.

Christ The King School have some very excited students waiting to ask astronaut Hadfield 15 questions, just as the Children from Mt Ousley Public School did last Tuesday, March 15.

(audio)

Twelve students had been chosen to ask questions to Astronaut Kevin Ford KF5GPP who is the commander of the International Space Station. The conversations occurred while he was travelling at 27,000 kilometres per

hour at an orbit height of 380 kilometres above the Earth.

The event took place with the assistance of the Illawarra Amateur Radio Society, working with ARISS - Amateur Radio on the International Space Station. The connection to the Space Station was performed by Claudio located in Italy, with the audio then passing through NASA's conferencing bridge to the school's auditorium. The Australian ARISS Co-ordinator Tony VK5ZAI was the moderator, initially chatting to the students and their families, explaining how the connection to the Space Station was achieved before handing over to Claudio to call the Space Station.

Even before Astronaut Kevin Ford came on-line, the gathered audience was impressed as these voices from all over the world were coming through loud and clear into their hall's speakers.

The Space Station was expected to clear Claudio's western horizon at 07:34 UTC & almost to the second, a voice came out of the noise and within seconds was noise free.
The students immediately started with some questions revolving around radiation exposure, the risk of fire, how long does it take to train for the Space Station, through to some lighter questions like can you roll a dice in space and can you eat spaghetti with runny sauce!

(audio)

The broadcast was linked to the VK2RMP repeater covering Wollongong and Sydney area while also being connected to IRLP and Echolink via John AG 9 D in the USA who was also connected to the NASA Conference Bridge.

For confirmation of connection to the rest of the world, Wollongong's second 2m repeater VK2RUW on 7300, was also relaying the Space Station conversation but from the Echolink relay via VK2BGL. Notably, it's transmitted audio was a full four seconds behind that of the direct feed from the school into VK2RMP, but this was to be expected after the audio relay had effectively been around the world a few times!

The event was a great success, with the students and families standing around for well over an hour afterwards taking pictures and discussing what they had just heard. Additionally, the local newspaper, radio station and also the WIN Television News covered the event, with Amateur Radio being mentioned many times during the event.

All involved can be justly proud in assisting this small school in the suburbs to be taken "out of this world!".

www.illawarramercury.com.au/story/1359743/what-mt-ousley-kids-asked-nasa-astronauts/

(Rob VK2MT President - Illawarra Amateur Radio Society)

Engage - 17 March 2013, 0'38"

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

The AGM is the forum for you to participate in determining the future direction of Amateur Radio in Australia and the role that the Wireless Institute of Australia takes in that process. You'll help with an Open Forum where you can raise issues close to your heart and hear the views of other Amateurs.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

HAMS ACROSS AUSTRALIA.

Amateur Radio Victoria training courses

Do you know a VK3 with a Foundation Licence that wants to upgrade?

Or perhaps a friend who wants to be a radio amateur?

Enrolments close tomorrow, Monday, for an intensive Standard Licence bridging theory course at centrally located Ashburton.

Also in April there will be another successful Foundation Licence weekend.

For full details about the Standard Bridge Course closing tomorrow, or next months Foundation Licence classes, please contact without delay the Education Team Leader, Barry Robinson VK3PV vk3pv@amateurradio.com.au or 0428 516 001.

(Jim Linton VK3PC)

Another major event held

A sincere thank you to everyone who travelled to the picturesque Kyneton Racecourse to attend last month's Centre Victoria RadioFest.

Under mild weather conditions there were many highlights for the biggest event of its kind held in Victoria, including the Homebrew Competition.

Drew Diamond VK3XU was delighted at being asked to do the judging and expressed amazement at the number and quantity of entries, which he described as all being good.

Drew VK3XU said it was a daunting task to examine all the models carefully and read their helpful documentation.

First prize went to Noel Ferguson, VK3FI, for his beautifully engineered and fully metered transmitter. The rack-mounted 160 E Class AM Transmitter consisted of 14 printed circuit boards, which were individually pre-tested.

The Second prize went to Mike Borthwick VK3UBM, for his very well made UHF diplexer/amplifier. He makes good use of it particularly when on mountain tops during field days.

The 'Encouragement' Award went to Ron Bicker VK3FTFM, for his scratch-built power supply, made almost entirely, and with much ingenuity, from junk-box parts.

Drew VK3XU in giving further encouragement noted that the only new components in Ron's supply were some hardware-shop nut and bolts. However, the resulting job had a pleasing utilitarian appearance.

Helping everyone on the day, Sunday the 10th of February, were the volunteers from Amateur Radio Victoria and the Central Goldfields Amateur Radio Club. Thank you.

(Jim Linton VK3PC)

EMDRC White Elephant Sale

Only one more week till the BIG friendly hamfest the Eastern and Mountain District White Elephant Sale Great Ryrie Primary School Great Ryrie Street Heathmont Victoria.

Doors open 10:00am entry just $6

Be there early for all the bargains and stay for a BBQ lunch.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Celebrate Wellington! Special Event Station W4W

In early February, members of the Wellington Radio Club in Florida USA were elated. The mayor of Wellington, New Zealand, Celia Wade-Brown accepted their invitation to help commemorate the founding of Florida's 17 year-old Wellington Club.

The Special Event is scheduled for March 16th.

Radio clubs on both sides of the Pacific were all set to go.

But, on March 8, the USA club members were left dumbfounded.

New Zealand's Mayor, Wade-Brown, abruptly cancelled her exchange of greetings with Mayor Margolis (Wellington, Florida's mayor).

An email explained that foul weather forced Mayor Wade-Brown to re-schedule a kayak voyage across the Cook Strait on that date. That left the Wellington Radio Club "high and dry"... until a Cornhusker came to the rescue from 8100 miles away!

Dr. Wayne Guppy, Chairman of the Wellington Region Mayors Forum and Mayor of Upper Hutt stepped forward to pick up the ball and exchange greetings with Mayor Margolis.

Florida's Wellington Radio Club President Larry Lazar noted that "Mayor Guppy has been re-elected for four terms and must be doing something right. I bet he has demonstrated the same initiative and drive to his constituents in Upper Hutt as he has in helping us!" Lazar added:

To learn more about W4W Special Event Station go to the Wellington Radio Club website at qsl.net or the ARRL Special Event Station webpage.

Ban on all shortwave broadcasts

The Republic of Zimbabwe has banned shortwave radios as it heads towards government elections due in July.

The foreign broadcasts from outside the landlocked country in Southern Africa are reportedly seen as propaganda to undermine the rule of President Robert Mugabe. Only local stations are to be heard.

Police recently declared that it was a crime to own a shortwave radio, which is deemed to be an illegal communications device.

Hundreds of them have been confiscated including the wind-up version donated by Non-Government Organisations.

China silent on jamming

Radio Australia is the latest to report that its shortwave service to China is being jammed.

This follows similar complaints recently by the BBC and the Voice of America.

Radio Australia's Connect Asia program has been told by the Association for International Broadcasting that research has indicated the jamming comes from within China.

The BBC, the world's largest shortwave broadcaster, describes it as being indicative of a well-resourced country such as China.

VOA has also complained, adding that whoever is responsible seems to be using new technology.

China has used jamming in the past as a form of media censorship, by transmitting radio signals on the same frequency as the intended target using

the Mandarin language. Now interference is being suffered by English language broadcasts.

The Association for International Broadcasting has verified the recent start of deliberate interference to the English broadcasts from Radio Australia, the BBC World Service and the Voice of America.

It has lodged complaints with the Chinese embassies in Canberra, London and Washington.

No official comment was available from China, but the jamming also came amid broadcasts about cyber-crime and may have offended some sensitivities.

VISITING EUROPE THIS WINTER? TAKE IN THE DARC HAMRADIO

The 64th Lake Constance and the HAM RADIO 2013 Convention, both organised by Deutscher Amateur Radio Club will take place from Friday, 28 June to Sunday, 30 June in Friedrichshafen, Germany.

This event has long been considered Europe's premiere amateur radio gathering with attendees from around the world.

One of the highlights of this year's HAM RADIO gathering will be an informal international meeting for representatives of IARU member societies. It will be held at the Zeppelin Museum on Friday, 28 June. Event planners say that they will provide a shuttle bus that will take those attending from the exhibition halls to the museum.

More information on HAM RADIO 2013 can be found at www.hamradio-friedrichshafen.de

==========

NEWS FROM ARNEWSLINE USA

WORLD AMATEUR RADIO DAY 2013

World Amateur Radio Day is April 18th and according to the International Amateur Radio Union that sponsors the event the theme this year is Amateur Radio: Entering Its Second Century of Disaster Communications. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

According to the IARU announcement, the theme for 2013 of Amateur Radio: Entering Its Second Century of Disaster Communications is an excellent opportunity for amateur radio emergency communications groups to take advantage of the event to highlight the role amateur radio plays in disaster response.

Among the suggestions are for IARU member societies to arrange ham radio demonstrations in public places such as parks or shopping areas. The IARU says that such demonstrations in public areas usually generate inquiries

and questions from the public about amateur radio. It adds that this makes it a great opportunity to attract new people to become members of the ham radio community.

The IARU notes that in 2013, April 18th is a weekday but that should not keep public activity from taking place either on the weekend before or after that date. Also, if you plan on holding a public demonstration, the IARU says not to forget to include some young people to show all ages are a part of this growing worldwide public service oriented hobby.

For the Amateur Radio Newsline, I'm Cheryl Lasaek, K9BIK, Zion, Illinois.

More information on World Amateur Radio Day is on the web at www.iaru.org

WW International Museums Weekends June 15/16 and 22/23

HOLYLAND CONTEST 2013 - APRIL 19 - 20

On the air, word that the 2013 Holyland Contest 2013 will be held from 2100z UTC on April 19th, and ends at 2100 UTC on April 20th.

This year's contest goal will be to have as many Israeli mobile stations activating many different and rare squares for the "Holyland Award".

Complete contest details and last year's results are available at tinyurl.com/holyland-contest-2013

(ARNewsLine)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The CRARC Committee approached WIA and ACMA with the view of having their Special Events Callsign VI 100 ACT period of operation extended from March only, to the end of December 2013.

ACMA have now formally agreed to extend the licence period to 31 December 2013.

(Murray de Plater VK1MdP CRARC Secretary)

TA 1 HZ will be in Somalia on a humanitarian mission from 23rd March to 4th April. His primary purpose is as a doctor and but he also plans some on the air time, most likely from the city of Mogadishu using the call T5TC. His operation will be on the HF bands using a Kenwood radio and a Windom antenna.
If you work him, QSL to TA 1 HZ as per the details found on qrz.com

(RSGB)

MARION ISLAND

Two radio amateurs will be part of the over-wintering team and will be active on Marion Island from May 2013 to April 2014.

ZS 8 C - Carson, ZR6CWI, has been appointed as the Space Weather Engineer and is employed for the next year by the SA National Space Agency (SANSA).

ZS 8 Z - David, ZS1BCE, has been appointed as the radio technician.

Expected modes will mainly be SSB and digital modes, They may only use the existing commercial broadband HF antenna, and their QSL Manager is ZS 1 HF.

(sarl)

DL 100 OUI CELEBRATES 100 YEARS SINCE FIRST DL - US RADIO CONTACT

Keep an ear open for the German special event callsign DL 100 OUI which will be on the air throughout 2013.

This is in celebration of the 100th anniversary of the first commercial radio contact between that nation and the United States from Hannover.

O U I were the call letters of the German station at that time.

The US station was located in New Jersey.

WW SPECIAL INTEREST GROUPS --- DIGITAL

We received an email from Bernie KC9SGV who implored us to install some software for the listening pleasure of Hams worldwide.

Cunningly disguised as a promotion for remotehams.com Bernie shared with us the notion that we might install some free HF Remote software for Windows.

He eloquently put it like this:

"Australia shines in its absence on the stations list..."

So, if you have an Internet connection, a spare radio and computer and the desire to add Australia to the list of stations available for use, go to remotehams.com and start playing but NOT until you check your ACMA Licence and ldc

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Raspberry Pi-powered Tardis blasts off from 'Blighty's Baikonur'

The Register reports on the launch by radio amateur Anthony Stirk M0UOU and Dave Akerman, of a 434 MHz balloon that carried a Rapsberry Pi and Dr. Who's Tardis to near-space.

The launch took place from Brightwalton in Berkshire on Wednesday, February 27, almost exactly one year since the launch of the Raspberry Pi computer board.

The balloon carried a 70cm transmitter sending 600 bps radio telemetry and Slow Scan Digital Video images.

WW SPECIAL INTEREST GROUPS --- ILLW

Registrations keep coming.

The 16th annual International Lighthouse and Lightship Weekend is five months away in August, but already more than 170 registrations have been received.

In the lead is Germany with 38 registrations, just ahead of Australia on 36, followed by the USA and England.

So far there are entries from 26 countries with the many more expected in the weeks ahead.

The basic objective is to promote public awareness of lighthouses and lightships, their need for preservation, and to promote the goodwill of amateur radio.

Join in by setting up an amateur station at a lighthouse, lightship or maritime beacon.

To see the guidelines or register online for the next fun event on August the 17th and 18th, visit the website illw.net

(Jim Linton VK3PC)

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR YOUNG TIMERS
A Youth Net meets Saturdays at 0100 UTC on IRLP Reflector ≠2.
Young Hams Net 3.590 - 7:30pm Victorian time.

During the summer of 2013, a youth radio camp "Youngsters On The Air" will be held near Tartu, Estonia from 5-12 August.

There will be 10 teams participating from different European member associations of IARU R1. The camp is organised by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European countries will be participating in different activities: presentations, Contests, visiting radio stations, observatory,

etc.

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

In Tasmania, that's the bit of Australia left off the new VK5 State Govt. logo... well, down there members of the CCARC provided comms support for the 2013 Pure Tasmania Cycle Challenge on the 2nd of March.

The cycle ride covered Devonport to Strahan on a perfect Autumn day, with no wind and mid to high 20s temperatures.

The event started at 6am and concluded around 6pm.

The organisers were happy with how the radio coverage worked even though there are still some areas to improve.

Communications gear included 80MHz repeaters provided by the octagon organisation. As a back channel 2 & 70cm amateur repeaters were used, and at times 40m FM and SSB.

FEEDBACK

Peter : vk2

Thanks for the broadcast, I always enjoy it. Like one of your commenters, I think it's good to stay focused on ham radio topics. there's plenty of technology news around - I read tons of it already.
Anyhow, keep up the great work!

David : vk5

Every Sunday morning where ever I am be it at home, out and about, in the car or at work I always sit down and listen to the Sunday WIA News Broadcast which is transmitted on VK5RAD on Mount Lofty. Keep up the Excellent work team, much appreciated 73

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

W4HM "Free" Daily MF/HF/6M Radio Wave Propagation Forecast

Posted: 14 Mar 2013 09:08 AM PDT
http://forums.qrz.com/showthread.php?383588-W4HM-quot-Free-quot-Daily-MF-HF-6M-Radio-Wave-Propagation-Forecast&goto=newpost

Just an FYI I have decided to make my W4HM Daily MF/HF/6M Radio Wave Propagation Forecast free of charge to all of my fellow amateur radio operators and SWL's around the world.

It can be found at http://www.solarcycle24.org and http://www.wcflunatall.com/propagation.htm .

Breaking News From ARNewsline: Dayton Hamvention(r) Announces 2013 Award

Winners

Posted: 14 Mar 2013 01:42 AM PDT
http://forums.qrz.com/showthread.php?383544-Breaking-News-From-ARNewsline-Dayton-Hamvention(r)-Announces-2013-Award-Winners&goto=newpost

Hamvention 2013 Award Winners

Amateur of The Year - Mustapha Landoulsi DL1BDF

Mustapha has been instrumental in promoting amateur radio all over the world. He is currently a pilot for Lufthansa Airlines. He is fluent in Arabic, French, German, and English. Among his many accomplishments he established six amateur radio stations in Tunisia and continues to help re-establish them after the Arab Spring. He has organized delivery of emergency medical equipment and medicine to African countries. He led a project to save a Costal Radio Station in North Germany. He works tirelessly to bring amateurs together in the middle east and Africa and many other parts of the world. He has won many awards for his numerous contributions throughout the world.

Technical Excellence Award

Dave Whitten KD0EAG and David Rowe VK5DGR for their FreeDV program that encodes high quality HF Digital Voice in 1.125 khz, less than ½ the bandwith of an SSB QSO.

Special Achievement Award

George Thomas W5JDX for his work on Ham Nation and Amateur logic TV. His contribution is applauded by hams worldwide and his videos are both entertaining and interesting.

Club of the Year

West Palm Beach Amateur Radio Group in West Palm Beach, Florida

Hamvention® Awards Committee

Michael Kalter, W8CI ☐Chairman

David Crawford, KF4KWW ☐ Co-Chairman

KV4 call issued in US 4th district

Posted: 13 Mar 2013 05:51 PM PDT
http://forums.qrz.com/showthread.php?383510-KV4-call-issued-in-US-4th-district&goto=newpos
t

As best as I can tell the last systematically issued block B callsign
issued to an Advanced licencee in the FCC 4th district was KW4AA.

As far as I can tell, they skipped over the KV4 calls to issue that single
KW4 2x2 call. The US Virgin Islands have KP2, NP2 and WP2 calls, but at one
time in the past some KV4 calls were also issued there, and I believe some
of those are still in use. (NB: the British Virgin Islands next door to
them are VP2V, and at one time USVI used only KP2V calls, but there weren't
enough of those to go around).

Now, lo and behold, the US 4th district has run out of unused block A
callsigns, the last one issued being AK4ZZ, given that AL is assigned to
Alaska. They are supposed to jump to unused calls in block B, and they
have, but did they go to KW4? Apparently not. They have recently issued
KV4LP to an Extra class ham in Florida, and the database shows it as having
been issued systematically, i.e. not a vanity call. If I were him I would
be annoyed because (1) the DX might think he was in USVI; and (2) it is
just possible the FCC might yet take away his shiny new call and replace it
with a KW4 call.

Please do tell me I'm wrong, but it doesn't look like it.

Special event call PA33KBX

Posted: 15 Mar 2013 08:31 AM PDT
http://forums.qrz.com/showthread.php?383709-Special-event-call-PA33KBX&goto=newpost

On April 30 Queen Beatrix of the Kingdom of the Netherlands abdicates in favor of her son Willem Alexander.

Queen Beatrix has been our Queen for 33 years and for the first time in 123 years The Netherlands will have a King again.

This years The Netherlands will also celebrate 200 years Kingdom om the Netherlands.

On behalf of this event the crew of the PI4DX contest station will be operating with a special callsign, PA33KBX, from 26-4 until 23-5-2013.

PA obviously stands for the Netherlands, 33 stands for the number of years Beatrix has been our Queen and KBX stands for Koningin (Dutch for Queen) BeatriX

KBX also happens to be the suffix of the Dutch government aircraft, a Fokker 70 with the registration PH-KBX.

For more information please visit the PA33KBX QRZ page or the PI4DX website

QSL for PA33KBX via PA0ABM

During April an May there will be many more Dutch Special event calls on air. PA200KING, PB33Q, PA13KING, PA00KING just to name a few.

If you hear us, please give us a shout. We would certainly appreciate it.

73, Maarten PD2R

of the PI4DX crew

April 2013 /QST/ Digital Edition - Now Available
<http://www.nxtbook.com/nxtbooks/arrl/qst_201302/>
**
<http://www.nxtbook.com/nxtbooks/arrl/qst_201302/>
Go to this link and start reading: April 2013 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201304/>.

* Celebrating 75 years of W1AW in this issue!*

* Try modulated CW on 2 Meter FM.
* Add an audible readout to your SWR meter.
* Build a "towerless" Yagi antenna.
* ...plus, two items in this issue pay homage to the /QST/ April Fools' tradition. Can you find them?

* Enjoy Content You Won't Find in the Print Edition*

* Watch a video overview of the new Yaesu FT DX 3000 HF and 6 Meter transceiver.
* Listen to the sound of HF digital voice created by the new FreeDV software.

Every issue of /QST/ is filled with the news and features you need to keep active in Amateur Radio. Enjoy this issue!

December 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201304/>

Apple App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>
Download the */QST/ App* for Apple mobile device users. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>. Users with Android devices should use the enhanced web version <http://www.nxtbook.com/nxtbooks/arrl/qst_201304/> of /QST/ which is optimized to automatically recognize Android phones, tablets and e-book readers.

What is a digital edition?
The digital edition of /QST/ is an electronic form of the journal. All ARRL members have access to the digital edition of /QST/...a way to read and interact with the current issue of /QST/ anytime, anywhere. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
/QST/ can be read online or downloaded onto some devices. Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>. Apple iOS device users (iPhone, iPad and iPod touch) can also access the digital edition from a dedicated QST app. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>.
To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.
Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.
Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.
Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions.
Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

*Go Green! Go Digital-Only. *
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue. * Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

ZCZC AP11
QST de W1AW
Propagation Forecast Bulletin 11 ARLP011
>From Tad Cook, K7RA
Seattle, WA March 15, 2013
To all radio amateurs

SB PROP ARL ARLP011
ARLP011 Propagation de K7RA

Solar indicators were mixed this week, with the average daily sunspot number down 8.4 points to 84.9, but average daily solar flux up 5.9 points to 118.5. Geomagnetic indices were much quieter, with the average planetary A index down 4.7 points to 4.4, and the average mid-latitude A index down 5 points to 3.9. The main reason for this is there weren't any active days this week, such as March 1-2 in the previous week's report.

The predicted solar flux for March 15-17 is 120, then 115 on March 18-19, 110 on March 20, 105 on March 21, 95 on March 22-24, 100 on March 25-26, 105 on March 27, 110 on March 28-31, 115 on April 1-3, then solar flux peaks around 120 on April 4-11. This prediction for solar flux at 120 on April 4-11 is fairly recent, first appearing in the March 11 forecast. Prior to that date, values were predicted around 100-105, and back before February 25, 95 was the predicted level. The predicted March 15-17 flux value of 120 is also recent. On March 6 the predicted values were 95 for that period.

The average of predicted solar flux for the next five days, March 15-19 is 118, right around the average of 118.5 for the past reporting week, March 7-13.

The predicted planetary A index on March 15-16 is 17 and 12, indicating more geomagnetic activity similar to March 1-2. The predicted planetary A index is 5 on March 17-20, 8 on March 21, 5 on March 22-27, 18 and 10 on March 28-29, and 5 again on March 30 through April 16.

OK1HH predicts the geomagnetic field will be active to disturbed on March 15, quiet to unsettled March 16-17, mostly quiet March 18, quiet to unsettled March 19-21, active to disturbed March 22, quiet to active March 23, quiet March 24-25, mostly quiet March 26, quiet

to active March 27-28, quiet to unsettled March 29-30, mostly quiet March 31, and quiet on April 1-4.

At 0600 UTC on March 15 the Australian Space Forecast Centre reported that a sudden impulse of 22 nT was detected in magnetometers at 0527 UTC. Due to a CME, increased geomagnetic activity is predicted on March 15-16. Minor storm periods at high latitudes are possible.

The coronal mass ejection and M1 class solar flare were from sunspot group 1692, right in the center of the visible solar disc viewed from Earth, and was Earth-directed.

In recent online articles about a possible two-peak Cycle 24, they were talking about the peak in late 2011 and another in 2013. But I noticed recently that solar physicist Dean Pesnell of NASA is suggesting a peak in late 2013 and another in 2015. Check the last line of the first paragraph of this article posted yesterday on the ARRL website:
http://www.arrl.org/news/solar-cycle-24-may-have-double-peaks-says-nasa-solar-physicist.

Robert Elek, W3HKK sent these observations about the TX5K operation on Clipperton Island:

"Kudos to the ops at TX5K! And to their nifty web site. I love the world map, spotting of call signs, almost instantaneous log updates, QSO totals, etc. It lets you see the propagation on a visual basis, call by call.

"I had not realized TX5K was on the air until, during our club effort at WW8OH for the ARRL SSB DX Contest on March 2-3, we worked them. Post-contest, and after catching up on my sleep Sunday night and most of Monday, I turned on the rig, right after dinner, and TX5K was EVERYWHERE, with big sigs! I worked them on 12, 15, 17, 30, 40 and 160 meters, many bands on both SSB and CW, during an amazing three hour stretch of operating!

"The station here is modest: 100 watts to an assortment of single band ground planes, and an inverted L for 160m. Working them so quickly, often on the very first or second call, was mind-blowing. Their pile-ups were HUGE. It had to be a miracle of good timing, plus a little experience to boot.

"I have since worked them on 160 thru 10m. Great job by TX5K! Thanks, guys!"

For a peek at the vertical antennas at W3HKK, click the photo on the upper right on his QRZ.com page at http://www.qrz.com/db/W3HKK. Note you will have to log in, but accounts are free.

Brian Alsop, K3KO of Henderson, North Carolina commented that "DXers shouldn't overlook VOACAP while chasing new ones." He sent a couple of circuit reliability plots from his location to ZL9CI and 9M4SLL

on Spratly, and noted that the times he worked them lined up with the predictions. "I recently downgraded to 500 watts, a 2 element tri-bander at 40 feet and rotary dipole for 30/17/12 at 42 feet. I need all the help I can get. Besides the DX cluster, knowing what paths at what time may be possible helps."

K9LA has a tutorial on the ARRL web site for using VOACAP, and you can see it at http://www.arrl.org/files/file/Technology/propagation/Voacap.pdf.

Finally, at http://stevemorse.org/jcal/latlon.php is a handy tool for converting a street address into latitude/longitude coordinates. This is useful for determining locations for propagation prediction and other programs based on FCC database address records, or for your own location.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 7 through 13 were 80, 59, 63, 89, 105, 95, and 103, with a mean of 84.9. 10.7 cm flux was 113.8, 115, 116.2, 119.2, 119.7, 123, and 122.9, with a mean of 118.5. Estimated planetary A indices were 4, 3, 6, 4, 5, 5, and 4, with a mean of 4.4. Estimated mid-latitude A indices were 2, 3, 6, 3, 4, 6, and 3, with a mean of 3.9.

Classes Teach Residents How to Ham It Up in an Emergency:

Posted: 14 Mar 2013 05:11 PM PDT
http://www.eham.net/articles/29877

When modern methods of communication fail during a time of emergency, having a contingency plan can help maintain order. For the Greater Damascus area, that plan relies on that old standby, the ham radio. The Damascus Emergency Communications Team will teach residents how to become operators in an amateur radio class from 6:30 to 9:30 p.m. on Tuesdays from April 2 to May 14 at Damascus United Methodist Church. Amateur -- or ham -- radio is known as the recreational or noncommercial use of radio to communicate, and is used mainly for fun or as a backup form of communication when normal public safety methods fail or are otherwise unavailable.

SARL NEWS SUNDAY 17 March 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret that we have to announce that the keys of two radio amateurs went silent recently, they are:

Trevor Holmes, ZS2AZR, on Tuesday 12 Marchy. Trevor was a member of the South Cape Amateur Radio Club. Trevor leaves his wife Adelaide behind.

Bill Ingleson, ZS6KO, at 85 years of age, at on Friday 15 March 2013. Bill joined the SARL and the Pretoria Amateur Radio Club in 1946 and was an ex-chairman and active member of PARC until quite recently. Bill was also a very enthusiastic CW, QRP operator. Bill leaves his daughter Lynette and his son-in-law Steven, with whom he lived the last couple of years.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

IN THE NEWS TODAY:

DID YOU KNOW THAT AMATEUR RADIO PLAYED A ROLE IN ENDING THE CIVIL WAR IN MOZAMBIQUE?

FREQUENCY CHANGE FOR AMATEUR RADIO TODAY ON MARCH 31

BOB BRUNINGA, WB4APR, TAKES APRS UNDERGROUND

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

DID YOU KNOW THAT AMATEUR RADIO PLAYED A ROLE IN ENDING THE CIVIL WAR IN MOZAMBIQUE?

Hear this fascinating story from the guest speaker, Dr Antony Turton, ZS6CST at the annual Awards dinner. The dinner is held as part of the 2013 SARL National Convention which will be hosted on the West Rand by the West Rand Amateur Radio Club on 26 and 27 April.

To stem the flow of weapons from Mozambique into KwaZulu- Natal, a two-man special operations team was inserted into Mozambique for this mission. One of those two persons was Anthony Turton, selected in part because of his skills as a radio operator, which was deemed to be a necessary element for the success of this high risk but strategically important mission. Anthony used these skills, honed to a high level of technical competence as an active radio amateur, to gain strategic access to the rebel group RENAMO.

Make your booking for the annual dinner now. Tony, as he is also known, has authored the book "Shaking Hands with Billy' which tells this story for the first time. The book will be available at a special price at the National Convention. To book follow the links from the SARL home page on www.sarl.org.za.

This is also a reminder that the visit to SANSA at Hartbeeshoek earth station is limited to 45 persons. Make your reservation now to avoid disappointment. When booking ensure that you submit your ID number.

FREQUENCY CHANGE FOR AMATEUR RADIO TODAY ON MARCH 31

On 31 March some of the frequencies on which the SARL's programme is transmitted will change. Here is the complete HF transmit schedule.

Sundays 10:00 - 11:00 local time for Southern Africa the frequency will remain the same on 7 025 kHz, however for East and Central Africa listeners the frequency will change to 17 570 kHz. For our listeners outside South Africa local time translates to 08:00 - 09:00 UTC. On Mondays the programme is repeated at 16:30 UTC, 18:30 local time in South Africa, on a new frequency of 3 230 kHz. For more information about podcasts and other relays and retransmissions visit www.sarl.org.za and select Amateur Radio Today from the menu. From the web pages you can also download the programme in a high and low res format for retransmission on local repeaters or for your own listening pleasure.

Reception reports, comments and suggestions are always invited. Send an email to artoday@sarl.org.za.

BOB BRUNINGA, WB4APR, TAKES APRS UNDERGROUND

Bob Bruninga, WB4APR, led a group of radio amateurs earlier this month to Mammoth Cave, the world's longest known cave system, in Kentucky, USA to test how the Automatic Packet Reporting System (APRS) can be used as a means to extend radio communications underground. When used underground, VHF and UHF radios can only work over a short distance of

each other and only when in the line of sight of another radio. This makes routine use of these radios of little value when underground; however, when APRS radios act as packet digipeaters, the coverage can be dramatically extended. Bruninga, a senior research engineer at the US Naval Academy, developed APRS as a global, on-air protocol for supporting handheld position reporting and text messaging via VHF radio.

Bruninga's team used 14 APRS radios to establish a network that provided real-time position and text message communications along a route nearly 1 600 metres long in the cave. "Cavers carried a cave map that had a latitude and longitude grid so that they could know their exact coordinates when manually entering their position into their handheld transceivers," Bruninga said. "Texting via APRS provided communications end-to-end, and even included email into the topside global APRS system." The team set up the APRS network in what Bruninga called "large subway-sized cave passages" that were 30-50 feet wide and 10-20 feet tall.

He said that extending the communications system along the cave was easy: "We would walk until we lost the signal, then back up 5 - 10 metres and set a digipeating APRS handheld transceiver on a rock and then kept going, repeating the process.

After going over the data from the cave test, Bruninga found two interesting facts: Even with the average link between each radio at 150 metres, UHF outperformed VHF by about 13 percent. In addition, power did not make much of a difference, with the APRS-compatible handheld transceivers performing as well as several portable 10 W mobile radios.

Bruninga said that APRS radios bring "a new range multiplier dimension to in-cave communication. In the past, a paltry few-hundred metres VHF/UHF radio range has not been impressive to cavers, but now with APRS, they can be linked up to 14 times in series, demonstrating some real potential for amateur radio caving support. This is especially true when some of those few-hundred foot distances may take an hour or more to crawl, whereas APRS can get the message through at the speed of light."

CLUB AFFILIATION

This week the SARL welcomes the Secunda Amateur Radio Club as an affiliate to the league. Secunda Amateur Radio Club actively supports Hamnet and takes part in HF competitions.

YOUTH AND RADIO

The Thaba Voortrekker camp is held annually during the first school holiday of the year north of Rustenburg as has been done for more than a decade.

During the camp radio speech, radio operating and electronics, based on the RAE course, will be presented to the young campers in order for

them to obtain the relevant badges. The children are encouraged to complete the course for the radioamateur badge after the camp, which includes the ZU examination.

During the camp the training call sign of the Voortrekkers, ZS6VTS, will be used. ZS6VTS will be on the air daily between 16:00 and 19:00. The Rustenburg, Magalies, PTA and Centurion repeaters can be accessed from the camp. The station will also be active on the 80, 40, 20, 15 en 10 m bands. A bulletin will be transmitted every evening shortly before 19;00. Please listen out for ZS6VTS and speak to the children from 20 to 26 March.

FOUNDING OF A WILDERNESS SEARCH & RESCUE ORGANISATION FOR THE EASTERN CAPE

All interested radio amateurs en specifically members of Hamnet are invited to attend the inaugural meeting of a wilderness search & rescue organisation for the Eastern Cape on Monday 18 March 2013 at 18:30. The meeting will be at the Nelson Mandela Ambulance Station in Lindsay Street, Xorsten, Port Elizabeth. The ambulance station is opposite the Livingstone Hospital. Should you require more information please do not hesitate to contact the SARL councillor ZS1JM, Johann Marais, on 082 77 1880.

WEST RAND FLEA MARKET

The West Rand Amateur Radio Club is hosting its next flea market 12:00 on Saturday 30 March 2013 at their clubhouse in Kroton street, Weltevredenpark, Roodepoort. Everybody is welcome. For more information contact Phillip, ZS6PVT, 083 267 3835 or Geoff, ZS6GRL, 082 546 5546.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low levels but there is a good chance that it may pick up in the near future. There remains a chance for M-class Solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 64.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

17 March - SARL VHF/UHF analogue and digital contest closes at 10:00 UTC today. 18 March - Founding meeting for a wilderness search & rescue organisation for the Eastern Cape. 20 to 26 March - Voortrekker camp station ZS6VTS on the air. 30 March - West Rand Amateur Radio Club flea market starting 12:00. For more information contact Phillip, ZS6PVT, at 083 267 3835 or Geoff, ZS6GRL, at 082 546 5546.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Voice of America to Test Digital Transmissions this Weekend

TAGS: audio frequencies, BPSK31, Digital Modes, Ham Radio Deluxe, hz, khz, modes, shortwave receiver,Sunday, utc

03/14/2013The Voice of America Radiogram show, hosted by Kim Andrew Elliot, KD9XB, will be testing a variety of digital modes on March 16 and 17.

The data transmissions can be decoded by anyone with an AM shortwave receiver using any of the popular sound-card-based programs such as Fldigi, Ham Radio Deluxe, MixW, MultiPSK, DigiPan (for BPSK31, BPSK63 and QPSK31 only),CocoaModem (for Macs) and others.

Each test will last one minute, unless otherwise specified, on the following modes at the audio frequencies indicated. During some tests as many as four modes will be used simultaneously . . .

BPSK31 at 2000 HzQPSK31 at 1000 Hz, BPSK31 at 2000 HzQPSK31 at 1000 Hz, PSK63F at 1500 Hz, BPSK31 at 2000 HzQPSK63 on 1000 Hz, PSKR125 at 1500 Hz, BPSK63 at 2000 HzQPSK125 at 1000 Hz, PSKR250 at 1500 Hz, BPSK63 at 2000 HzQPSK250 at 800 Hz, PSKR500 at 1500 Hz, BPSK250 at 2200 HzQPSK500 at 800 Hz, PSKR1000 at 1500 Hz, BPSK500 at 2200 HzPSKR500 at 1000 Hz, PSK63F at 1500 Hz, PSKR125 at 2000 Hz, and PSKR250 at 2500 Hz (5 minutes, 40 seconds total). The latter portions of the PSKR250 and 500 transmissions are formatted for Flmsg, a function within theFldigi software suite. (In Fldigi, go to Configure > Misc > NBEMS > under ☐Reception of flmsg files.☐ Click Open with flmsg and Open in browser and select the desired location of the flmsg.exe file.)MFSK32 image on 1500 Hz (54 seconds)

The 30-minute Radiogram program is scheduled to air . . .

Saturday 1600 UTC at 17860 kHz

Sunday 0230 UTC at 5745 kHz

Sunday 1300 UTC at 6095 kHz

Sunday 1930 UTC at 15670 kHz

... from the IBB Edward R. Murrow Transmitting Station in North Carolina.

E-mail reception reports are welcomed at radiogram@voanews.com.

According to Elliot, future VOA Radiogram programs will transmit only one mode at a time. ☐This will ensure the highest possible signal-to-noise ratio and the best possible chances for a successful decode. These broadcasts are an experiment. We will try different modes in different programs to see which work best via AM analog shortwave broadcast transmitters.☐

Grant Signals Growth for Radio Group:

Posted: 15 Mar 2013 05:15 PM PDT
http://www.eham.net/articles/29881

AMATEUR radio enthusiasts in South Tyneside are making waves and broadcasting for more members after receiving a council cash boost. The 28-strong North East Amateur Radio Society meets weekly at Wardles Bar in Albert Street, Hebburn. Members contact fellow radio 'hams' across the world, learn about radio communication and even study for special examinations. This week, Hebburn councillors Richard Porthouse and John McCabe handed over 850 to the society, which has been operating at the town pub for about a year. Kayleigh Cockburn, seven, a pupil at Toner Avenue Primary School, Hebburn, who is the society's youngest member, said: "I learn all about how to communicate with people across the world by radio. It's great fun." Coun Porthouse, chairman of Hebburn community area forum, said members were "delighted" to support the town-based society. A spokesman for the society said: "The grant helped us buy a new radio receiver and transmitter, antenna, plus a power source, and we are very grateful to Hebburn councillors for their support. "Our members are now in regular contact with fellow radio enthusiasts in all parts of the world, from America to Australia. We learn about the basics of electronics and also study towards examinations in radio communication, at various levels.

//
Propagation Forecast Bulletin #11 de K7RA:

Posted: 15 Mar 2013 09:48 AM PDT
http://www.eham.net/articles/29880

Solar indicators were mixed this week, with the average daily sunspot number down 8.4 points to 84.9, but average daily solar flux up 5.9 points to 118.5. Geomagnetic indices were much quieter, with the average planetary A index down 4.7 points to 4.4, and the average mid-latitude A index down 5 points to 3.9. The main reason for this is there weren't any active days this week, such as March 1-2 in the previous week's report.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-March, through Sunday, 17th-March there were 241 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

10 METER CONTEST. Members of "Radio Club Guadeloupe" (ACRA - FG5KC) invite all Contests/DXers to be active in the "2013 Championship 10M

FG (Guadeloupe) SSB Contest" on June 29th, between 0100-2300z. Details are available at:
http://rc-fg5kc.over-blog.org/pages/CONTEST_2013_CHAMPIONSHIP_10M_SSB_GUADELOUPE-8570589.html

5H, TANZANIA (Update/IOTA Op). Bodo, DF8DX, will be active as 5H1DX between April 20-28th. Activity will include the activation of several IOTAs which include the following: AF-075 - Bongoyo Island as 5H1DX3
AF-063 - Pemba Island as 5H1DX
AF-032 - Zanzibar as 5H1DX
Operations will be on the HF bands and EME. QSL via DF8DX.

8P, BARBADOS. Dean, 8P6SH, will be active as 8P2K during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (10m) entry. QSL via KU9C.

8P, BARBADOS. Jeff, VA3QSL, is once again heading to the Caribbean, but this time he will be active as 8P9HI from Farther Away Cottage, Bayfield, St. Philip, Barbados (NA-021), between April 6-13th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct or by the Bureau.

8Q, MALDIVES. Noel, F6BGC, will be active as 8Q7NC from Rihiveli, South Male Atoll, in the Maldives Islands (AS-013) between March 19-29th. He plans to operate holiday style on 40-6 meters with 100w and a vertical, using mostly SSB with some CW and RTTY. He states, "The island is isolated in the Indian Ocean, it's motto is 'No News, No Shoes'. There is no InterNet, cell phone ... so no DXA and no Cluster!" QSL via F6BGC, direct or by the Bureau and LoTW. More information can be found at:
http://f8kcf.free.fr

9X, RWANDA. Kiyoshi "KIYO", JR1IZM (ex-V31IZ, 7P8ZM), has been in Kigali since February and announced that he finally received his license/callsign 9X0ZM. He will be there until March of 2014 and expects to be active soon. Activity will be limited to his free time. He will use an IC-7200 with ATU/AH-4 and Loop antenna. Operations will be mainly 20 meters on the Digital mode JT65), CW and SSB. QSL via JO1CRA, direct (SASE) or by the Bureau.

A5, BHUTAN. Yuki, JH1NBN, is expected to be active as A52W through March 26th. He is in Bhutan on business, so his activity will only be during his spare time. There has been no QSN reported as this was being written. QSL via JH1NBN direct.

A7, QATAR. Operators Ali/A71BX, Khalid/A71CO, Abdulla/A71CV, Saif/A71AM and Andrey/RA9CKQ will be active as A71AM from Dukhan during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. QSL via A71AM, direct or by the Bureau.

DAYTON HAMVENTION NEWS (SWODXA DX DINNER ANNOUNCEMENT, dated March 13th). Janet Pater, W8CAA, writes, "FOR IMMEDIATE RELEASE -- The SouthWest Ohio DX Association (SWODXA) has announced that David Patton, NN1N, will be the featured speaker for their 28th annual DX dinner. The dinner, held

in conjunction with the 2013 Dayton Hamvention®, will be on Friday, May 17th, at the Marriott Hotel in Dayton.
Dave was first licensed in 1977 at the age of 12 as WD9DCL. Always an avid DXer and contester, the two-time WRTC competitor has been on world record holding multi-op teams at 6Y2A and HC8N. Changing his calls frequently in his quest for a "good" call sign, Dave has worked 10 Band DXCC along with 2875 countries in the DXCC Challenge using 'DCL, KJ9W, AH2U, NU9R, WO0G, AA9AK, WX3N, KW9KW, W9QA, NT1N and now NN1N. In his past he has been a net control, and public service volunteer, as well as a 6-year President of the Society of Midwest Contesters.
He started at ARRL HQ as the Special Assistant to the Executive Vice President, and is now the Manager of the Membership and Volunteer Programs Department with a staff of 22. The MVP Dept. includes Field Services, W1AW, Emergency Preparedness and Response, ARRL Operating Awards, and the QSL Bureau.
Dave will have an informative and entertaining presentation on the Logbook of the World (LOTW®). We look forward to Dave presenting 'What hath LOTW Wrought?'; exploring the initial, current and future impact of this state-of-the-art logging and awards website.
For more information and to order dinner tickets, visit <WWW.SWODXAEVENTS.ORG> and follow us on @SWODXA ."

E5, SOUTH COOK ISLANDS (Update/New 'Resident' Operator/QSL INFO & Change). Andy, AB7FS/E51AND, informs OPDX that he is moving to Rarotonga (OC-013). Edited excerpts from his long E-mail, Andy writes, "My wife Kat and I are moving to Rarotonga -- she arrives there on March 25th and I will be there on April 29th. We are moving into a house in the part of Arorangi Beach called Inave (say ee-nah-vay) -- about 100 meters inland from the back road -- and probably about 1/2 mile inland from the beach roughly in line with the Crown Beach or Manuia Beach "resorts" (There are no street addresses in Rarotonga). We would rather be inland to moderate the impact of cyclones and to stay away from the storm surges. Arorangi is on the West side of Rarotonga, and we will have a range of volcanic mountains up to 2,500 feet to the East -- which may limit operations in that direction. I hope to be operating using a 43 ft vertical and 100 watts from a Yaesu FT 857D by the end of the first week of May. The container with the tower and yagis will likely not arrive until early June -- so it will be July or August before I have the tower up and the yagis in the air. Once it's up we should have a 5 element KLM monobander at 70 feet for 20m and a Tennadyne T7 at 80 feet for the higher bands. Not sure yet how we will handle 30 meters and below though we do have an OCF dipole and I can drive the tower. We'll be using a Icom 756Pro and have an Ameritron AL1200 - though I prefer to operate using as little power as possible. I'm a ragchewer at heart -- NOT a DXer -- and with several active hams on Raro I'm hoping to avoid some of the rapid fire 5 and 9 contacts and ACTUALLY talk to people. LOL. I got back into CW a while back and although I'm still plodding along at 10 wpm, I enjoy CW and will likely hang out at the Straight Key Century Club frequencies and exchange SKCC numbers with other members. On SSB, the place to find me will be on the ANZA DX net (14183 kHz daily starting at 0515z). And if you are looking for esoteric VK and NZ -- and Tahiti,

Fiji, the Cooks, New Caledonia, Kiribati, etc.. -- and the occasional African Station -- it's a good net to check in to. Kat is also a licensed Ham (ZK1SCH/KB7SCH) and I'm hoping that being in a 'rare' location will prompt her to get on the air :-). Other active hams on Rarotonga include: Jim Ditchburn, E51JD, in the village of Tupapa (North side of the Island) who is on almost daily on 20 meters SSB; Victor Rivera, E51CG (or E51USA), in Nikao (NW corner) who tends to work the highest band open and has a 6m beacon; and Bob Walker, E51BQ, in Muri in the SE corner of the Island... I'll keep the E51AND page on QRZ.com updated." Andy announced on March 11th, on QRZ.com, that there is a change in the QSL route (address) and he has responded to all cards received to date!! After April 15th, he states, "Please QSL DIRECT to P.O. Box 618, Avarua, Rarotonga, Cook Islands". He also states, "If there are problems/issues with your QSL -- Please E-mail me with all the QSO info and your mailing address - I have a paper log and CANNOT find you without date, time and callsign :-) Thanks". Andy also mentions, "If all goes as planned I should have a good gain antenna system on Rarotonga, and I may try for Palmerston [OC-124] (or possibly PukaPuka [OC-098]) again in July or August :-). This time with better preparation and hopefully a Hex Beam at 30+ feet. :-)". Take a look at his QRZ.com page for some great pictures.

E6, NIUE (Reminder). Look for operators Alan/VK4WR and Graeme/VK4FI to be active as E6RQ and E6SG, respectively, from Niue (OC-040) between March 22-29th. Their activity will focus on 6 meters as well as some HF operations. QSL both callsigns via VK4FI

FR, REUNION ISLAND. Guy, F5MNW, will be active as FR/F5MNW from Reunion Island (AF-016) between April 6-29th. Activity will be on the HF bands using only CW. QSL via his home callsign, direct or by the Bureau.

H40 & H44, TEMOTU AND SOLOMON ISLANDS (Update). The "Two Entities DX-pedition - Solomon 2013" continues with both operations on the air as this was being written. The first group signing H44G from Guadalcandal (OC-047), Solomon Islands will operate until March 25th. The second group finally hit the air waves as H40T on March 16th (after a flight delay of 4 days due to bad weather), from Santa Cruz Island (OC-100) [Temotu Island], and will operate until March 23rd. Activity from both locations will be on 160-6 meters using CW, SSB and RTTY. See OPDX.1103 for suggested frequencies. QSL route is via DL7DF, direct or by the Bureau. For more details and updates, visit:
http://www.dl7df.com/h4/index.php

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103). Operators Ralph, 5W0W/H44RK, Dom/SQ9KWW, Tom/WL7HP and Maggie/H44MK (the only local YL Ham from Sikiana) are planning an upcoming IOTA tour which will start during the first week of June. The callsign will be H44IOTA (not H40IOTA as mentioned earlier). The group now has a Web, Twitter and FaceBook page at: http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

Activity will be on 80-10 meters using CW and SSB. The suggested
frequencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14260, 18128, 21260, 24950, 28460 and 28560 kHz

All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates,
it is suggested to watch: http://www.qrz.com/db/H40RK

HB30, SWITZERLAND. Member of the Tera Radio Club (HB9OK) will celebrate
their 30th anniversary by using the callsign HB30OK until the end of the
year. Look for operators Marco/HB9OCR, Luigi/HB9CXZ, Claudio/HB9OAU and
Marco/HB9EUY to use the special callsign during the CQWW WPX SSB Contest
as a Multi-Single entry. QSL via HB9OCR, director by the Bureau.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, will once again be active from here
between March 21st and April 11th. Activity will be from Tumbaco on
40-10 meters operating CW, SSB and RTTY, using a TS-850s with a Heath
SB-200 into a Carolina Windom (40-10m) antenna. QSL via K8LJG. View the
HC DX-Diplomas at: http://webpages.charter.net/ne8z/NE8Z/Welcome.html

HQ9, HONDURAS. Ray, WQ7R, will once again be active as HQ9R from Honduras,
but this time during the CQ WW WPX SSB Contest (March 30-31st) as Single-
Op/Single-Band (10m)/Low-Power entry. QSL via K5WW or LoTW.

IOTA NEWS.............
AF-019. (Update) An international team of operators will be active as
IG9Y from Lampedusa Island between October 17-30th. Operators
mentioned are Khalid/A61BK, Gianni/IT9BUN, Roy/IW9ELR, Don/
JH5GHM, Boyko/LZ1QN, Dale/N3BNA, Frederic/ON4LG, Aurelio/PC5A,
Romeo/S52RU, Peter/S54W, Renato/S57UN and Drago/S59A. Activity
will be on 160-6 meters using CW, SSB, and RTTY, with four
stations on the air. The team will be in the CQWW DX SSB Contest
(October 26-27th) as a Multi-2 entry. QSL via ON4LG. An OQRS
will be available for direct and Bureau cards. Visit their Web
page at: http://ig9.ii9p.com

AS-073. Jack, SP5APW, will be active as 9M2/SP5APW from Perhentian
Besar Island between May 1-7th. Activity will be SSB and a
little digital. His license is good for 160-10 meters. QSL
via his home callsign, direct, by the Bureau or use LoTW.
For updates, watch: http://as-073.blogspot.com

AS-118. Members of the Kuwait Amateur Radio Society are once again
active as 9K2F from Failaka Island between now and March
18th. This is their 7th annual trip. Activity will be on
the HF bands. QSL via 9K2HN. Watch last year's operation
at: http://www.youtube.com/watch?v&#65533;mJe2saYm4

EU-006. Members of the Papa Lima DX Group will be active as EJ0PL
from Inishmore Islands (Aran Islands) between July 23-29th.
Ten operators plan to have three stations active on 80-6
meters using CW, SSB and the Digital modes. Activity will
include the RSGB IOTA Contest (July 27-28th) as a Multi-Op/
High-Power entry. They will use Hexbeams (20-6m) and verticals

(80-30m). Operators mentioned are Michal/EI3KG, John/EI4GK, Adam/EI5JQ, Robert/EI6KD, Oleg/EI7KD, Waldi/SP7IDX, Jerzy/SQ7JT, David/EI9FBB, Ark/EI9KC and Mietek/SP9NWN. QSL via EI5JQ, direct or by the Bureau. An OQRS will be available via ClubLog. Log will be uploaded to LoTW, eQSL and HRDLOG.net.

EU-008. Members of the Camb-Hams will once again activate the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p between May 10-16th. They were there in April 2008. Activity will be on all HF bands (600-10m) using five stations with amps. Operations will also be on 6m, 4m and 2m. They will focus more effort on 2m EME. QSL via M0VFC (OQRS via QRZ.com). More details and updates can be found at: http://dx.camb-hams.com

EU-038. Wim, PA0WRS, will be active as homecall/p from Ameland Island (WLOTA 1059) between April 19-26th. Activity will be on the HF bands, all modes, propagation permitting. QSL via his home callsign, direct or by the Bureau.

EU-039. Operators Jacques/ON5OO, Jean-Jacques/ON7EQ, Noel/ON4NS, Pascal/ON5RA, Ann/ON5AR, Roger/ON6WU, Martin/ON4VMA, Frank/ON5NQ, Peter/ON8ZZ and Frederik/ON8ZL will be active as TM7T from Grand Ile (DIFM MA-004, WLOTA 0424) in the Iles Chausey Group between July 26-28th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Multi-Op/24hr/DXpedition entry. Operations will be on 80-10 meters using CW and SSB. QSL via ON8ZL, direct (QRZ.com) or by the ON Bureau. See the QRZ.com Web page for more details at: http://www.qrz.com/db/TM7T

NA-174. (Update to OPDX.1103) The "DX-World.net" reports that David, VE3VID, who is currently active as VY0/VE3VID from the rare Igloolik Island (WW.Loc EP-99), will be there until March 29th, but he will return later this year during September/October. Currently, David uses a 20m dipole on RTTY, but has plans to use a multiband antenna upon his return. His work obligations will determine his activity, but generally he will be on the air after 2100z and definitely weekends. QSL via his home callsign, by the Bureau or direct to: David Gerrard, 1653 Mountain Rd, R.R. #1, Westport, ON, K0G 1X0, Canada.

OC-090. Victor, R6AF, will be active as DU1/R6AF from Busuanga Island possibly April 27th and May 3rd. Watch for updates on Twitter: https://twitter.com/r6af

SA-050. Jos&#65533;, CE8DMT, will be active from Navarino Island (WAP CHL-13) in the Chilean Antarctic Province between March 23-24th, to meet the needs for European and North American stations seeking WAP Antarctic stations award. Jos&#65533; will operate according to the following schedule: 1330-1530z on 15 meters (21277 kHz)
1600-1700z on 10 meters (28477 kHz)
He will use a Kenwood TS-130S into a Hi-Gain 3 element Yagi

beam. QSL via address on QRZ.com. Suggested URLs are:
http://www.waponline.it/NewsInformation/tabid/225/Default.aspx

http://yimber-gaviria.blogspot.com/2013/03/chile-antartic-province-ce8-23-24-de.html

IS0, SARDINIA. Hubert, OE3FHA, will be active as IS0/OE3FHA from Sardinia (EU-024, IIA SD-001, MIA MIS-035, WLOTA 1608) between September 8-26th. Activity will be on 40/20/15 meters using SSB with 100 watts and a CP6 Diamond antenna. QSL via his home callsign, by the ARI Bureau or direct.

J3, GRENADA. Operators Tom/OE2ATN and Franz/OE2SNL will be on a suitcase DXpedition to Grenada Island (NA-024, WLOTA 0718) between October 28th and November 10th. The callsign has not been issued yet. Operations will be on CW, SSB and RTTY with 100-200 watts. A Web page is under constructions.
More details will be forthcoming.

VRY DIS - Very Disturbed Severe Storm K�9 100-400

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on March 10th [edited]: "Press Release #2 - Wake Atoll Commemorative DXpedition -- "We are pleased to announce the callsign for the Commemoration anticipated taking place at the beginning of October, 2013.
K9W has been assigned to this event! The actual days of use will be announced on our website and through the normal media channels.
Additionally, we are happy to announce that Val, NV9L, and Col, MM�NDX, have joined the Team as Pilot Stations. Pilot stations are essential members of the DXpedition's operation and gather the DX communities' feedback during the event. This information allows the 'on island team' to tailor their activities to the needs of stations worldwide.
We have received our first foundation support from INDEXA and donations from clubs and individuals.
In-depth planning is continuing and progressing nicely thanks to the efforts of many members of the DX community. Their input and assistance is greatly appreciated and welcomed!

Please check our web site often for updates: http://www.wake2013.org/
K9W Wake Atoll Management Team"

OH0, ALAND ISLANDS. Operators Pertti/OG2W and Raimo/OH0BCI will be active as OH0/OG2W from the Aland Islands(EU-002, WLOTA 1373, WWFF OHFF-037) between March 20-24th. Activity will be on all HF bands and modes. QSL via OG2W, direct or by the Bureau.

P5, NORTH KOREA (Update To P5/K6VVA Pending "CW ONLY" & IOTA AS-197 Activation Proposal Project). Rick, K6VVA, posted another new supplement (INFO UPDATE #2) at: http://www.k6vva.com/p5/p5infoupdate2.pdf
If you have not read the general information page <http://www.k6vva.com/p5> and/or Rick's "INFO UPDATE #1" <http://www.k6vva.com/p5/p5infoupdate1.pdf>, it is suggested that you do so before reading "INFO UPDATE #2".
In short, Rick updates everyone on his efforts and continues to pursue his goal of activating P5 from an IOTA (AS-197) on CW only. However, in "INFO UPDATE #2" he states, "Yet a new alternative route to potential success has also materialized, and I decided to unleash the full 'long term' plan, which has been to activate ALL of the four P5 IOTA Designators (AS-195, AS-196, AS-197 and AS-198)." He also talks about the recent appalling behavior of DXpedition pileups.

PB33, NETHERLANDS (Special Event). Jaap, PA7DA, will be active with the special callsign PB33Q (Princess Beatrix 33 years Queen) between April 20th and May 1st. On April 30th, Queen Beatrix will hand over the throne to her eldest son Prince Willem Alexander. On April 30th, 1980, she took over the throne of her mother Juliana. When she abdicates her throne, she has been the Queen for almost 33 years. Activity will be on the HF bands, as well as 6 and 2 meters. QSL please via the Bureau. For more details, see: http://pa7da.jouwweb.nl/pb33q
ADDED NOTE: There will be several other amateur stations to be active with special callsigns during this event. As this was being written, look for the following announced special callsigns:
PA33KBX in Zeeuws Vlaanderen (QSL PA0ABM) PD6KING -> PD9ND
PB2013KING -> PA9LUC PE6KING -> PE1KFC
PB6KING -> PB2JJ PA200KING -> PD5ROB
PC6KING -> PC7C PC13KING -> PA1DV

PJ4, BONAIRE (Update to OPDX.1103). Operators Steven/W1SRD and Dean/N6DE will be active as PJ4/homecall from the "Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279) between March 26th and April 1st. They plan to be active as PJ4D in the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. Operation before and after the contest will be focused on RTTY. QSL via LoTW is preferred. Direct to W1SRD with SASE/return postage for the contest callsign. QSL the QSOs to their homecalls for contacts outside of the contest.

PJ7, SINT MAARTEN. Operators Randy/N0TG, Ron/AA4VK and Jeff/N1SNB will be active as PJ7/homecall from Dutch Sint Maarten (NA-105, WLOTA 0711, DIFO FS-001) between March 15-23rd. Activity will be a suitcase operation on 40-10 meters using CW and SSB, with wire antennas and 100 watts.
QSL "ALL" callsigns via AA4VK.

QSLS RECEIVED VIA THE BUREAU: 4L1MA, 5H1Z, 7Z1HL, 9M6Z, 9M8/SM5GMZ, AA35YZ, BA7MG, BD1BYV, BD2SH/7, C21UF, C31KC, C50C, CE0Y/LA5UF, CT3/LA9DL, CT9/DH4JQ, CT9/DJ0IF, CY9M, CY0X, DX0M, E44PM, EA8/DL2DXA, F1IZL, FR5MV, HZ1FI, JW1RSA, JW6TMA, JW9DL, JW8HGA, OH0V, OJ0R, PJ2/DL4JS, PJ4J, S79DO, S79UFT, SV9CJO, SV9COL, SV9ZT, T32C, TT8PK, US5IFA, V31YK, V5/DJ4SO, V5/DK1CE, V55A, VK9DWX, VK9HR, VP2MXF, XF3LH, YJ0ANR, YJ0VK, YO3CZW, YP3A, Z60K, ZC4VJ, ZD8W and ZL8X

T2, TUVALU (Back on again and now active!). No sooner than OPDX.1103 was sent out, word came out that operators Gavin/GM0GAV, Robert/GM3YTS and Tom/GM4FDM had to change their operating plans to Tuvalu because their outward flight from Glasgow was cancelled due to an undercarriage problem. This effected all their others flights they were due to catch, especially the connection from Fiji to Tuvalu. However when this happened, their fourth operator Clive, GM3POI, was already on route to Fiji and did continue onto Tuvalu while the other three operators were making plans to operate from Fiji. By Tuesday, Clive, GM3POI, made it to Tuvalu and was planning to operate using a rig (w/100 watts) and wire antennas. Then on Wednesday, their Blog reported that Gav/GM0GAV, Rob/GM3YTS and Tom/GM4FDM were booked on a Saturday flight to Tuvalu. They were initially booked on a Thursday flight, however, since arriving in Fiji Monday, their luggage did not arrived and was still missing. The Saturday flight was their last chance of going to Tuvalu, but if no luggage by then they would return home. Then on March 14th, their luggage finally showed up. The three

Scots were able to leave on Saturday, and by the time you read this, they should be on the air from Funafuti Atoll (OC-015). For updates, watch the Web Blog page at: http://t2gm.org
Activity should be 160-10 meters using CW, SSB and RTTY. See suggested frequencies in OPDX.1103. If the InterNet is available, logs will be uploaded to ClubLog and LoTW. QSL Manager will be GM4FDM (QRZ.com), direct or by the Bureau. A OQRS will be available via ClubLog.
LAST MINUTE UPDATE: Activity from T2GM may be limited. Operators report, "On the flight to Tuvalu from Suva, Fiji, Rob's (GM3YTS) luggage was again lost. This bag contained band pass filters and coax, so antenna choice until Tuesday will be limited. (It's expected the missing luggage will arrive on the Tuesday flight). The team will QRT on Friday, March 22nd. at 1830z."

T2, TUVALU. A German team consisting of Rich/DK8YY, Detlef/DL3ALI and Ingolf/DL4JS will be active from the "Hideaway Guesthouse" on Funafuti Atoll (OC-015), the capital of the island nation of Tuvalu, between March 23rd and April 4th. They have requested the callsign T2YY and will receive the license upon their arrival. Activity will be on 80-10 meters, possibly 160m, using CW, SSB and RTTY. They plan on having two stations with amps using a Hexbeam for the HF bands and verticals for 80/40/30m. QSL via DH7WW.

T2, TUVALU (Reminder). Tim, NL8F, is expected to be active from Tuvalu between March 19th and April 2nd. His callsign is not yet known, but he will obtain his license upon his arrival on Tuvalu. Activity will probably be mostly SSB. QSL via K8NA.

TO7, MAYOTTE. Hartwig, DL7BC, will once agin be active as FH/DL7BC from Mayotte (AF-027) between March 26th and April 12th. Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 80-10 meters plus participation in CQWW WPX SSB Contest signing TO7BC. QSL via his home callsign, direct or by the Bureau. For more details, visit it his Web site at: http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

XR0, EASTER ISLAND (Reminder). Just a reminder that a UK DXpedition team will be active as XR0YG from Easter Island (SA-001) between March 20-27th (see OPDX.1090). Activity will be on all bands 160-10 meters, mainly CW. Even though the operations will be on the HF bands, they also plan to work challenging paths on the low bands and with an emphasis on Europe. ClubLog and LoTW uploads will occur daily. The log search on ClubLog will be available at: https://secure.clublog.org/charts/?c�0YG
There will also be OQRS available. QSL via G3TXF and LoTW. Visit their Web page at: http://xr0yg.com

YE1, INDONESIA. Team members of the Bekasi Club Station (YE1ZAT) and the Jakarta Contest DX Team (YE0X) will be active as YE1K from Bekasi (OC-021, WLOTA 1660) during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Multi entry. QSL via YE1ZAT.

Tell ABC you want more Ham radio on Last Man Standing show

Posted: 15 Mar 2013 08:51 PM PDT
http://forums.qrz.com/showthread.php?383796-Tell-ABC-you-want-more-Ham-radio-on-Last-Man-Standing-show&goto=newpost

From the Last Man Standing's Mike Baxter, KA0XTT's facebook page, We can show some support by going to the link below and posting comments to try and get more amateur radio tv time.

Please, for the hobby's sake, keep comments constructive and on target, this is the first foray into amateur radio that I can remember seeing on national television which is not a documentary or similar. Yes mistakes were made on the show, but, at least they are trying.

From the post:

Can Mandy be saved from a life of Radio Piracy? Will Mike Baxter ever get on the radio? Will Kyle figure out which Amazon PY8 is? Only you can help. Tell us you want more ham radio on the official "ABC LMS" site.

Episodes 66

Meet 5 Year Old Ham Ethan Kemp KK4ORG

(and his folks)

I did this interview wrong, and I wish I could do it over again. I talked (awkwardly) with Ethan for a few minutes. Then I talked to his parents,

Mitzi and Kevin, for a while longer. I should have talked to all three of them together. I'm pretty sure Ethan could have held up his end of the conversation.

Oh, it's a good show. It just might have been better. I think you'll enjoy meeting Ethan, and then learning how his folks nurtured his interest in Ham Radio as he studies for his Tech test. It seems they did a lot of things right.

Congratulations, Ethan! Welcome to Ham Radio!

Watch these episodes at our web site, www.HamRadioNow.tv.

THANK YOU to all our contributors and supporters!

Special event station call sign PH600NYK

Posted: 16 Mar 2013 12:36 PM PDT
http://forums.qrz.com/showthread.php?383880-Special-event-station-call-sign-PH600NYK&goto=newpost

The Special Event Call sign PH600AMF will be operational from time to time
during the Year 2013.

First period: 27 march - 15 april 2013. (which covers also the WPX contest!)

27 March 2013 it is 600 years ago that Nijkerk was granted city right.

With our special callsign PH600NYK we (clubstation PI4AMF) pay attention on
the 600th anniversary of this old city.

From a radio historical point of view we have chosen the suffix NYK, in
remembrance of the former Aero Nautical NDB NYKE,

which was transmitting "NYK" at 326 kHz. It was located close to its
successor; the navigational waypoint "NYKER".

Our prefix is related to Dutch Airplane Registations which are starting
with "PH"

Thanks so much for participating in our special event!

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th March 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Return of IRTS Awards & Trophies

If you have not returned your trophy which were presented at last years IRTS, AGM, time is running out. All trophies and cups must be returned to any IRTS committee member and or contact Peter EI4HX, email ei4hxperimental/at eircom/dot/net.

Renewal of Amateur Station Licences

In June 2009 the Wireless Telegraphy (Amateur Station Licence) Regulations 2009 came into force which changed individual Amateur Station Licences from annual licences to lifetime licences.

Whilst the licences are lifetime licences, under the regulations licensees are required to confirm the details of their licence to ComReg every five years. ComReg will begin advising licensees how to comply with this requirement in 2014. We have been told by ComReg that they have yet to determine how this process will take place but will endeavour to make it as smooth as possible.

Youngsters On The Air

During the summer of 2013, a youth radio camp "Youngsters On The Air" will be held near Tartu, Estonia from 5-12 August. There will be 10 teams participating from different European member associations of IARU R1. The camp is organised by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European

countries will be participating in different activities: presentations, Contests, visiting radio stations, observatory, etc. Young operators or SWL's aged between 14-25, are being sought to represent Ireland, and should contact Ger McNamara, IRTS Youth Co-ordinator on 087 2532512 or by email to ei4gxb /at/ gmail.com

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

Dundalk Amateur Radio Society EI7DAR

Dundalk amateur radio society members will be joining with Mid Ulster amateur radio club in a SOTA activation of Slieve Gullion 573m asl GI/CA-001 on Sunday 17th March, Activity will be around 145.375 fm, 144.305 and 7.130 ssb + or - qrm from 10am onwards.

North Cork Radio Group

North Cork Radio Group are operational from Ballynamona Beach, near Ballycotton, on bank holiday Monday, 18th March from 11.30am - 4pm approx. This is a fun day out where we make contacts and test different antennas for use at upcoming events. If you wish to take part, or indeed try the bands for the first time, feel free to come and visit us, we look forward to seeing, and working, you all.

We also confirm that we will be active at Mizen Head Visitors Centre for Marconi weekend from 12am on Saturday, 20th April using the callsign EI0IMD. We wish to thank the Centre for their continued support and look forward to the variety of contacts to be made at the site.

We also have the pleasure in announcing our annual Radio & Electronics Fair which is to take place at the Commons Inn, Blackpool, Cork on Sunday, 15th Sept 2013. Doors open at 11am and entry fee is 5 per adult (children free). More details to follow but if anyone wishes to make enquiries, please feel free to contact Edwin EI2HEB at 086 3885741 or via email ei2heb /at/ ei1nc.com

---

South Eastern Amateur Radio Group

The next monthly meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 25th March at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp. New members are very welcome. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

DX News

The International Museums Weekend special event will take place on the double weekends of 15th & 16th June and 22nd & 23rd June. More details available from www.ukradioamateur.co.uk/imw

Pete EI7CC is now QRV from Lesotho as 7P8PB, and Aidan EI8CE will be QRV from Lesotho next week and will be signing 7P8AM. Both operators look forward to working stations from EI & GI.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Users Prep for Severe Weather Season:

Posted: 16 Mar 2013 05:03 PM PDT
http://www.eham.net/articles/29882

Severe weather season is right around the corner and that means HAM radio users are dusting off their gear and gearing up for the coming storms. The Nebraska HAM radio state convention is underway at the Lancaster Event Center. HAM radios can make contact over short distances, like inside a room, or long distances, like around the world. That versatility make them ideal for severe weather spotting and response. At the state convention, HAM operators are brushing up on their hobby and stocking up on new equipment. It's all part of their commitment to being ready, if and when disaster strikes.

GB2RS NEWS

Sunday 17th March 2013

The news headlines:

Clarification due on 5MHz NoVs

RSGB AGM announced

Club of the Year regional winners revealed

Ofcom is shortly expected to make an announcement concerning the validity of 5MHz Notices of Variation on Club and Reciprocal licences. The details are expected to appear first on the Ofcom website, and on the RSGB site shortly afterwards. This announcement is prompted by a number of enquiries by clubs and individuals.

The April edition of RadCom contains the formal Calling Notice for the 86th Annual General Meeting of the RSGB. The AGM will take place at the Institution of Engineering and Technology at noon on Saturday 20 April. Full details of the Agenda and other relevant details have been sent to Members of the Society. Voting is now underway on the Resolutions, and Members may vote online or by post.

The Regional winners of the RSGB Club of the Year competition have been announced and have been posted on the RSGB website. The Regional winners will now be whittled down to three finalists. These three clubs will be invited to the RSGB AGM to find out which among them has won the prestigious National Club of the Year award.

The special event station celebrating the RSGB Centenary, GB100RSGB, is going from strength to strength. This weekend it's being operated by Otley ARS. On Monday and Tuesday GB100RSGB will be operated by Hornsea ARS, who hand it over to Denby Dale ARS for Wednesday to Friday. Next weekend it will be in the hands of M2D East Yorkshire Contest Group.

The QSL Bureau is looking for an active G3 L, M or N callsign holder to take over responsibility for the G3 L to N QSL sub group. The current volunteer, Tom Bartlett, G3ITB, is stepping down after 18 years and the RSGB would like to thank him for his excellent service to his fellow members. The ideal replacement needs to have time available, email available and some basic knowledge of Excel spreadsheets. This sub group currently handles around 15 to 20 thousand cards per year. If you hold a callsign starting G3 L, M or N and are interested in helping others, please contact the QSL bureau via email to qsl@rsgb.org.uk.

Two IARU spectrum planning committees are meeting in late April this year. The C4 committee handles HF, while C5 looks after VHF, UHF and microwave matters. All UK amateurs are invited to view and comment on the papers submitted for this meeting. They can be found online at two Yahoo reflectors. The C4, HF papers and discussions are at http://uk.groups.yahoo.com/group/ukc4discussion. The C5, VHF, UHF and microwave papers and discussions are at http://uk.groups.yahoo.com/group/ukc5discussion. In early April 2013 the RSGB IARU Committee will review comments on these reflectors and also input from the RSGB Spectrum Forum in order to agree the brief for the RSGB delegates at the two committee meetings.

And now for the details of rallies and events for the coming week

We start with advance notice that the South Lancs Spring Rally planned for 25 May has been postponed until 22 June due to unforeseen circumstances.

We are not aware of any rallies this weekend.

On Saturday 23 March the Laugharne Rally takes place at the Millenium Memorial Hall, Laugharne, Carmarthenshire SA33 4QG. Open from 10am to 2pm, admission is free - as are trader tables and flea market places. Details from Matthew Twyman, GW6KOA, on 01994 427 581.

Sunday 24 March sees the Devon & Cornwall Hamfest at The Engine House, Compton Park, Callington PL17 8EA. There will be trade stands, car boot sale, special interest groups, family attrarctions TS, SES, CBS, SIG, CP, FAM, CS. Dereck, M0YDW, disco5live@btinternet.com.

Also on Sunday 24 March is the Lough Erne Amateur Radio Club Annual Rally. This opens at 11.30am at Share Discovery Village, Lisnaskea, Co Fermanagh BT92 0EQ, N Ireland. There is car parking, a bring and buy, trade stands, a licensed bar, catering and disabled facilities. For more information contact Iain, on 028 6632 6693.

Now for the news of special events

Coventry Gliding Club is on the third and final day of operating its Special Event Station GB6CGC today, celebrating the club's 60th anniversary. The station is at The Soaring Centre, Husbands Bosworth Airfield, Leicestershire.

The Marconi Radio group will be operating GB0SPD at Ballycastle sea front today to mark St Patrick's Day. Activity will be from 40m to 2m.

>From today until the end of the month, members of Team Cartagena will be operating EH5SIP. This is to commemorate the 125th anniversary of the submarine Isaac Peral. QSL and other information is on QRZ.com.

23 March sees GB1CMR operating from Suvla Barracks in Hereford, celebrating 35 years of Clansman military radios. Operation will be on 80m through to 2m.

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating Events Station K5BL on 23 March, in celebration of one of New Mexico's oldest, continuously operating radio clubs. Operation will be 1400-2300 UTC, as near as possible to 21.337 and 14.330MHz, as band conditions permit.

And now the DX news compiled from 425 DX News and other sources

A UK-led expedition to Easter Island is scheduled for 20 to 27 March, with activity planned mostly on CW on 160 through 10m. Plans are to use Elecraft K3s, small amplifiers and vertical antennas with plans to work challenging paths on the low bands, with emphasis on Europe. For receive antennas on the low bands they will use a Beverage or flag, depending on available space. Plans are to upload daily to Club Log and LoTW. Team members include G7VJR, G3TXF, G4IRN and G3ZAY. The callsign will be XR0YG. QSL via G3TXF and LoTW.

G1EUZ plans to be active from Ascension Island, IOTA reference AF-003, from 18 - 22 March using the call ZD8RAF.

Tim, NL8F plans to be on the air from Tuvalu, OC-015, from 19 March to 2 April, mostly on SSB. The callsign is not known yet. QSL via K8NA.

TA1HZ will be in Somalia from 24 March until 4 April and plans some time on HF, probably as T5TC from Mogadishu. QSL to TA1HZ as per instructions on www.qrz.com.

Now the contest news

The BARTG HF RTTY contest is in progress now and ends at 0200 UTC on Monday. Operation is on all contest bands from 80 to 10m and the exchange is RST plus serial number and time.

Tuesday sees the 1.3GHz UKAC from 2000-2230 UTC. Operation is all modes on the 23cm band, and the exchange is RST, serial number and locator.

The 80m Club Championships SSB is on Thursday from 2000-2130 UTC. Using SSB on the 80m band, RST and serial number form the exchange.

And now the solar factual data for the period from Friday the 8th to Thursday the 14th of March, compiled by Neil Clarke, G0CAS on Friday the 15th of March

Up to eight sunspot regions were visible on the 11th but most were small and stable. However, a couple of groups produced occasional C class solar flares. Solar activity was very low for the first three days of the period but increased to low from the 11th. In total eight C class solar flares took place. The most impressive was a long duration C2 solar flare in connection with a filament eruption. Associated with this solar flare was a coronal mass ejection. Solar flux levels increased slightly from 115 units on the 8th to 123 by the 12th. The average was 120 units. The 90 day solar flux average on the 14th was 116 units, that's one unit up on last week. X-ray flux levels varied little day to day and averaged B3.2 units. Geomagnetic activity was quiet every day and the average was Ap 4 units. Solar wind data from the ACE spacecraft

saw solar wind speeds decline from 360 kilometres per second on the 8th to around 300 for the rest of the period, except for an increase late on the 14th to 400 kilometres per second. Particle densities were at moderate levels every day and varied between 12 and 45 particles per cubic centimetre. Bz varied between minus 5 and plus 6 nanoTeslas every day but increased to minus 7 and plus 9 nanoTeslas late on the 14th.

And finally the solar forecast for the coming week. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be low with only C class solar flares taking place, however, on some days, activity could decline to very low levels. Solar flux levels should be around the 100 mark and may even dip slightly below 100 on several days. Geomagnetic activity is expected to be mostly quiet, but if a coronal mass ejection heads our way then activity would increase. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Paths this week to Japan will have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 0800 and 1100 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club is holding its holding club net on 145.225MHz from 8pm today and next Sunday. The Intermediate exam is on Monday. Tuesday sees a Morse class from 7.45pm, followed at 8.30pm by a talk on Circuit Wizard by Chris, G0EYO. On Thursday it's the 80m Club Championships SSB Contest from 8pm, and the shack social is on Friday. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. Friday sees a club HF net on 3.748MHz from 8pm. Contact the FELCC Information Line on 07554 362 020 for more information.

Lincoln Short-Wave Club is holding a committee meeting in the shack on Monday. Wednesday sees a formal meeting at the BSA Club from 8.15pm. The club net is on Thursday from 8pm on 145.375MHz and the Saturday surgery and mentoring commences at 9am in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is having an open meeting on Monday. Thursday sees training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is holding its AGM. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is having a construction evening and operating on VHF. Details from Anne, 2E1GKY, on 01242 699 595, daytime.

On Monday Sutton Coldfield Amateur Radio Society is running an open net on 145.250MHz from 7.30pm. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is holding its AGM. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Dudley and District Amateur Radio Society is having its 23cm contest night. Details from Miles Hall, G4GSB, by email to g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club is watching a video on the Avro Vulcan. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is planning social events and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is having a natter night and is on the air. Contact Terry, M0RIA, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is having a talk by M0RJS on the hows and whys of lenses. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Cheltenham Amateur Radio Association is having a constructional exhibition. Details from Derek Thom, G3NKS, on 01242 241 099.

On Friday Coventry Amateur Radio Society has its President's Night. Contact John, G8SEQ, on 07958 777 363.

On Saturday Rugby ATS is looking at valves and classical electronics. Details from Steve, G8LYB, on 01788 578 940.

NEWS FOR THE NORTH OF ENGLAND

We start with clubs that have several events this week. Hornsea Amateur Radio Club is operating GB100RSGB on Monday. Wednesday sees the construction of a Slim Jim antenna. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Halifax & District Amateur Radio Society is having a talk on Tuesday by Raymond, G1MSD, on John Logie Baird. Wednesday sees the start of a three day event, joining forces with Denby Dale Amateur Radio Society to run the RSGB Centenary Special Event Station G100RSGB. Three separate stations will operate from DDARS's contest station site near Holmfirth. Details from Martin, M0GQB, on 01422 341 317.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is having a demonstration by Zoltan Derzsi of further development of an affordable ATU. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having CW night with group instruction and practice. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is having a talk on phased verticals by Paul, M1PAF. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is having a surplus sale. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Stockport Radio Society is having a project night led by Tom Spence, M0DCG. Details from Nigel Roscoe, on 07973 312 699.

On Wednesday Denby Dale Radio Club commences three days of operating G100RSGB from Cartworth Moor for the RSGB Centenary Celebrations. There will be no meeting at Pie Hall. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Mid-Cheshire Amateur Radio Society is running Foundation and Intermediate training, plus having a committee meeting. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday South Lancashire Amateur Radio Club is having an Easter buffet with other attractions. Contact Allan Green, 2E0RAG, on 07533 970 841.

On Thursday South Manchester Radio and Computer Club is having a surplus equipment sale with Peter, G0BHP. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is holding a bring and buy evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday Tynemouth Amateur Radio Club is looking at homebrew QRP. Contact Bob, M0KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

Marconi Radio group will be operating GB0SPD at Ballycastle sea front today to mark St Patrick's Day. Activity will be on 40m through to 2m. The day has a variety of events including face painting for the children, Irish Dancing Music by Shane Kennedy, and a guest appearance

by John Watt. There is a children's painting competition for several age groups, with Cllr Sandra Hunter judging the entries and presenting goodie bags as prizes. The North Antrim Model Aircraft club will be putting on an aircraft and helicopter show, and a car boot sale will be on throughout the day.

Mid Ulster Amateur Radio Club is running a SOTA activation at Slieve Gullion from 11am today using MN0VFW and members' own callsigns. On Tuesday the Intermediate course continues alongside a shack night. Next Sunday sees the club promoting itself at the Lough Erne Amateur Radio Club rally. More information from Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is conducting CW practice. Contact Paul, GM0BKC, on 07846 412 862.

On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is visiting Bang and Olufsen in Glasgow. More information from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday Aberdeen Amateur Radio Society is having a construction night. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is holding a radio check night with John, MM0JXI. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice that West Kent Amateur Radio Society is running a short course for those wanting to sit the Advanced exam on 2 May. More information online at www.wkars.org.uk or via email to training@wkars.org.uk.

Now for clubs that have several events this week. Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's slow Morse on 1.995MHz from 8pm. Friday sees the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Hilderstone Radio and Electronics Club 19 and is running National Science Week activities at Charles Dickens school on Tuesday and Thursday. Next Saturday there's a club Trip to Bletchley Park and the National Radio Centre. Details from Chrissie Turner, by email to hilderstoneclub@gmail.com

Norfolk Amateur Radio Club is having a visit by Paul Bigwood of Yaesu on Wednesday. On Thursday it's the RSGB 80m CC SSB. Details from Chris Danby, G0DWV, on 01603 898 678.

Now we return to the traditional listing in date order. On Monday Basingstoke Amateur Radio Club is having a talk on Woofferton HF radio station by Tony Crake. Details from Tim, G3PJD, on 07754 132 859.

On Monday Braintree & District Amateur Radio Society is having a talk on baluns and their construction by Melven, G0EMK. For more information contact John, M5AJB, on 01787 460 947.

On Tuesday Stevenage & District Amateur Radio Society is holding its AGM. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Tuesday Verulam Amateur Radio Club is having a talk by David, G3YYD on decoding RTTY on a PC. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday Chesham & District Amateur Radio Society is on the air and holding a members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Dover Radio Club I having a talk on the Raspberry Pi by Matt, M1CMN and Rob, G4FXE. Contact Pete, M0PKH, by email to peter.halloway@sky.com.

On Thursday Colchester Radio Amateurs is hosting and taking part in the Interclub Quiz. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Cray Valley Radio Society is having a presentation by Malcolm, G8MCA on operating in the UKAC VHF/UHF Tuesday evening contests, and he will also introduce the rules for the new Cray Valley operating award. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a talk by Mike from Alton Antenna Arrays. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships SSB. Contact Rob, G4LMW, on 01635 862 737.

On Thursday Shefford & District Amateur Radio Society is having a talk by Stewart, G3RXQ, on The Event. Contact John Burnett, 2E0OAK, on 07860

804 793.

On Thursday Sutton & Cheam Radio Society is having a talk by Professor Simon Watts, G3XXH, on a brief history of airborne surveillance radar in the UK. Contact John, G0BWV, on 020 8644 9945.

On Thursday Worthing & District Amateur Radio Club is taking part in the 80m CC SSB contest. Contact John, G8FMJ, on 01273 593 232.

On Friday Cambridge & District Amateur Radio Club is having a talk on a modulation gadget by Mike, M0BLP. Details from David, M0ZEB, on 01353 778 093.

On Friday Fort Purbrook Amateur Radio Club is on the air as M0GZN at the Fort from 7pm. Contact Neil Hoare, M0NEH, on 02392 378 559.

On Friday Mid-Sussex Amateur Radio Society is having a workshop on cable connectors with Chris, G0GMC. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Friday Radio Society of Harrow is holding its AGM at the Elsie Fischer Room, St Lawrence Church, Eastcote HA5 2SJ. More information from Linda, G7RJL, on 02083 868 586.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Exeter Amateur Radio Society is holding its HF net on 3.675MHz from 7.45pm on Monday. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Riviera Amateur Radio Club is having a club meeting and putting MX0RIV on the air on Tuesday. Friday sees the club net on 145.425MHz from 8pm. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

Thornbury & South Gloucestershire Amateur Radio Club is having a talk on Wednesday about GPS Investigations by Paul, 2E0PSM. The Friday 2m net is at 8pm. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Sunday Flight Refuelling Amateur Radio Society is having a talk by Ashley, G0CDY, on prognostics - the predictive analysis of future events. Details from John, G4POF, by email to g4pof@hotmail.com.

On Monday Appledore & District Amateur Radio Club is holding its AGM. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Thursday Cornish Radio Amateur Club is having a workshop evening. Contact Steve, G7VOH, on 01209 844 939.

On Thursday Saltash & District Amateur Radio Club is on the air. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club is having its spring table top sale. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is having a talk on simple transmitters by G3MYM. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Torbay Amateur Radio Society is having a presentation and buffet evening. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Dragon Amateur Radio Club has its Chairman's night. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Monday Llanelli Amateur Radio Society is putting GB4SDD on the air and having a social evening. Contact Craig, MW0MXT, on 01269 845 773.

On Tuesday Carmarthen Amateur Radio Society is having an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is looking at Cellnet communication. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

```
:Product: Weekly Highlights and Forecasts
:Issued: 2013 Mar 18 0210 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
11 - 17 March 2013

Solar activity was low to moderate. Low activity dominated the week
with only low level C-class events observed on 11-14 and 16-17
March. A long duration C2/1f flare associated with a filament
eruption near N20E05 occurred at around 12/1107 UTC. An associated
asymmetric full halo was assessed to be Earth-directed with a
velocity in the low 700 km/s range at departure. Activity increased
to moderate levels on 15 March when Region 1692 (N09, L=077,
class/area Hhx/250 on 09 March) produced an M1/1f long duration
flare at 15/0658 UTC. This flare appeared in H-alpha imagery to
erupt along a NE to SW oriented filament channel and partially
through Region 1692 beginning at 15/0615 UTC. Associated with this
flare were a 150 sfu Tenflare, a Type IV radio sweep, and an
asymmetrical full-halo CME (estimated plane-of-sky speed of 1399
km/s). The CME first appeared in SOHO/LASCO C2 imagery at 15/0712
UTC.

A greater than 10 MeV proton event associated with the 15 March CME
began at 16/1940 UTC, reached a maximum flux of 16 pfu at 17/0700
UTC, and ended at 17/0825 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels throughout the period.

Geomagnetic field activity was quiet from 11-14 March. Activity
increased slightly to yield a few isolated unsettled periods on
15-16 March due to weak effects from the 12 March CME. The
geomagnetic field began at quiet levels on 17 March. At 17/0601 UTC,
a geomagnetic Sudden Impulse (41 nT on the Boulder magnetometer) was
observed as the 15 March CME became geoeffective. Minor to major
storm periods were subsequently observed with major to severe storm
periods at high latitudes for the 17/0900-2100 UTC periods.

Forecast of Solar and Geomagnetic Activity
18 March - 13 April 2013
```

Solar activity is expected to be low throughout the period. A slight chance for M-class activity exists through 20 March while Regions 1696 (N04, L=095, class/area Eai/190 on 16 March) and 1698 (S19, L=118, class/area Eao/200 on 17 March) remain on the disk, and again from 01-13 April when the two regions are expected to return to the visible disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to begin the period at moderate levels but rise to high levels from 19-24 March due to effects from the 15 March CME. A decrease to normal to moderate levels is then expected through 28 March. High levels are expected from 29 March-04 April due to effects from a recurrent coronal hole high speed stream (CH HSS). A return to normal to moderate levels is expected for the remainder of the period.

Geomagnetic field activity is expected to be at quiet to minor storm levels on 18 March due to continued effects from the 15 March CME. Quiet to unsettled levels are expected to prevail throughout the remainder of the period with the exception of possible active periods on 28 March due to CH HSS effects.

A centenary normally marks 100 years and not the 87 years for which
the RSCB has existed.

As the London Wireless Club, it was merely one of a number of territorial
wireless clubs in this country, with that of Cantab being the oldest, AIUI.

Who is trying to con whom?

Posted: 17 Mar 2013 01:55 PM PDT
http://forums.qrz.com/showthread.php?384039-GB0GPF-MN0URN-MN0GPF&goto=newpost

A date for your diaries..

Location: Grey Point Fort, Northern Ireland.

Grey Point Fort is a World War 1 coastal defence fort on the south shore of Belfast lough, 13 miles east of Belfast city, housed within the Helens Bay/Crawfordsburn Country Park.

We at Grey Point Fort Amateur Radio Society will be holding a special ☐Moment of Remembrance☐ event on the following dates: 31st May to 2nd June 2013, starting and ending at 1700hrs on both days.

The following 3 callsigns will be on air for this event: GB0GPF, MN0GPF and GN0URN.

The 3 stations will be working on all HF bands between 80m and 10m (contacts above 10m will not count, nor will any internet assisted contacts i.e. Echolink. Modes of operation will be SSB and PSK).

Please note that this event will not be a contest, and will not operate under contest style conditions, it is a Moment of Remembrance.

Awards: 2 classes of awards are available, Licensed and non-licensed(SWL)

A certificate will be awarded to any station able to make contact with all 3 callsigns in use, on any band, SSB or PSK. Any station not making all 3 contacts, individual QSL cards are available for each contact.

SWL stations can also avail of this award under the same conditions as long as the logs match up.

More information is available online from:
http://www.greypointfort.magix.net/p...nt%20rules.htm

We at Grey Point Fort ARS wish to take this opportunity to thank you in advance, and hope that you will be able to publish these details, or part of, for us.

Yours

Stephen Mulligan 2I0SOB

Power Buddy - Backup power in a briefcase - Solar panels too

Posted: 18 Mar 2013 07:08 AM PDT
http://forums.qrz.com/showthread.php?384121-Power-Buddy-Backup-power-in-a-briefcase-Solar-panels-too&goto=newpost

My wife just called me and asked me about this portable, backup power she heard about so I checked it out. It's certainly not enough to run the house but my Amateur Radio mind sure could see using it for portable, remote communications. The solar panels are a nice feature too.

Here's the web site: http://www.mypowerbuddy.com

Enjoy,

Paul

http://forums.qrz.com/showthread.php?384082-HamRadioNow-EME-the-easy(er)-way-W4PC-on-Ham-Radio-Deluxe-Version-6&goto=newpost

HAMRADIONOW.tv

Episodes 67 and 68

Episode 67: EME the Easy(er) Way

that's Earth□Moon□Earth

Pete Rimmel N8PR sits in the middle of the EME pack. He's got the power, a decent four-Yagi array on two meters with AZ-EL rotor, and he can do EME the old fashioned way, on CW while listening by ear. Not the biggest station out there, but big enough. But he introduces us to one of the WSJT digital modes that lets you make EME contacts with a far more modest station (no, not an HT!). If you've got an all-band multimode rig and a beam on the roof, you're pretty close to at least being able to work the big guns.

Episode 68: Ham Radio Deluxe V6 is Out

W4PC tells us all about it

HRD V6 is the long-awaited, and maybe somewhat dreaded, new version. Dreaded? Well, if you didn't get in on the pre-release bargains, it'll cost you a C-Note. For the money, you get a full-time support and development team, and a very full-featured, multi-faceted piece of software. Our big question: will we get the trolls who want to complain in the comments section? See if that comment count ratchets up...

Watch these episodes at our web site, www.HamRadioNow.tv.

THANK YOU to all our contributors and supporters!

E-Mail: newsline@arnewsline.org

Nominations Sought for 2013 Amateur Radio Newsline☐ ☐Young Ham Of The Year Award☐

The nominating period for 2013 Amateur Radio Newsline☐ "Young Ham of the Year Award" is now open. Originally known as the "Westlink Report Young Ham of the Year," this award program, now in its third decade, is presented annually to a United States or Canadian licensed Radio Amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in communications through the Amateur Radio hobby/service. (Please see application form for details.)

ELIGIBILITY

The award is open to any licensed amateur radio operator residing in the 50 states that comprise the United States plus U.S. territories and 10 Canadian provinces. Nominees must hold a currently valid Amateur Radio License issued by the FCC (United States) or Industry Canada (Canada) and meet the 18 year or younger age qualification.

OBTAINING NOMINATING FORMS

Applications forms are available for a self addressed stamped envelope mailed to the 2013 Young Ham of the Year Award % Newsline, 28197 Robin Avenue Santa Clarita California 91350. These nominating applications are also available for electronic download in .PDF format from our website at http://www.arnewsline.org/YHOTY.

NOMINATION CUTOFF DATE

All nominations must be submitted before midnight your local time on May 30, 2013 on an official nominating form and accompanied by verification materials for declarations noted within the nomination.

NOMINATION FILING

Paper nominations should be sent by regular mail only to The Amateur Radio Newsline, Inc., Att: YHOTY 2013, 28197 Robin Avenue, Saugus CA. 91350. (Note: Please do not send in any mail that requires a recipient signature as there is nobody here to provide this.)

Electronic nominations scanned as .JPG files should be e-mailed to newsline(at)arnewsline(dot)org.

PRESENTATION IN 2013

With continued corporate sponsorship, the 2013 Amateur Radio Newsline Young Ham of the Year Award presentation will take place in August at the 2013 Huntsville Hamfest. The Huntsville Hamfest is one of the nation□s largest and most popular Amateur Radio conventions. It is held annually the third weekend in August at the Von Braun Civic Center in downtown Huntsville Alabama and usually attracts upward of 5000+ attendees.

AWARD BACKGROUND

The Amateur Radio Newsline□ □Young Ham of the Year Award□ program was conceived in 1985 by then Westlink Report "Editor-in Chief" Bill Pasternak, WA6ITF. His desire then and now is to highlight the accomplishments of the nation's many young radio hobbyists, and to encourage the entry of more young people into the exciting and rewarding hobby of Amateur Radio.

With the absorption in 1995 of the Westlink Report readership base into Worldradio Magazine, the awards originator has decided to continue it under the banner of his own "Amateur Radio Newsline□" organization. It is his belief that this real-life experience may lead the award winners and many other young hams into technology based careers that will make them the scientific leaders of the future.

ABOUT THE AWARD SPONSORS

The Amateur Radio Newsline, Inc., better known as "Newsline" is the world□s largest not for profit (501(c)(3) and totally independent ham radio broadcast news and data information service. It was organized in 1976 by Jim Hendershot WA6VQP and Bill Pasternak WA6ITF. Since that time it has produced and put to air over 1850 consecutive weeks (35+ years) of free news bulletin programming dealing with Amateur Radio and related personal communications issues.

Primary corporate underwriting since the inception of the "Young Ham of the Year Award" in program in 1986 is from Yaesu U.S.A. Corporation. Yaesu is a world leader in the design, manufacture and distribution of Yaesu brand high quality Amateur Radio equipment. See: www.yaesu.com

As of 1995, CQ Communications Inc. has been an additional corporate underwriter. CQ Magazine and its sister publications CQ-VHF, Popular Communications and Worldradio OnLine are owned by CQ Communications and are considered the trend-setting magazines serving today's modern radio amateur radio community. See: www.cq-amateur-radio.com

In 2008 Heil Sound Ltd.; an innovative manufacturer of microphones and accessories for the amateur, professional sound and broadcast industries joined as the latest corporate underwriter. See: www.heilsound.com

PAST RECIPIANTS

1986 - Shawn Alan Wakefield, WK5P

1987 - David Rosenman, KA9PMK

1988 - Jonathan Binstock, NK3D

1989 - Erin McGinnis, KA0WTE

1990 - Mary F. Alestra, KB2IGG

1991 - Richard S. "Sammy" Garrett, AA0CR

1992 - Angela Fischer, KB0HXY

1993 - Kevin Boudreaux, N5XMH

1994 - Allison Daneen Zettwoch, KD4CKP

1995 - Adam Weyhaupt, N9MEZ

1996 - Toby Metz, KB7UIM

1997 - Brian Mileshosky, N5ZGT

1998 - Richard Paczkowski, Jr. KF4BIA

1999 - Michelle Swann, KE4EZI

2000 - Christopher Arthur, KT4XA

2001 - Patrick Clark, KC8BFD

2002 - Josh P Abramowicz, KB3GWY

2003 - Jay Thompson, W6JAY

2004 - Andrea L Hartlage, KG4IUM

2005 - Rebekah A Dorff, WG4Y

2007 - Grant H. Morine, W4GHM

2008 - Emily Stewart, KC0PTL

2009 - Andrew Koenig, KE5GDB

2010 - Cody Anderson, KI4FUV

2011 - Kaitlyn Cole, KS3P

2012 - Erin King, AK4JG

ABOUT AMATEUR RADIO

The world-wide Amateur Radio service is force of more than 2.5 million publicly spirited personal radio operators who are licensed and regulated by their respective administrations. They are available as a voluntary group of skilled public service-oriented individuals with their own radio equipment who are available to provide emergency communications in times of disaster. They also provide a pool of trained radio operators and technicians to assist in improving international relations.

DXNL 1824 - March 20, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Fabian Kurz, DJ1YFK
(e-mail: dj1yfk@darc.de)

9X, Rwanda:
9X0ZM is the callsign of Kiyo, JR1IZM, who's in Kigali since
February and expects to stay for a year. It's not a DXpedition,
activities with a IC7200 and a loop antenna are limited to his
free time. He's mainly QRV in digital modes (JT65, PSK31), CW
and SSB on 40m - 10m. QSL via JO1CRA (B).

A5, Bhutan:
Yuki, JH1NBN will be in Bhutan on business matters until March 26.
In his free time he's active as A52W. QSL direct via JH1NBN.

C5, Gambia:
Pedro, AA9HX/ON7WP will be QRV from near Kololi and from Buntu
village from March 20 to 27 as C5WP. He'll use dipoles on top
of a three storey building with a FT-897. To cope with the
frequent power failures, he'll use battery power when needed.
Later this year, in August, he'll return for another two weeks.
QSL direct via ON7WP. http://www.africajeepsafari.com/

E5\S, South Cook Islands:
Andy, AB7FS/E51AND, and XYL Kat, ZK1SCH/KB7SCH, are moving to
Avarua (WW Loc. BG08ds) on Rarotonga and plan to put up some
big antennas. In July or August they might visit Palmerston
(OC-124) or Pukapuka (OC-098). QSL direct only (QRZ.COM).

EI, Ireland:
Olivier, ON4EI, will sign EI8GQB from Fethard (EU-115), March 24 -
April 3, with "green power" from his caravan. A participation in
the CQ WW WPX SSB Contest (March 30/31) is planned as EI1A.
QSL via ON4EI.

G, England:
The 35th jubilee of "Clansman Military Radio" will be celebrated

on March 23 with the special station GB1CMR from Sulva in Hereford..

From March 24 to 29 the special call GB5CT will be on the air
from Chalbury in Dorset England to commemorate over 200 years of
the Admiralty Shutter Telegraph. QSL via M0XIG.

HC, Ecuador:
Rick, NE8Z is QRV as HC1MD again from March 21 to April 11 on
40m - 10m in CW, SSB and RTTY. QSL via K8LJG.
http://webpages.charter.net/ne8z

I, Italy:
"The Factory 1944" organized the 2nd "Meeting of Historical Means
of the II World War". Through June 2nd the special call sign II0FTC
will be on the air in CW and SSB. QSL via IQ0FB.
http://www.thefactory1944.org/index.html

PA, Netherlands:
Joop, PD0RKA was admitted to the hospital and therefore cannot
operate as PD70JT as planned and reported in the previous DXNL.
We wish him all the best and a speedy recovery.

S5, Slovenia:
Milos, S53EO celebrates his golden ham radio jubilee with the
special callsign S503EO until June 15. He's QRV on all bands in
all modes. QSL via S53EO.

T5, Somalia:
Tevfik, TA1HZ will be in Modadishu on a humanitarian mission
as a doctor from March 23 to April 4 and in his free time be
active as T5TC with TS-480 and a Windom antenna.
QSL via TA1HZ. https://yyd.org.tr/

Upcoming Contests

24.03. UBA Spring Contest
25.03. DIG-PA Contest

The NAURYZ DX Contest will be held by the "Association of Amateur
Radio Services of Kazakhstan". The spring festival Nauryz (Nowruz)
was added to the UNESCO list of "Intangible Cultural Heritage of
Humanity". The Contest takes place on March 23/24 in CW and SSB
on 80m, 40m, 20m, 15m and 10m. http://www.nauryz-dx-contest.com

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island Activities

AF-027; FH; Mayotte Island: Hartwig/DL7BC visits Mayotte Island (DIFO
FH-001; WLOTA 0376; WW Loc. LH27nf) once again from March 26 zo
April 12. As TO7BC or FH/DL7BC he'll be active on the HF bands,
including activities in RTTY/PSK31 and a participation in the CQ
WW WPX SSB Contest. QSL via DL7BC (d/B).

http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

AS-013; 8Q; Maldive Islands: Noel/F6BGC spends his vacations on
Rihiveli Island (WLOTA 3911; WW Loc. MJ63). From March 19 - 29 he
will sign 8Q7NC in holiday style on 40 - 6m, mainly in SSB and a
little CW and RTTY. QSL via LoTW and F6bGC (d/B).

AS-042; R0B; Severnaya Zemlya: Vlad/RV3EFH will start a long time
activity (until October 2014) from Bolshevik Island (RR-07-03) as
RV3EFH/0 on March 25. He'll focus on 40/20/15/10m SSB, CW and
digital modes. QSL via RZ3EA (d).

AS-125; HS; Gulf of Thailand North East group: On 26.03.2013, Tana/E27EK
plans to be QRV from Chang Island as E27EK/p on the HF bands.
QSL via E27EK (d/B).

EU-002; OH0; Aland Islands: Pertti/OG2W and Raimo/OH0BCI will be QRV
from Aland (WLOTA 1373, WWFF OHFF-037) as OH0/OG2W from March 20-24.
Activities are planned on all bands and modes. QSL via OG2W (d/B).

EU-003; CU1/CU2; Eastern group: Frank/PA4N and Dervin/PD9DX will be
on the bands from Ilha de Sao Miguel (DIP AZ-002, PIP AC-002, WLOTA
2016) from March 26 to April 3. As CT8/PA4N and CS8/PD9DX they will
be QRV on the HF bands from a QTH that favors QSLs with the US over
Europe. Dervin (CS8/PD9DX) also plans to take part in the CQ WW
WPX SSB Contest. QSL via LoTW. QSL for CT8/PA4N via PA4N (B, no
direct cards). QSL for CS8/PD9DX via PD9DX (d/B).

EU-010; GM/MM; Outer Hebrides: From March 24 to 29, Graham/MM0GHM is
QRV from Barra Island (IOSA OH11, SCOTIA HI02, WLOTA 3126) as
MM0GHM/m. QSL via GM0GHM (d/B).

Corsica IOTA Expedition
The "Invoker-Team", consisting of Vincent/F4BKV, Gil/F4FET,
Christian/EA3NT and Laurent/TK4LS, will activate the following
islands between March 23 and 28.
Activities will be limited to daytime and they plan to have
three stations on the air at the same time.

EU-100; TK; Cerbicales Islands: TK0INT March 23. and 26.03. from
Ile de Maestro Maria (DIFM TK-032; MIA MCO-017; WWFF FFF-945;
WW Loc. JN41qn).

EU-104; TK; Sanguinaires Islands: TK1INT on 24. and 25.03. from
Ile Grande Sanguinaire (DIFM TK-002; MIA MCO-022; DPLF PB176;
ARLHS COR-003; WLOTA 0098; WW Loc. JN41hv).

EU-164; TK; Corsica's Coastal Islands: TK2INT on 27. and 28.03. from
Ile San Cipriano (DIFM TK-037; MIA MCO-013; WWFF FFF-253) and Ile
de Lavezzi (DIFM TK-011; MIA MCO-007; WWFF FFF-068; WLOTA 0755).

QSLs for all calls via LoTW and EA5KA (d/B). OQRS available.
http://f4bkv.net/corsica2013 https://twitter.com/IOTAcorsica

OC-015: T2; Tuvalu Island: Rich/DK8YY, Detlef/DL3ALI and Ingolf/DL4JS
will be QRV as T2YY from march 23 to April 4 from Funafuti Atoll.
Two stations will be QRV on the HF bands in CW, SSB and RTTY.
QSL via DH7WW (d/B).

OC-029; V7; Ratak Chain: Ted/JF1CCH will be on the bands from
Marshall Islands as V73TS from March 21 to 26. He'll work in CW
exclusively from 40m to 10m. QSL via JF1CCH (d/B).

OC-040; ZK2; Niue Island: From March 22 to 29, Alan/VK4WR (E6RQ)
and Graeme/VK4FI (E6SG) will be QRV from Niue Island (WLOTA 2139,
Grid Loc. AH50). The focus will be on 50 MHz with a little HF
activities too. QSL for both calls via VK4FI (d).

OC-049; A3; Tongatapu group: Jacek/SP5EAQ will work as A3EAQ from
Tongatapu Island in SSB only on 80-10m. The activitiy will start
on March 26 and finish on April 16.
QSL via SP5EAQ (d/B). http://sp5drh.com/a3eaq/

OC-086; KH0; Northern Mariana Island: From the well known "Saipan Rental
Shack" on Saipan Island, (USi NI002S, WLOTA 1333), Gennady/R0FA and
Yuri/RA0FU will show up on the HF bands in all modes as KH0/homecall.
The activation from March 25 to April 4 includes a participation in
the CQWW WPX SSB Contest.
QSL via Homecall (d/B).

SA-001; CE0; Easter Island: Michael/G7VJR, Nigel/G3TXF, John/G4IRN
and Martin/G3ZAY are planning a DXpedition to Easter Island
(DICE ICE-001, WWFF CEFF-027, WLOTA 0319) from March 20 to 27.
Using the callsign XR0YG they will be QRV on 160m - 10m mostly
in CW. Daily upload of the QSOs is planned to ClubLog and LoTW.
OQRS will be available. QSL via G3TXF (OQRS) and LoTW.
http://g7vjr.org/2012/12/XR0YG-easter-island/
http://XR0YG.com
https://secure.clublog.org/charts/?c=XR0YG

SA-006; PJ4; Bonaire Island: Steven/W1SRD and Dean/N6DE will be QRV
as PJ4/homecall from the "Radiohouse" (http.//www.pj4g.com)
on Bonaire Island (WLOTA 1279). From March 26 through April 1
they will be QRV on the HF bands with a focus on RTTY and a
participation in the CQWW WPX SSB Contest (callsign to be
announced). QSL for contest QSOs via W1SRD (d) others via
operator call (d).

SA-036; P4; Aruba Island: The QTH of P49V on Aruba (WLOTA 0033, WW Loc.
FK42xn) will be visited by Helmut/DF7ZS once again for his
activities as P40Z (26.03. - 03.04.). He'll take part in the CQ
WPX SSB Contest and try to be QRV on the WARC bands before and
after the contest. QSL via DF7ZS (d/B). http://www.df7zs.de

SA-049; LU; Tierra del Fuego's Coastal Islands: Members of the
"Radio Club Ushuaia (LU8XW) plan to activate Isla Redonda (WW
Loc. FD55ue) as LT5X from 23.03. (00:00 UTC) to 24.03. (15:00 UTC)
with three stations on 80/40/20/15/10m in SSB, CW and PSK31.

QSL via LU8XW (QRZ.COM).

SA-050; CE9; Antarctica Chilena Province group: Jose/CE8DMT will be
QRV from Isla Navarino (DICE ICE-901, WAP CHL-13, WW Loc. FD65eb)
in March 23/24. The island is in the southernmost province of
Chile. With TS-120 and a 3el beam he will be QRV according to the
following schedule: 21.277 MHz from 13:30 to 15:30 UTC, 28.477 MHz
from 16:00 to 17:00 UTC. QSL via CE8DMT (QRZ.COM).

Ham Radio Group Elects Officers:

Posted: 18 Mar 2013 05:01 PM PDT
http://www.eham.net/articles/29890

The Northern Arizona DX Association, a group of amateur (Ham) radio operators, recently elected its 2013 officers. Pictured, from left, are Paul Gagnon, secretary, Bob Wertz, president, Jack Lunsford, vice president and Dave Brown, treasurer. The club participates in Radiosport contests and specializes in long distance radio contacts (known as DX). Members try to contact as many countries as possible from their Flagstaff-area amateur radio stations. Some members have contacted in excess of 330 of the 340 active countries in the world. The club started the annual "Route 66 on the Air" special event, where they set up amateur radio stations all along Route 66 from Chicago to Santa Monica, Calif., and other Hams, from all parts of the world, try to contact each of the participating stations. Last year, according to a press release, the 13th consecutive year of the event prompted more than 35,000 amateur radio contacts from all parts of the world.

RAC Bulletin 2013-011E - RAC Completes First Phase of Review of
Amateur Radio Exam Questions*
2013-03-18

In December of 2012 Industry Canada put out a Request For Proposals (RFP) to update the amateur radio question bank. RAC responded and subsequently entered into a contract with Industry Canada in January 2013 to update the amateur radio question bank. RAQI was engaged by RAC to collaborate on the French language component of the contract.

This is an update on our project milestones with respect to this project which is of keen interest to all amateurs. Radio Amateurs of Canada, on March 13, 2013, delivered to Industry Canada a comprehensive and detailed set of recommendations to improve and modernize the question banks used for examinations to qualify radio amateurs in Canada.

The curriculum will not be changed by the review. Prospective hams still need knowledge of the same topics. However, changes were proposed to make all questions correct, clear, understandable and relevant to amateur radio in Canada today.

This required great attention to detail. The review team examined more than 3000 questions and 12000 answers used for the Basic and Advanced examinations in English and French and aimed for perfection in every one.

Technical and linguistic accuracy were equally important in the review. Changes included correcting factual errors, replacing obsolete language and examples, making questions and answers more clear and addressing current amateur radio practices and regulations. The team accomplished most changes through editing of existing questions but also recommended that some obsolete questions be deleted and proposed new questions. Comments from radio amateurs in response to the RAC bulletins on the question bank review aided the team in identifying where changes were needed.

The review also assessed the complexity of questions and recommended where questions in one exam might be more appropriate to the other. It recognized current trends in learning and assessment. Rote memorization is no longer important in a society where detailed information is at everyone's fingertips. Understanding principles and concepts and where to find information are more important today. Several questions were modified to recognize this approach. The

overall objective is to remove unintended barriers to participation in amateur radio and provide the basis for fair examinations of required knowledge.

Industry Canada will review the proposed changes and respond to RAC in early April. The review team will consider this and develop further recommendations as required in the final phase of the review that will be completed in mid April. Industry Canada will decide on the final changes as a result of this process. Until that decision is made the existing examination material will remain in use.

Glenn MacDonell, Project Manager, Question Bank Update Project and Deputy Director Ontario North East, (ve3xra@rac.ca).

HAMFEST India 2013

Posted: 18 Mar 2013 10:53 PM PDT
http://forums.qrz.com/showthread.php?384218-HAMFEST-India-2013&goto=newpost

HAMFEST is one of the biggest events usually hosted once in a year.
Unfortunately it is not hosted in NORTH India till today and for the first
time GWALIOR has got the opportunity to host it on 21 ☐ 22 September 2013.

HAMFEST is studded with technical lectures on latest topics like satellite
communication, software design radio, antennas, etc. It also has live
demonstration of HAM Radio Operation, workshops on different topics, stalls
having wireless communication equipments.

The venue for the HAMFEST is
ABVIIITM Gwalior most renowned college of India located in Centra/North
part. We expact about

700 + delegates who will witness this event.

We are trying for NASA school
program for school children during HAMFEST.

We all from Amateur Radio Club
Gwalior invite all to attend the HAMFEST India 2013 on 21-22 September 2013.

73's

de

Jayu S. Bhide
VU2JAU Chairman HAMFEST India and President , Amateur Radio Club Gwalior

Parachute Mobile Skydiving QSO Jumps!

Posted: 19 Mar 2013 02:26 PM PDT
http://forums.qrz.com/showthread.php?384291-Parachute-Mobile-Skydiving-QSO-Jumps!&goto=newpost

QST QST QST...

Parachute Mobile Skydiving QSO Jump!

Parachute Mobile is a unique way of combining two great hobbies; skydiving
and amateur radio. Our skydivers will jump from 13,500 feet and once they
have deployed their parachutes they will make QSOs with as many hams as

possible. The Drop Zone will be at the Marina Municipal Airport.

Date: March 23, 2013. This will be our 14th mission and we are proud to be scheduled in conjunction with Radiofest, ARRL's Santa Clara Valley Section Convention. Conventioneers are encourage to make a QSO with the skydiver and to come by our display table to learn more about our projects.

Jump Times: The first jump is scheduled to occur around 1100 hrs with each additional jump approximately 90 minutes apart. We don☐t have control over the aircraft or weather so times may change. We hope to make 3 jumps.

Frequency: QSOs with the Jumpers will be on 146.430 simplex with an alternate of 147.570 simplex

APRS: ☐Jumper 1☐ and ☐Jumper 2☐ will be fitted with APRS that will transmit location and altitude as well as biotelemetry data, which includes SpO2 (blood oxygen saturation) and heart rate. Look for AF6IM for Jumper 1, and KF6WRW for Jumper 2 on your favorite APRS web site. No SSID required.

Live Streaming Video: We will also be streaming live video from the Drop Zone (DZ). Log into ustream.tv/channel/mfwright.com, or come by the display table to watch the action unfold.

Updates: QSTs and updates on the day of the event will be made on:

K6LY Repeater (event talk-in), 146.970- 94.8

LPRC Repeater (Loma Prieta), 146.640- 162.2

Special Event QSL cards will be available.

Hear the action, make a QSO!

Note: This event is subject to weather conditions and there is always the possibility the event could be canceled. But you can still visit with us at our display table at Radiofest.

For more information go to parachutemobile.org

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: GM ; Scotland ; Square: IO57 ; start 2013-04-02

GM6VXB is qrv from St.Kilda IO57QT only 4m and 6m

Will be on St Kilda for a short time early April. After much thought will only be taking
4/6M gear as activity too low on 2M. Probably no internet access and marginal mobile signal
so will publish CQ frequencies when possible. Trip may be delayed due to high winds of
rough
seas but will update if and changes

SOURCE: tnx to GM6VXB direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the

island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: EA8 ; Canary Isl. ; Square: IL38 ; start 2013-04-10

I will be back in EA8 from 10-17 April, for the last 2 or 3 visits I have given priority to 70cm EME, this time I will get the 2m JT65 station qrv again as it has been a few years since I did this. The station remains 350w - mgf1302 - 9 el yagi with pol rotation. I will try and be qrv on N0UK if I have a internet connection from Apr 11th onwards. Grid is IL38.

SOURCE: tnx to Dave EA8/G4RGK direct to MMMonVHf

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

UPDATE from Rene, Eeltje and Johan.
Good news! We have our single entry visa for Ghana! It took a whole day travelling to the Ghanese embassy and waiting, getting interviewed, filling in the right answers (in capitals)
and showing the proof of our returnticket and yellow fever vaccination, but eventually we got
a sticker in our passports. All on schedule now! This was not cheap. The three of us in total ?360 (450$).
Such a waste.... But with help of our sponsors the damage is less painful though donations still are more than welcome!

Thank for your votes for the best EME VHF DXpedition 2012. The two men DXpedition operated by
PA3CEE Eltje and Ren? PE1L to Uganda (5X1EME) won. We're proud that all our African DXpeditions
since 2009 got the first place. It's clear that we do our best, never resting and persisting in
getting all of you in the log and we want to promise you that our policy hasn't changed for 9G5EME.
You know us by know. We won't give up! Thanks for your trust gents! We're proud!

For 144 MHz we do use the same setup as we used in Gambia and Uganda, 2 x 8 Xpol a WA2ODO preamp and modest power.
If all ok we will have a small 70cm AND 23 cm setup with us.

Our schedule:
144 MHz start april 12th till april 14th (condx are not that great but OK for the bigger stations)
1296 MHz april 19th
144 Mhz april 20th (ARI contest)
432 MHz april 21th
144 MHz april 22nd till april 27th (22-24 good condx for smaller stations)

Power shutdowns are common in Africa so schedule can change and don't wait to make a contact with us till the last day.
Visit our website www.emelogger.com/ghana/

Johan, Eltje and Rene

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: 5H ; Tansania ; Square: KI94 ; start 2013-04-20

Activity from 5H on HF and EME
>From april 20 to april 28 Bode DF8DX is QRV as 5H1DX on HF and EME.
Main activity is in CW on HF band from 10m to 160m. I will do some EME on 70cm and 23cm with single yagi and 100W.
For EME is JT65 preferred but CW is welcome if your signal is strong enough and you can copy me.

SOURCE: tnx to Bodo, DF8DX, direct to MMMonVHF

** DXCC: GM ; Scotland ; Square: IO76 ; start 2013-05-10

Isle of Mull IOTA EU-008 DXPedition, GMxxx (GS3PYE), IO76ej

Continuing the Camb-Hams traditional Scottish Island activations, which started with Mull in 2008, Harris in 2009 and 2010,
Arran in 2011 and Mull in 2012 again, they have decided to return to the Isle of Mull in the Scottish Inner Hebrides
(IOTA EU-008) this time in a great location for lower HF band operation, including 472KHz!
All HF bands from 600m to 10m covered with five stations on air simultaneously from five linear amplifiers,
and 6m, 4m and 2m with a great take-off to the UK and Europe all capable of running the legal power limit.
Building on the success of EME last year they will focus more effort in 2m EME with an elevation system this year
giving them more time on the moon They will be on air from Friday 10th May until Thursday 16th May. Further information
can be found at the Camb-Hams website at http://dx.camb-hams.com/

** DXCC: MJ ; Jersey Isl. ; Square: IN89 ; start 2013-05-24

Several Belgian hams will be qrv from Jersey, IN89ve, between the 24 till 30 may 2013 , the aim is to be qrv on 2M, 6M, from 10m to 160 m , SSB and CW, PSK with an emphasis on the higher bands ,
conditions permitting.

SOURCE: tnx to ON4CKM direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on 50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the
manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

Classes Teach Residents How to Ham It Up in an Emergency:

Posted: 19 Mar 2013 05:10 PM PDT
http://www.eham.net/articles/29892

When modern methods of communication fail during a time of emergency, having a contingency plan can help maintain order. For the Greater Damascus area, that plan relies on that old standby, the ham radio. The Damascus Emergency Communications Team will teach residents how to become operators in an amateur radio class from 6:30 to 9:30 p.m. on Tuesdays from April 2 to May 14 at Damascus United Methodist Church. Amateur -- or ham -- radio is known as the recreational or noncommercial use of radio to communicate, and is used mainly for fun or as a backup form of communication when normal public safety methods fail or are otherwise unavailable.

Parachute Mobile at ARRL Radiofest, Monterrey CA this Saturday March 23

Posted: 19 Mar 2013 03:56 PM PDT
http://forums.qrz.com/showthread.php?384311-Parachute-Mobile-at-ARRL-Radiofest-Monterrey-CA-this-Saturday-March-23&goto=newpost

http://parachutemobile.wordpress.com/

http://www.radiofest.org/index.php?page=pages&id=9

Parachute Mobile ham jumpers Mark Meltzer AF6IM (Jumper 1) and Michael Gregg KF6WRW (Jumper 2) will be jumping and working QSOs on 146.430 FM simplex. If conditions permit we will make exits at 18,000 ft from the DZ's King Air 200 jumpship which should give us an exceptionally wide line of sight coverage area. The DZ website is here: http://www.skydivemontereybay.com/?g...FcR7QgodcwQAOg

Parachute Mobile is a unique way of combining two great hobbies; skydiving and amateur radio. Our skydivers will perform HAHO (high altitude high opening) jumps from 18,000 feet over the old Fort Ord Army Airfield at Marina CA. Once they have deployed their parachutes, they will make contacts with as many hams as possible. The Drop Zone (DZ) is at the Marina Municipal Airport. Date: Saturday March 23, 2013. This will be our 14th mission and we are proud to be scheduled in conjunction with Radiofest, ARRL☐s Santa Clara Valley Section Convention. Conventioneers are encouraged to make a QSO with our skydivers and to come by our display table at Radiofest to learn more about our projects. Forgot your HT? Not a ham? No problem! Come by our table and we'lll get you connected.

Jump Times: The first jump is scheduled to occur around 1200 hrs and approximately each 60-90 minutes thereafter. We don☐t have control over the aircraft or weather so times may change. We hope to make 3 jumps.

Frequency: QSOs with the Jumpers will be on 146.430 simplex with an alternate of 147.570 simplex

APRS: ☐Jumper 1☐ and ☐Jumper 2☐ will be fitted with APRS gear that will transmit position and altitude as well as biotelemetry data, which includes SpO2 (blood oxygen saturation) and heart rate. Look for AF6IM for Jumper 1, and KF6WRW for Jumper 2 on your favorite APRS web site. No SSID required. www.aprs.fi works well.

Live Streaming Video: We will also be streaming live video to our Radiofest table from the Drop Zone (DZ) and from the jumpers aloft. Log into ustream.tv/channel/mfwright or come by the display table to watch the action unfold.

Updates: QSTs and updates on the day of the event will be made on:

K6LY Repeater (event talk-in), 146.970- 94.8

LPRC Repeater (Loma Prieta), 146.640- 162.2 (Coastal Region)

Collectible Special Event QSL cards will be isssued for all contacts.

See and hear the action, make a QSO!

Parachute Mobile: In the Air, on the Air, Taking Ham radio to New Heights.

==> NEXT WEEK! NATIONAL HURRICANE CONFERENCE: AMATEUR RADIO SESSIONS

The National Hurricane Conference <http://www.hurricanemeeting.com/>
will be held next week, March 25-28 at the Hilton New Orleans Riverside
<https://resweb.passkey.com/Resweb.do?mode=welcome_gi_new&groupID=10994405>
in New Orleans, Louisiana. There will be several Amateur Radio
activities going on during the week, especially on Monday. The National
Hurricane Conference (NHC) leadership continues to recognize the
valuable contribution of ARES and again invited us to participate with
three sessions, as follows:

NHC Session #1: Monday, March 25, 2013 from 10:30 am to 12:00 pm. This
is the main Amateur Radio session of the National Hurricane Conference
and will cover Hurricanes Sandy and Isaac Amateur Radio responses.

NHC Session #2: Monday, March 25, 2013 from 1:30 pm to 3:00 pm. This
session will cover Amateur Radio at the National Hurricane Center, the
```

WX4NHC Haiti Earthquake Mission, VoIP Hurricane Watch Net and will feature special guest speaker Dr. Rick Knabb, Director of the National Hurricane Center.

NHC Session #3: Monday, March 25, 2013 from 3:30 pm to 5:00 pm. This session is designed for Emergency Management personnel and is entitled "Amateur Radio Rap Session - The Emergency Manager's Hidden Resource." This is an increasingly popular session where Emergency Management personnel from all over the country interact with ARES personnel on aspects of disaster communications.

The three Amateur Radio presentations will be recorded and streamed live on the Internet by James Palmer, KB1KQW at, www.nsradio.org/stream.htm <http://www.nsradio.org/stream.htm> and www.voipwx.net/files/stream.htm <http://www.voipwx.net/files/stream.htm>

All hams are invited, at no cost to attend the Amateur Radio sessions at the National Hurricane Conference.

For additional information:

http://www.hurricanemeeting.com <http://www.hurricanemeeting.com/>

National Hurricane Conference Presenters:

Special Guest Speaker, Dr. Rick Knabb, Director of the National Hurricane Center

John McHugh, K4AG, WX4NHC Coordinator for Amateur Radio, National Hurricane Center

Julio Ripoll, WD4R, WX4NHC Assistant Coordinator for Amateur Radio, www.wx4nhc.org <http://www.wx4nhc.org/>

Rob Macedo, KD1CY, Director of Operations for the VoIP Hurricane Net <http://www.voipwx.net/> and ARRL Section Emergency Coordinator, Eastern Massachusetts Section

Dennis Dura, K2DCD, Assistant Director of the Office of Emergency Management, New Jersey DHS

Joe Stepansky, KQ3F, Hurricane Watch Net, Net Control

Mike Corey, KI1U, ARRL Emergency Preparedness Manager

Greg Sarratt, W4OZK, ARRL Southeastern Division Director

We encourage you to visit and participate in all the activities you can and learn more about ARES communications in the context of hurricane disasters. Hope to see you there! -- Greg Sarratt, W4OZK, ARRL Southeastern Division Director, http://www.southeastern.arrl.org <http://www.southeastern.arrl.org/>

==> MISSISSIPPI TORNADOES; ARES RESPONSES

On February 10 a line of severe storms pushed east across Mississippi resulting in numerous severe thunderstorm watches and warnings, as well as tornado watches and warnings. The storm produced heavy rains, flash flooding, and tornadoes that left behind widespread damage, debris, and injuries. One tornado track measured approximately 75 miles long with touchdowns in Marion, Lamar, and Forrest counties, with Forrest County the most heavily impacted.

DEC Larry Morgan, AG5Z, reported that as the EF-4 tornado approached Hattiesburg informal emergency nets were started on two local repeaters. The nets eventually merged on the 146.775 MHz repeater. When the net got a confirmed report of a tornado on the ground, it went into a more formal mode. Calls were made to Forrest and Lamar County EOCs to see if ARES support was needed. Since their communications were not disrupted, the net was asked to stand by to be called if needed. Several stations sent damage reports, and those needing forwarding were sent to the Forrest County EOC. Gerald Shannon, KF5AQN, reported a gas leak near the CVS Pharmacy on Hwy 49. Morgan forwarded the message to the Forrest County EOC by telephone.

There were several other informal H&W and damage report messages handled as well. During the same storm event Jasper County EC Albert Mcdonald, WV1Q, reported that the South Central SKYWARN and Jasper County ARES activated an emergency net session for adverse weather in their served counties, taking check-ins and emergency traffic during the storm. A host of storm spotters and ARES members reported on this dangerous cell in the areas of Jones, Jasper, Wayne, Smith, Lamar, Forrest and Clarke Counties. Operators played key roles in listening for emergency traffic out of the affected areas. Partial phone and numerous power outages were reported as well as building damage.

Central Mississippi SKYWARN Coordinator Linda Goodman, KE5PYM, reported that the Central Mississippi SKYWARN net activated on February 10 at 10:30 AM and closed at 12:00 midnight for a total of 13.5 hours of operation. The net had 40 check-ins on VHF and passed 15 pieces of traffic.

There was no rest for ARES in Hattiesburg. The Red Cross requested assistance on February 21. Hams were asked to provide back-up communication between two active shelters and the Red Cross Headquarters facility. Operators met with Red Cross officials and others to work out an activation plan. Hams were advised that there was no equipment on site and responders would need to bring their own rigs and antennas. Hams provided a rig and coax for the Headquarters site, with which the licensed Red Cross personnel operated.

James Lee, NE5P, activated the shelter in Purvis, and Thomas Webb, AE5QX, activated the Hattiesburg shelter. Sam Williams, N5SP, stood by as relief operator if needed. The Red Cross secured the activation around 8:00 PM. Storm activity increased later that night, and hams were called back in. The stations were secured once the severe weather passed around 1:30 AM.

The Red Cross again requested backup communications assistance on February 25. Hams were dispatched to the Purvis shelter at 2:00 PM and the Hattiesburg shelter at 2:45 PM. Both locations lacked on-site antennas, so operators managed to configure an adequate antenna from items they brought with them. James Ebner, N8JE, operated the Red Cross Headquarters Station that he had installed.

As a result of the ARES effort, the American Red Cross South Mississippi Readiness and Response Manager, Susan Laney, sent a letter of commendation to DEC Larry Morgan, AG5Z, recognizing the efforts of the ARES operation in Hattiesburg. -- Mississippi Section Manager Malcolm Keown, W5XX

==> FREAK SNOWSTORM HITS BILLINGS, MONTANA: HAMS RALLY

At 1445 on Sunday, March 3, the sunny 53 degree day suddenly clouded over and snow started to fall from the sky. The NWS reported that the temperature had dropped 20 degrees in 50 minutes. Within minutes, Billings was enveloped in a total whiteout, with visibility of less than 100 feet in some areas. Most hams were out performing their activities of daily living when the storm hit.

At 1505, Ron Glass, WN7Y received a text message from Linda Cornetet, KF7ITX, that power to her home just west of Shiloh Road was out. At 1510, the Great Clips hair salon at Grand Avenue and Rehberg where Glass was experienced several power bumps in a row - enough to cause the point-of-sale computer to have to be manually rebooted three times in about five minutes. Glass worked his way home through the slushy roads and poor visibility.

Upon arrival, Glass turned on his D-STAR base radio (on 147.360 MHz), and APRS station, and began streaming live radar feeds from NWS. He put his handheld on the public safety bands, scanning for reports. By this time, Richard Wilson, KF7ITU, had started an informal "Standby Net" from his spotting location near the airport, and was receiving more reports from hams of power outages, white-out driving conditions, and also reports over the public safety channels of slide-offs and vehicle crashes. Soon thereafter, Zimmerman Trail hill was closed and traffic westbound from the airport traffic circle toward Lavina was being diverted back into Billings. Wilson said traffic was still allowed eastbound in front of the airport, but the vehicles appeared out of the snow, drove by, and disappeared back into the snow - all within 200 yards! Air traffic was suspended.

1625: In preparation for a possible call-up to help the City and
County, Glass sent out a shared Net Control Log on Google Drive and

began logging all check-ins and radio traffic.

1639: Several hams heard over the public safety Sheriff West VHF repeater a broadcast from the 911 Comm Center that "the only way you can reach us now is via this VHF repeater and by cellphone. We will be contacting officers directly in the field via cellphone." Glass assumed that the new 800 MHz trunked system that was just upgraded last month must have faltered with the power outages.

1650: Glass decided not to spin the Standby Net up into a full Yellowstone ARES (YARES) Emergency Net at this time for several reasons: (1) the Comm Center had a workaround in place - cellphones; (2) the cellphones appeared to be working with no expectation of dropping; and (3) NWS radar showed clearing skies and almost zero precipitation behind the initial violent frontal boundary. The latter was confirmed with four hams who had good visibility to the west and northwest - clearing skies, almost blue skies already. Planes were again allowed to take off and land at the airport.

1659: Hams reported that Northwestern Energy power had been restored to their homes west of Shiloh Road. At 1700, Glass as NCS closed the Standby Net and completed log entries in the Google Drive online log. "We had 18 check-ins during the net, with some via cellphone text messages only, some on D-STAR, and others were monitoring D-STAR, some on 147.360 MHz, some on 145.410 MHz, and several hams on repeaters," Glass reported.

Some wonderful, awesome, but frightening photos came out of various sources after the storm - it was definitely one for the record books and one that Billings residents will be talking about for quite some time. Glass received several e-mails from people asking "did you say your group does Storm Spotter Training in April? When and where can we attend?"

Thanks to everyone that helped, either by checking in with reports, or standing by in listen-only mode in case we were activated. - from a report submitted by Ron Glass, WN7Y, Yellowstone County Emergency Coordinator, Billings, Montana

==> HILLSBOROUGH COUNTY (FL) ACTIVE IN OPERATION RADAR II

Hillsborough County (Tampa Bay area), Florida ARES/RACES was very active in Operation RADAR II, Florida's statewide Interoperability exercise held early last month, with over 35 amateurs involved. We were requested to participate by Preston Cook, Hillsborough County Fire Rescue's Director of Emergency Management.

Three teams were deployed by the county. The first team comprised four first responders: Thurnell "Chip" Shields, Steve Lawton, Mark Fisher and Chris Tallent. Two became involved in leadership positions during the exercise: Shields as Region 4 COML and Tallent as Region 4 Safety Officer. All four of these first responders have earned their amateur licenses over the course of the last couple of years.

Two ARES/RACES teams were sent up to the exercise location at Camp Blanding, one responsible for deploying the Region 4 MARC unit (a state asset consisting of a cache of radios and a 100' trailer-mounted tower), and the third team operating primarily as a remote HF base.

ARES/RACES officials deployed Bill Williams, AG4QX, operating as AUXCOMM leader, Larry Gispert, KR4X, Jim LaFollette, W4WBL, Ian Renton, W4RIR, leader of the MARC unit team, Warner Budd Johson, WB4J, and Robert Chapman, KK4GKH. All teams successfully deployed long-haul and local stations and communicated back to Hillsborough County, and to other points around the state, and the State Warning Point.

In Hillsborough County, Keating Floyd, KC4HSI, ARES EC and RACES Officer, coordinated operations with local and remote teams from the Hillsborough County Emergency Operations Center, with several nets ongoing during three days.

Hillsborough County ARES/RACES has a strong MARS presence, with operators from all branches of MARS involved. That bond with our military was strengthened by coordinating with the 290th JCSS of the Florida Air National Guard. We communicated with elements from the JCSS in person and over MARS circuits. That amounts to 150+ hours for the firefighters, and over 500 volunteer hours from Hillsborough County during the course of a one-week exercise!

Positive items from this exercise included the opportunity to participate in a statewide communications exercise, remotely and locally. This simulated real-world conditions, with the need to communicate with deployed Hillsborough County ARES/RACES personnel having been experienced after various hurricanes and the Haiti earthquake.

There were issues in-county, which included interesting slip-ups in passing message traffic. All messages eventually got through, and everyone kept up their spirits and had a good time, but we learned that we need to practice message handling more.

Volunteer organizations have the critical need to ensure there is something for volunteers to do, and an exercise is a great outlet for that need. Many operators checked in, passed traffic, and monitored the various nets, both local and remote. Activities that would be needed in disaster communications were performed in the safety and comfort of a normal day, without the stress of a real event over our heads.

Perhaps most importantly of all of these details, there was great camaraderie during the course of this exercise. The deployed and local teams, fire fighters and amateurs, military and civilians, developed stronger and, in some cases, new, working relationships. The next time we are called up, for an exercise or real-world disaster, everything will be easier because of these good working relationships with our communications partners. -- ARES EC/RACES Officer Keating Floyd, KC4HSI, Hillsborough County, Florida

==> HAMS WORK WHEN CELL PHONES DON'T IN FLORIDA SWAMP

After a day of exploring the Green Swamp Wildlife Management Area -- which covers 50,692 protected acres in Florida's Lake, Polk and Sumter Counties -- with his grandson, Joe Cody, KE4WDP, of Winter Haven, Florida, saw that the roads were flooding and becoming hazardous. As he tried to drive out of the area, Cody's small pick-up truck got bogged down in the mud. Since he was out of cell phone range, Cody tried calling for help on the Dade City 146.880 MHz repeater. Richard Parker, KF4ORW, of Dade City, Florida, heard the call and answered.

After hearing the situation, Parker called 911 in Pasco County, who put him in touch with the dispatch in neighboring Polk County. Cody passed his location on to Parker, who in turn passed it on to the Polk County Sherriff's Office. "Polk County 911 took over trying to get help," Parker said. "They called me back several times for more information and I was able to relay information from Joe to them. Then Ted Bulmanski, W4TKB, who is also from Dade City, started monitoring and copying Joe's information."

About 30 minutes later, Parker saw a helicopter fly over and around Cody's position, and after another 30 minutes, Cody radioed back on the repeater, saying he was on his way home -- thanks to a Lake County Deputy in a Sherriff's Office truck that had a winch. "We learned that Joe was eight miles inside Lake County," Parker explained. "That's why the Lake County Sherriff's Office responded instead of the Polk County authorities. The Polk County Sherriff's Office called me back to say that the helicopter from Lake County found the truck inside Lake County and sent both a deputy from Lake County, as well as a Fish and Game Officer and winched him out of the mud. They called me back to thank us for assisting the stranded pair. Ham radio still works when other forms of communications don't." --Thanks to ARRL West Central Florida Section Public Information Coordinator Kevin Poorman, KV4CT, for the information; ARRL Letter

==> US NATIONAL GRID - A GEO-SPATIAL TOOL FOR PUBLIC SERVICE COMMUNICATIONS

As a result of Hurricane Sandy, northeast responders were certainly faced with response situations in unfamiliar areas or where common navigation aids were gone, flooded or burned over. When such conditions exists, what should be the tool employed to quickly allow for positional reporting and navigation? The answer that many may not be familiar with is: US National Grid (USNG), a national standard coordinate system designed for land-based operations and which is consistent with military operations since 1949.

Amateur Radio operators staffing EOCs and supporting emergency communications should be familiar with USNG as responders and emergency managers will be using it. In October, 2012, the Florida Division of Emergency Management issued a new Field Operations Guide that describes how Florida emergency services will use USNG. USNG has been a part of Florida's high level planning documents since 2010 with references going back to 2006.

USNG is effectively the same as Military Grid Reference System (MGRS), and is a derivative of the Universal Transverse Mercador (UTM), which hikers employ routinely. USNG can be displayed on your smartphone easily. However, a GPS receiver is not mandatory. Paper maps are always a priority and all should include USNG grid lines when created. Fire and law enforcement computer aided dispatch and mobile data terminals can also be made to display properly labeled grids.

All maps need a grid system in order to be most usable. Maps already in use or those found in office supply or convenience stores typically display non-interoperable "bingo" grids. Maps from the Internet are generally devoid of grid lines and thus are effectively just "pictures." What responders and emergency communicators need are properly labeled, gridded USNG maps. USNG can specify areas of 1 Km, 100 meters or 10 meters with as little as four, six or eight digits respectively and without dashes, decimal points or degrees. This facilitates easier radio communications of coordinates. 15S UB 6912 0927 represents a coordinate with precision of 10 meters square (33' x 33'). When the components 15S UB are truncated by local users, 691 092 represents 100 meters square (330' x 330') and 69 09 is the 1 Km square area. In words, 6912 0927 is a location 12% right and 27% up in 1 Km grid 69 09.

USNG area references will be used tactically. 100 meter or 10 meter grids can identify helispots, structures, homes, bridges, specific damage, etc. in combination with or in place of the paradigm of street address, as appropriate. Out-of-area personnel may have no familiarity with local addresses, but when versed in the simple x-y nature of USNG, finding a location can be less stressful and certainly more efficient. USNG coordinates for all locations such as shelters, points-of-distribution, staging areas, etc., should be added to all planning documents.

USNG is designated by the States of Minnesota and Florida as the preferred coordinate system. Federal agencies comprising the National Search and Rescue Committee have designated USNG as the coordinate system for all land search and rescue operations as of November 2011.

When the street addressing system is unfamiliar, blown away, burned over, flooded or is non-existent in a rural or wilderness areas, the interoperable coordinate system to report position and to navigate by is US National Grid. -- Al Studt, CFPS, KF4KIR, Florida Fire Instructor III, kf4kir@gmail.com, Cocoa, Florida

==> LETTERS: CERT MEMBERS ARE QUALIFIED, NOT CERTIFIED

In your last issue, a writer said "pleased to see your article The Future of ARES is CERTain in January 2013 QST. I am CERT trained and certified along with being a licensed operator. In our group, . . ."

CERT members are "qualified" after taking certain specified courses (IS-317), not "certified." This is a small point but may have legal ramifications. - Tom Ponte, WB1CZX, EC, Perquimans County, North

Carolina

==> VISIT THE NEW CITIZEN CORPS AND CERT WEB PAGES

The Citizen Corps website and CERT web page have relocated to new homes. FEMA has consolidated all of its online content, including content currently on the Citizen Corps website, into two websites: FEMA.gov and Ready.gov. In addition to reducing costs, this website migration provides an opportunity to increase the visibility of our programs to an entirely new audience and to recruit new volunteers. The new website locations also give you easy access to more resources than ever and an updated look and feel for online content.

Now when you try visiting the original Citizen Corps website, you should be automatically redirected to the new page at www.ready.gov/citizen-corps
<http://links.govdelivery.com/track?type=click&enid=ZWFzPTEmbWFpbGluZ2lkPTIwMTMwMjIxLjE1ODIwMzExJm1lc3NhZ2VpZD1NREItUFJELUJVTC0yMDEzMDIyMS4xNTgyMDMxMSZkYXRhYmFzZWlkPTEwMDEmc2VyaWFsPTE3MDQxNjEwJmVtYWlsaWQ9azFjZUBhcnJsLm9yZyZ1c2VyaWQ9azFjZUBhcnJsLm9yZyZmbD0mZXh0cmE9TXVsdGl2YXJpYXRlSWQ9JiYm&&&100&&&http://www.ready.gov/citizen-corps>.
Likewise, if you try visiting the original CERT website, you should be automatically redirected to its new page at www.fema.gov/community-emergency-response-teams
<http://links.govdelivery.com/track?type=click&enid=ZWFzPTEmbWFpbGluZ2lkPTIwMTMwMjIxLjE1ODIwMzExJm1lc3NhZ2VpZD1NREItUFJELUJVTC0yMDEzMDIyMS4xNTgyMDMxMSZkYXRhYmFzZWlkPTEwMDEmc2VyaWFsPTE3MDQxNjEwJmVtYWlsaWQ9azFjZUBhcnJsLm9yZyZ1c2VyaWQ9azFjZUBhcnJsLm9yZyZmbD0mZXh0cmE9TXVsdGl2YXJpYXRlSWQ9JiYm&&&101&&&http://www.fema.gov/community-emergency-response-teams>.

The new web pages should have all of the functions of the original Citizen Corps and CERT websites, including program registration and profile updates. We also intend to build out State-specific pages

web pages today for the latest program news and updates! -- FEMA

==> LETTERS: PROFESSIONAL COMMENDS AMATEURS AFTER OPERATION RADAR II

In re Florida's major interoperability exercise held last month and reported in last month's issue, a professional participant wrote: "As someone who has been involved in first responder communications for many years, this type of training is what is needed on an annual basis. Regardless if you're a volunteer or a communications professional, any opportunity to train in a real environment validates what you as an individual or as a member of a team can offer. There was excellent participation by the amateur community; Amateur Radio operators surprised a lot of us with their level of professionalism." -- David P. Byrum, Communications Engineer, Communication Maintenance Manager 1, Pinellas County Sheriff's Office, DHS/FEMA ALL-HAZARDS ICS COML Instructor, KA4EBX, SKYWARN; thanks Kevin Poorman, KV4CT, ARRL West Central Florida PIC

==> BOOKS: SNOW INFO

The book The Snow Booklet, a Guide to the Science, Climatology, and the Measurement of Snow in the United States by Nolan J. Doesken and Arthur Judson, contains a good description of measuring snow depth under difficult conditions as well as instructions for the measurement of "new snowfall" and the water content of the "new snowfall." The publication is sold out, but available free on-line at: http://ccc.atmos.colostate.edu/snowbooklet.php -- Jim Hastings, K9AUC, St. Louis, Missouri

==> TIPS: BATTERIES AT THE HEART OF PORTABLE COMMS

Back about 20 years ago, NiCd batteries were notorious for having a pronounced memory effect caused by a special type of crystal formation within the battery. This particular mechanism has been eliminated in current NiCd cells but our memory of it, so to speak, is long.

Today's batteries all have some kind of memory in which the capacity of the battery changes with patterns and depths of discharge. Each type of battery chemistry exhibits this effect for different reasons - some types stronger than others. Unfortunately, it's also referred to as a "memory effect" which is confusing to those of us who remember the old "memory effect." Nothing like calling two different things by the same name to generate a lot of confusion!

Because this effect varies with battery type, blanket statements about it are unwise. Isidor Buchmann's *excellent* and very readable book, Batteries In a Portable World, and its sibling website, www.batteryuniversity.com <http:// www.batteryuniversity.com>, tackle the full spectrum of battery types and how to apply them. On the website, I highly recommend taking the opportunity to read the section "How to Prolong Battery Life." The book is available from the ARRL Store <http://www.arrl.org/arrl-store> and other book sellers. Both should put a charge into your understanding of this important energy source that is crucial to effective emcomm operation. Good luck and may your batteries live long and prosper! -- Ward Silver, N0AX, Contributing Editor, QST; ARRL Contest Update Editor; St. Charles, Missouri

==> FEMA TIP: TEST YOUR READINESS

FEMA Private Sector Resilience Tip of the Week 3/11/13: Assess your
organization's emergency preparedness with the Ready Rating system:
http://www.readyrating.org/
<http://links.govdelivery.com/track?type=click&enid=ZWFzPTEmbWFpbGluZ2lkPTIwMTMwMzEzLjE2NTYwNzcxJm1lc3NhZ2VpZD1NREItUFJELUJVTC0yMDEzMDMxMy4xNjU2MDc3MSZkYXRhYmFzZWlkPTEwMDEmc2VyaWFsPTE3MDUyNjg0JmVtYWlsaWQ9azFjZUBhcnJsLm9yZyZ1c2VyaWQ9azFjZUBhcnJsLm9yZyZmbD0mZXh0cmE9TXVsdGl2YXJpYXRlSWQ9JiYm&&&100&&&http://www.fema.gov/redirect?url=http%3A%2F%2Fwww.readyrating.org%2F>.

==> K1CE FOR A FINAL

I enjoyed this word of wisdom, relayed from Ward Silver, N0AX, from the
CQ-Contest reflector: "In my experience, I can say with certainty that
spending time running in a contest is excellent preparation for
operating as a Net Control Station during an emergency. The hours spent
handling Sweepstakes exchanges reinforces a level of discipline needed
to accurately handle H&W traffic during a relief operation that comes
during and after a natural catastrophe. If one is ready to face it, one
usually arrives at recognizing the part of the equation that usually
needs the most improvement is... the OPERATOR." -- Geoffrey Way, KA1IOR

WIANEWS WEEK COMMENCING MARCH 24 2013.

Roger Harrison VK2ZRH with more on the Australian Communications & Media
Authority's proposed withdraw of the 2300 to 2302 MHz band

THIS STORY AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAR 24 2013.

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

This is Roger Harrison VK2ZRH.

The Australian Communications and Media Authority - the A C M A - proposes
to withdraw the 2300 to 2302 MHz segment of the 13 cm Amateur band from
July 2015 so that it can be re-allocated for Spectrum Licensing nationally.

All Advanced Amateur licensees will be affected.

The ACMA has already advised all Advanced licensees by letter and invited
comment on the proposal.

The driver behind the ACMA's proposed move is to create a tidy 100 MHz-wide band from 2300 to 2400 MHz for the purpose of Spectrum Licensing by auction.

It is understood that the likely technology to be deployed under Spectrum Licensing in the 2300-2400 MHz band will be that known as Long Term Evolution - L T E.

The 13 cm Amateur band has only a secondary service status at 2300 to 2450 MHz. Primary user status goes to the fixed, mobile and radiolocation services. 2400 to 2450 MHz is widely used by Class Licensed Wi-Fi wireless computer networks and radio amateurs have to share the use of this sector of 13 cm, with the inevitable rise in the noise floor and interference issues.

The 2300 to 2302 MHz segment has been used for narrowband, weak-signal working and this is reflected in the WIA band plan for 13 cm.

In the face of the ACMA's proposal, the WIA intends to fight back.

The WIA is preparing a submission that strongly argues for the retention of a 150 kHz-wide allocation at 2300 MHz on at least a co-primary basis. A 150 kHz-wide "line in the sand", you might say.

Some have suggested that the Institute should bargain the loss of 2 MHz in the 13 cm band for more spectrum elsewhere - like the 80 metre DX window, or securing exclusive access to 50 to 52 MHz, for example. However, the WIA Board has adopted the stance that this is no time to roll over and die on the 13 cm issue, to use the loss of 2 MHz as a bargaining chip when it comes to issues affecting other bands - OR, for that matter, bargaining for a new band elsewhere in the radiofrequency spectrum.

Each issue really has to be addressed on its own merits.

The Institute will continue to seek from the ACMA more favourable consideration in other amateur bands under threat or other disadvantage, along with new allocations.

Back to the fate of 2300 MHz.

LTE employs complex modulation technology to provide very high capacity and data speed in new cellular mobile networks.

The spectrum used by LTE may be configured in channels of various widths, ranging from 1.4 MHz up to 20 MHz wide. Hence, many channels will fit within the proposed 100 MHz band at 2300 to 2400 MHz.

The good news for us is that the whole of a channel's bandwidth is not used. There is some unoccupied spectrum at the edge of each channel, regardless of what channel bandwidth might be deployed.

For the minimal channel bandwidth of 1.4 MHz, the unoccupied spectrum at each edge - or "white space", if you like - amounts to 160 kHz. For a 10 MHz channel, it's 500 kHz at each edge.

So - there will always be some unoccupied and otherwise unused spectrum right at 2300 MHz.

Hence, the WIA submission proposes that a 150 kHz-wide allocation, from 2300 to 2300.15 MHz, is retained for Amateur use on at least a co-primary basis.

In addition, the 10 MHz immediately below 2300 MHz, from 2290 to 2300 MHz, is allocated in Australia for weak-signal space research, fixed and mobile services. Australian Defence systems in that band are protected against harmful interference.

It is envisaged that Spectrum Licensees using the 2300 to 2400 MHz band will be required to reduce out-of-band emissions below 2300 MHz to meet a specified standard, tailoring-off the transmission power and bandwidth usage so as to protect licensed users of the 2290 to 2300 MHz band from interference.

This, too, works in our favour in arguing to retain a segment of the 13 cm band for narrowband, weak-signal working, be it terrestrial point-to-point DX, rain scatter propagation or moon bounce.

The WIA submission notes the significant loss of segments of Amateur allocations in the 70 cm, 23 cm and 9 cm bands.

It also emphasises the long history of leading edge weak-signal terrestrial, space (EME and satellite) and ATV work carried out on the 13 cm band over more than 60 years, since the band was allocated following WW II.

Many state/territory and national distance records have been established and re-established over the decades and are recognized around the globe.

In addition, there are currently at least two Australian suppliers of high performance transverter kits for the 13 cm band. Use of the band is relatively popular among stations deploying microwave equipment on field days.

The submission argues that loss of 2300 to 2302 MHz would, at best, severely hamper - or at worst - eradicate weak-signal terrestrial and moon bounce work by Australian radio amateurs. This is about preserving a future for leading edge weak-signal Australian amateur radio work in this region of the microwave spectrum.

The Institute encourages all interested licensees to respond to the ACMA's invitation to comment.

You might develop your own detailed submission, and / or you might care to write to the ACMA and support the WIA's submission.

It is in the interests of the future of amateur radio in Australia.

The deadline for comment is close of business on Wednesday 27 March.

If you can't find your letter, the ACMA's consultation paper is available on the ACMA website under "Issues for comment".

Information is also available on the WIA website. Look for "Looming loss of 2300 to 2302 MHz - WIA fights back !"

Get cracking !

Thank you for bearing with me.

This is Roger Harrison VK2ZRH.

Learn - 24 March 2013, 0'37"

Have you prepared for the last weekend in May;
the 2013 WIA AGM and Conference?

With access to Amateurs from all levels of experience, you'll participate in sessions about and related to Amateur Radio. With so much expertise in one place we offer a platform to tap into the assembled knowledge and experience and give you front row access to it all.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

North Queensland Amateur Radio Convention in jeopardy

News in this week that the main venue for this years North Queensland Amateur Radio Convention - the Charters Towers RSL - has had to close its doors due to poor local patronage and mounting debts!

Moves are afoot to find a single or combination of venues in Charters Towers to house the Convention - stay tuned for further info !

(tarcinc)

VK6

BOB THE BUILDERS TO THE RESCUE

The old 6DL regional transmitter was trucked to Wubin in the WA wheat belt and reassembled in the Wubin Wheat Bin Museum, in the Shire of Dalwallinu by local and imported enthusiasts.

Bob, VK6KW had spent a week at the Wireless Hill Museum pulling it apart. Bob, plus the 'other' Bob, VK6CG, Trevor Kelly who had worked on this AWA transmitter when he was technician at 6WF/6WN along with Gina Capes and Kaylene Poon (they look after the Wireless Hill and other museums for the City of Melville) and some very capable Wubin locals, they all put 6DL back together again.

This beautiful 10KW Art Deco AWA broadcasting transmitter was "Type J50961" and was in use at 6WN, Wanneroo, before its redeployment to Dalwallinu as 6DL.

It is 6m long, 2m high, 1m thick and weighs tons, a forklift, adeptly driven by a local farmer, made light of the heavy lifting.

The transmitter is probably the most complete of this type left in Australia though the power and modulation transformers and filter capacitors are missing. They were located behind the main cabinet and access to them was through a door at the right of the transmitter.

A complete 500W standby transmitter was earlier found stored behind this door. Its provenance is unknown but is also Art Deco in style so probably also made just pre-World War II.

(Bob Crowe VK6CG)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

DID YOU KNOW THAT AMATEUR RADIO PLAYED A ROLE IN ENDING THE CIVIL WAR IN MOZAMBIQUE?

To stem the flow of weapons from Mozambique into KwaZulu- Natal, a two-man special operations team was inserted into Mozambique for this mission. One of those two persons was Anthony Turton, selected in part because of his skills as a radio operator, which was deemed to be a necessary element for the success of this high risk but strategically important mission.
Anthony used these skills, honed to a high level of technical competence as an active radio amateur, to gain strategic access to the rebel group RENAMO.

Anthony has authored a book "Shaking Hands with Billy' which tells this story for the first time.

AM Radio on the way out in the UK

UK Government reports indicate an intention to abandon AM broadcast radio for emergency communications and to phase-out AM broadcasting from 2016.

The report Impact of a Radio Switchover on the Government's Emergency Communications Policy says:

The coverage of AM services are near universal across the UK, delivered by a small number of transmitters which could more easily be restored in the event of a national disaster.

However, while AM services are universally available, the number of households which both have access to and choose to access such services is on the decline.

The declining value of the AM platform is best displayed in the case of the National Attack Warning System (NAWS).

The use of the BBC Radio4 LW frequency to broadcast emergency information nationally in the case of a nuclear attack or similar disaster was formalised through the NAWS arrangements between the BBC and the Cabinet Office. However, as a result of the limitations of this system in the present day, from the falling numbers of LW receivers in homes, to the delay incurred from having to restore transmitters following an attack, the Cabinet Office has since cancelled their NAWS arrangements with the BBC.

Neighbours at war over aerial

New Zealand's Nelson Mail reports that a Nelson couple, dismayed by the erection of a large ham radio aerial in the middle of their expansive view from Princes Dr, have taken their fight to city councillors.

Dallas Woods made a presentation to the council's public forum, asking councillors to change the rules so that amateur radio aerials were no longer a permitted activity in residential zones or the "landscape overlay" which covers city ridgelines.

The landscape overlay prevented the putting up of cell phone towers, power poles and light standards as of right, but the plan did not prohibit other structures such as radio aerials.

Read the full Nelson Mail article, with pictures, at http://www.stuff.co.nz/nelson-mail/news/8429054/Neighbours-at-war-over-aerial

Amateur Radiocommunication service - it is not only a hobby

On March 12, 2013, a conference titled 'Amateur Radiocommunication service it is not only a hobby' took place in the Lower Chamber of the Parliament of the Republic of Poland.

It was organized by the Committee on Culture and Media together with the Foundation of the Nation-wide Agreement of Amateur Radio Organizations (FOPOR), and in cooperation with the Polish Amateur Radio Union (PZK). The conference was attended by representatives of the governmental

administration, amateur radio organizations, guide and scouts, and young radio amateurs.

NEWS FROM ARNEWSLINE USA

HAMVENTION ANNOUNCES 2013 AWARD WINNERS

I'm Bill Pasternak, WA6ITF, with word that the Dayton Hamvention has announced this years winners of its famed Hamvention Awards.
The news was made public on the March 13th edition of Ham Nation by past Hamvention General Chairman Michael Kalter, W8CI, with a well-known ham from Germany garnering the top spot:

--

W8CI: Our Amateur of the Year is Mustapha Landoulsi, DL1BDF. He was actually born in Tunisia and has set up six amateur radio stations in Tunisia and has brought them into the IARU. He's worked tirelessly to help Middle-Eastern countries and African counties in amateur radio. He also sped up and organized the delivery of emergency medical equipment and medicine to African and other third world countries, and he is so well known throughout the world that his work actually embodies what amateur radio is about. He tries to bring peoples together from different countries and his heart is one hundred per cent into amateur radio.

--

Recognized as this years Special Achievement Award recipient was George Thomas, W5JDX, of Ridgeland, Mississippi. For those few of you not aware, George the producer of the Internet TV show known as amateurlogic.tv. He also co-hosts Ham Nation with Bob Heil K9EID and Gordon West WB6NOA on TWiT TV. And he took the opportunity to thank those who have been working with him over the past few years:

--

W5JDX: "You know I couldn't do this without my partners Tommy, Jimmy and Peter and of course Bob and Gordo."

--

==========

RSGB's G4NJH

LES-1 satellite heard again

Phil Williams, G3YPQ, an amateur radio astronomer in North Cornwall, reports picking up a signal from the LES-1 satellite, launched in 1965.

The satellite failed to reach its intended orbit owing to a
wiring error and has been drifting out of control ever since.

Phil ran across it while monitoring near 237MHz when he
noticed a signal with a peculiar signal drift caused by the
bird tumbling end over end every four seconds as the solar
panels became shadowed by the satellite's engine.

He said that gives the signal a particularly ghostly sound
as the voltage from the solar panels fluctuates.

==========

WEIRD AND WONDERFUL

Pirate Radio Station In Florida Jams Automotive Electronics

Peter Ellis VK1PE has dug up another humorous radio-related story.

"In December there were reports that, for months, dozens of people could not
use their keyless entry systems to unlock or start their cars when parked in
the vicinity of the eight-story Regents bank building in Hollywood, FL.

Once the cars were towed to the dealership for repair, the problem went away.

The problem resolved itself when police found equipment on the bank's roof
that was broadcasting a bootleg radio station. A detective and an FCC agent
found the equipment hidden underneath an air conditioning chiller.
The man who set up the station has not been found, but he faces felony
charges and fines of at least $10,000 if he is caught.

The radio station was broadcasting Caribbean music around the clock on
104.7 FM."

OPERATIONAL NEWS

Hi! this is Ed VK2JI, contests manager for the Central Coast Amateur
Radio Club.

Do you know it's only three weeks to the National Field day?

These are the two days of the year that we should especially try to
get out in public and explain our great hobby to all interested and see
if we can welcome new people into the hobby and into our clubs.

So why not get out to a public place and put on a small station -
The Central Coast ARC are doing just that. We will have several stations
across the region, having fun and meeting people.

>From the WIA website when I'm recording this, it seems the CCARC are
leading the registrations, perhaps the other states are lagging a little
behind?

In any case, here's hoping lots more stations will be on in public places on the 13th. and 14th. of April!

(Ed VK2JI)

Good Morning,

This is Denis Johnstone Contest Manager for the John Moyle Memorial Field Day.

So far I have received about 70 logs and there has been plenty of contesting done during the weekend. The weather has been a little kinder than many years in the past..

Of course having taken part in the contest, which in most cases requires you to plan your site, pack and transport your accommodation, food and equipment. Then to set up your station as well as operate your station for up to 24 hrs. Then pack up your station and return to your home QTH. It would be such a shame, if you were not to complete the process by filling out your log and getting it to me.

You can use Electronic or snail mail.

For details of course you can check the details on www.wia.org.au/members/contests/johnmoyle/

Your log is very important to you, but it is also important to others as it in this way I am able verify the logs submitted by other stations.

So make sure that you complete you log and get it to me before the closing date of 19th April 2013.

HOLYLAND CONTEST 2013 - APRIL 19 - 20

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

VI 100 ACT - Centenary of Canberra, capital of Australia.

Canberra Region Amateur Radio Club members are activating special event call until 31 Dec LF through to VHF using multiple modes.

www.qrz.com/db/VI100ACT

PA ?? KING is the special call on the 30th April 2013, the Coronation of Dutch new King, "Willem Alexander".

Queen Beatrix's decision to hand over the throne to her eldest son may have historical significance, but the actual process and ceremony is very simple.

On April 30, she will sign a document - the act of abdication - and Willem-Alexander automatically becomes king, although he still has to be inaugurated. His oldest daughter, Catharina-Amalia, will automatically become first in line to succeed him.

Willem-Alexander will be sworn in in the Nieuwe Kerk in Amsterdam, but it will be a secular rather than a religious ceremony.

The inauguration takes the form of a meeting of the upper and lower houses of parliament - as set down in the constitution. This means all members of the lower and upper houses of parliament will be there as will a limited number of other guests.

The new king will then swear to be faithful to the constitution and to fulfil his role properly.

Zen and The Art Of Radiotelegraphy

The book "Zen and The Art Of Radiotelegraphy" by Carlos Consoli IK 0 YGJ is now available for the Kindle

This book is the result of several years of experience in amateur radiotelegraphy. It suggests, for the first time, a learning methodology based on an integrated and multidisciplinary approach designed to accompany the apprentice from the first steps in ham radio all the way to a world-class proficiency in telegraphy.

The book introduces, ad-hoc tailored to amateur radio, techniques used successfully by competitive athletes, including extreme sports such as free diving, adapted to the difficult process of learning telegraphy.

The Kindle book is on Amazon at
amazon.com/Zen-The-Art-Radiotelegraphy-ebook/dp/B00BVOBJDQ/

Ham Radio EME 'Go Work Yourself'

In this latest episode of HamRadioNow Gary Pearce KN 4 AQ talks to Pete Rimmel N 8 PR about Earth-Moon-Earth communications.

With new software and techniques, you don't need that monster station anymore. But you'll need more than an HT. Somewhere in between....

MODERN AMATEUR RADIO FROM CANADA

Modern Amateur Radio is the title of a new, bi-lingual video produced in Canada by Donald Boucher, VE2XT. Boucher put the show together in full wide screen High Definition and it includes some truly breathtaking aerial footage of the Canadian countryside.

VE2XT owns a video production company in Montreal and he shot the video last year in his spare time. Posting of the video to YouTube was done by CQ Propagation Editor Thomas Hood, NW7US.

What makes Modern Amateur Radio unique is its international flavour.

While the narration is in English most of the natural sound background conversations are in French. But you do not have to understand the French language to truly enjoy this Canadian look at our great hobby.

You can see it for yourself at tinyurl.com/modern-amateur-radio

SPECIAL EVENT STATION 2 O 12 L VIDEO NOW AVAILABLE

The organizers of 2 O 12 L, the amateur radio special event station celebrating the London Olympic and Paralympic Games in the Summer of 2012 have now released a 45 minute DVD of the event. Produced by Fred Curtis G3SVK, the DVD goes behind the scenes of the event, telling the story of how those 69,644 QSOs were made possible.

Details can be found at www.2o12l.com under the 'News' link.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

USAF APPROVES AMSAT REQUEST FOR REDISTRIBUTION OF KEPS

The Keps will keep on coming.

So says AMSAT North America after a deal was reached between the Amateur Radio Space Agency and the Air Force Space Command that will permit AMSAT to continue to re-distribute Keplerian elements from the latter's SpaceTrack service.

Keplerian elements. sometimes called by the acronym Keps are the basis for all satellite tracking. According to AMSAT's Orbital Data Manager Ray Hoad, WA5QGD, the re-distribution agreement was approved for the period April 1, 2013 to April 1, 2014.

(ARNewsLine)

The largest-ever array of radio telescopes, ALMA, has gone online today in Chile, seeking to unravel mysteries of the Universe.

The ALMA (Atacama Large Millimetre Array), located in the South American country, is the culmination of an international effort that had been going on for nearly a decade and promised to outdo all previous ground-based telescopes

and even outdo the mighty Hubble Telescope, producing images almost ten times sharper.

Costing $1.4 billion, the 66 radio telescope array is the product of an international collaboration between Europe, the United States, Canada, East Asia and Chile, and according to ALMA scientists, will herald a new age in astronomy.

The telescopes have been placed 5,000 meters above sea level, affording astronomers unique conditions. As the array of telescopes is placed at such an altitude and in a desert, dry condition, good observation of the universe is ensured almost year round.

What is even more unique about the telescope array is the manner in which it observes the heavens, picking radio waves instead of light to make its images of the universe - a method that basically "unclutters" the telescopes' views, piercing through any celestial haze.

66 telescopes in the array cover an area of some 70,000 square feet and are individually capable of capturing the stars.

The data generated by the array will then be fed into a supercomputer, which will then collate the information, producing images never seen before

SICK PARADE

One of Australia's well known hams, Barry Wilson VK3MBW, is currently in intensive care at Burnie Hospital, Tasmania, with pneumonia.

Barry and his wife Sandra had flown to Tasmania from Victoria last week, intending to join in at the annual "Sewing Circle" BBQ at Ross this Sunday (March 24)

Barry is an avid DXer and a co-founder of the Friday Night "Bottle Shop" Net for Valve Radio Operators which has run for 166 editions so far.

He is also president of the Geelong Radio and Electronic Society.

Barry is still medically "asleep" for now, but he seems to be responding slowly to treatment.

Our thoughts and prayers are with Barry, Sandra and their family.

(Keiran VK3BTV and the Bottle Shop Net.)

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

NZART Headquarters Infoline Issue 37s

22 March 2013

NZART Website: www.nzart.org.nz

Results of the 2013 Council Election

NZART President

Vaughan Henderson ZL1TGC 514 votes

John Andrews ZL2HD 210 votes

Vaughan Henderson is by the above result, duly elected President.

Northern Region Council – No election required

Stephen Hayman ZL1TPH

Phil King ZL1PK

Neill Ellis ZL1TAJ

Central Region Council – No Election Required

Warren Harris ZL2AJ

Fred Johnson ZL2AMJ

Ted Linney ZL2TB

Midlands Region Council

Stuart Watchman ZL2TW 154 votes

Phil Holliday ZL3PAH 134 votes

Ann Fraser ZL3TNT 43 votes

Stuart Watchman and Phil Holliday are duly elected as Midland Region Councillors.

Southern Region Council – No election required

Terry Thomas ZL4TAE

Scrutineers for this election were

Mark Gooding ZL2UFI Upper Hutt Branch President. Steve Morgan, Debby Morgan.

The above positions become effective 1 June 2013.

Evan Sayer

NZART Returning Officer

20 March 2013

==> AMATEUR RADIO ENFORCEMENT: FCC REDUCES PENNSYLVANIA HAM'S FINE

After affirming it was going to uphold a forfeiture in the amount of
$4000 to Jose Torres, N3TX, of Philadelphia, Pennsylvania, the FCC
decided to lower the fine to $3500. The FCC issued the fine in May
2011, saying that Torres' willful and repeated operation on an
unauthorized frequency in April and June 2008 was in violation of
Section 1.903(a) of the FCC's rules. Torres filed a Petition for
Reconsideration in July 2011, asking that the FCC cancel or reduce the
fine based on his inability to pay the full amount. Read more
<http://www.arrl.org/news/fcc-reduces-pennsylvania-ham-s-fine>.

==> SUPPORT ARRL: ARRL ANNOUNCES A CAMPAIGN FOR ITS SECOND CENTURY
```

As the ARRL draws closer to celebrating its Centennial in 2014, its Board of Directors has launched an unprecedented $10 million fundraising initiative to build the ARRL Endowment and strengthen the organization's financial future. Led by the ARRL Board and an eight-member Second Century Campaign Committee -- headed by David W. Brandenburg, K5RQ -- the campaign has already raised more than $4 million toward this goal. Plans are to reach that goal by the end of ARRL's centennial year in 2014.

"The vision of the ARRL Second Century Campaign is to secure significant financial resources that will open a path to passionate involvement in Amateur Radio for new generations," she said. "In this, it will provide opportunities for educational enrichment, community service and personal achievement through the exploration and use of the magic of radio communication." Read more <http://www.arrl.org/news/arrl-announces-a-campaign-for-its-second-century>.

==> DAYTON HAMVENTION® ANNOUNCES 2013 AWARD WINNERS

The Dayton Amateur Radio Association (DARA) -- host of the Dayton Hamvention® -- has announced the winners of its four annual awards for 2013: the Amateur of the Year, the Technical Excellence Award, the Special Achievement Award and the Amateur Radio Club of the Year. These recipients will be honored at Hamvention in May. Each year, DARA invites the amateur community to nominate hams who have made significant contributions to the Amateur Radio Service. Read more <http://www.arrl.org/news/dayton-hamvention-announces-2013-award-winners>.

==> CHECK OUT THE APRIL ISSUE OF QST

The April issue of QST celebrates 75 years of W1AW, the Hiram Percy Maxim Memorial Station. So grab your print edition of QST -- or settle in with your computer or tablet to read the digital version <http://www.nxtbook.com/nxtbooks/arrl/qst_201304/index.php> -- and discover what the April issue has to offer.

Remote operation of your station via the Internet is gaining popularity. While operating the rig and antenna selector is fairly simple, controlling other station functions remotely can be a bit of a challenge. In his article "Remote Control of Accessories via the Internet," Jon Crisman, W0JEC, explains how to make this functions a bit simpler. In "The 2 Meter Q-Pole," Eric P. Nichols, KL7AJ, explains how this attractive and somewhat strange-looking antenna is the only kind of antenna capable of radiating omnidirectional diagonal polarization. In the first of a series of one night, easy to build projects, Paul Danzer, N1II, presents "Done In One: Temperature Alarm," which demonstrates how to build a device to warn you if your rig is overheating.

The world's most famous Amateur Radio station -- W1AW -- turns 75 in September. W1AW Station Manager Joe Carcia, NJ1Q, takes readers on a photo tour of the ARRL's flagship station in "75 Years of W1AW." In his article "Field Day the Solo Way," Thomas Mills, NU9R, gets a jump on

Amateur Radio's most popular on-the-air event by showing that roughing it on Field Day can teach some valuable lessons. ARRL News Editor S. Khrystyne Keane, K1SFA, reports on the ARRL's Board of Directors Annual Meeting and presents the recipients of three of the ARRL's annual awards in "ARRL Board of Directors Convenes in New Orleans for 2013 Annual Meeting."

ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, takes a look at the Yaesu FTdx3000 HF and 6 meter transceiver in this month's Product Review. He says this rig "brings a boost in features and performance to Yaesu's mid-priced transceiver range." You can find a video overview of the Yaesu FTdx3000 <http://www.nxtbook.com/nxtbooks/arrl/qst_201304/index.php#/50> in the digital edition of the April issue of QST.

Of course, there are the usual columns you know and have come to expect in the April issue of QST: Happenings, Hints & Kinks, Eclectic Technology, The Doctor is In, Short Takes, Vintage Radio, How's DX? and more. Look for your April issue in your mailbox and in your inbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ARRL EXECUTIVE COMMITTEE FOCUSED ON FCC AND REGULATORY ITEMS AT MARCH MEETING

The ARRL Executive Committee (EC) held its first 2013 meeting Saturday, March 9 in Irving, Texas. The meeting's agenda included items concerning the FCC and regulatory items, FCC enforcement, legislative issues and organizational matters. The EC is responsible for administering the League's affairs in between Board meetings. Read more <http://www.arrl.org/news/arrl-executive-committee-focused-on-fcc-and-regulatory-items-at-march-meeting>.

==> THE AMATEUR RADIO PUBLIC SERVICE HANDBOOK NOW AVAILABLE FOR KINDLE

The Amateur Radio Public Service Handbook
<http://www.amazon.com/Amateur-Public-Service-Handbook-ebook/dp/B00BM9S1P4/ref=pd_rhf_cr_p_t_1_MHTV>
is now available from amazon.com for the Kindle. This e-book is for all hams who volunteer their time and skill in service to their communities. It provides knowledge needed for communicating quickly and effectively during disasters, emergencies and community events, as well as an opportunity to learn more about the Amateur Radio Service and its unique role in supporting the public.

You do not need a Kindle to download and purchase The Amateur Radio Public Service Handbook: those who have the Kindle application installed on their Apple iPhone, iPod touch or iPad or Android smartphone -- or even on their computer -- can download the book for use on these devices. The Amateur Radio Public Service Handbook is

available as a Kindle book from amazon.com for $24.99. The soft cover version <http://www.arrl.org/shop/Amateur-Radio-Public-Service-Handbook/> is also available for $39.95 ($34.95 for ARRL members).

==> ARRL UHF/MICROWAVE BAND PLAN COMMITTEE SEEKS COMMENTS ON DRAFT 5 AND 10 GHZ NATIONAL BAND PLANS

Last year, the ARRL UHF/Microwave Band Plan Committee prepared -- and the ARRL Board of Directors approved -- updated national band plans for the amateur bands between 902 MHz and 3.5 GHz after receiving extensive and helpful input from the user community. Last year, after the ARRL Executive Committee extended the Committee's charter to include the 5 and 10 GHz bands, it solicited additional input concerning usage on those two bands. The Committee has prepared draft band plans for 5 centimeters (5.650-5.925 GHz) and 3 centimeters (10-10.500 GHz). Read more <http://www.arrl.org/news/arrl-uhf-microwave-band-plan-committee-seeks-comments-on-draft-5-and-10-ghz-national-band-plans>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: This past week, the average daily sunspot numbers were up 16.2 points to 101.1, while the average daily solar flux remained about the same, rising from 118.5 to 119. An eruption on March 15 caused a coronal mass ejection (CME) that hit Earth on March 17, causing the planetary A index to jump to 46. The predicted solar flux is 105 on March 21-22, 100 on March 23-27, 95 on March 28, 100 on March 29-30, 105 on March 31, 110 and 120 on April 1-2, 125 on April 3-6, and back down to 120 on April 7-8. The planetary A index is predicted to be 10 and 8 on March 21-22, 5 on March 23-27, 18 and 10 on March 28-29, and back down to 5 on March 30-April 16. Look for more on the ARRL website on Friday, March 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> W1AW ANNOUNCES 2013 SPRING OPERATING SCHEDULE

With the switch from Standard Time to Daylight Saving Time on March 10, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. Your local standard times have not changed, but the UTC times they reference have. Read more <http://www.arrl.org/news/w1aw-announces-2013-spring-operating-schedule>.

==> ARRL TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, March 29. There will be no W1AW bulletin or code practice transmissions that day. ARRL Headquarters will reopen Monday, April 1 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> THIS WEEK IN RADIOSPORT

This week:

- March 22 -- NCCC Sprint
- March 24 -- UBA Spring Contest (SSB)
- March 27 -- SKCC Sprint
- March 27 28 -- CWops Mini-CWT Test

Next week:

- March 29 -- NCCC Sprint
- March 30-31 -- CQ WPX Contest (SSB)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will allow you to see rec.radio.info-crossposted bulletins, while still filtering out most SPAM or "Velveeta" crossposted to more than 2 newsgroups (as such articles usually do not contain a 'Followup-To:' header):

Score: -9999
Newsgroups: ,.*,
~Followup-To: .

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://static.slated.org/killfile/killfilefaq.htm |

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.antenna Antennas: theory, techniques and construction. |
rec.radio.amateur.boatanchors Vacuum tube-based amateur radio equipment. |
rec.radio.amateur.digital.misc Packet radio and other digital radio modes. |
rec.radio.amateur.dx Discussion, tips, notices and news for DXers. |

rec.radio.amateur.equipment All about production amateur radio hardware. |
rec.radio.amateur.homebrew Amateur radio construction and experimentation. |
rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.amateur.space Amateur radio transmissions through space. |
rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are
appropriate, but reserve the right to add groups if we feel it has
broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The
rec.radio.broadcasting moderation team prefers to review all articles |
before posting. Placing rec.radio.broadcasting before rec.radio.info |
on the Newsgroups line should accomplish this. We will typically |
abide by the rec.radio.broadcasting moderation team's decision whether |
the article is appropriate for rec.radio.info. |

- rec.radio.amateur.moderated is also a moderated group. As the
rec.radio.amateur.moderated Moderation Team manages both
rec.radio.amateur.moderated and rec.radio.info, we can manage
crossposting and approvals for both newsgroups. The
rec.radio.amateur.moderated group does not allow crossposting to other
discussion newsgroups, whether moderated or unmoderated. However, we
would like to manage rec.radio.info as consistently as possible with
how it was done by previous moderators, including the grandfathering
of existing regular postings. Therefore, the submitter can choose
rec.radio.amateur.moderated or the other unmoderated
rec.radio.amateur.* discussion newsgroups for crossposting, but not
both.

- Any FAQ or informational posting approved by the
rec.answers/news.answers moderation team that is also crossposted to
any rec.radio.* newsgroup (besides just rec.radio.info) is also
automatically pre-approved for rec.radio.info. See below for more
information.

If you post to another moderated group, it may be better to make special
arrangements with both moderators before posting by contacting us at our
administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders
can be configured to show you cross-posted articles only once anyway;
not everybody reads rec.radio.info; and rec.radio.info was never meant

to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org>

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Ham Radio Now

//
HamRadioNow Reviews "Last Man Standing's" 'Ham Radio' episode

Posted: 21 Mar 2013 12:01 PM PDT
http://hamradionow.tv

Last Friday, ABC's sitcom "Last Man Standing" took ham radio from a background element to full-frontal, with multiple cast members talking on the radio (if maybe not exactly the way we'd do it for real). Most hams were thrilled, but some have objected. Gary reviews the episode, and then talks to ARRL's Media guy Allen Pitts W1AGP about the impact of putting this much ham radio before the public.

706. Amateur Radio Newsline(tm) Report 1858 - March 22 2013

Amateur Radio Newsline(tm) Report 1858 - March 22 2013

Amateur Radio Newsline report number 1858 with a release date of March 22 2013 to follow in 5-4-3-2-1.

The following is a QST. An antenna battle down under pits a ham antenna against a landscape view; a big win in New Jersey as a ham is finally granted approval for his tower and antenna; a Coronal Mass Ejection on the sun hits Earth on St. Patrick's Day; the Federal probe of the so-called zombie attack on the United States Emergency Alert System continues and GPS jamming becomes a threat to public safety in the UK. All this and more on Amateur Radio Newsline(tm) report number 1858 coming your way right now.

RADIO LAW: NELSON NZ COUPLE WANT HAMS ANTENNA TAKEN DOWN AND ALL HAM ANTENNAS BANNED DUE TO EMI EXPOSURE

A Nelson, New Zealand couple upset by the installation of a ham radio antenna in the middle of their expansive field of view from have taken their fight to city councilors. They also appear to want a change in local zoning law that would make all ham radio installations in that city subject to exceedingly strict human electromagnetic exposure limits. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has the details:

--

Dallas Woods is the complainant who made a presentation to the council's public forum. At that hearing Woods asked councilors to change the rules so that amateur radio antennas are no longer a permitted activity in residential zones or the landscape overlay which covers city ridgelines. Woods said the landscape overlay was supposed to mitigate adverse effects on visual qualities and to retain views from major vantage points. Also that the council's councils current plan acknowledged that in some areas use of structures such as antenna masts should be extremely limited.

But that presentation did not stop there. According to Woods testimony, with the modern communications now available, there was no justification for large ham radio antennas as a right in residential zones. Woods also stated that ham radio was no longer needed to help with emergencies. They are also concerned about the health aspects for themselves and passers-by who could be exposed to higher what Woods

terms as a than acceptable amount electromagnetic radiation from the ham radio antenna when it was operating at full power. Woods wants the National Radiation Laboratory of the Ministry of Health should monitor the RF output from the antenna while the ham radio station is operating at maximum power.

The tower and antenna in question belong to Rick Kiessig, ZL2HAM. He has acknowledged that his antenna did impinge on his neighbors view to some degree, but noted that there was a gum tree in the same area which was taller than his antenna and blocked much more of the view. He also said that he had taken a number of additional steps to mitigate the effect of the antenna on the view of his neighbors. This included his using a self-supporting tower without lots of guy wires and an antenna made of translucent fiberglass rather than one with a large number of thick aluminum elements.

Nelson's environmental inspections manager is Stephen Lawrence. He acknowledges that he has received such a request from the Woods, but he notes that a rule in the Nelson Resource Management Plan specifies that any antenna transmitting on radio frequencies had to do so within the limits of the relevant New Zealand Safety Standard. He says that Kiessig has already submitted a very detailed self assessment to council that shows his antenna system complies with that safety standard. According to Lawrence, the council in the process of seeking someone to peer review this assessment as a double check, but he adds there are currently no grounds to believe that it isn't accurate or that the antenna system is operating outside of proper safety limits.

And that's where this one stands as we go to air.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, one the scene in Nelson, New Zealand.

--

According to ZL2HAM, amateur radio stations such as his that operate in the high frequency spectrum makes them safer at a given power density than cellphones or wireless internet. He notes that a ham radio station in the high frequency range would need to transmit about 12,000 watts of effective radiated power to have the same power density as a cellphone in normal use. (Fairfax NZ News, Others)

**

RADIO LAW: NJ HAM WINS ANTENNA HEIGHT APPEAL

Back on this side of the Pacific a New Jersey ham has finally been granted a building permit to erect a 96 foot high antenna system. Amateur Radio Newsline's Heather Embee, KB3TZD, is here with more:

--

In April 2012, Ira Saber, N2IS, filed an application for a building permit in Morris Township, New Jersey. A month later, the Township's

Code Enforcement Officer informed Saber that the proposed 96' high private radio antenna system, on his modest one quarter acre property, may violate the height requirement in the zone.

On appeal to the Zoning Board of Adjustment, Saber submitted a "Showing of Need for Height of an Amateur Radio Antenna Support Structure," prepared by Dennis Egan, W1UE. Also submitted was an ARRL pamphlet entitled "Antenna Height and Communications Effectiveness," prepared by Richard Straw, N6BV and Gerald Hall, K1TD, and a brief by his lawyer, Fred Hopengarten, K1VR.

In December 2012, after soliciting opinions by the township's RF consultant, the township planner, and the attorney to the Board of Adjustment, the Zoning Board of Adjustment held a hearing. Saber and Hopengarten appeared. At that time the Board voted unanimously that Saber's building permit should be issued as requested.

But the most important aspect of this finding was what has come to light since. In an opinion letter the Board of Adjustment attorney said that it is apparent that the essence of the FCC's preemptive intent as expressed in PRB-1 was to guarantee that each amateur radio operator could install functional antennas for all amateur frequency bands, at the licensee`s residence.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, a bit to the West in Berwick, Pennsylvania.

--

The full decision, and the opinion of the Board's attorney, may be found under "Resolution of Findings and Conclusions, Ira J. Saber" at tinyurl.com/n2is-antenna-win. (QRZ)

PROPAGATION: CME IMPACT SPARKS ST. PATRICKS DAY AURORAS ON EARTH

The Southgate news reports that the skies over parts of North America turned green for St. Patrick's Day. This as a Coronal Mass Ejection or CME from the surface of the sun impacted on planet Earth during the early hours of March 17th.

The CME sparked bright auroras at latitudes as far south as Colorado. Other intense Aurora's were spotted on March 18th mainly over the Arctic as Earth's magnetic field continued to respond to the solar impact. And if you heard or worked some stations on 50 MHz and above who sounded as if they were gargling while speaking, that was the sound of aurora propagation.

More information on this latest CME flare including photos and further updates can be found on line at spaceweather.com. (Southgate, Skywatch, others)

**

ENFORCEMENT: FEDERAL PROBE INTO FALSE EAS ZOMBIE ALERT WIDENS

FCC Public Safety and Homeland Security Bureau Chief David Turetsky says that the investigation continues into what happened to allow someone to hack some broadcast stations' EAS encoders/decoders and insert false alerts of zombie attacks that were aired on some of those facilities.

According to Turetsky, the Internet which is a part of the EAS system will remain an important means of communication. Turetsky says that there is no silver bullet to cover all occasions. He says that all involved in EAS need to work hard to create greater security.

As previously reported, some stations that were hacked had connected their EAS encoder/decoder equipment directly to the Internet, rather than behind a firewall. Others had not changed the factory-provided password making both vulnerable to attacks by hackers. (RW)

**

RADIO LAW: FEUD ERUPTING BETWEEN CTIA AND NAB OVER ENG SPECTRUM FOR BROADBAND

A feud appears to be brewing between the broadcast community and the broadband industry over spectrum now used by broadcast auxiliary operations. This after the CTIA Wireless Association has requested that the FCC look to reclaim some of this spectrum for commercial reallocation. Amateur Radio Newslines Stephan Kinford, N8WB, has the details:

--

For its part the CTIA points out that the FCC has until February of 2015 to identify 15 MHz of contiguous spectrum for reallocation and licensing for mobile broadband and that the current broadcast auxiliary services band is a natural fit.

But the National Association of Broadcasters counters that such a move would amount to a threat to public safety. This is because the spectrum in question is currently used for electronic newsgathering and is where broadcasters were forced to move these operations when they reallocated satellite spectrum.

Perhaps the biggest dig at the CTIA proposal came from National Association of Broadcasters spokesman Dennis Wharton. He is quoted as having said that if the request were not such a serious threat to public safety, it would be amusing.

But the wireless industry does not seen to be amused. In his statement CTIA president Steve Largent wrote that this spectrum band is below 3 GHz, is contiguous and adjacent to current allocations, and would allow pairing in a readily achievable fashion. Largent added that the CTIA is not aware of any other spectrum bands as well-positioned as this band to meet all the key principles for mobile broadband spectrum that could be paired with the specific 15 MHz identified by National

Telecommunications and Information Agency.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

The bottom line appears to be that broadcasters who had been allied with wireless companies in opposition to the FCC's incentive auction band plan may be quickly heading in different directions and may well come to loggerheads over this new CTIA spectrum demand. (B&C, fiercebroadbandwireless.com)

ENFORCEMENT: FCC SEIZES UNLICENSED FM BROADCAST STATION IN BROCKTON MA

Federal authorities have shut down and seized equipment reportedly used by an unlicensed radio station in Brockton, Massachusetts. A station that is alleged to have interfered with air traffic communications in the Boston area. Amateur Radio Newslines George Bowen, W2XBS, tells us what happened:

--

The equipment was confiscated by the US Marshals Service, which executed a warrant March 1st. According to an affidavit filed in January by FCC Engineer Emmanuel Domkam, officials began investigating the unlicensed station operating on 91.7 FM in Brockton, in February 2010. However the station's transmitter moved three times before it ended up on at the location the seizure occurred.

Domkan wrote that each time the move occurred after the FCC has issued and posted a written warning at the transmitter location. Investigators eventually traced the transmitter to an address on Rutland Street in Brockton. This after the Federal Aviation Administration filed a complaint last October that a possible unlicensed station, later identified as operating on 91.7 and playing Haitian music, was interfering with its ability of controllers to communicate with pilots flying in the Boston area.

The interference was likely from spurs generated by the stations transmitter. The FCC said the investigation became a top priority because this kind of interference could be dangerous to air to ground communications and public safety.

As we go to air the owner of the property where the equipment was confiscated has not been charged with any crime. Nor was immediately clear if that person or anyone else will be subject to a Notice of Monetary Forfeiture or other federal penalty. As regular listeners know, fines in similar cases start at $10,000 and run as high as $25,000 or more.

For the amateur Radio Newsline, I'm George Bowen, W2XBS, in Albany, New York.

--

This is not the first time that the FCC has confiscated an unlicensed station in the Brockton area. In an unrelated 2007 case an unlicensed radio broadcaster was cited by federal authorities for interfering with the traffic control at Logan International Airport in nearby Boston. In that incident the stations equipment was also seized. (Boston Globe, Boston Herald, Cape Cod Daily)

**

ENFORCEMENT: FINE REDUCED IN PENNSYLVANIA OUT OF BAND OPERATION

A Pennsylvania ham whom the FCC says operated outside of the amateur radio bands has had his fine reduced by $500.

Back on May 16, 2011 the FCC imposed a $4,000 monetary forfeiture against Jose Torres, N3TX, of Philadelphia. This for his alleged willful and repeated operation of his amateur radio station on an unauthorized frequency on April 17 and June 2, 2008. The frequency in question was 26.71 MHz.

On February 17, 2009, Torres met with agents in the Philadelphia Office to respond to the apparent findings in the N-A-L. During the meeting Torres claimed that he was not at home when the alleged unauthorized transmissions occurred. He also asserted that payment of the $4000 proposed fine would pose a financial hardship. At that meeting he produced the required documentation to back up his claim.

But in affirming the penalty, the FCC said that it finds that Torres's Petition for Reconsideration fails to demonstrate a material error in the Forfeiture Order. That it only reiterates arguments previously presented to and rejected by the agency's Northeast Region office. As such, it denies reconsideration of the Petition on this basis.

As to Torres's claim of his inability to pay the forfeiture, here the FCC says that based on the materials he submitted that a reduction of $500 is warranted. Therefore the agency affirms the Northeast Region's finding that Torres willfully and repeatedly operated on an unauthorized frequency but reduces the forfeiture amount to $3,500.

Torres was given the customary 30 days from the March 19th release of the Memorandum Opinion and Order in this matter to pay the reduced $3,500 forfeiture amount. (FCC)

**

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA BROADCASTERS ISSUED $25000 NAL

The FCC has issued Gary Feldman a $25,000 Notice of Monetary Forfeiture for operating an unlicensed radio station in Miami, Florida.

Responding to a complaint, agents from the Enforcement Bureau's Miami office traced the source of an unauthorized signal on 99.7 MHz to an FM antenna mounted on Feldman's residence, in both 2011 and 2012. While monitoring the station, agents heard the website hot977fmmiami.com mentioned. A check showed the website domain registered to Feldman.

According to the FCC, during an inspection in 2012, Feldman admitted he operated the station but refused to either surrender the gear to the investigators or to destroy it. At that time the commission warned Feldman that operating an unlicensed station violated FCC rules and he could face further enforcement action.

Later in 2012 the FCC says that Feldman attempted to evade detection by moving his unlicensed operation to a commercial building he owns in Miami. The commission also found Feldman had earlier been issued a $10,000 fine for operating an unlicensed station in Fort Myers. That case had already been turned over to the Department of Justice for collection but the fine at that time has still remained unpaid.

In issuing the latest proposed fine to Feldman the agency noted that it had increased the amount to $25,000 because of his past record of non compliance with FCC rules and that the current violation is deemed as willful and repeated. It also warned him that he may face larger fines, criminal prosecution and equipment seizure if he fails to comply.

Feldman has 30 days from the February 21st date of the issuance of the proposed fine to pay it in full or to file an appeal. (FCC)

**

RADIO HAPPENINGS: FEMA-IPAWS WONT BE AT NAB DUE TO SEQUESTRATION BUDGET CUTS

It appears that FEMA-IPAWS personnel won't be going to the National Association of Broadcasters Convention in April due to the so-called "sequestration." That's the fancy word politicians in Washington made up to give a title to the more than $40 billion in across-the-board federal spending cuts within the remaining fiscal year.

One member of that office posted a message to the Society of Broadcast Engineers EAS list serve that at this time FEMA won't have a presence at the National Association of Broadcasters Convention next month in Las Vegas, Nevada. That likely means FEMA won't have a booth and no one can travel to the event, including those scheduled to be session panelists.

There's no word yet on how the budget cuts might affect travel for the FCC personnel scheduled to speak in Las Vegas. During a recent Senate FCC oversight hearing Chairman Julius Genachowski said he has serious concerns about the effects of the cuts, since the agency is at its lowest employee level in some 30 years.

The FCC's portion of the sequestration cuts is about $17 million, or 5% of its total $340 million budget. This in turn begs the obvious question as to how the sequestration mandated budget cuts might affect all aspects of ham radio oversight by the agency as well as FCC participation in major amateur radio conventions and other events. (RW, ARNewsline(tm))

RADIO HAPPENINGS: FAIRBANKS AK COLLEGE STATION TAKES MAJOR PRIZE

KSUA, a student-run radio station at the University of Alaska at Fairbanks has been named as the best college radio station in the country. The station on 91.5 MHz FM won the 2013 MTVU'S Best College Radio Woodie Award, beating out competition from major universities in metropolitan areas from across the country.

MTVU is a division of the MTV Network that targets college-aged students and is available on more than 750 college campuses across the United States. The Woodie Awards are its top honors, which celebrate everything about college life from best musical artist and video to best radio station.

This year awards will be presented in Austin, Texas, during the South by Southwest festival. This is a major 10-day entertainment festival covering music, film and interactive formats such as video gaming and the online world. (AND.com)

**

RADIO EDUCATION: DARA TO AGAIN SUPPORT ADVANCED ARRL TEACHERS INSTITUTE

For the fourth year in a row, the Dayton Amateur Radio Association will provide financial support for the advanced session of the Teachers Institute sponsored by the ARRL. This advanced session on remote sensing and data gathering will be held July 22nd to the 25 at the Dayton Amateur Radio Association's new classroom facility at their clubhouse in Dayton, Ohio.

There will also be two basic Teachers Institute sessions taking place this summer. One will be held July 8th to the 11th at ARRL Headquarters in Newington, Connecticut. The other from July 15th to the 19th on the West coast at Parallax, Inc in Rocklin, California.

More on all of these sessions is on line at tinyurl.com/2013-arrl-teachers-institute. (ARRL)

**

HAM HAPPENINGS: INTERNATIONAL MUSEUMS WEEKEND REGISTRATION OPEN

The International Museums Weekends special event will take place on the double weekends of June15th and 16th and again on June 22nd and 23rd. Hams world-wide are being encouraged to participate in this event by setting up stations in their local museums in third areas.

The events organizer Harry Bloomfield, M1BYT. He asks that all those intending to take part to register their museum via the web form on the International Museums Weekend website. Its in cyberspace at www.ukradioamateur.co.uk/imw. (GB2RS)

NAMES IN THE NEWS: DAVE PATTON N1NN TO SPEAK AT DAYTON DX DINNER

Some names in the news. The SouthWest Ohio DX Association has announced that Dave Patton, NN1N, will be the featured speaker for its 28th annual DX dinner. This on Friday, May 17th at the Marriott Hotel in Dayton, Ohio.

Dave Patton was first licensed in 1977 as WD9DCL at the age of 12. Always an avid DX'er and contester Patton is a two-time World Radiosport Team Championship competitor has been on world record holding multi-operator teams at 6Y2A and HC8N.

For more information and to order dinner tickets please visit www.swodxaevents.org on the World-Wide-Web (OPDX)

**

NAMES IN THE NEWS: PB33BQ TO CELEBRATE THE CHANGE OF ROYALTY IN THE NETHERLANDS

And in celebration of the Netherlands Queen Beatrix handing over the throne to her eldest son Prince Willem Alexander, Dutch ham radio operator Jaap Van Duin, PA7DA, will take to the airwaves using the special callsign PB33Q between April 20th and May 1st.

The PB33BQ callsign stands for Princess Beatrix 33 years Queen and commemorates the more than three decades since she took over the throne of her mother Queen Juliana. That took place back on April 30th, 1980.

Keep an eye on pa7da.jouwweb.nl/pb33q for more information on this very special celebration. QSL PB33Q only via the bureau. (Various DX News Sources)

**

RADIO HAPPENINGS: NRCDXAS MOVES FROM CASSETTE TO CD DISTRIBUTION

The National Radio Club has announced that its highly acclaimed DX Audio Service has ceased publication on cassette and is now available on CD.

Fred Vobbe, W8HDU, is the Publisher of the DX Audio Service and an anchor here on Amateur Radio Newsline. He notes that the audio magazine which targets blind and visually handicapped individuals has been published on cassette tape since 1985. But says W8HDU, the switch to CD distribution will increase the amount of time to present articles on radio and the radio listening hobby as well as represent an advancement in technology. With the move to CDs the club hopes not to just talk about the quality of a radio receiver, but let the members make their own qualitative judgments. According to Vobbe, the high quality of CD's is what makes this possible.

The DX Audio Service magazine started with volunteers reading the printed version of DX News Magazine to tape. Two decades ago the subject matter was changed slightly from traditional AM DX'ing, to add

general topics on radio listening, technical articles, and features on people in the broadcasting business.

A sample of the MP3 version is located on the World Wide Web at www.nrcdxas.org under the "Publications", then "Download" links. A sample CD for United States and Canadian radio listeners is available for $3.00 from National Radio Club Publications, P.O. Box 473251, Aurora, Colorado, 80047 in the USA. More information is on the web at www.nrcdxas.org. (W8HDU)

**

RADIO IN SPACE: FCC ISSUES GUIDANCE ON OBTAINING LICENSES FOR SMALL SATELLITES

The Federal Communications Commission released a Public Notice to provide guidance concerning FCC licensing of spectrum for use by small satellites, including satellites that fall within the categories of pico-satellites, nano-satellites and cubesats. Amateur Radio Newsline's Bruce Tennant, K6PZW has more:

--

The FCC's rules set forth three different procedures for licensing satellites. The Commission's Part 25 rules are primary for satellite licensing, and are used for regulating a wide range of satellite operations, including commercial communication and remote sensing satellites. The Commission's Part 5 rules cover experimental operations. The Commission's Part 97 rules cover amateur radio service satellite operations.

Currently, many small satellite missions involve experimental operations such as scientific and research missions including those conducted under government contract, and many operate in amateur frequency bands. These satellites are licensed under Parts 5 or 97 of FCC rules. Because of the significant interest in small satellites in the amateur radio and research communities, the primary focus of this new Public Notice is on those operations, although certain guidance in the Notice is also applicable to Part 25 licensing well in advance of a launch.

The FCC notes that the advent of small satellite designs has brought with it dramatically lower launch costs. This is enabling a larger range of organizations to directly launch satellites. Institutions such as universities and research groups that previously found it cost prohibitive to orbit their own satellite can now participate in the exploration of space at relatively reasonable cost. And because of this many of these new participants may be unfamiliar with the spectrum licensing, scheduling and other requirements attendant on satellites. The FCC says that this new Public Notice seeks to alert those planning to orbit a small satellite of these requirements and aid operators in the planning necessary for a successful launch operation.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The full public notice can be found on-line at tinyurl.com/small-sat-guide. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (FCC, AMSAT)

**

RADIO IN SPACE: THE DL4APV WEEKEND MOON CALENDAR

Still with space related matters, E-M-E enthusiasts should take note that DL7APV has posted a 2013 weekend Moon Calendar to the World Wide Web. Titled the Lunar Weekend Calendar the page gives all sorts of information regarding the Moons position on weekends throughout the year along with ham radio events taking place on the same dates. You can access the DL7APV Lunar Weekend Calendar on-line at tinyurl.com/find-the-moon. (N4GIV, VHF Reflector)

**

RADIO IN SPACE: APRIL 432 AND ABOVE EME NEWSLETTER AVAILABLE

Still with moonbounce communications, the April issue of the amateur radio 432 MHz and Above EME Newsletter is now available for download. The newsletter is available in Word, PDF and Text formats the newsletter can be downloaded free of charge at tinyurl.com/april-432-news. (VHF Reflector)

**

ON THE AIR: SPANISH SPECIAL EVENT STATION EH5SIP

On the air. members of the Team Cartagena will commemorate the launch of the submarine Isaac Peral 125 years ago with the special station EH5SIP on the air through March 31st. Operation of this station is on SSB and the digital modes. QSLs will be sent automatically via bureau. (Southgate)

**

ON THE AIR: 8J4G CELEBRATING NATIONAL TREE PLANTING IN JAPAN

And keep an ear open for a special event stations operating from Japan. 8J4G can be heard through May 31st celebrating the 64th National Tree Planting Ceremony in Tottori prefecture on Honshu Island. QSL only via the JA Bureau. (Southgate)

**

DX

In DX, JH1NBN is expected to be active from Bhutan as A52W through March 26th. He is there on business, so his activity will only be

during his spare time. QSL via JH1NBN direct only.

F6BGC will be active as 8Q7NC from the Maldives through March 29th. He plans to operate holiday style on 40 through 6 meters using mostly SSB with some CW and RTTY. QSL via F6BGC, direct or by the bureau and electronically using Logbook of the World.

F5MNW will be active stroke FR from Reunion Island between April 6th and the 29th. Operations will be on the High Frequency bands using only CW. QSL via his home callsign either direct or via the bureau.

Lastly, ZS6AYU will likely be operational as C91GR from Mozambique between May 7th and 11th. We say likely only because the C91GR callsign has been applied for but not yet issued. Either way he plans to be on 40 through 10 meters operating CW only. QSL via his home callsign, either direct or by the Bureau.

**

THAT FINAL ITEM: GPS JAMMERS GROWING PROBLEM ON UK ROADS

And finally this week, word that jamming of the Global Positioning System by drivers on United Kingdom is becoming a growing threat to public safety. Amateur Radio Newsline's Jim Damron, N8TMW, reports:

--

The United Kingdom's Guardian newspaper reports that thousands of people in that nation may be using GPS jamming devices on UK roads. This to be invisible to any form of surveillance while driving.

According to the article there are a lot concerns that use of these devices could lead to the dangers to public safety. This includes overtired bus drivers or others staying on the roads despite the presence of monitoring equipment. More importantly they could also pose major a threat if vehicles equipped with the jammers were to go on in airport areas near aircraft which rely on the global positioning system for navigation.

The Guardian article also notes that the growing use of these devices could torpedo any plans to introduce pay as you drive insurance or road toll systems. This is because a vehicle owner would be able to block communications with monitoring systems.

GPS jammers, which can have a range of several hundred meters, can be bought in the United Kingdom for about £30 or about $45 in U-S currency. While not illegal to purchase and own in the U-K it is against the law to use them.

For the Amateur Radio Newsline, I'm Jim Damron, N8TMW, in Charleston, West Virginia.

--

The full story is on-line at tinyurl.com/uk-gps-jamming (Guardian)

Special Event by Sch Club KKID

Posted: 21 Mar 2013 12:14 PM PDT
http://forums.qrz.com/showthread.php?384549-Special-Event-by-Sch-Club-KKID&goto=newpost

our school club KØKID is having a special event in honor of the Hon.
Clarence Cannon (our community's favorite son who served over 40 years in
the House of Representatives.). The station will be manned by 5th grade
students

date: May 14, 15, 16 (mark your calendar)

hours: 0800 CDST til 1500 CDST / 1300 until 2000 GMT

exchange: name, signal report, state / country, capitol city

certificate: available with SASE

additional notes: our students are going to try for WAS; work all US
zones; work all Canadian zones. students will operate the station as
competing teams, e.g., team Alpha, team Charlie Brown, etc.

info: see KØKID QRZ page; more details to follow or QRZ'd page and look
for an update on this forum.

nvasion!!!!!&goto=newpost

June 13, 2013 - June 20, 2013

Special event station N2J....Operating from the Ocean City NJ boardwalk.
Event is the 1st Annual New Jersey Jeep Assoc. Ocean City NJ Jeep Invasion.
This event is open to the public and other operators are welcome to come
and operate and share the wonderful hobby of amateur radio with all.

All QSL requests should be submitted to W2CCW via direct or bureau. All QSL
request should be accompanied by SASE for state side contacts and SAE and
$2 USD or current IRC. All donations are welcome and will benefit the NJ

Jeep Association http://njjeep.org/.

W2CCW is special event station coordinator and QSL manager for this station.

http://forums.qrz.com/showthread.php?384615-Amateur-Radio-Newsline-Report-1858--March-22-2013&goto=newpost

Amateur Radio Newsline☐ Report 1858 ☐ March 22 2013

Amateur Radio Newsline report number 1858 with a release date of March 22 2013 to follow in 5-4-3-2-1.

The following is a QST. An antenna battle down under pits a ham antenna against a landscape view; a big win in New Jersey as a ham is finally granted approval for his tower and antenna; a Coronal Mass Ejection on the sun hits Earth on St. Patrick☐s Day; the Federal probe of the so-called zombie attack on the United States Emergency Alert System continues and GPS jamming becomes a threat to public safety in the UK. All this and more on Amateur Radio Newsline☐ report number 1858 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: NELSON NZ COUPLE WANT HAMS ANTENNA TAKEN DOWN AND ALL HAM ANTENNAS BANNED DUE TO EMI EXPOSURE

A Nelson, New Zealand couple upset by the installation of a ham radio antenna in the middle of their expansive field of view from have taken their fight to city councilors. They also appear to want a change in local zoning law that would make all ham radio installations in that city subject to exceedingly strict human electromagnetic exposure limits. Amateur Radio Newsline☐s Jim Meachen, ZL2BHF, has the details:

Propagation Forecast Bulletin 12 ARLP012
>From Tad Cook, K7RA
Seattle, WA March 22, 2013
To all radio amateurs

SB PROP ARL ARLP012
ARLP012 Propagation de K7RA

Average daily sunspot numbers over the past week (March 14-20) were up 16.2 points to 101.1, while average daily solar flux remained about the same, rising from 118.5 to 119. An eruption on March 15 caused a CME (Coronal Mass Ejection) which struck Earth on March 17, causing the planetary A index to jump to 46.

The predicted solar flux is 105 on March 22, 100 on March 23-27, 105 on March 28, 100 on March 29-30, 105 on March 31, 110 and 120 on April 1-2, 125 on April 3-6, 120 on April 7-8, 115 on April 9, 110 on April 10-11, then 105, 100, 120, 115 and 110 on April 12-16.

The planetary A index is predicted to be 8 on March 22-23, 5 on March 24-26, 12 on March 27-28, 10 on March 29, 5 on March 30 through April 16, and 8 on April 17.

F.K. Janda, OK1HH of the Czech Propagation Interest Group predicts the geomagnetic field will be quiet to active March 22, quiet to unsettled March 23, quiet March 24, mostly quiet March 25, quiet March 26, active to disturbed March 27-28, quiet to active March 29 and mostly quiet March 30-31.

He continues with quiet April 1-3, mostly quiet April 4, quiet April 5, quiet to unsettled April 6, quiet April 7, quiet to unsettled April 8, quiet April 9, mostly quiet April 10, quiet to unsettled April 11 and active to disturbed April 12.

Last weekend on March 16-18 the planetary A index was 10, 46 and 7. How well did our sources of geomagnetic forecasts foresee this?

>From late January through March 11, NOAA/USAF predicted a planetary A index value of 5 for all three days. This seems to be their default predicted value for low activity. I've never seen them issue a prediction for an A index value below 5, even though since the

first of the year the planetary A index has been below this value on January 1-12, 15, 21-24, 28-31, February 1, 3-6, 9-12, 15, 18, 24-25, 27, March 4-8, 10 and 13.

Their forecast was revised on March 12, when the values changed to 10, 5 and 5. That changed to 12, 5 and 5 on March 13-14, and on March 15, the forecast for March 16-18 was 12, 39 and 20. So two days prior to the event, they predicted 39 for March 17, which is not bad.

What did OK1HH predict for those dates? On February 28 the prediction was quiet to unsettled on March 16, and mostly quiet March 17-18. The March 7 prediction was quiet to unsettled on March 16-17 and quiet March 18. The March 14 prediction was quiet to unsettled March 16-17 and mostly quiet March 18, echoing the prediction from two weeks prior. Of course, the U.S. government source has the advantage of releasing a new prediction every day.

Spaceweather.com issued an alert about the event on Friday, March 15 at 2355 UTC. The message titled "Geomagnetic Storm Warning" said, "A magnetic eruption on the Sun during the early hours of March 15th hurled a coronal mass ejection (CME) directly toward Earth. NOAA forecasters estimate a 70% chance of polar geomagnetic storms when the CME arrives on March 17th."

Jack Kelley, K4WY of Fairfax Station, Virginia had an unusual experience on a seemingly dead band on Sunday. He wrote, "I had some interesting propagation in the wake of the CME last weekend. After checking the bands (160-10) the sole station I found was 5T0JL at S9 on 30 meters - we worked each other easily - and after listening to Jean's following QSOs I found he was working W6s almost exclusively. Again no other signal, anywhere. So how did this occur? The path was assumed to be east-west, and in darkness, but all the W6 QSOs stumped me, particularly after the worst of the CME effects. A similar scenario happened with 6V7S later that same evening as he plowed through the extremely high QRN."

This was Sunday night local time, 0130-0200z Monday. We ran this by Carl Luetzelschwab, K9LA, who indicated that the path through low latitudes was the key to success.

He wrote, "The effects from elevated K indices due to a CME include modification to the worldwide F2 region ionization. Generally the mid and high latitudes see a depletion of electrons, whereas low latitudes aren't affected too much (or even see an enhancement)."

He ran some numbers using the Space Weather Prediction Center STORM model, and said, "In both hemispheres the F2 region ionization was depleted significantly around 0200 UTC on 18 March. But the ionization at low latitudes in both hemispheres fared much better.

"Additionally, was there perhaps some 'spotlight' propagation going on? Could be. The ionosphere is very dynamic, especially under

disturbed conditions."

The day after the big blast, the New York Times ran an interesting article on solar flares and possible effects on the power grid, satellites and communications. Check it out at http://www.nytimes.com/interactive/2013/03/19/science/space/0319-solar.html and don't forget to click on the link, "Related Article," which takes you here: http://www.nytimes.com/2013/03/19/science/space/on-the-watch-for-a-solar-storm.html.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 14 through 20 were 133, 105, 90, 126, 116, 68, and 70, with a mean of 101.1. 10.7 cm flux was 122.8, 123.1, 126, 125.7, 117.6, 110.4, and 107.6, with a mean of 119. Estimated planetary A indices were 5, 6, 10, 46, 7, 5, and 9, with a mean of 12.6. Estimated mid-latitude A indices were 4, 5, 8, 32, 6, 4, and 7, with a mean of 9.4.

Looming Loss of 2300-2302 MHz -- WIA Fights Back!

Posted: 21 Mar 2013 05:00 PM PDT
http://www.eham.net/articles/29906

As advised in February, the Australian Communications and Media Authority (ACMA) proposes to withdraw the 2300 to 2302 MHz segment of the 13 cm Amateur band from July 2015 so that it can be re-allocated for Spectrum Licensing nationally. All Advanced Amateur licensees will be affected. The ACMA has already advised all Advanced licensees by letter and invited comment on the proposal. The driver behind the ACMA's proposed move is to create a tidy 100 MHz-wide band from 2300 to 2400 MHz for the purpose of Spectrum Licensing by auction. It is understood that the likely technology to be deployed under Spectrum Licensing in this proposed band will be that known as Long Term Evolution (LTE). The 13 cm Amateur band has only a secondary service status at 2300 to 2450 MHz. Primary user status goes to the fixed, mobile and radiolocation services. 2400 to 2450 MHz is widely used by Class Licensed Wi-Fi wireless computer networks and radio amateurs have to share the use of this sector of 13 cm, with the inevitable rise in the noise floor and interference issues. The 2300 to 2302 MHz segment has been used for narrowband, weak-signal working and this is reflected in the WIA bandplan for 13 cm. In the face of the ACMA's proposal, the WIA intends to fight back. The WIA is preparing a submission that strongly argues for the retention of a 150 kHz-wide allocation at 2300 MHz on at least a co-primary basis. A 150 kHz-wide "line in the sand", you might say. Some have suggested that the Institute should bargain the loss of 2 MHz in the 13 cm band for more spectrum elsewhere - like the 80 metre DX window, or securing exclusive access to 50 to 52 MHz, for example. However, the WIA Board has adopted the stance that this is no time to "roll over and die" on the 13 cm issue, to use the loss of 2 MHz as a bargaining chip when it comes to issues affecting other bands - or, for that matter - bargaining for a new band elsewhere in the radiofrequency spectrum. Each issue really has to be addressed on its own merits.

//
Power Amplifier 'Heals' Itself After Laser Blasts:

Posted: 21 Mar 2013 05:01 PM PDT
http://www.eham.net/articles/29905

Indestructible electronics are a step closer to reality thanks to engineers at the California Institute of Technology (Caltech), who have developed

what they are calling "self-healing" integrated chips. The team from the High-Speed Integrated Circuits laboratory in Caltech's Division of Engineering and Applied Science repeatedly blasted tiny power amplifiers with a high-power laser, vaporizing many of their components, then watched the chips develop their own work-arounds in less than a second. The chips are so small that 76 of them, including the amplifier and everything needed to heal it, can fit on one penny. The amplifiers developed by the team use on-chip sensors that monitor temperature, current, voltage, and power. These sensors send the information to a custom application-specific integrated circuit (ASIC), which is a central processor on the same chip that functions as the system's "brain." The ASIC evaluates the information it receives from the sensors about the amplifier's performance, decides what adjustments need to be made to the system's actuators, and makes those changes. The unit was designed to get to the optimum state for all actuators in any situation without outside intervention. The benefits of this approach go beyond overcoming severe damage. These amplifiers used about half as much power as those without the self-healing capability, and performance was more predictable and reproducible, according to the team, who formed these conclusions after testing 20 chips. In addition to working around damage to parts of the circuits, the amplifier's self-healing can repair:

ARRL Announces a Campaign for Its Second Century:

Posted: 21 Mar 2013 11:54 AM PDT
http://www.eham.net/articles/29900

As the ARRL draws closer to celebrating its Centennial in 2014, its Board of Directors has launched an unprecedented $10 million fundraising initiative to build the ARRL Endowment and strengthen the organization's financial future. Led by the ARRL Board and an eight-member Second Century Campaign Committee -- headed by David W. Brandenburg, K5RQ -- the campaign has already raised more than $4 million toward this goal. Plans are to reach that goal by the end of ARRL's centennial year in 2014.

SARL NEWS SUNDAY 24 March 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

PAYMENT OF AMATEUR RADIO LICENSE FEES

HAVE YOU BOOKED FOR THE SARL NATIONAL CONVENTION?

INTERNATIONAL MUSEUMS WEEKEND REGISTRATION OPEN

PB33BQ TO CELEBRATE THE CHANGE OF ROYALTY IN THE NETHERLANDS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

PAYMENT OF AMATEUR RADIO LICENSE FEES

ICASA is currently finalising the mailing of invoices for the 2013 licence year. You only need to pay once you receive the invoice. If you decide to pay before receiving the invoice, please ensure that you include your licence number in the payment advice. Failing to do so will result in your payment not being credited to your account.

HAVE YOU BOOKED FOR THE SARL NATIONAL CONVENTION?

Time is running out for the booking of your attendance at the SARL national Convention to be hosted by the West Rand Amateur Radio Club on 26 and 27 April 2013. Don't delay. Get details on www.sarl.org.za.

>From Monday you can download the AGM documents as well as a proxy form. Detail will be posted on the SARL home page.

Book also for the annual dinner on Saturday evening 27 April and listen to a fascinating story from the guest speaker, Dr Antony Turton,

ZS6CST. Your booking includes a free lucky draw for one of many prizes including an IC-V82 two metre hand-held transceiver and two dual band 2m/70cm antennas sponsored by Radio Data Modems and Accessories.

This is also a reminder that the visit to SANSA at Hartbeeshoek earth station is limited to 45 persons. Make your reservation now to avoid disappointment. When booking ensure that you submit your ID number.

Attendance at the AGM is free but you are still requested to complete the registration form and submit it as soon as possible This is required for catering purposes and ensuring that the venue is set up for comfort.

INTERNATIONAL MUSEUMS WEEKEND REGISTRATION OPEN

The International Museums Weekend special event will take place on the double weekends of June 15th and 16th and again on June 22nd and 23rd. Radio amateurs world-wide are being encouraged to participate in this event by setting up stations in the local museums in their areas. The event organizer, Harry Bloomfield, M1BYT, has asked that all those intending to take part to register their museum via the web form on the International Museums Weekend website. It is s in cyberspace at www.ukradioamateur.co.uk/imw.

WORLD AMATEUR RADIO DAY CELEBRATION AT THE NARC

The SARL will celebrate Amateur Radio's century of involvement in disaster communication on World Amateur Radio on 18 April 2013 at the National Amateur Radio Centre. The callsign ZS9DCC - Disaster Communication Century will be operational from the NARC on that day. Special guests and the media will be invited to a briefing starting at 12:00 with presentations about amateur radio's involvement in disaster communication and how amateur radio is supporting sporting and other community events with communication.

Operators are needed for the special event station which will be operational from early morning till the bands close at night. Volunteers are invited to contact SARL's Vice President Geoff Levey, ZS6GRL to schedule their participation. Two radio amateurs are required for each time slot. Email Geoff at contest@sarl.org.za or call him on 082 546 5546.

On April 18, make a contact with ZS9DCC to receive a special commemorative QSL card. Take a day's leave and set up your club station at a public venue and demonstrate amateur radio as a national resource for the country and how radio amateurs support communities with communication when all else fails. It is worth taking a day's leave to support your hobby.

PB33BQ TO CELEBRATE THE CHANGE OF ROYALTY IN THE NETHERLANDS

In celebration of the Netherland's Queen Beatrix handing over the throne to her eldest son Prince Willem Alexander, Dutch radio amateur,

Jaap Van Duin, PA7DA, will take to the airwaves using the special call sign PB33Q between April 20th and May 1st.

The PB33BQ call sign stands for Princess Beatrix 33 years Queen and commemorates the more than three decades since she took over the throne of her mother Queen Juliana. That took place back on April 30th, 1980. Keep an eye on pa7da.jouwweb.nl/pb33q for more information on this very special celebration. QSL PB33Q only via the bureau.

MEMBERSHIP APPLICATIONS

Applications for membership of the SARL have been received from the following radio amateurs: Dr Lennart Nell, ZS6ALL Anton Oosthuizen, ZSL1063 Wynand Cronj, ZSL1064 Willem Pistorius, ZSL1065 Sidney Freedman, ZSL 1066 Jacobus de Kock, ZSL1067 Any objections against the acceptance of the applications must reach the Secretary before or on the Tuesday after this bulletin.

NEXT RAE

The next RAE is approaching and things are moving. Most of the clubs that ran examination centres in the past, have renewed their centre's registration. What are the conditions for registration of an examination centre? The club must be affiliated to the SARL and all invigilators and assistants must be paid-up members of the SARL. Each examination centre should also ensure that there are two registered HF assessors available to do the HF assessment. For the full conditions visit the relevant web page of the SARL (www.sarl.org.za/public/licences/rae_admin.asp).

Candidates must ensure that they read the forms and carefully execute each instruction, especially those concerning the three preferred call signs. The closing date for entries is 11 April 2013 and the HF assessment form may be submitted together with the exam answer paper.

Candidates that pass the RAE gets free (complimentary) membership of the SARL until the end of June 2014.

CONTEST NEWS

Results of the SARL Digital Contest held on the 24th February 2013.

8 logs were received which included 1 DX log from VU2UR. According to the logs there were 32 stations active.

1st - Jaco le Roux, ZS6PX - 630 points 2nd - ZS2CR, Colette Rundle, - 528 points 3rd - ZS2J, Derek Stuart, - 450 points

Congratulations to the winners and thanks to all who submitted their logs.

Results of the Hamnet Emergency Contest held on the 3rd March 2013:

Category A, Single Operator Stationary Mobile.

ZS5J, John Kramer 1 890 points ZS6ADY, Andy Cairns 1332 points

Category B Single Operator Portable.

ZR6LJK, Christo Kriek 1 449 points ZS2U, Al Akers 1 098 points ZS6WBT, Wilhelm Taljaard 480 points ZS6BNE, Eddie Leighton 72 points

Category C Multi Operator Portable.

ZS5HAC, Hibiscus Coast Amateur Club 1 500 points

Category D Single Operator Base Station.

ZS5PO, Jo Snyders 2 352 points ZS6RHL, Hendrik Rudman 1 995 points ZS4DZ, Johannes van Zijl 1 764 points ZR6NGB, Nigel Burgess 1 204 points ZU6FR, Fran&#xFFFD;ois Reyneke 1 185 points ZS2DK, Mitch Rundle 1 104 points ZS2J, Derek Stuart 1 026 points ZS6APT, Pam Momberg 980 points ZS6YE, Heather Holland 222 points ZS5R, Gawie Hoon 72 points

Congratulations to the winners in each competition and thanks to all who participated and sent in logs.

CLUB NEWS

A Special General Meeting of the East Rand Amateur Radio Club will be held for all paid-up members on Saturday 6 April 2013 at 15:00 at the clubhouse at Ebenezer Street, Arrowe Park in Benoni. A bring and braai will commence afterwards. All paid-up members must try to be there as this is a very important meeting and we wish everybody to be there.

This was from Elize Findt, ZS6ECF, Secretary, East Rand Branch of the SARL; contact details: Tel: 073 490 6642 / 082 378 3062 Fax: 086 653 3990 e-mail: zs6erb@gmail.com url: www.zs6erb.co.za

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low levels. There remains a chance for M-class Solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 45.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

20 to 26 March - Voortrekker camp station ZS6VTS on the air. 30 March - West Rand Amateur Radio Club flea market starting 12:00. For more information contact Phillip, ZS6PVT, at 083 267 3835 or Geoff, ZS6GRL, at 082 546 5546. 18 April - World Amateur radio day and ZS9DCC on the air. Operators required, Email Geoff to contest@sarl.org.za or call him

on 082 546 5546. April 20-May 1 - Commemorative station PB33BQ on the air, see pa7da.jouwweb.nl/pb33q for more information. 26- 27 April - SARL National Convention, register now, get details on www.sarl.org.za. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Ofcom Clarifies 472 kHz and 5 MHz NoVs:

Posted: 22 Mar 2013 05:05 PM PDT
http://www.eham.net/articles/29919

Clarifications have been added to the 472 kHz and 5 MHz NoV page on the Ofcom website. The main change is to state that only holders of a Full Amateur Licence may operate in these bands, so this includes Individual, Club and Reciprocal licences. Ofcom have also added some further clarification with regard to operating in the 5MHz band, in particular that the NoV to operate in the 5MHz band only applies in the United Kingdom, Isle of Man, Guernsey and Jersey, and that the band may not be used mobile or maritime mobile.

NZART Headquarters Infoline Special Issue 38s

24 March 2013

NZART Website: www.nzart.org.nz

In this issue:

· Resource Management Act Reforms

· Further submissions in support of NZART submission to Marlborough District council.

Debby has handed the preparation of this special edition to Mike Newman, our NZART Local Government Liaison Officer.

Resource management reform 2013: have your say

· As part of phase two of the resource management reforms, the Government has released a discussion document which sets out its proposals on improving New Zealand's resource management system and would like to hear your views.

· The Government, through the Ministry for the Environment (MfE) is planning to develop legislation this year to deliver these improvements. Public submissions are welcomed.

· The government is wanting these reforms to achieve greater national consistency and guidance

· Detailed information about the proposals is contained in the discussion document:

Improving our Resource Management System.

One of the most serious problems we as amateur radio operators face is the restrictions to antenna installations which are imposed by district planning rules.

Some councils are relatively liberal, others are becoming increasingly restrictive, such as Hamilton City Council which is proposing that all installations, even the most modest, are classified as limited discretionary consents. Think $$$. You can't afford to go through the process required for a limited discretionary resource consent.

We need to express our concerns, through submissions from NZART, from its Branches, and individually, through personal submissions.

What should you write in your submission.

Tell the government that:

a.. amateur radio antennas, aerials and their supporting structures such as masts and poles are becoming increasing restricted through egregious rules contained in District plans.
b.. the costs of the limited discretionary and discretionary consent processes are excessive and beyond the means of many amateurs wanting to establish antenna supports for effective antennas, and there is no guarantee of any satisfactory outcome if the process is followed.
c.. the permitted use heights in most district plans are inadequate for effective antennas required for effective radiocommunications used by the amateur radio service.
d.. Council's are having to face huge and unnecessary costs in defending appeals against district plans, using funds which could be much better used for other purposes, especially in the smaller rural districts.
e.. the only way to resolve the difficulties facing amateur radio operators is for there to be an agreed national policy, setting out conditions acceptable to amateur operators, and ensuring a reasonable accommodation of their needs.
f.. there should not need to be over sixty different district plans in New Zealand, and there should be a high measure of uniformity between plans on the rules imposed on amateur radio installations.
g.. the problems facing amateur radio operators are nation-wide, and the effects on operation are nation-wide, and therefore are best addressed through a national policy.
h.. anything else that you think be included in your submission which should be considered.
Expand on any issues as you see fit.

Begin your submission with the words:

Improving our resource management system

How to make a submission

There are three ways you can make a submission:

1. Use the online submission tool available at www.consultation.mfe.govt.nz

2. Download the submission form (RTF, 1.5 MB) to complete and return to MfE.

3. Prepare your submission in a separate document and send it to MfE.

Ensure you provide the following information with your submission:

· Contact information:

· Name of submitter/organisation

· Address

· Telephone

· Email

· Your submission, with reasons for your views

· Any further information you wish the Minister for the Environment to consider.

The Ministry asks that electronic submissions be submitted as a PDF, Microsoft Word document (2003 or later version), or other compatible format.

If you are unable to use the online submission tool you can email or post your submission to:

Email: rmreform@mfe.govt.nz

Post: RM Reform, PO Box 10362, Wellington 6143

The closing time and date for submissions is 5.00pm 2 April 2013.

It is vital to the future of amateur radio that you respond to the call for submissions. Opportunities like we now have to tell the Government what we think don't arise very often. So make the most of this opportunity and PLEASE make a submission. The closing date is on the first Tuesday of April, the day after Easter Monday.

==========

Further submissions in support of NZART submission to Marlborough

District council.

Marlborough District Council has notified two plan changes to remove amateur radio antennas from the utilities section of the plan without replacing the deleted rules with any alternative rules allowing amateur radio antenna installations.

The proposed plan changes fails to recognise the needs of the amateur radio service in respect of antennas, aerials and their supporting structures, poles and masts. The change will relegate amateur radio configurations to consideration under inappropriate rules relating to buildings.

This needs to be redressed, and NZART has lodged a submission in opposition to the proposed change, and seeking that the Council:

….. amends the proposed Marlborough District Plans to remove the unduly severe restrictions on the amateur radio service which would be a consequence of the proposed Plan Changes, and that the Council include rules which are more accommodating to the amateur radio service, so providing for more effective long distance communications than the proposed plan allows.

Such Rules must:-

a.. provide Permitted Use supporting structure heights to at least 20 metres in the residential zones, and to at least 25 metres in the Rural zone,
b.. allow surmounted whip and discone antennas above the mast heights,
c.. allow minimal setback on internal site boundaries, and no greater than

3 metres on road boundaries
d.. allow penetrations of the daylight control recession planes
New rules must be devised in consultation with the amateur radio service, and in particular with the New Zealand Association of Radio Transmitters (Inc) and the Marlborough Amateur Radio Society (Inc).....

Support of all members is requested

You can support NZART by making a further submission. See the form attached to this infoline which you can copy and complete with your details, and either email or mail to Marlborough DC.

You should enter your full name, and complete your signature (not required for email forwarding), date, address and contact details

To make this easy for you, I have prepared a form which you can complete and forward to Marlborough District Council.

Further submissions on the plan changes close at 5:00 pm next Thursday 28 March

==========

Form 6 Further submission in support of, or in opposition to, submission on publicly notified proposed policy statement or plan, change or variation

Clause 8 of Schedule 1, Resource Management Act 1991

To Marlborough District Council
Email to PC61@marlborough.govt.nz by 5.00pm on Thursday, 28 March 2013

Copy to zl1bnb@nzart.org.nz

1.Full name of person making further submission:

2. This is a further submission in support of a submission on Proposed Plan Changes 61 and 26 to the Wairau/Awatere and the Marlborough Sounds Resource Management Plans.

3. I am a person who has an interest in the proposal that is greater than the interest the general public has. My grounds for saying that are that the proposed changes will limit my ability to communicate with amateur radio operators within Marlborough District. Without adequate antenna height, radiocommunications are limited in effectiveness. Removing the private services from the district plan rules without appropriate alternative provision for such services is an unacceptable limitation to those services, particularly to the amateur radio services

4. I support the submission of: New Zealand Association of Radio Transmitters (Inc)

5. The particular parts of the submission I support are: The entire submission

6. The reasons for my support are: The Council has failed to make any alternative rules in the plan to redress the removal of private radio services and in particular the amateur radio services from the existing plans. Amateur radio antennas aerials and their supporting structures should be permitted uses as sought in the NZART submission.

7. I seek that the whole of the submission be allowed, and that the relief sought by NZART(Inc) be granted.

8. I wish (or do not wish) to be heard in support of my further submission. (delete as appropriate)

9. If others make a similar submission, I will consider presenting a joint case with them at a hearing:

DX Bulletin No. 1105
BID: $OPDX.1105
March 25, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, K3LP, KR3E, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, WA4DAN,KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 9M6DXX, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, ON4EI, Pete's DX-Newsdesk, PA3CNO, PY3DF, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-March, through Sunday, 24th-Mar there were 234 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2014 ANTARCTICA AND SOUTH AMERICAN TOUR. David, K3LP, has announced on his Web page that he will be operating from the Antarctica; Port Stanley, Falkland Islands; Chile, Argentina and Uruguay between February 2-16th,

2014. He informs OPDX that this is a family vacation and plans to operate a few hours at each location (listed below) along the way. He plans to take a vertical antenna and IC-7000 on the trip. The tentative schedule and callsigns are as follows:
February 2-16th - Buenos Aires, Argentina; callsign LU/K3LP
February 6th - Ushualia, Argentina; callsign LU/K3LP
February 7th - Cape Horn, Chile; callsign CE/K3LP
February 8th - Schollart Channel, Antarctica; callsign ??/K3LP
February 8th - Paradise Bay, Antarctica; callsign ??/K3LP
February 8th - Gerlache Straight; callsign K3LP/MM
February 9th - Elephant Island, Antarctica; callsign ??/K3LP
February 11th - Port Stanley, Falkland Islands; callsign VP8/K3LP
February 13th - Puerto Madryn, Argentina; callsign LU/K3LP
February 15th - Montevideo, Uruguay; callsign CX/K3LP
QSL via his home callsign.

3B7C BOOK. During the middle of April, Pete, SM5GMZ, will releases another photo book (approx. 90 page) about the 2007 Saint Brandon DXpedition. Pete was one of the 20 operators who together managed to work 137,500 QSOs during an absolute sunspot minimum. The book consists of a large number of images, all in full color. In texts, Pete describes how it is to be on an uninhabited atoll in the middle of the southern Indian Ocean where nothing but amateur radio and satellite phones work. He also tries to explain the joy of endless multi-layer pile-ups and describes the enormous planning that comes with a DXpedition of this magnitude. For more info and details on how to order the book, see: http://www.3b7cbook.com

7T50/7T9, ALGERIA (Just Reminder). Members of the Algerian Radio Amateurs (ARA) will activate special event callsigns 7T9A (until March 30th, from Palais des Rais [Bastion 23] in Algier City; WCA 7X-00012) and 7T50ARA (until May 30th) to celebrate the 50th anniversary of the Algerian Amateur Radio Association. Activity will be on all bands and modes. QSL both callsigns by the Bureau or direct (NO IRCs) to: PO Box 1, Algiers RP 16000, Algeria.

A3, TONGA (Reminder). Jacek, SP5EAQ, will be active as A3EAQ from Tongatapu Island (OC-049) between March 26th and April 16th. Activity will be on 80-10 meters SSB only. QSL via SP5EAQ, direct or by the Bureau. For more details and updates, watch: http://sp5drh.com/a3eaq

C6, BAHAMAS. Chuck, KG9N, will be active as KG9N/C6A from Grand Bahama (NA-080) between March 28th and April 4th. Activity will include the CQWW WPX SSB Contest. QSL via LoTW (preferred), direct or by the Bureau.

CY0, SABLE ISLAND. Operators Gary/VE1RGB and Murray/WA4DAN are pleased to announce a DXpedition to Sable Island between October 1-11th, 2013. Approvals are in hand from Parks Canada and the Canadian Coast Guard. They have chartered with Maritime Air Charter LTD to provide the Britten Norman Islander aircraft for landing on the beach. The callsign CY0P has been issued for the October DXpedition. The CY0P(Parks) callsign was chosen in recognition of the newest National Park in Canada. VE1RGB is a veteran of two previous CY0 DXpeditions and is a top CW contester.

WA4DAN has coordinated two previous CY0 DXpeditions, including the October 2012 DXpedition that was cut short due to Hurricane Sandy. An all bands 160-10 meters, CW/SSB/RTTY operation is planned. Look for more details to follow in the coming months.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
9X0ZM • Rwanda; 2013 operation

E5, SOUTH COOK ISLANDS. Bruce, ZL1AAO, will once again be active as E51AAO from Rarotonga Island (OC-013) between May 3-17th. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100 watts to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

E5, SOUTH COOK ISLANDS. Tony, ZL2AGY, will once again be active as E51AGY from Rarotonga Island (OC-013) starting May 7th for about 24 days. He states, "This will be a CW only operation running my K3 barefoot, and may include some form of activity in the WPX CW Contest during the last weekend of May..... I hope to be reasonably active, but the food, the weather, the sea, the people, are all very pleasant in Raro, so I might have other things to occupy my time as well!" QSL via his home callsign, direct (preferred - see details on QRZ.com).

EI, IRELAND. Olivier, ON4EI, will once again be active as EI8GQB and EI1A between March 23rd and April 3rd. He plans to operate from his caravan using green energy. Olivier will activate EI1A callsign during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band/Low-Power entry. His objective is to run the 48 hour contest with green energy only and score among the "TOP 10" European stations. You can follow his activities and antenna experimentation on: http://www.qrz.com/db/EI8GQB
This is a very interesting QRZ.com page. There you will find a live information banner with on air frequencies and information. His equipment will consist of:
18m top loaded vertical monopole for 160-80m-40m bands + 32 radials.
3 elements East-West directional inverted V beam for 40m band.
200m long beverage RX antenna East-West directional.
2 Spiderbeam antennas for 20/15/10m bands.
Rigs are Elecraft K3+P3 & Kenwood TS2000 100W.
500Ah battery bank + 180W solar panel and 400W wind generator.
Also, live video streaming will be provided on:
http://www.ustream.tv/channel/ei8gqb
QSL via PA3249, direct or by the Bureau.

FOC EVENT (And Award). To commemorate their 75th anniversary in May, the FOC (First Class CW Operators' Club) is holding a month-long on-air event featuring more than 20 special •FOC• suffix calls. These will include GB75FOC, a special anniversary callsign for their club station. (GP4FOC will be used when operating from Guernsey, GS4FOC from Scotland and GT4FOC from Isle of Man). There will be many other FOC callsigns

from the USA and VE and from more exotic locations such as VQ9, HZ1 and 5T. Stations will gain points for contacting any FOC member and a beautiful certificate will be presented to stations who reach certain point levels. Complete details are available on the FOC Web page at: http://www.g4foc.org/Default.aspx?pageId37887

FR, REUNION ISLAND. Cyril, FR4NT, will be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Low-Power entry. QSL via FR4NT direct (NO IRCs).

GB0, ENGLAND (CASHOTA Monument Ops). Look for John, M0JFE, of the Fleetwood Radio Enthusiast Group, (along with the help of others) to activate some CASHOTA monuments during the month of April. He has obtained the special callsign GB0FRG. His tentative schedule is as follows:
April 2nd - The Mount Pavilion & Tour of the Clock Workings; Reference numbers: LR SD333481, WAB SD34 and QRA IO83LW
April 9th - I.O.M Ferry Berth (Location where the Anchors of the Titanic where transferred from Train to Ship to be shipped to Belfast); Reference numbers: LR SD340483, WAB SD34 and QRA IO83LW
April 16th - War memorial in Memorial Park Fleetwood; Reference numbers: LR SD328474, WAB SD34 and QRA IO83LW

April 23rd - Activation Jubilee Towers Quernmore just outside of Lancaster; Reference numbers: LR SD542573, WAB SD55 and QRA IO84PA
Activity will be on 80-10 meters and 2m & 70cm; propagation dependant. Stations that work ALL 4 activations and E-mail in their log to <gb0frg@hotmail.com> will be E-mailed a special certificate from their club. The club's Web site is: http://www.fleetwoodradiogroup.moonfruit.com/#

GJ, JERSEY (Update/Callsign Change). Richrad, M5RIC, will be active as GJ2A (not MJ2Z) for the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All Band/High Power entry. QSL via M5RIC. He will sign MJ5RIC for any activity outside the contest.

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103/1104). Operators Ralph, 5W0W/H44RK, Dom/SQ9KWW, Tom/WL7HP and Maggie/H44MK (the only local YL Ham from Sikiana) will be active as H44IOTA during their upcoming IOTA tour which will start during the first week of June. Preliminary dates have now been announced for each island, but may vary due to the nature of the tour. Here is their announced schedule:
June 1-4th - New Georgia Island (OC-149)
June 6-8th - Russell Islands (OC-168)
June 10-13th - Florida Islands (OC-158)
June 17-24th - Stewart Island (OC-285) **
July 1-7th - Nendo Island (OC-100)
July 9-12th - Vanikolo/Utupua (OC-163)
July 14-16th - Reef Islands (OC-065)

** Of special interest to IOTA chasers is Stewart Island (OC-285)
having NEVER been activated.

Activity will be on 80-10 meters using CW and SSB. See OPDX.1104
for frequencies. All QSL requests are via QSL Manager Rex Turvin, NR6M.
For updates, it is suggested to watch: http://www.qrz.com/db/H40RK
The group now has a Web, Twitter and FaceBook page at:
http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

HB0, LIECHTENSTEIN. A group of Dutch radio amateurs will be operating
from Liechtenstein between April 13-20th, as HB0/homecall. Activity will
be on 160-10 meters using CW, SSB and PSK31. During this week, a couple
of SOTAs will be activated as well. Operators mentioned are Mans/PA2HGJ,
Hugo/PA2HW, Robert/PA2RDK, Frank/PA3CNO, Paul/PA3DFR, Henny/PA3HK, Gert/
PE0MGB and Piet/PE1FLO. QSL via PE1FLO.

IOTA NEWS.............
AS-125. Tana, E27EK, will be active as E27EK/p from Chang Island,
Thailand, between March 26-27th. Activity will be on all HF
bands. QSL via his home callsign direct. Please NO eQSLs.

EU-028. Members of the Valle Brembana DX and Contest (VBDXC) Team will
be active as IA5A from Giglio between April 29th and May 4th.
Operators mentioned are Ezio/IK2AHB, Diego/IW2MZX, Alessandro/
IW5ELA, Andrea/IZ2AJE and Fabio/IZ2GMT. QSL via IK2AHB, direct
or by the Bureau.

EU-125. Rico, DO6EBB, will once again be active as OZ/DO6EBB from
Fano Island (DIA NS-002, WWFF OZFF-004) between June 22nd
July 7th. Activity will be holiday style on 160-2 meters
using SSB and some Digital modes. QSL via his home callsign,
direct or eQSL.

EU-158. Markus, DJ4EL, will be active as SV8/DJ4EL from both Proti
(March 25-26th) and Sapientza Islands (March 28-29th). This
is a rare IOTA. Activity will be on 15 meters only using
battery power and a simple Quad antenna. Markus hopes to
make 1000 or more contacts. QSL via LoTW, by the Bureau or
direct.

NA-041. David, K0DCH, will be active as K0DCH/KL7 from Mitkof Island
(USI AK155S, WLOTA 2115) between July 12-16th. Activity will
be on or near the usual island and IOTA frequencies. QSL via
his home callsign direct only.

IOTA TOUR (Philippines). Dindo, DV1UD, finally received permission (after
trying for several months) to land on and activate three of the 'most
wanted' Islands in the DU area. Dindo will visit Bongao Island (OC-174),
Tawi-Tawi Island (OC-174) and Taganak Island (OC-225). This is to complete
some survey and research as part of his work requirements. His tentative
schedule is for the first week of April. Hopefully this will allow him to
stay on each island for 2-3 days. He will grab this opportunity to activate

these rare IOTA's between his work commitments. On Friday he announced that his equipment will be an Icom IC-7000, AH-4 Tuner and 100w into a Loop Antenna. Tentative departure from Manila is April 2nd, and he expects to be in Bongao, Tawi Tawi, by April 4th or 5th, via Zamboanga City. His callsign will be DX8DX, and activity will be on CW and SSB. QSL via M0OXO OQRS. For more details, visit his Blog page at: http://www.m0oxo.com/dx8dx.html

IU, ITALY (Attention Prefix Hunters). The Ministry of the Economy of the Italian Republic announced that it used up the prefix IZ and will now use the new prefix is IU.

J3, GRENADA (Update to OPDX.1104). Operators Tom/OE2ATN and Franz/OE2SNL will be on a suitcase DXpedition to Grenada Island (NA-024, WLOTA 0718) between October 28th and November 10th. The callsign has not been issued yet. Operations will be on CW, SSB and RTTY with 100-200 watts. Their Web page is now available at: http://j3.oe2atn.at

KH8, AMERICAN SAMOA (Update/Operator Needed). Bill, N6MW, will make one last try to activate American Samoa as KH8/N6MW from a hotel in Tutuila between November 11-21st. The focus will be on "Maximum number of different stations contacted; CW, some SSB and RTTY if/when things slow down; EU when possible on higher bands; and Significant 160m effort." The location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible. The DX-pedition's Web page states, "Total of 3 operators planned, 2 of the slots available." For more details and updates, visit: http://n6mw.jimdo.com

LX, LUXEMBOURG. Matthias, DJ8OG, will be active as LX7I during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

OX, GREENLAND. An international group of YLs will once again activate amateur radio from Kangerlussuaq between August 16-20th. Operators mentioned are Unni/LA6RHA, Mio/JR3MVF, Chae/HL1KDW, Kay/WA0WOF and

Solveig/SM6KAT. The last YL expedition was in 2010 and was very successful. For more information, visit their Web site at: http://home.online.no/~la6rha/greenland2013.htm

PA150, NETHERLANDS (Special Event). Fred, PA0FAW, will be active as PA150BA between April 1-28th. Activity is to celebrate the 150th anniversary of Bronbeek, a former Royal palace in Arnhem that is now a museum and a home for elderly soldiers and disabled KNIL (The Royal Netherlands East Indies Army) soldiers. The inhabitants took their collections of 'souvenirs' with them. This turned into a museum about the Dutch East Indies. Operations will be mainly CW, with some Digital and SSB. This operation will have a World Flora Fauna (WFF) reference number of WFF-PA-005. Fred is a member of the ISWL and Euro PSK club. QSL via PA0FAW, by the Bureau, eQSL and direct, but no LoTW. SWL reports are welcome direct, no need for return postage.

QSL INFO AND NEWS.....
QSL-INFO from DB0SDX (Not Available This Week)

-
(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

PY0SJ 1982 LOTW. Cesar, PY2YP, reports that he typed the log into LoTW and it is now working on the PY0ZSC operation which is three times larger. The Rocks web page <www.py2yp.com/spsprocks> shows several logs and cards. Stay tuned.

TX5K OQRS. The TX5K OQRS is now operational online at: https://secure.clublog.org/charts/?c&#65533;5K#

UT1FG/MM QSL STATUS. John, K8YSE, reports, "Eugene, UX0FY, advises that he has not received logs for UT1FG/MM after November 2012. He hopes to have the December 2012 thru March 2013 logs in a few weeks. Then he will be answering all QSL requests that he has received so far. He asks everyone to be patient."

QSL RECEIVED VIA LoTW: 4Z5MU, 8P5A, 9K2F, 9M4SLL, BU2AW, DH6BH, EA7TG, EI3GG, H40T, H44G, KH2L, KP2MM, MI0BPB, OS8A, PY0SJ, PY5ZD, RI1ANF, RU0FM, RX6BH, RZ6BS, SV5FRD, T2GM, T88TF, VK3HJ, VP9I, XR0YG, XT2AA, XT2TT, ZF2AM and ZF2UL

SILENT KEY (DXer's Have Lost Another Legend). It is with great sorrow to report that DXers have lost a great friend and well-known DXer. Luis, XE1L,

became a Silent Key, shortly after returning to San Diego from the recent TX5K Clipperton Island DXpedition. Reports indicate that Luis was stricken with a major heart attack and passed away within minutes. An ARRL Life Member, Luis held Top of Honor Roll (Phone and Mixed), with all 340 current entities confirmed. He also held DXCC for Mixed, Phone, CW and RTTY, as well as 5-Band DXCC, and had a total of 354 entities, including deleted. World-Wide DXers will miss him greatly on the air. Here are just a few places, major DXpeditions and contests that Luis has operated:
Major DXpeditions:
3Y0PI, 9M0M, 9N7MD, S07L, TZ6RM, XF4L, XR0Y, XR0Z and XZ0A

Contests Callsigns:
4A7L, 4A9LCH, 6D1LCH, 6D7LCH, 6H1L, 6J1L, W4/XE1L (Various IOTA), W4T (Dry Tortugas), XF0L, XF5L, XF6L and YW5L.

Other Entities Callsigns:
4K/XE1L, 4U/XE1L/ITU, 4U/XE1L/NY, 4U/XE1L/YK, 4X/XE1L, 6Y5/XE1L, 8P9/XE1L, 9N7MD, C6A/XE1L, CE0/XE1L, CE3/XE1L, FM5/XE1L, FS5/XE1L, J6/XE1L, KH7/XE1L, KP4/XE1L, P4/XE1L, PJ2/XE1L, TG9/XE1L, TZ6L, VE7/XE1L, VP8CPJ, W/XE1L, W4/XE1L, XE0LCH, XE1LCH, XE1L, XE1L/XF2, XE1L/XF3, XF3/XE1L, XZ1L, YV5/XE1L and ZD8/XE1L.

OPDX and it readers would like to send out our deepest smypathy to the family and friends of XE1L. A "Condolences Book" has been setup on the Radio Club Sat�lite's (XE1RCS) Web page at: http://www.xe1rcs.org.mx/xe1l
To read more about Luis, XE1L, visit the ARRL Web page at:
http://www.arrl.org/news/view/noted-contester-and-dxer-luis-chartarifsky-xe1l-sk

SOUTHEAST ASIAN TOUR. The "425 DX News" reports that Alan, G0RCI, will be in Singapore (9V) and hopefully Malaysia (9M2) between April 1-12th. He plans to operate as 9V1/G0RCI and 9M2/G0RCI "as much as the XYL allows". QSL via his home callsign direct.

T2, TUVALU (Update). Tim, NL8F, is now active as T2TT from Tuvalu until April 2nd. Activity will be mostly SSB. QSL via K8NA.

V6, MICRONESIA. Operators Takio/JH3QFL and Keizo/JH3AZC will be active as V6H and V6S, respectively, from the South Park Hotel in Pohnpei between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB, RTTY and JT65. QSL via their home callsign.

VP9, BERMUDA. Kei, KG2A/JJ1RJR, will be active as KG2A/VP9 from Bermuda (NA-005) between March 29th and April 1st. Activity will be on the HF bands using CW and SSB. His operations will include the CQWW WPX SSB Contest (March 30-31st). QSL via KG2A direct.

XP, GREENLAND. Henning, OU2I/OZ1BII, will once again be active as XP2I from Kangerlussuaq between May 23-27th. Activity will be CW only. He will also be in the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via OZ1BII (see www.oz1bii.dk/qsl-info.htm).

XW8, LAOS. Steve, 9M6DXX, will be operating holiday style as XW8XZ from
near Vientiane, Laos, between March 30th and April 3rd. Activity will
be SSB only, using 100 watts (the maximum power permitted by the licence)
to a Butternut HF6V-X antenna with 12/17m kit. QSL via M0URX, by OQRS
(see <www.m0urx.com/oqrs>), direct, or by the Bureau. Logs will be uploaded
to LoTW as quickly as possible after the operation.

Nominations Sought for 2013 Amateur Radio Newsline® ®Young Ham Of The Year Award®

The nominating period for 2013 Amateur Radio Newsline® "Young Ham of the Year Award" is now open. Originally known as the "Westlink Report Young Ham of the Year," this award program, now in its third decade, is presented annually to a United States or Canadian licensed Radio Amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in communications through the Amateur Radio hobby/service. (Please see application form for details.)

ELIGIBILITY

The award is open to any licensed amateur radio operator residing in the 50 states that comprise the United States plus U.S. territories and 10 Canadian provinces. Nominees must hold a currently valid Amateur Radio License issued by the FCC (United States) or Industry Canada (Canada) and meet the 18 year or younger age qualification.

OBTAINING NOMINATING FORMS

Applications forms are available for a self addressed stamped envelope mailed to the 2013 Young Ham of the Year Award % Newsline, 28197 Robin Avenue Santa Clarita California 91350. These nominating applications are also available for electronic download in .PDF format from our website at <http://www.arnewsline.org/YHOTY>.

NOMINATION CUTOFF DATE

All nominations must be submitted before midnight your local time on May 30, 2013 on an official nominating form and accompanied by verification materials for declarations noted within the nomination.

NOMINATION FILING

Paper nominations should be sent by regular mail only to The Amateur Radio Newsline, Inc., Att: YHOTY 2013, 28197 Robin Avenue, Saugus CA, 91350. (Note: Please do not send in any mail that requires a recipient signature as there is nobody here to provide this.)

Electronic nominations scanned as .JPG files should be e-mailed to newsline(at)arnewsline(dot)org.

PRESENTATION IN 2013

With continued corporate sponsorship, the 2013 Amateur Radio Newsline Young Ham of the Year Award presentation will take place in August at the 2013 Huntsville Hamfest. The Huntsville Hamfest is one of the nation®s largest and most popular Amateur Radio conventions. It is held

annually the third weekend in August at the Von Braun Civic Center in downtown Huntsville Alabama and usually attracts upward of 5000+ attendees.

AWARD BACKGROUND

The Amateur Radio Newsline® ®Young Ham of the Year Award® program was conceived in 1985 by then Westlink Report "Editor-in Chief" Bill Pasternak, WA6ITF. His desire then and now is to highlight the accomplishments of the nation's many young radio hobbyists, and to encourage the entry of more young people into the exciting and rewarding hobby of Amateur Radio.

With the absorption in 1995 of the Westlink Report readership base into Worldradio Magazine, the awards originator has decided to continue it under the banner of his own "Amateur Radio Newsline®" organization. It is his belief that this real-life experience may lead the award winners and many other young hams into technology based careers that will make them the scientific leaders of the future.

ABOUT THE AWARD SPONSORS

The Amateur Radio Newsline, Inc., better known as "Newsline" is the world®s largest not for profit (501(c)(3) and totally independent ham radio broadcast news and data information service. It was organized in 1976 by Jim Hendershot WA6VQP and Bill Pasternak WA6ITF. Since that time it has produced and put to air over 1850 consecutive weeks (35+ years) of free news bulletin programming dealing with Amateur Radio and related personal communications issues.

Primary corporate underwriting since the inception of the "Young Ham of the Year Award" in program in 1986 is from Yaesu U.S.A. Corporation. Yaesu is a world leader in the design, manufacture and distribution of Yaesu brand high quality Amateur Radio equipment. See: www.yaesu.com

As of 1995, CQ Communications Inc. has been an additional corporate underwriter. CQ Magazine and its sister publications CQ-VHF, Popular Communications and Worldradio OnLine are owned by CQ Communications and are considered the trend-setting magazines serving today's modern radio amateur radio community. See: www.cq-amateur-radio.com

In 2008 Heil Sound Ltd.; an innovative manufacturer of microphones and accessories for the amateur, professional sound and broadcast industries joined as the latest corporate underwriter. See: www.heilsound.com

1999 - Michelle Swann, KE4EZI
2000 - Christopher Arthur, KT4XA
2001 - Patrick Clark, KC8BFD
2002 - Josh P Abramowicz, KB3GWY
2003 - Jay Thompson, W6JAY
2004 - Andrea L Hartlage, KG4IUM
2005 - Rebekah A Dorff, WG4Y
2007 - Grant H. Morine, W4GHM
2008 - Emily Stewart, KC0PTL
2009 - Andrew Koenig, KE5GDB
2010 - Cody Anderson, KI4FUV
2011 - Kaitlyn Cole, KS3P
2012 - Erin King, AK4JG

ABOUT AMATEUR RADIO

The world-wide Amateur Radio service is force of more than 2.5 million
publicly spirited personal radio operators who are licensed and regulated
by their respective administrations. They are available as a voluntary
group of skilled public service-oriented individuals with their own radio
equipment who are available to provide emergency communications in times
of disaster. They also provide a pool of trained radio operators and
technicians to assist in improving international relations.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 24th March 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

EI13CLAN

EI13CLAN will be QRV from the shack of EI4GXB for the CQ WPX contest next weekend. Operators include a group of young op's, and a visiting operator from Lithuania.

Youngsters On The Air

During the summer of 2013, a youth radio camp "Youngsters On The Air" will be held near Tartu, Estonia from 5-12 August. There will be 10 teams participating from different European member associations of IARU R1. The camp is organised by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European countries will be participating in different activities: presentations, Contests, visiting radio stations, observatory, etc. Young operators or SWL's aged between 14-25, are being sought to represent Ireland, and should contact Ger McNamara, IRTS Youth Co-ordinator on 087 2532512 or by email to ei4gxb /at/ gmail.com

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

South Eastern Amateur Radio Group

The next monthly meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road,

Waterford on Monday the 25th March at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp. New members are very welcome. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

South Dublin Radio Club

This years South Dublin Radio Club AGM will take place on Tuesday 26th of March. All members are asked to attend.

Cork Radio Club

The March meeting of Cork Radio Club will be held on Tuesday next March 26th at the Community Centre in Carrigtwohill. Dave Deane EI9FBB will give an illustrated talk on his recent trip to Uganda as part of the 5X8C DXpedition team. Plans for the trip to Brow Head, near Crookhaven in West Cork for International Marconi Day will be finalised at the meeting. The club will once again operate EI5IMD from the exact spot on Brow Head where Marconi established his famous station in 1901.Club members Jeremy EI5GM and Dave EI9FBB activated Bere Island on the recent bank holiday Monday making several hundred QSOs on both CW and SSB from the eastern end of the island alongside the fort. CW Field Day will be operated as part of a weekend club outing to Baltimore over the June bank holiday weekend. New members are always very welcome at the club meetings.

South Eastern Amateur Radio Group

The next monthly meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 25th March at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp. New members are very welcome. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

EI8GQB/EI1A Activation

EI8GQB/EI1A will be active between 23rd March and 3rd April.Olivier ON4EI will operate EI8GQB/EI1A from a caravan using green energy. He will activate EI1A call sign during the CQ WPX SSB contest (30-31st March). More detail on http://www.qrz.com/db/EI8GQB

Mid Ulster Amateur Radio Club

The Mid Ulster Amateur Radio Club will be holding the next Foundation Amateur Radio Licence course on Friday and Saturday April 12th and

13th. The course takes place at the Place Resource Centre, 1b Ardress Park, Portadown. More details from www.muarc.com

---

Nicholas Joseph Callan

January 2014 is the 150th anniversary of the death of Father Nicholas Joseph Callan, (1799-1864). Nicholas Callan, a Louth man, was an Irish priest and scientist at Maynooth College, County Kildare. He was professor of Natural Philosophy,(now known as Physics) and he is best known for his work on the induction coil which was the world's first transformer.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Solar Storms And Other Activity Will Rise As Sun Roars Back To Life In 2013

Posted: 23 Mar 2013 05:02 PM PDT
http://www.eham.net/articles/29920

This year is supposed to be the peak of the 11-year solar cycle, where activity such as solar flares should be at a high point, but the amount of solar activity has been abnormally low, prompting scientists to speculate that the solar cycle is twin-peaked and that we will see an increase of solar activity as the year goes on. Sunspot numbers are well below their values in 2011, prompting some to wonder if our understanding of the Sun is inaccurate and that the sun cycle is not at the predicted maximum.

GB2RS NEWS

Sunday 24th March 2013

The news headlines:

5MHz NoVs clarified by Ofcom

Operating abroad

RSGB Centenary Dinner

Further to last week's news story, Ofcom has issued clarifications for the 472kHz and 5MHz Notices of Variation. These include confirming that the NoVs are available to all holders of Full licences, including Club and Reciprocal licences. They also note that the NoV permits operation only in the United Kingdom, Isle of Man, Guernsey and Jersey, and that the band may not be used mobile or maritime mobile. In response to a number of enquiries, Ofcom separately noted that a Club Licence holder may authorise any Club member, who holds their own separate Full Licence, to use and supervise the operation of the club radio equipment on the Licensee's behalf. These members can then supervise holders of Foundation and Intermediate licences.

The Society would like to remind amateurs to exercise caution when operating abroad under CEPT Recommendation T/R 61-01. Take a full copy of your licence with you, and consider taking a translation into the local language. Some countries have rules that ban amateur radio operations in certain areas, for instance within so many kilometres of any military facility. It may be worth contacting the host country's national society before you travel, and ask whether your plans will break any local rules. This should also mean you have a local point of contact in case of difficulties during your stay. The vast majority of amateurs who travel with their radios have no problems, but a little preparation is often worth it, just in case. The RSGB is currently supporting a UK amateur who experienced problems whilst operating in Turkey, and last year we reported similar problems for a colleague operating in Greece.

RSGB Centenary dinner tickets are proving popular following the announcement in the April RadCom. There are a limited number of tickets available and over a third have already been booked. The Dinner will be held at Horwood House near Buckingham and Milton Keynes on the evening of 5 July, the RSGB Centenary day. Full details are in the April RadCom or on the RSGB website and both dinner tickets and accommodation can be booked via the RSGB shop.

EME enthusiasts should note that DL7APV has posted a 2013 weekend Moon Calendar on the internet. The Lunar Weekend Calendar gives all sorts of information regarding the Moon's position on weekends throughout the year, along with amateur radio events taking place on the same dates. You can access the DL7APV Lunar Weekend Calendar online at www.tinyurl.com/find-the-moon.

The RSGB's Centenary AGM will take place at the IET, Savoy Place, London on the 20th April at noon. If you are intending to attend, it would be appreciated if you could let the RSGB know by filling in the very short form at www.rsgb.org/attendagm.

This year, International Marconi Day will take place on 20 April. For more information and to see which stations are taking part in IMD activities, go to www.gb4imd.com.

G100RSGB, the special event callsign celebrating the RSGB Centenary, moves from Region 4 to Region 11 this week. Today and tomorrow, 24 and 25 March, the East Yorkshire Contest group will put the callsign on the air from Gilberdyke. Then on Tuesday, Region 11 takes over with the Norman Lockyer Observatory in Sidmouth running 6m & 70cm using SSB, PSK31 & ROS. On Wednesday, Flight Refuelling ARS in Wimborne will be running stations on Top Band to 70cm. The 28th and 29th sees Christchurch ARS running HF and UHF stations using SSB, CW, PSK31, RTTY and FM, with 2m being added on the 29th. On Saturday and Sunday, Plymouth RS will have HF and VHF/UHF stations on the air using SSB, possibly CW and FM on VHF and UHF. Details of how to get your QSL card are on the website, www.rsgb.org.uk.

The next RSGB Getting Started e-mail newsletter is due out in early April. Any RSGB Member who hasn't already signed up to receive copies should go to www.rsgb.org/gettingstarted.

And now for the details of rallies and events for the coming week

Today, Sunday 24 March, it's the Devon & Cornwall Hamfest at The Engine House, Compton Park, Callington PL17 8EA. There will be trade stands, a car boot sale, special interest groups, family attractions and much more. Contact Dereck, M0YDW, by email to disco5live@btinternet.com.

Also today is the Lough Erne Amateur Radio Club Annual Rally. This opens at 11.30am at Share Discovery Village, Lisnaskea, Co Fermanagh BT92 0EQ, N Ireland. There is car parking, a bring and buy, trade stands, a licensed bar, catering and disabled facilities. For more information contact Iain, on 028 6632 6693.

WW2 Air Forces Radar Reunion 2013 will be held at Blackpool from Friday, 12 April to Monday 15 April. Operators, mechanics, filter room and airborne radar visitors are welcome. Day visitors are also welcome. For further details please contact Jim Ward, G0DGG, 17Valley Walk, Croxley Green, Rickmansworth, Hertfordshire WD3 3TA.

Advance notice now for the Dambusters Hamfest on 5 May. This will be held at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Doors open

at 10am and admission is ?3. There will be a Bring & Buy. For full details check out www.qsl.net/gb4tcm/dambusters.html.

Now for the news of special events

GB2RAF, the RAF Neatishead Radar Museum Permanent Special Event Station, will be on the air celebrating the 75th Anniversary of the Royal Air Force Amateur Radio Society on 1 April from 0900 to 1700UTC. Operations will be on 80m or 40m using SSB or CW.

ZB2MOLE will be active from 27 to 31 March. Operation will be on HF with a combination of voice and CW. The antennas will be several verticals.

The Derby & District Amateur Radio Society will be operating G2DJ at Duffield Junction railway station during the gala at the Ecclesbourne Valley Railway over the 4 day Easter weekend, 29 March to 1 April. Operation will be on the HF bands and on 2 metres. Further details are on the website www.dadars.org.uk.

GB0BD will be operating from Boyndie Aerodrome on 30 March to 1 April, celebrating 75 years of Royal Air Force Amateur Radio Society. Details can be found on at QRZ.com.

Riviera Amateur Radio Club is operating the special event callsign GB4ZOO on Saturday 30 March at Paignton Zoo Environmental Park, to mark the 90th anniversary of the zoo's opening on Easter weekend in 1923. The station will be operating on 40m SSB and 2m FM. QSL via bureau, direct or eqsl. For more details see www.rivieraarc.org.uk.

And now the DX news compiled from 425 DX News and other sources

LY5A will be active as LY23A until 11 April to celebrate the 23rd anniversary of the restoration of Lithuanian independence. QSL via LY5A.

TA1HZ will be in Mogadishu, Somalia on a humanitarian mission until 4 April. He plans to operate on the HF bands in his spare time, hopefully as T5TC, although his callsign has not been assigned yet. QSL via home callsign.

Now the contest news

Tuesday 26 March sees the 50MHz UK Activity Contest taking place from 2000 to 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

At the same time, the SHF UK Activity Contest is taking place on the 2.3 to 10GHz bands. This contest also uses all modes and the exchange is the same, signal report, serial number and locator.

Next weekend, 30 and 31 March, the CQ World Wide WPX SSB contest takes place for 48 hours from 0000 to 2359UTC. Using SSB only on the 1.8 to 28MHz bands, the exchange is signal report and serial number.

And now the solar report for the period from Friday 15 March to Thursday the 21st, compiled by Martin Harrison, G3USF, on Friday the 22nd.

Solar activity remained mostly low, though C-class flares were reported almost every day, and a smallish M-class flare occurred on the 21st. The solar flux slowly declined, from 123 on the 15th to 106 on the 21st. The average was 116, a drop of four points on the previous week's level. However, the 90-day average was unchanged, also at 116. The X-ray flux showed little daily variation and averaged B3.0. At the start of the period geomagnetic activity was low, with an Ap of 6 units. It rose to an unsettled Ap of 10 on the 16th as a result of a coronal mass ejection on the 12th. This was followed by a jump to minor storm level early on the 17th, caused by another coronal mass ejection on the 15th. Solar wind speeds increased to 790km/sec on the 17th. MUFs were depressed by several MHz throughout the day, with east-west and high-latitude paths the most severely affected. VHF aurora was reported during most of the day, peaking around 1600 to1700 and reaching all areas of the UK, with contacts into Scandinavia and Germany on both 50 and 144MHz. This was the best auroral event so far this year. Geomagnetic activity then fell back to quiet levels for the next few days, but was back to an unsettled Ap of 10 on the 21st, again as a result of coronal hole effects.

Now the forecast for the week from today. Solar activity will mostly continue to be mostly low, with mostly C-class flares, though there is potential for an occasional M-class flare. And there is always a chance of an Earth-directed coronal mass ejection. In the light of the events of the past week it is perhaps worth a reminder that chances of auroral events tend to be greater around the equinoxes. This week, MUFs at equal latitudes should be around 24MHz in southern Britain and 21MHz in the north. Paths to India and South-East Asia should have a maximum usable frequency of 32MHz, where there should be a 50 per cent chance of a QSO. The optimum working frequency, where there should be a 90 per cent chance of success, will be around 26MHz. The best times for this path will be between 0800 and 1400.UTC

And that's all for another week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club is holding its holding club net on 145.225MHz from 8pm today and next Sunday. On Monday there's a curry night at Monsoon. Tuesday sees a Morse class from 7.45pm, followed at 8.30pm by a talk on having fun with the CQ WPX SSB Contest by Lee, G0MTN. The club Easter contest begins at 10am on Thursday, and the shack social is on Friday. Saturday and Sunday see the CQ World Prefix SSB Contest. Details from Chris, G0EYO, on 07710

412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR. Friday sees a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is planning for field day on Monday. Thursday sees training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Lincoln Short-Wave Club is having a visit and talk on Wednesday by new Region 13 Manager Steve Bowden, G4XCK. The club net is on Thursday from 8pm on 145.375MHz and the Saturday surgery and mentoring commences at 9am in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is closed due to the school holiday. Contact Anne, 2E1GKY, on 01242 699 595, daytime.

On Monday Stratford Upon Avon District Radio Society is having an informal meeting. Contact G0CHO, on 01608 664 488.

On Monday Sutton Coldfield Amateur Radio Society is meeting and on the air at Walmley Rugby Club. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Dudley and District Amateur Radio Society is taking part in the 6m and 3cm contests. Details from Miles Hall, G4GSB, by email to g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Burton Amateur Radio Club is having a demonstration of software defined radio with Geoff Newstead, G8EKG, from 8.15 at the Stapenhiil Institute, Burton on Trent. Admission is ?2 on the door. For more information please email maria.m6ksw@gmail.com.

On Wednesday Hucknall Rolls Royce Amateur Radio Club is having a members' forum for views and feedback. Contact Dave Wilde, G1YAI, by email to treasurer@hrrarc.com.

On Wednesday Midland Amateur Radio Society is having a general meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is having a talk on EZNEC aerial modelling by G4NDM. Contact Terry, M0RIA, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is holding its AGM. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Central Radio Amateur Circle is on the air from 8pm on 145.375MHz. Details from Martin Hallard, G1TYV, on 07906 905 071.

On Friday Coventry Amateur Radio Society is having a Project 2013 construction night. Contact John, G8SEQ, on 07958 777 363.

On Saturday Rugby ATS is watching the Peter 1 Island DXpedition video. More information from Steve, G8LYB, on 01788 578 940.

NEWS FOR THE NORTH OF ENGLAND

We start with the announcement of two new RSGB Deputy Regional Managers in Region 4. Nancy Bone, G7UUR, is the new DRM for North of the Tyne, and Ian Douglas, G7MFN, is new DRM for South of the Tyne. For more information please contact Harold Scrivens, G0UGE, by email to rm4@rsgb.org.uk.

Now for clubs with several events this week. South Manchester Radio and Computer Club is holding a technical forum on Monday. Thursday sees a review of New Year Resolutions with Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

South Tyne Side Amateur Radio Club is on the air on Monday from 7.30pm, and also starts its Foundation course the same day. There may still be places available. Names are also beingtaken for an Intermediate course, which will start soon. Tuesday sees a club net from 7.30pm on 145.550MHz. Contact Darren on 07511 968 073 for further information.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is holding its AGM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Chester & District Radio Society is having a talk on propagation by Dr Brian Austin. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Wednesday Denby Dale Radio Club is attending a First Aid course at Mirfield ATC from 7.15pm and on the air from 7.30pm on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Hornsea Amateur Radio Club is having a contest briefing. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday Mid-Cheshire Amateur Radio Society is having a surplus equipment sale and continuing its Foundation & Intermediate courses. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Friday East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday Tynemouth Amateur Radio Club is running the G0NWM QRPp milliwatt challenge. Contact Bob, M0KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

On Sunday Mid Ulster Amateur Radio Club is running a promotion at the Lough Erne Amateur Radio Club rally. On Tuesday there's a shack night whilst the Intermediate course continues. Details from Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is on the air. Contact Paul, GM0BKC, on 07846 412 862.

On Tuesday Kilmarnock & Loudoun Amateur Radio Club is having a talk on setting up a station at a new home by Steve, GM4OSS. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Lothians Radio Society is having a talk on the sinking of the Flying Enterprise, by Angus Annan MM1CCR. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Thursday Aberdeen Amateur Radio Society is practicing Morse and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice that Bromley and District Amateur Radio Club is planning to run an Intermediate course commencing on Saturday 6 April. For more information visit www.bdars.org/training0206.shtml

Now for clubs that have several events this week. Farnborough & District Radio Society has a slow CW net on 3.570MHz on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's a maritime history talk by Ken, 2E0DRW, on The Halifax Event. Friday sees the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Newbury & District Amateur Radio Society is having at talk on Wednesday on the history & future of the RSGB by Alison Johnston, G8ROG. On Saturday it's the WPX SSB, with the club taking part as G7N at the QTH of G3ZGC. Contact Rob, G4LMW, on 01635 862 737.

Now we return to the traditional listing in date order. On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Dorking & District Radio Society is having a talk on radio control by Darren Harvin, M0PRV. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday Stevenage & District Amateur Radio Society is having a linear amplifier demonstration by Rob, G2BKZ. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Chesham & District Amateur Radio Society is having a technical talk on radio kit construction by Tim, M0GPE. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Darenth Valley Radio Society Mike Wallace G8AXA is giving a talk on the Secret Telephone Exchange. Contact Bob, M0RAW, on 01322 663 804

On Wednesday Dover Radio Club is having a talk on APRS on 2m and the HF bands by Matt, M1CMN. More information from Pete, M0PKH, by email to peter.halloway@sky.com.

On Wednesday Hastings Electronics and Radio Club is having a talk on radio controlled model aircraft development and Flight Simulator, by the 1066 Model Flying Club. Contact Gordon, on 01424 431 909.

On Wednesday Norfolk Amateur Radio Club is having a table top sale in the main room, Bright Sparks in the side room and the shack will be open. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Worthing & District Amateur Radio Club is putting GX3WOR on the air. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bittern DX Group is meeting at The Roman Camp Inn, Aylmerton, NR11 8QD, from 8pm. Details from Linda, G0AJJ, on 01692 218 562.

On Thursday Edgware & District Radio Society is having a talk by Mike, G4RNW on aviation between the Wars. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Horsham Amateur Radio Club is having a social evening at The Star, Rusper. Contact Alister, G3ZBU, on 01932 242 243.

On Thursday Hilderstone Radio and Electronics Club is having a talk on the work of RAYNET by David Townsend, G0WVA. Details from Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday Lowestoft & District PYE Amateur Radio Club Meeting Club Night at the Shack Tim Ward, 2E0TJW, 07810 481182, tim@2E0TJW.co.uk

On Thursday Reading & District Amateur Radio Club is holding a junk sale. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society is closed. Contact John Burnett, 2E0OAK, on 07860 804 793.

On Friday Mid-Sussex Amateur Radio Society is closed. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Friday Wimbledon & District Amateur Radio Society is closed. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Sunday Coalhouse Fort Amateur Radio Society is putting GB1CHF on the air from 11am to 5pm for Motor Cycle Day. Contact Tony Reynard G7HJT, 07976 553 345

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Exeter Amateur Radio Society is running CW practise, watching films and videos at the Moose Centre from 7pm on Monday and holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Riviera Amateur Radio Club is putting MX0RIV the air on Tuesday from 7.30 to 9.30pm. Wednesday sees the 2m club net on 145.425MHz from 8pm. Saturday sees special event station GB4ZOO at Paignton Zoo, commemorating 90 years since the zoo opened. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

Now we return to the traditional listing in date order. On Monday Bristol RSGB Group is having a talk on microwave projects by Chris Bartram, GW4DGU. Details from Robin, G3TKF, on 01225 420 442.

On Wednesday Flight Refuelling Amateur Radio Society is operating G100RSGB. Contact John, G4POF, by email to g4pof@hotmail.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a rally planning meeting. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is holding an open house and on the air night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is on the air. Contact Rodney Edwards, M0RGE, on 01935 825 791.

On Friday Torbay Amateur Radio Society is closed. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Llanelli Amateur Radio Society is holding a junk sale. Contact Craig, MW0MXT, on 01269 845 773.

On Thursday Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500MHz then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

Highlights of Solar and Geomagnetic Activity
18 - 24 March 2013

Solar activity was very low to moderate. Low activity dominated the
week with low level C-class flares observed on 18-20 and March.
Activity increased to moderate levels on 21 March when Region 1692
(N09, L=077, class/area Dki/340 on 20 Mar) produced an M1flare at
21/2204 UTC. A filament eruption was observed around 19/1400 UTC
from the area surrounding Region 1695 (N10, L=055, class/area
Dao/180 on 18 Mar). A faint Earth-directed CME was associated with
this event, as well as Type II (850 km/s) and Type IV radio sweeps.
The period ended with very low levels on 23-24 March.

No proton events were observed at geosynchronous orbit. The period
began with slightly enhanced proton levels due to residual effects
from the 15 March CME but returned to background levels by 19 March.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate to high levels. Moderate levels were observed on 18-19
March followed by an increase to high levels on 20-23 March reaching
a peak flux of 3,880 particle flux units (pfu) at 22/1640 UTC. Flux
decayed to moderate levels on 24 March.

Geomagnetic field activity was at quiet to active levels. The period
began with mostly quiet conditions from 18-20 March. An increase to
quiet to active levels was observed on 21 March due to effects from
the two CMEs related to filament activity on 17 March. Quiet
conditions prevailed for the remainder of the period with the
exception of an isolated active period at the close of 23 March.
This increase in activity was possibly related to the weak CME
observed on 19 March.

Forecast of Solar and Geomagnetic Activity
25 March - 20 April 2013

Solar activity is expected to be very low to low throughout the
period. A slight chance for M-class activity is possible from 01-13
```

April when old Regions 1692, 1696 (N04, L=095) and 1698 (S19, L=118) return to the visible disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to begin the period at normal to moderate levels. High levels are expected from 29 March-04 April due to recurrent coronal hole high speed stream effects (CH HSS). A return to normal to moderate levels is expected for the remainder of the period.

Geomagnetic field activity is expected to begin the period at moslty quiet levels. Quiet to active conditions with a chance for minor storm periods are expected on 28-30 March due to recurrent CH HSS effects.

G6LBQ MKII Multiband HF Transceiver & DX KITS

Posted: 24 Mar 2013 07:50 AM PDT
http://forums.qrz.com/showthread.php?384917-G6LBQ-MKII-Multiband-HF-Transceiver-amp-DX-KITS&goto=newpost

I have a news release about the NEW version of the world famous G6LBQ multiband transceiver. Andy G6LBQ is releasing the MKII version through a partnership with Adrian Lane (2E0SDR). They have formed a company called DX KITS, it will trade from www.dxkits.com, it is currently in the development stage.

We are having manufactured industry quality PCB's for the NEW linear board that us 3 x RD16HHF1 Mosfets, along with a digital VFO board coming soon that utilises the SI570. Andy then intends to update the Filter Boards and also create a new and improved exciter board, both the Linear Board & the new VFO board will be compatible with the existing exciter board that will become obselete when the new MKII exciter board is relesed later this year.

There are lots of new development going on with Andy (G6LBQ) and DX Kits for a very brite future and large upgrade for the G6LBQ and Homebrewer all round.

DX Kits will be the sole worldwide supplier for the G6LBQ MKII and all of Andy's future developments.

Please visit us at the G6LBQ Yahoo group at groups.yahoo.com/group/G6LBQ/ and keep an eye on our developing site at dxkits.com.

We are awaiting our first batch of PCB's, then the sky is the limit for the HF Homebrewer.

Regards

Andy (G6LBQ) & Adrian (2E0SDR)

Students Will Talk to Space Station Astronauts:

Posted: 25 Mar 2013 05:04 PM PDT
http://www.eham.net/articles/29925

LEWISTON -- Next month, there'll be a 10-minute window when Maine ham radio operator signals can reach the International Space Station orbiting above. In this September 2012 self-portrait, International Space Station astronaut Aki Hoshide of Japan captures the sun, the Earth, parts of a robotic arm, the deep darkness of space and the unusual camera taking the picture. Through an arrangement proposed by Bates College Museum of Art, in April local students will talk to astronauts in the international space station through a ham radio. Auburn Middle School students visit the Bates Museum of Art "Starstruck" exhibit on space last fall. The space photograph exhibit prompted the museum's Curator of Education Anthony Shostak to propose that Lewiston-Auburn eighth-graders chat with International Space Station astronauts in April through ham radio operators, an event to which NASA has agreed. In that time frame, Lewiston and Auburn eighth-graders have NASA approval to talk to astronauts and ask them questions, according to teachers and Bates College Museum of Art Curator of Education Anthony Shostak. The exact day of the live chat isn't yet known. NASA has narrowed the time of the contact to the last week of April and will refine the schedule to the precise time when the space station zips overhead at 17,000 mph. Photographs of space, the art museum's exhibit on astrophotography, helped connect local students with astronauts.

A7, QATAR
Ali,A71BX, Khalid,A71CO, Ali,A71CV, Saif,A71AM, and Andy,RA9CKQ, will
join the WPX SSB Contest (Mar 30/31) as A71AM from Dukhan in the
Multi/2 category. QSL via bureau.

C6, BAHAMAS, NA-080
Chuck,KG9N, announced to be QRV as KG9N/C6A from Grand Bahama (NA-080)
from Mar 28 until Apr 4 incl. the WPX SSB Contest.
QSL via LoTW preferred, bureau is ok.

DL, GERMANY
The special event station DR13IGS is working from the International
Garden Show (IGS) in Hamburg until Dec 31. The special DOK is IGS13.
QSL via bureau and eQSL. See also: http://www.igs-hamburg.de

The special event station DM750PZL celebrates the 750th anniversary
of the city of Penzlin until Dec 31. QSL via bureau, see QRZ.com.
See also: http://www.penzlin-historie.info

FR, REUNION ISLAND, AF-016
Cyril,FR4NT, hopes for a high score in the WPX SSB Contest in the SO/LP
category. Unfortunately QSL only direct (no IRCs).

G, ENGLAND
On Mar 30 the "Riviera ARC" activates the special event station GB4ZOO
on 40m and 2m to celebrate the 90th anniversary of the Paignton Zoo.
QSL via bureau, eQSL. See also: http://www.rivieraarc.org.uk

The special event station GB4C marks the 60th anniversary of the
Queens coronation. QSL via bureau.

The "Fleetwood Radio Enthusiasts Group" member John,M0JFE, and a few
other HAMs will activate the special event station GB0FRG in April

from several CASHOTA monuments. His schedule is:
Apr 2: The Mount Pavilion & Tour of the Clock Workings
(LR SD333481, WAB SD34, IO83lw)
Apr 9: I.O.M Faehranleger (LR SD340483, WAB SD34, IO83lw)
Apr 16: War Memorial im Memorial Park Fleetwood
(LR SD328474, WAB SD34, IO83lw)

GM, SCOTLAND
The special event station GB0BD is activated on 80m-2m by members of
the "RAF Banff Strike Wing" from the Boyndie Airfield until March 31
to celebrate the 75th jubilee of the Royal Air Force Amateur Radio
Society (RAFARS).
QSOs will be confirmed via bureau automatically, direct QSLs to MM0XDB.

HB9, SWITZERLAND
The Tera Radio Club (HB9OK) members Marco,HB9OCR, Luigi,HB9CXZ,
Claudio,HB9OAU, and Marco,HB9EUY, will join the WPX SSB Contest in the
M/S category with the special event station HB30OK. QSL via HB9OCR.

I, ITALY
The prefix block IZ has been used up and the Italian authorities
start issuing callsigns with the prefix IU now.

JA, JAPAN, AS-077
The special event station 8J6KKC is active until Feb 28, 2014, to mark
the 50th anniversary of Kitakyushu city (JCC 4021) in Fukuoka province
on Kyushu (AS-077, WLOTA 0963). QSL via bureau.

LX, LUXEMBURG
Matthias,DJ8OG, plans to take part in the WPX SSB Contest as LX7I.
QSL via LX2A. See also: http://www.lx2a.com

LZ, BULGARIA
The special event station LZ134SOF celebrates the 134th anniversary
of the capital Sofia. They are working in all modes on all bands.
QSL via LZ1KZX, LoTW, eQSL.

P5, NORTH KOREA
Rick,K6VVA, still tries to obtain a licence. Stay tuned!
See: http://www.k6vva.com/p5/p5infoupdate2.pdf
See: http://www.dxcoffee.com/eng/2012/07/07/project-k6vva-p5-air

PA, THE NETHERLANDS
the new king is crowned in April and Dutch HAMs are celebrating this
event with the special event station PA13KING. QSL via PA9JO.
---
600 years ago Nijkerk was granted city right. The special call PH600NYK
will be activated between Mar 27 and Apr 15. QSL via PA0RSM, eQSL.

The special event station PH600AMF will be operational from time to
time during the year 2013, first period: Mar 27 until Apr 15.

The first transatlantic radio contact between the Netherlands and the

USA took place in 1923. The special event station PA90CII remembers this event and also OM Henk Jesse (SK 2001) until Mar 28 and from August until November. Using the self-awarded callsign PCII, H.J. Jesse then an 18-year old (!) schoolboy, made the first two-way transatlantic amateur radio contact from the Netherlands in 1923 when he exchanged messages with American station 2AGB. The QSO lasted over two hours and was in CW. The output stage of Jesse's home-made transmitter comprised three vacuum tubes (valves) in parallel and consumed 350 watts on a wavelength of 113m. However when news of this leaked out he was prosecuted and found guilty in 1925. He was then congratulated for his engineering achievement and not sentenced. In 1983, 60 years after this Henk J. Jesse received the call PA0CII to honour his achievement from the Dutch Government. Henk was the only radio amateur in the Nether-lands who received a call without taking a ham radio exam.
QSL via PA2LO.

Fred,PA0FAW, will sign PA150BA mainly in CW with only little SSB and digital modes from Apr 1-28 to mark the 150th anniversary of the museum of Bronbeek (WWFF PA-005).
QSL via homecall (bureau, eQSL), SWLs direct without return postage.

T2, TUVALU, OC-015
Tim,NL8F, is producing pile-ups from Tuvalu signing T2TT mainly in SSB until April 2. QSL via K8NA.

T5, SOMALIA
Tevfik,TA1HZ, will join the WPX SSB Contest (SOAB/LP) as T5TC from Mogadishu. QSL via homecall.

TA, TURKEY
The special event station TC47A remembers the 47th Giresun Volunteer Regiment from Apr 1-15. QSL via TA1HZ. See: http://www.tcswat.org
---
Huseyin,TA1TA, will activate the special event station TC168POL from Apr 1-10 to celebrate the 168th anniversary of Turkish National Police.
QSL via homecall.

UA, RUSSIA
The city of Penza was founded 350 years ago. Local HAMs will activate several special event stations on all bands throughout the year:
R350FP January - March
R350FL April - Juny
R350FO July - September
R350FV October - December

The special event station R100MP remembers the 100th birthday of Marshal A. I. Pokryshkina until April 18. QSL via UA9OA.

UR, UKRAINE
The special event station EO90LCR celebrates the 90th anniversary of the Chuguivs'kyi oblast until June 1. See also: http://urrh.com.ua

XW, LAOS
Steve,9M6DXX, is working in holiday style near the capital Vientiane signing XW8XZ only in SSB with 100 watts and Butternut HF6V-X from Mar 30 until Apr 3. QSL via M0URX (OQRS), LoTW after his return.
See also: http://www.m0urx.com/oqrs

YA, AFGHANISTAN
Eric,K9GY, will join the WPX SSB Contest as T6MO in the SOSB/LP category on 15m or 10m. QSL via K9GY, LoTW.

ASIA TRIP: Alan,G0RCI, is planning a trip through Asia and wants to show up as 9V1/G0RCI and 9M2/G0RCI from Apr 1-12. QSL only direct via homecall.

AMATEUR OF THE YEAR: Mustapha,DL1BDF, was recognized "Amateur of the Year" at the Hamvention 2013 in Dayton/Ohio.

RUMOURS: There are efforts under way to nominate the amateur radio for the Nobel Peace Prize. A good idea, because no other institution or group has done more for the friendship between nations and thus to peace across boundaries, ideologies and generations for over 100 years.
In how many cases a QSO was the beginning of a lifelong friendship with international mutual visits and thus increasing understanding of different cultures? In Germany the goal of international friendship is written down in the Amateur Radio Act. Even during the Cold War there were wireless connections between the USA and USSR every day and even the exchange of QSL cards worked fine. Legendary are the relief efforts of radio amateurs in natural disasters as well as responding to emergency calls. A possible recipient of the award would be the President of the IARU as a representative of the radio amateurs.
Nominations can be made by former Nobel laureates, heads of state and professors of relevant disciplines.

DXCC RULE CHANGE: At the request of the Program and Services Committee (PSC) the DX Awards Committee (DXAC) investigated the impact of an amendment to the DXCC rules. The DXAC and the PSC have unanimously decided to bring into force the following rule:
To meet the growing outrages of direct-QSLs to put to an end QSL-cards sent via bureau will be credited for DXCC with the factor 1,04.
Intended side effect is a higher degree of organization of radio amateurs in the respective national associations combined with a strengthening of the IARU and the total of Amateur Radio.

DXCC: Following DXpedition has been accepted for DXCC credit: 9X0ZM

INTERNATIONAL DIG MEETING: The International DIG meeting 2013 is approaching and 151 participants from ten countries announced to take part so far.
If you are interested and want to register as well check these links:
http://ok1srd.hrnek.cz/dig
http://ok1srd.hrnek.cz/dig/zobrprihl.php?jazyk=1

SILENT KEY: Shortly after returning from the DXpedition to Clipperton (TX5K) the wellknown DXer Luis,XE1L, suffered a heart attack in San Diego and died within minutes.
Our condolences and sympathy are with his family and friends.

We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 30/31 CQ World Wide WPX Contest, SSB

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-005, G, Great Britain: Adrian,MW1LCR, will be using the special callsign
GW100C from his QTH in Llangolen (WLOTA 0453, Loc IO82KW, SJ24WRE) on
Mar 30/31 to celebrate the 100th anniversary of the RSGB. He will plans
to take part in the WPX SSB Contest as well. QSL via M0OXO (OQRS).
See also: http://www.m0oxo.com/oqrs

EU-013, GJ, Jersey: Richard,M5RIC, will sign MJ5RIC from Jersey (WLOTA 0818)
from Mar 27-31. He will join the upcoming WPX SSB Contest as GJ2A.
QSLs for both calls via M5IRC (bureau/direct).
See also: http://m5ric.co.uk

EU-038, PA, Noord Hollans/Friesland/Groningen Province group: Dirk,DL5DCL,
will spend his holidays on Ameland (WLOTA 1059) from Apr 1-6. He will
be QRV in holiday style signing PA/DL5DCL mostly in CW on HF.
QSL via DL5DCL (bureau/direct/OQRS). See also: http://www.dl5dcl.de

EU-158, EU-158, SV3, Peloponnisos West group (incl. Proti, Sapientza,
Skhiza, Venetiko, etc.): Markus,SV8/DJ4EL, is working from the island
of Proti (GIOTA INS-013, MIA MG-092, WLOTA 4036) until Mar 26 and from
Sapientza (GIOTA INS-011, MIA MG-101, WLOTA 1471) on Mar 28/29. He uses
battery power on 15m and hopes to log 1.000 QSOs. QSL via homecall.

EU-171, Jylland North group: Ela,DL1TM, and Tor,DJ4MG, will be active in
SSB and PSK on 160m-10m signing OZ7TM and 5P4MGn from Apr 1-18. They
will also try to activate the callsign OU1RAEM.
QSLs for OZ7TM via DL1TM, 5P4MG via DJ4MG and OU1RAEM via DF5LW.

NA-005, VP9, Bermuda: Kei,KG2A/VP9, plans to join the WPX SSB Contest
and will be QRV also in CW and SSB until Apr 1.
QSL via KG2A, unfortunately only direct.

NA-015, CO, Cuba: The "Las Tunas Contest Crew" will sign T48K from
Las Tunas (WLOTA 0032) in the WPX SSB Contest. The team includes the
club members Alex,CO8KA, Alejandro,CM8AKY, Doug,CO8DM, Del,CO8DRG,
Raul,CO8ZZ, and the guest OP Hugo,F5FYO.
QSLs for this activity via F5FYO (bureau/direct).

NA-021, 8P, Barbados: Dean,8P6SH, will sign 8P2K from St. Philip Parish
on Barbados (WLOTA 0999) during the WPX SSB Contest.
QSL via KU9C or direct via 8P6SH.

NA-057, HR, Bahia Islands: Ray,WQ7R, will be QRV as HQ9R in the WPX SSB.
His QTH is situated on Isla de Roatan (WLOTA 1671, grid loc. EK66).
QSL via LoTW or direct via K5WW.

NA-106, KP2, US Virgin Islands: Stan,K8MJZ, Fred,NP2X, Bob,WP2XX, and
other OPs will be active as WP2Z from St. Croix Island (USi VI002S,
WLOTA 2477, Loc FK77PR) in the WPX SSB Contest. QSL via KU9C.

NA-143, W5, Texas State East (Matagorda to Jefferson County) group:
Joe,K5KUA, plans another stay on Galveston Island (USi TX001S) from
Mar 28 until Apr 1 and will be active as usual signing K5KUA/5 in CW
and digital modes on 80m-10m. QSL via K5KUA (bureau/direct).

OC-003, VK9/C, Cocos (Keeling) Island: Chris,GM3WOJ/ZL1CT, and Keith,GM4YXI,
are going to visit the Cocos-Keeling Islands and plan to show up as
VK9CZ in SSB/CW and some RTTY on the HF bands from Mar 30 until Apr 13.
If possible they want to upload their logs to the LoTW every day.
An OQRS will be installed after their return home.
Please check the QSL information on their website: http://www.vk9cz.com

OC-013, Rarotonga Island: Mauri,AG1LE, will stay on Rarotonga (Loc BG08cr)
from Apr 1-13 and wants to work holiday style as E51DXX on HF.
QSL via AG1LE (bureau/direct).

OC-021, YB0-3, Java Island: The team of YE1ZAT and the YE0X contest team are
planning a joint venture as YE1K from Bekasi (WLOTA 1660, Loc OI33mu)
in the WPX SSB Contest. QSL via YE1ZAT (d). See also: http://ye1zat.com

OC-026, KH2, Guam Island: Masa,W6LJ, Ryuji (Rio),NY8A, Aki,W3JH, Masa,AH6KY,
and Masaru,AI2K, will be QRV as NH2KY from Barrigada on Guam
(USi GU003S, WFF KFF-110, WLOTA 0064) between Mar 29 and Apr 2.
They will sign KH2KY in the WPX SSB Contest.
QSLs for KH2KY via JA1MFR, NH2KY via JR3QFB.

OC-036, ZL, North Island: Holger,ZL3IO, plans to take part in the upcoming
WPX SSB Contest as well. QSL via ZL3IO (bureau/direct).

OC-042, DU1-4, Luzon Island: Jose,DU1BP, Torsten,DL2KGS, and Rag,LA6FJA,
will be QRV as DZ1B from Luzon (WLOTA 0081) in the WPX SSB Contest.
QSL via LoTW or direct via DU1BP.

OC-086, KH0, Northern Mariana Island: The Saipan BBQ Contest Club AH0BT
plans to take part in the WPX SSB Contest from Saipan (Loc QK25).
QSL via 7L1FPU (bureau/direct).

OC-090, DU1, Calamian group: Victor,DU1/R6AF, will be QRV in holiday style
from Busuanga (grid loc. PK02) from Apr 27 until May 3. QSL via R6AF.

OC-134, ZL, South Island: The "Quake Contesters" ZL3X will be active from
Christchurch (WLOTA 0342) during the WPX SSB. The list of operators
includes Mark,ZL3AB, Geoff,ZL3GA, Don,ZL3DMC, Phil,ZL3PAH, Chris,ZL3LF,

and Byron,ZL3DXT. QSL via ZL3PAH (bureau/direct).

OC-236, YB8, Celebes Coastal Islands: Hajar,YB8HZ/p, and Ram,YB8BRI/p, are planning an activity from Balang Lompo Island from Mar 28-31 working on all bands focussing on SSB. QSL via YB8BRI (d).

SA-036, P4, Aruba Island: Correction to DXNL 1824: The QSL manager of P40Z was not correct. QSLs for P40Z should be sent via W3HNK (d).

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 27, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- CTY Files Overheat - CQ WPX SSB Contest
- VHF Spring Sprints Kickoff On 144 MHz
- Florida Spelling Bee Returns
- Spark Some Interest in Engineering
- Wow - Webinar Wonders!
- ARRL CW Sweepstakes and EME Contest Results Online
- VOACAP Tutorial by K9LA
- WWV History
- I Can Hear You Now!

NEW HF OPERATORS - THINGS TO DO

Even a little pistol can be a star attraction in the CQ WPX (Worked
PrefiX) contests in which a 2-by-3 call sign is often a new multiplier.
Plus, you can make strides towards your WPX award
<http://www.cq-amateur-radio.com/cq_awards/cq_wpx_awards/042208_cq_wpx_new_rules.pdf>while
you're contesting. National DX contests from Bulgaria, Hungary, and
Poland are taking place, too, along with the Missouri QSO Party -
spring has sprung!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The North American Phone Sprint date was grouped improperly in the
contest summary last time - apologies for anyone misled or delayed.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

March 30-31
```

- CQ WPX SSB Contest
- Poisson d'Avril (Apr 1)
- VHF Spring Sprints--144 MHz (Apr 1)
- Low Power Spring Sprint--CW (Apr 1)
- ARS Spartan Sprint--CW (Apr 2)
- OK1WC Memorial Contest (Apr 2)

April 6-7

- NS Weekly Sprint--CW (Apr 5)
- LZ Open 40 Meter Contest--CW
- PODXS 31 Flavors Contest--Digital
- Stark County (OH) VHF QSO Party--Phone
- QRP ARCI Spring QSO Party--CW
- SP DX Contest
- EA RTTY Contest
- Missouri QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Based on the strong positive response last year, the Florida Contest Group announces that they are bringing back the 1x1 spelling bee for the 2013 Florida QSO Party <http://www.floridaqsoparty.org/>, April 27 - 28. Stations that work all seven of the 1x1 calls to spell "FLORIDA" will receive a special certificate. (Thanks, Chris WF3C)

Scott, N3FJP announces the release of VHF Contest Log 4.0 <http://www.n3fjp.com/>, replacing both VHF Contest Log 3.0 and VHF Network Log 2.5. The new program supports both Fixed and Rover stations for the ARRL VHF+ contests and CQ World Wide VHF.

It is a shock to report the sudden death of Luis Chartarifsky XE1L just after he returned to the mainland following the recent TX5K expedition to Clipperton Island. Luis was an active DXer and contester with numerous expeditions to his credit, a member of the A-1 Operators Club and received numerous other accolades throughout his ham career. (Thanks to DXXE)

While reading the just-released CW Sweepstakes extended results for 2012 you might wonder where that long exchange came from. Basing its exchange in part on the radiogram header, Sweepstakes owes a lot to long-time ARRL staffer, George Hart W1NJM <http://www.arrl.org/news/national-traffic-system-developer-george-hart-w1njm-sk>, the father of the National Traffic System. George died on Sunday, March 24th at the age of 99. A memorial service is planned for late April. (Thanks, Pete W1RM)

With many QSO parties starting to align their dates, Chuck NO5W has added support for concurrent operation of the multi-QSO party consisting of MIQP, SDQP, NDQP, ONQP, and NebQP in the next update of his CQ/X software. Patch 180-03 is scheduled to be released by the end of this month. Download version 1.8.0 and the three patches from www.no5w.com <http://www.no5w.com>.

Ash KF5EYY is better known as 3V8BB and 3V8SS in contests, such as the ARRL DX CW contest in February. He has made it possible to hear your ARRL CW 2013 QSO with 3V8BB during online <http://www.kf5eyy.info/>.

Daniel K7DGL found a cool new product - the SatSleeve <http://gizmodo.com/5991685/this-case-turns-your-iphone-into-a-satellite-phone> from Thuraya - a case that turns an iPhone into a satellite phone capable of voice and SMS messaging. The Thuraya service does not cover the Western hemisphere, but it's not unreasonable to expect Inmarsat or Hughes to be thinking about similar products.

If you have more than one manufacturer's handheld radio, you'll be glad to hear of an open source tool used to program different radios called CHIRP <http://chirp.danplanet.com/projects/chirp/wiki/Home>. At the moment it covers the basic programming needs - frequency, tone, offset, etc - of a wide variety of handhelds. Since it is an open source project, there may be additional features added in the future. (Thanks, John KF5KI)

ARRL Bulletin 007 <http://www.arrl.org/news/fcc-grants-arrl-s-request-for-temporary-waiver-for-tdma-systems> tells us that the FCC has granted the ARRL's request for a temporary waiver to allow TDMA (time division, multiple access) emissions by amateurs above 30 MHz. This takes a lot of persistent effort that is rarely visible to hams and I don't know of another organization than the ARRL that has enough credibility and resources to cause it to happen - a good reason to support the ARRL. A tip of the Contest Update cap to the team charged with getting this done.

Web Site of the Week - As many of us discovered through our early ham radio adventures, an FCC license can also lead to a professional career. The burgeoning population of makers is also finding this out as in the EDN article, "DIY movement Sparks Engineering Education <http://electronicdesign.com/blog/diy-movement-sparks-engineering-education?NL=ED-03&Issue=ED-03_20130313_ED-03_229&YM_RID=hwardsil@gmail.com&YM_MID=1379278&sfvc4enews=42>" by Louis Frenzel W5LEF. This article is one of several recent articles about education and engineering in Frenzel's blog <http://electronicdesign.com/blogger/lou-frenzel>.

WORD TO THE WISE

Iron bottom - a contester with a very high number of operating hours in a contest. Doug KR2Q has provided us with the iron bottom results from a recent CQWW SSB contest:

~50% operate for 8 hours or less
~75% operate for < 16 hours
~90% operate for < 24 hours
~95% operate for < 30 hours

Leaving ~5% iron-bottoms out there - and you know who you are!

==> SIGHTS AND SOUNDS

The following upcoming programs have been scheduled (dates are North American local time):

- March 24 - CQ WPX Preview - Randy Thompson K5ZD
- April 14 - Contest University and Dayton Contester Activities - Tim Duffy K3LR
- April 16 - Solar Topics - Carl Luetzelschwab K9LA
- April 26 - What I've Learned in Two Decades of Terrain Assessment - Dean Straw N6BV

Click on the WWROF website's <http://wwrof.org> link to Webinars, then Upcoming Webinars for details and registration. (Thanks, Ken K4ZW)

The Northern California Contest Club (NCCC) recently held their annual awards dinner and Bob N6TV posted a lot of excellent photographs of the plaque winners in his excellent online album <https://picasaweb.google.com/rawilson/2013NCCCAwardsDinner02#5854369372544796082>.

This video from AMSAT-UK <http://amsat-uk.org/2013/03/16/nasa-edge-cubesat-launch-initiative/> is an excellent interview describing NASA's CubeSat Launch Initiative and how it enables students and professionals to launch their own satellites. (Thanks, Brent KB1LQD)

A winter's day can be a fine time for a short hike with a little QRP operation for seasoning as recounted by Jim W1PID in this recounting <http://www.w1pid.com/mud/mud.html> of his hike to the Pemigewasset River.

CQ Records <http://cqrecords.com/>? It's not what you think! (Thanks, George K5TR)

Another scherzando pense&#65533; to the magic of radio comes from guitarist extraordinaire, Leo Kottke, in this online video of his song, "Shortwave <https://www.youtube.com/watch?v=sqH5lOGVbVE>". (Thanks, Sean KX9X)

==> RESULTS AND RECORDS

The extended results for the ARRL's CW Sweepstakes by VE4XT and the International EME Contest by K1DS are online <http://www.arrl.org/contest-results-articles>. All certificates for the 2012 ARRL DX CW Contest have been processed, to be quickly followed by the ARRL DX Phone certificates. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Preliminary results for the January North American QSO Party CW <http://www.ncjweb.com/naqpcwprelim.php> and SSB <http://www.ncjweb.com/naqpssbprelim.php> contests are now on the National Contest Journal web site <http://www.ncjweb.com>. The contest managers and writeup authors are always looking for interesting stories and photos - see the NCJ website for contact information. (Thanks, NAQP SSB Manager, Bill AC0W)

A CWops Test Hat Trick means winning all three sessions on a single Wednesday/Thursday. So far, the only one to do it is Howie N4AF (photo at right) who has done it THREE times. That means Howie has accomplished a CWops Test Hat Trick Hat Trick. But can he chop wood? (Thanks, Hank W6SX)

The results of the 2012 Ohio QSO Party <http://www.ohqp.org/> have been posted on the OhQP web site. (Thanks, Jim K8MR)

OPERATING TIP

Many of us will recognize Contester's Crouch - sitting in front of a radio or a computer screen, head forward, shoulders hunched, ready to pounce. It's instinctive, maybe, but not very healthy. There are a number of health conditions that make "the crouch" painful and put severe limits on operating time. Pete N4ZR got relief through placing a large lumbar-relief cushion on his chair to shift his posture. If you aren't comfortable when operating, take the necessary steps to make things better - you are never too young to start taking care of your back!

==> TECHNICAL TOPICS AND INFORMATION

If you're interested in VOCAP, Carl Luetzelschwab K9LA has posted a VOCAP tutorial <http://www.arrl.org/files/file/Technology/propagation/Voacap.pdf> on the ARRL website. Carl is also hosting a WWROF webinar on solar topics as mentioned in the Sights and Sounds section above.

From Frank W3LPL on the1921 "Transatlantics <http://wwrof.org/webinars>" - "The 1BCG transmitter was redesigned and rebuilt many times before and during the Transatlantic Test. The transmitter as first built in early December was a "self rectified A.C. self oscillator" design, but Armstrong was very dissatisfied with the roughness of the transmitted signal. On 4 December it was decided that the transmitter should be rebuilt as a Master Oscillator - Power Amplifier" (MOPA) with a 2000 volt DC motor generator power supply. It wasn't until the third day of the Tests (December 9) that the transmitter was fully functional with an estimated 600 watts power output. Propagation was very poor and atmospheric QRN was very high after the night of 11/12 December, and Godley heard no further transatlantic signals. Out of frustration and with only a few days remaining before Godley was scheduled to depart from Scotland, another 2500 volt motor generator was rushed to 1BCG and connected in series with the original motor generator, with 4500 volts now applied to the PA. That configuration was used for the last few days of the Transatlantic Test and during the next two weeks when 1BCG made two way QSOs with every state of the union." A kilowatt or more of CW in 1921? Awesome! As a point of interest, Frank noted, "It would be many years before two way transoceanic QSOs took place on 160 meters. For many years all of the effort was focused on opening transoceanic DX on the higher frequencies, all the way up to 5 meters!"

ARRL Propapagation Bulletin 011
<http://www.arrl.org/w1aw-bulletins-archive/ARLP011/2013> mentions a
handy tool for converting a street address into latitude/longitude
coordinates <http://stevemorse.org/jcal/latlon.php>. It is useful for
determining locations for propagation prediction and other programs
based on FCC database address records or for your own location.

>From Slashdot <http://slashdot.org> comes a recommendation of this list
of important dates <http://www.merlyn.demon.co.uk/critdate.htm>
relevant to computer programs, algorithms, and operating systems - just
in case you needed something else to worry about!

EDN magazine often reprints popular designs from years past for which a
need still exists, such as this analog notch filter
<http://www.edn.com/design/analog/4410461/Filter-quashes-60-Hz-interference>
to remove 60 Hz interference.

While aimed at the robotics designer, Servo City's selection of small
aluminum beams <http://www.servocity.com/html/aluminum_beams.html>
looks like there is lots of potential for building small antennas and
other jobs around the ham shack.

Pete N4ZR has been busy! "Before last weekend's (ARRL DX) contest, I
had a chance to experiment a bit with my voice recordings. One of the
problems I have always had is that when I try to enunciate clearly I
slow down and the resulting recording lacks the urgency you expect in a
contest situation. I also notice stations whose recorded and live audio
don't sound anything alike and wanted to minimize that as much as
possible." Here is a method
<http://lists.contesting.com/archives/html/CQ-Contest/2013-03/msg00111.html>
Pete found of using the Audacity audio software tools
<http://audacity.sourceforge.net/> to speed up the recording while
still keeping enunciation crystal clear.

The first electrostatically-driven graphene speaker
<http://www.technologyreview.com/view/512496/first-graphene-audio-speaker-easily-outperfor
ms-traditional-designs/>
matches or outperforms commercially available earphones according to
this article. Lighter is good, particularly on those long contest
weekends when you're in "iron bottom" mode. (Thanks, Brian K1BRF)

This week's Instructables project for the ham shack is this clever
adaptation of a stepladder
<http://www.instructables.com/id/Ladder-Bookshelf/> to form a set of
shelves for books, parts, or gear. Change that wobbly old ladder into
furniture!

Many digital contesters are aware of DL4RCK's RCKSkimmer software,
which allows skimming of RTTY and other digital signals by scanning for
them with a conventional receiver. Now Wes, WZ7I has come up with an
ingenious way to generate seven bands of CW spots and two additional
bands of digital spots, all from a single QS1R receiver. The Reverse
Beacon Network is <http://reversebeacon.blogspot.com/> ready for

digital spots - this will definitely increase the number of spots available to digital DXers and contesters worldwide. (Thanks, Pete N4ZR)

Technical mavens would do well to check out the project-packed web page of Jim VK5TR <http://www.users.on.net/%7Eendsodds/>. I can smell the soldering irons heating up now!

Technical Web Site of the Week - In searching for WWVB information, Jerry WA0ACF found an interesting NIST publication <http://tf.nist.gov/general/pdf/1383.pdf> containing the history of WWV and all of its variations and locations. He says, "I thought it was interesting to learn that the second WWV time announcer was replaced because he didn't sound enough like the first time announcer."

==> CONVERSATION

I Can Hear You Now!

I mentioned hearing aids and contests previously in the May 11, 2011 <http://www.arrl.org/contest-update-issues?issue=2011-05-11> issue of the Contest Update. Recently, I upgraded my hearing aids (I wear one in each ear) to a pair of ReSound Forza <http://www.future-resound.com/> in-the-ear models. These are nice digital aids with some interesting features but the one that will interest most of my readers is the Bluetooth <http://en.wikipedia.org/wiki/Bluetooth> wireless capability that links the aids to an "audio streamer" which, in turn, plugs into a source of stereo audio, such as a TV or...a ham radio! I really liked being able to clearly hear the TV audio piped directly into each ear - wow, dialogue, who knew? - so the next stop was to the shack to see how they sounded on the bands.

My grand experiment took place during the January CW NAQP with an SO2R setup and during casual operating since. Usually, I wear lightweight open-air headphones while contesting unless there is a lot of local noise that requires noise-cancelling or closed-muff models. In this case, I was the only one at home so this was a great opportunity to try the hearing aids and the wireless connection.

It worked great! I set up the streaming device and plugged it into the headphone jack. To activate the link, I press-and-hold the program select button. The linked-up tones sound and - voila! - full ham radio audio just if I was wearing headphones. I moved the streamer to my audio switchbox and again, audio just as good as headphones. (To be sure, the bass registers are not reproduced by the hearing aid with or without the Bluetooth link, but this is not an issue copying CW or most SSB.) Furthermore, I could get up and wander around without losing the link - maximum range is about 15 feet before dropouts start occurring.

So I operated with and without headphones during the contest and found the wireless hearing aids to be fine. The only issue I have had with the wireless link is that prolonged use drains the small 312-size batteries in less than a day. You'll want to put in fresh batteries

before the contest and have spares on hand for when they run down. Changing both batteries takes about 20 seconds if you're in a hurry.

Gary, AB9M experimented with the T-coils intended for picking up telephone handset audio. "In many hearing aids the T-coil program has a separate profile since normal telephone audio frequencies are from 300 to 3000 Hz with a 6 dB per octave rising response providing equal loudness." Gary's open-style hearing aids don't work well with regular T-coils and headsets due to the combination of external sound and the inductively-coupled sound.

He recommends instead J-hooks <http://www.hearinglosshelp.com/products/earlinks.htm#musicliks) which> which provide no external sound, but do inductively couple to the T-coils of my hearing aids to produce sounds inside my hearing aids. He can now copy CW, chase DX, or participate in an nets, even as net control!

There are a lot of hams with hearing loss - young and old - out there. If that's you, there are more and more options available every day as hearing aid technology advances. Don't let hearing loss be a reason to go QRT.

73, Ward N0AX

==> CONTESTS

27 March through 9 April

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ WPX SSB Contest--Phone, from Mar 30, 0000Z to Mar 31, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: Apr 6. Rules <http://www.cqwpx.com/rules.htm>

Poisson d'Avril--Phone, CW, Digital, Mixolidian, from Apr 1, 0059Z to Apr 1, 2359Z. Bands: 1970s classic rock is preferred, although a little jazz is good now and then. Frequencies: operate as long as you can stand it. Exchange: all awards are final and cannot be exchanged no matter how much you want to - you operated in the contest, didn't you? Logs due: they are due mostly to the vast amount of cheating in this contest, which is encouraged and often celebrated. Rules <http://poissondavril.webs.com/>

Low Power Spring Sprint--CW, from Apr 1, 1400Z to Apr 1, 2000Z . Bands (MHz): 1.8-28. Exchange: RST, grid square, category. Logs due: 30 days. Rules <http://www.hamradio.sk/>

ARS Spartan Sprint--CW, from Apr 2, 0200Z to Apr 2, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

OK1WC Memorial Contest--Phone,CW, from Apr 2, 1600Z to Apr 2, 1659Z. Bands (MHz): 3.5, 50,144. First through fourth Monday of each month; see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

NS Weekly Sprint--CW, from Apr 5, 0230Z to Apr 5, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

LZ Open 40 Meter Contest--CW, from Apr 6, 0400Z to Apr 6, 0800Z. Bands (MHz): 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 10 days. Rules <http://www.lzopen.com/>

PODXS 31 Flavors Contest--Digital, from Apr 6, 12 Noon to Apr 6, 6 PM. Bands (MHz): 14. Frequencies (MHz): 14.070-14.080. Exchange: S/P/C and name or 070 number. Logs due: May 8. Rules <http://www.podxs070.com/>

QRP ARCI Spring QSO Party--CW, from Apr 6, 1200Z to Apr 7, 2359Z. Bands (MHz): 1.8-28. Frequencies (MHz): QRP calling frequencies. Exchange: RST, S/P/C, power or QRP ARCI number. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

SP DX Contest--Phone,CW, from Apr 6, 1500Z to Apr 7, 1500Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or SP province. Logs due: Apr 30. Rules <http://spdxcontest.pzk.org.pl/>

EA RTTY Contest--Digital, from Apr 6, 1600Z to Apr 7, 1600Z . Bands (MHz): 3.5-28. Exchange: RST, serial or EA province. Logs due: Apr 27. Rules <http://www.ure.es/contest/428-ea-psk31-contest-english-version.html>

Missouri QSO Party--Phone,CW, from Apr 6, 1800Z to Apr 7, 0500Z. Multiple operating periods. Bands (MHz): 1.8-28. Frequencies (MHz): CW 1.820 and 40 kHz from band edge; Phone - 1.880, 3.825, 7.220, 14.250, 21.380, 28.350. Exchange: RS(T), serial, MO county or S/P/C. Logs due: May 1. Rules <http://www.w0ma.org/>

VHF+ CONTESTS

VHF Spring Sprints--Phone,CW,Digital, from Apr 1, 7 PM to Apr 1, 11 PM. Bands (MHz): 144. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

CSA Astronaut Chris Hadfield Communicates Through Ham Radio With Students:

Posted: 26 Mar 2013 05:06 PM PDT
http://www.eham.net/articles/29935

Longueuil, Quebec, March 26, 2013 -- As part of the Amateur Radio on the International Space Station (ARISS) program, Canadian Space Agency (CSA) Astronaut Chris Hadfield will answer questions live from the International Space Station (ISS). ARISS Canada is a volunteer program aimed at inspiring students worldwide to pursue careers in science, technology, engineering and math through amateur radio communications opportunities. During Expedition 34/35, ARISS Canada hopes to establish over 15 amateur radio contacts between astronaut Chris Hadfield and young Canadians across the nation.

//
FCC Grants ARRL's Request for Temporary Waiver for TDMA Systems:

Posted: 26 Mar 2013 12:14 PM PDT
http://www.eham.net/articles/29934

Acting upon a subsequent request by the ARRL, the FCC issued an Order (WT Docket No, 12-283) on March 25, granting a temporary waiver to transmit communications on amateur service channels above 30 MHz using single time-slot Time Division Multiple Access (TDMA) systems. The temporary waiver was granted pending the resolution of a related rulemaking proceeding (RM-11625).

//
National Traffic System Developer George Hart, W1NJM (SK):

Posted: 26 Mar 2013 12:13 PM PDT
http://www.eham.net/articles/29933

George Hart, W1NJM -- the chief developer of the National Traffic System (NTS) -- passed away Sunday, March 24. He was 99. An ARRL Charter Life Member, Hart spent more than four decades as a member of the ARRL Headquarters staff and continued to be an active amateur and regular participant in Field Day. In 1984, the ARRL Board of Directors named Hart as an ARRL Honorary Vice President.

//
Former ARRL Northwestern Division Director Mary Lewis, W7QGP (SK):

Posted: 26 Mar 2013 12:13 PM PDT
http://www.eham.net/articles/29932

Mary Lewis, W7QGP, of Seattle, Washington, passed away March 12. She was 85. An ARRL Life Member, Lewis served as ARRL Northwestern Division Director from 1981-1987 and 1991-1995. She also served as ARRL Section Communications Manager for Washington and ARRL Section Manager for Western Washington, as well as ARRL Assistant Section Manager and ARRL Affiliated Club Coordinator for the Western Washington Section.

//
Army MARS Chief's 1st Annual Report:

Posted: 26 Mar 2013 12:12 PM PDT
http://www.eham.net/articles/29931

Winding up his first
year in
command of Army MARS, Chief Stephen Klinefelter
thanked the members for "your efforts and sacrifice" and cited their accomplishments including preparedness and response during hurricane Sandy, establishment of the new National Operations Net, and
a new cross-border
relationship with Canada's equivalent organization of hams.

Debby says…

I was recently advised the following by a sharp eyed amateur….

In a huge shop called Junk and Disorderly at Northcote North Shore sits an old ZC1 with no case but looks complete. They ask $65.Collectors maybe interested.

http://www.junkndisorderly.co.nz/

Branch secretaries will all receive a circular from headquarters in the coming week, included in this will be the branch membership names of all those who are current financial members of the Association. This ensures your vote is counted on the remit to be discussed at the upcoming AGM in Masterton.

This is your last chance for branches to send their nominations, for

Young amateur of the year (2012), Amateur of the Year (2012), and the Jumbo Godfrey service award.

Please send in all nominations to me by the end of April. We are very lucky to have two sponsors for the Young Amateur and Best Examination Result for under 20 years old. So be sure to send in those nominations.

Talk soon…Debby ZL2DL

Situation Vacant

NZART Council is calling for expressions of interest for the following Officer Vacancy. All applicants must be NZART members.

VHF, UHF and SHF Records Co-ordinator

The Records Coordinator is responsible to NZART Council for the coordination, maintenance and promotion of the New Zealand VHF/UHF records. A job description is available at http://www.nzart.org.nz/council/jobs/vhf-shf-records/ or from NZART HQ.

Applicants for this role can be located anywhere in New Zealand. The ideal person for this role would have experience in the area of VHF/UHF/SHF operating and/or contesting.

The VHF, UHF and SHF Records Co-ordinator reports to NZART Council through the Officer Liaison Councillor.

The position is voluntary, however operating expenses will be refunded as per the NZART policy on officers expenses.

Applications for this position will be accepted from interested persons in writing with supporting documentation through the General Secretary, NZART, PO Box 40525, Upper Hutt 5140.

This advertisement is authorised by NZART Council.

World Amateur Radio Day

On April 18, 2013 we'll celebrate the World Amateur Radio Day on the 88th Anniversary of the founding of the International Amateur Radio Union, IARU.

This theme for this year World Amateur Radio Day is:

"Amateur Radio: Entering Its Second Century of Disaster Communications"

The REP-Rede dos Emissores Portugueses with the group the operators, will activate the special callsign CR5IARU from April 13 to 19, 2013 on all bands.

QSL via CT1REP (bureau or direct).

Logs will be available in ClubLog.

Branch 74, The Wellington VHF Group, has been granted the special callsign ZL2WARD for World Amateur Radio Day 2013, Thursday 18th of April.

The station will be active on The National System, and possibly on other bands.

An email QSL Card will be sent to all stations requesting one.

Branch 74 – WELLINGTON VHF GROUP

Digital Television Test Transmissions from Mt Belmont

The unmodulated CW carrier on 506 MHz has been turned off, on completion of coverage testing. Our thanks go to everyone who provided reception reports.

The digital exciter has been completed and successfully passed all tests.

Four power amplifier modules have been constructed and tested with the digital exciter. Their gain and linearity match within half a dB. The four modules will operate in parallel to achieve the licensed output power.

A prototype 2-way splitter, being one third of the 4-way drive splitter, has successfully passed all tests. A similar prototype, a 2-way combiner designed for higher power operation, being one third of the 4-way output combiner, is under construction.

VHF-UHF-SHF-EHF CONTEST NEWS

REMINDER – THE LOW BAND CONTEST IS TOMORROW AND SUNDAY

The next contest is the Low Band Contest, all bands 50 MHz to 440 MHz, on Saturday the 6th and Sunday the 7th of April 2013.

The operating times are: Saturday 1700 to 2300 NZ Daylight Saving Time and Sunday 0700 to 1300 NZ Standard Time. Remember to put your clocks back one hour before operating on Sunday morning.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:
zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

FMTAG NOTES FOR HQ INFOLINE 270

PROPOSALS

Branch 26 Nelson has applied for a one-way link from Grampians, located at TOPO50 BQ26 234283. The transmit frequency will be 439.350 MHz. An engineering evaluation, in accordance with RSM document PIB38, confirms that there will be no interference to other stations.

Branch 49 Westland has applied to transfer its 6 metre beacon to Stafford, located at TOPO50 BU18 417747. The Branch has requested a change of transmit frequency to 50.055 MHz. The new frequency has been coordinated with Region 3 IARU. An engineering evaluation, in accordance with RSM document PIB38, confirms that there will be no interference to other stations.

Branch 49 Westland has applied to transfer its 2 metre beacon to Stafford, located at TOPO50 BU18 417747. The transmit frequency will be unchanged at 144.286 MHz. An engineering evaluation, in accordance with RSM document PIB38, confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the March/April issue of Break-In-closes on 10 May 2013.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy. All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.

Amateur Radio Newsline(tm) Report 1860 - April 5 2013

CLOSED CIRCUIT ADVISORY

The following is a closed circuit advisory and not necessarily for air. With the latest on Amateur Radio Newsline's fiscal situation here's our producer Bill Pasternak, WA6ITF:

--

I want to thank all of you who have donated so far to our spring fund raising. While we set no monetary goal, we can say that things are looking better. However things are far from great. So we need your continued support to help keep threes newscasts coming your way. The easiest way to donate is via Pay Pat at our website at www.arnewsline.org or you can mail a donation to the address you will hear at the end of this weeks newscast. Which ever way you choose, we say thank you.

Im Bill Pasternak WA6ITF and now here is this weeks newscast with Skeeter Nash, N5ASH.

--

Thanks Bill.

Now, Amateur Radio Newsline report number 1860 with a release date of April 5 2013 to follow in 5-4-3-2-1.

The following is a QST. The FCC says it is reviewing RF exposure limits in all radio services; a look at the possible candidates to be the next FCC Chairman; a UK ham's signal is heard 2000 Kilometers away with only 10 milliwatts from a Raspberry Pi transmitter; the tiny Baofeng HT becomes a paradise for makers and hackers and the story of how ham radio help to stop a civil war. All this and more on Amateur Radio Newsline(tm) report number 1860 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC TO REVIEW RF EXPOSURE POLICIES

Amateur Radio operations on all levels may be impacted by an FCC decision to review the agency's R-F exposure policies. Amateur Radio Newsline's Bruce Tennant, K6PZW explains:

--

The FCC is re-evaluating its RF exposure policies. This as the agency says that it wants to update its guidelines and make sure they comply with the National Environmental Policy Act or N-E-P-A requirements for environmental reviews. Especially those related to health and safety of RF emissions from just about all types radio transmitters.

To accomplish this, the commission has released a Report and Order and a Further Notice of Proposed Rulemaking in ET Docket 13-84, and a Notice of Inquiry named ET Docket 03-137.

In the Report and Order the commission concludes several technical and semantic issues initiated in 2003 that revise and update its regulations implementing the National Environmental Policy Act. In the Further Notice the agency proposes to update and revise its procedures and treat all services equally. And in the inquiry the FCC seeks public input to determine whether its RF exposure limits and policies need to be reassessed including those that pertain to amateur radio.

The overall inquiry focuses on the propriety of existing standards and policies, possible options for precautionary exposure reduction, possible improvements to the FCC's equipment authorization process and policies as they relate to RF exposure. The commission proposes to revise and harmonize the criteria for determining whether single or multiple fixed, mobile, or portable RF sources should be routinely evaluated for compliance with the RF exposure limits or exempted from such evaluations.

No matter the outcome, ham radio installations appear likely to be included in any final action. This is because the agency says that it will codify in its rules the extent to which occupation controlled RF exposure limits apply to amateur radio licensees. This policy was established in the RF Report and Order of 1996, but was not incorporated in the rules at that time.

More specifically the FCC says that amateur radio operators are knowledgeable about the appropriate use of their equipment and as such that separation distances are likely to be maintained to ensure compliance with the agency's exposure limits. However, since the existing amateur exemptions are based only on transmitter power and do not consider separation distance or antenna gain, exempt transmitting antennas that are unusually close to people could potentially lead to non-compliant exposure levels.

As one example the FCC cites that a separation distance of at least 24 feet would meet its proposed exemption criteria. This, considering a currently-exempt 50-watt transmitter at VHF in accord with section 97.13(c) and assuming an antenna gain of 6 dBd. The FCC adds that the existing classification of amateur exposure as occupational is consistent with use of its proposed general exemption criteria based on general population exposure limits because awareness of exposure greater than the general population limits is required in all occupational settings, including amateur radio households.

The FCC goes on to state that the application of the general exemptions proposed to amateur radio installations would preclude the possibility of overexposure and require further evaluation only when necessary, giving guidance for both fixed and mobile transmitting antennas. As such it invites comment as to the impact of this proposal on the amateur community.

Parties that support maintaining the current exemption based on power alone are requested to explain how it provides adequate assurance that the public is protected against exposure to RF energy in excess of FCC limits and the extent of the burden imposed by this proposal. The FCC is also encouraging interested parties to comment on the relative costs and benefits of the proposed changes as well as those of alternative approaches.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Both the Report and order and the proposed changes can be read in their entirety in .pdf format at tinyurl.com/fcc-rf-standards-2013. Comments on Docket item 03-137 will be due 90 days after publication in the Federal Register. (FCC, RW)

**

COMMUNICATIONS POLITICS: CHOOSING THE NEXT FCC CHAIRMAN WONT BE POLITICALLY EASY

President Obama will likely face some difficult political decisions over who should replace Federal Communications Commission Chairman Julius Genachowski.

The reported front-runner, Tom Wheeler, faces opposition from some consumer groups over his former ties to the cable and mobile industries, while junior FCC member Jessica Rosenworcel, a favorite of 37 Democratic senators, could prove problematic. This is because the President would have to bypass senior FCC member Mignon Clyburn who is the daughter of Representative James Clyburn of South Carolina's 6th District.

Karen Kornbluh, ex-ambassador to the Organization for Economic Cooperation and Development, and Larry Strickling, the National Telecommunications and Information Administration chief, are seen as possible compromise candidates. Even so, no matter whom the President picks will likely not have an easy confirmation process other than Clyburn or Rosenworcel who are already seated Commissioners.

For a deeper look at the decision that t President Obama faces in making his decision on who will replace Julius Genachowski as head of the FCC please take your web browsers to tinyurl.com/next-fcc-chair. (The Hill)

**

COMPUTER DXING: 2000 KM USING 10 MILLIWATTS FROM A RASPBERRY PI

Eddie Bennett, G3ZJO, of Northampton in the United Kingdom is not making any claims. Even so he may now hold a Q-R-P distance record for a micro power transmission using a Rasberry Pi microcomputer as a transmitter.

Bennett reportedly used the 10 milliwatts of RF that can be generated from the Raspberry Pi computer board to be heard at over 2000 km on the 7 MHz band. The Raspberry Pi board can be made to operate as a WSPR mode transmitter covering Low, High and VHF frequencies up to 250 MHz. G3ZJO connected the board via a low pass filter to a dipole for the 7 and 14 MHz bands. A small Marconi inverted L at a height of only 6 meters was used on 472 kHz.

Among the stations who received his WSPR signal on 40 merters was LA9JO in grid square JP99 at a distance of 2124 km. On 20 meters he was heard by LY2BOS in grid KO24 at a distance of 1736km. 472 kHz did not fare anywhere near as well. Even so he was heard some 80 kilometers away by G4KPX in grid JO02.

If you want to give micro power Raspberry Pi DXing a try, the PE1NNZ code and binary to turn the mini computer into a super QRP signal emitter is available at tinyurl.com/raspberry-pi-transmitter. And we will have some more traditional DX news later on in this weeks newscast. (Southgate)

RADIO LAW: COALITION OF BROADCAST INVESTMENT WANTS TO PERMIT MORE FOREIGN OWNERSHIP OF US BROADCAST PROPERTIES

If a group representing investment holders in United States broadcast properties has its way then we could see major foreign investment and there-by control of broadcasting here in the United States. Amateur radio Newsline's Stephan Kinford, N8WB, tells us what the broadcast investors want and how the FCC is reacting:

--

The idea of loosening the FCC's restrictions on foreign investment in United States media holdings and vice versa has taken another step. This with the issuance of MB Docket 13-50 by the FCC.

MB Docket 13-50 is based on a letter to the regulatory agency from the Coalition for Broadcast Investment. It says Congress intended the current 25% limit on foreign investment to be a flexible benchmark, not a rigid cap. They also claim that in this age when consumers can get their media from a numerous sources that the restriction is too severe.

The Coalition for Broadcast Investment had previously asked the commission to clarify its policies that restrict foreign ownership and voting interests in entities that hold commission licenses to no more than 25% in the parent company of a broadcast licensee.

This restriction on foreign investment in United States broadcast properties was enacted some 80 years ago. It dates to a time when the Congress believed allowing too much foreign control over a U.S. broadcaster posed a threat to national security. The big question that the FCC must now decide if foreign interests controlling U-S broadcast properties are in the best interest of national security or if they are the same or possibly worse then when the ownership limit was put in place eight decades ago.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

The FCC is taking public comments on the letter from the coalition as MB Docket 13-50. Comments are due April 15th and replies by April 30th. And you can read an interesting view on this entire matter on the Comm Law Blog. Its in cyberspace at tinyurl.com/foreign-broadcast-ownership. (FCC, RW)

**

ENFORCEMENT FOLLOW-UP: $15000 FLORIDA FINE AFFIRMED

And a follow-up in the case of Florida resident Pierre Nixon Jean who was issue a monetary forfeiture of fifteen thousand dollars on June 14th of 2012. This, for his alleged operation of an unlicensed radio station on the frequency 92.5 MHz in the city of West Palm Beach.

According to the FCC, Jean never filed any form of response to the proposed fine. Therefore, based on the information at hand the FCC affirmed the forfeiture on February 28th and gave Jean the customary 30 days to pay. At airtime it's not known if this forfeiture has or has not been collected. (FCC)

**

ENFORCEMENT FOLLOW-UP: MORE ON BROCKTON MASSACHUSETTS UNLICENSED FM STATION CASE

A follow-up to our recent story about an unlicensed radio station in Brockton, Massachusetts that interfered with aviation communications in the greater Boston area. A warrant has been unsealed in U.S. District Court that details the seizure of radio transmission equipment. We

have more in this report:

--

As reported two weeks ago, the seizure by federal officials on March 1st occurred at the unlicensed station's last known address on Rutland Street in the city of Brockton, Massachusetts. The station is alleged to have been using frequency 91.7 MHz without a license from the FCC. A civil action was brought seeking forfeiture of the equipment because it was allegedly being used in violation of federal law.

According to an affidavit filed with the civil complaint, the unlicensed FM radio station was causing interference to a Federal Aviation Administration frequency of 120.6 MHz. This is one of the primary frequencies used by pilots to communicate with FAA controllers when flying in the Boston metropolitan area. The FCC had previously issued verbal and written warnings to the residents of the Rutland Street address on several occasions, but the radio station continued to broadcast.

Now the government appears to have decided to pursue the matter further. United States Attorney Carmen Ortiz and FCC Enforcement Chief Michele Ellison jointly made the announcement that the case is being prosecuted by Assistant U.S. Attorney Christine Wichers of Ortiz's Civil Division. Exactly what form this prosecution will take is unknown as we go to air.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los angeles.

--

The Communications Act of 1934 prohibits the operation of radio broadcasting equipment without a license issued by the FCC. The Act also authorizes the seizure and forfeiture of any electronic or radio frequency equipment used to broadcast without such a license. More on this latest development is on-line at tinyurl.com/brockton-followup. (DoJ, FCC)

HAM HACKING: BAEFONG UV-3R BECOMES HACKERS PARADISE

The tiny and very inexpensive Baefong (PRON BAY FONG) dual band H-T has developed a big following among the makers and hackers in ham radio. So much so that the DIY site Hack A Day reports on how you can write new firmware for the UV-3R to make it do things that its developers likely never thought of. You can see for yourself what's going on with this tiny set as the hackers and makers have a literal field day with it at tinyurl.com/uv3r-hack. (Hack A Day)

NAMES IN THE NEWS: N4TZ NAMED NEW DIRECTOR OF WPX CONTESTS AT CQ

Some names in the news. First up is Terry Zivney, N4TZ, who has been named Director of the CQ World Wide WPX Contests, effective immediately. Licensed since 1961, Zivney has had numerous top-five USA finishes in the single-operator all-band low power category of various CQ and ARRL DX contests. He also competed in the 2010 World Radiosport Team Championship in Russia, and has had three articles published in the National Contest Journal. Zivney succeeds Randy Thompson, K5ZD, who has been WPX Contest Director since 2008. (CQ)

**

NAMES IN THE NEWS: LATEST HANDHELD RADIO WEBSITE LAUNCHED

Bill Carmichael has launched a website to provide information on the latest handheld radio technology. The site includes product reviews and articles from radio enthusiasts globally discussing what they consider their own best handheld radio gear. Ham radio wise the quad band Yaesu VX-8DR and the dual band Yaesu FT-60R handhelds are among the radios featured on the site. You can read for yourself at www.besthandheldradios.com. (Southgate)

**

NAMES IN THE NEWS: G6LBQ AND 2E0SDR FORM DXKITS PARTNERSHIP

Andy Hunter, G6LBQ, says that he is releasing the MKII version of his multi-band transceiver through a partnership with Adrian Lane, 2E0SDR. The two have formed a company called DX KITS that will operate on-line from their new dxkits.com website that Andy says is operational but still in the development stage. DX Kits will be the sole worldwide supplier for the G6LBQ MKII and all of Andy's future developments. You can follow developments on at dxkits.com as well as the G6LBQ Yahoo group at groups.yahoo.com/group/G6LBQ. (G6LBQ, 2E0SDR)

HAMVENTION 2013: A FLEA MARKET HELPING HAND FROM W9FIZ

Barry Gose , W9FIZ, has announced over the Dayton Hamvention reflector that he will be providing a number of really needed services at this year Hamvention gathering. Barry says that he has rented a pair of Flea Market spaces where he will have available free of charge access

to both 110 volts AC line and 12 volts DC for testing newly purchased gear along with a watt meter and dummy load to test the output of HF, VHF and UHF transmitters. He does state that linear amplifiers are excluded.

But that's not all. Barry's booth will also have a vacuum tube tester to check purchased tubes and he also plans on running a paging service on 147.525 MHz simplex in the 2 meter band. Last but by no means least will be access to free advertisement boards for those looking to buy or sell radio gear. He says that you can e-mail him your ads in advance to w9fiz (at) arrl (dot) net or just drop them by his booth on standard 3 inch by 5 inch file cards. Photos are also OK and will be posted if he has room on the board.

There is no charge for any of these services but W9FIZ says that he will graciously accept donations to offset the cost of doing it again next year.

Gose says that the reason he decided to provide this service is that from hearing year after year from other hams that go to Dayton and who ask why someone has not done something like this. Well this year it is going to happen at Flea Market spaces FW 3976 and FW 3977 located along the north fence of the Hara Arena near gate E thanks to Barry Gose, W9FIZ. (Hamvention remailer)

HAM RADIO SCIENCE: IMPROVED FREED VHF DIGITAL AUDIO SOFTWARE NOW AVAILABLE

A new upgrade to FreeDV has been released. Amateur Radio Newsline's Heather Embee, KB3TZD has the details:

--

FreeDV is a part of a ham radio developed digital audio system that should eventually allow just about any SSB radio and any computer operating system to be teamed together. This to enable transmission and reception of what developers call high quality narrow-band digital audio for the High Frequency amateur radio bands.

To make this happen speech is compressed and then modulated onto a 1100 Hz wide QPSK signal which is sent to the microphone input of a SSB

radio. On receive, the signal is demodulated and decoded by the FreeDV software.

The new upgrade called version dot 96 became available on March 23rd. It provides a 1600 bit-per-second mode that communicates at much lower signal levels than previously envisioned. As such, signals should be readable down to a 2 dB Signal to Noise Ratio, and long-distance contacts have already been reported using only 1 to 2 watts power. A compatibility mode for communication with the older dot 91 version is included.

Developers say that an executable program for Windows is presently available. Also that Linux and other platforms will follow shortly.

FreeDV was brought into being by an international team of radio amateurs working together on coding, design, user interface and testing. It is open source software, released under the GNU Public License version 2.1. The FDMDV modem and Codec 2 Speech codec used in FreeDV are also open source.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

The new version of FreeDV for Windows along with documentation and a demonstration video is available from freedv.org. (VK2JI)

WORLDBEAT: FINAL IARU-R1 VIENNA 2013 PAPERS RELEASED

Turning to international news, the final set of VHF/UHF/Microwave papers for presentation at the International Amateur Radio Union Region 1 Interim meeting have been released. Included are such topics as Increased Amateur-Satellite Service 144MHz Usage; Recommendations for DATV Transmission; a Region 1 Satellite Coordinator Report; New Narrow-Band working frequencies in the 2300-2450 MHz band and 2400MHz Amateur Satellites. The meeting will be held in Vienna, Austria, on April 20th to the 21st. You can download these papers for your own reading at tinyurl.com/iaru-vienna-presentations. (IARU-R1)

WORLDBEAT: YOUNGSTERS ON THE AIR CAMP 2013

The 2013 "Youngsters On The Air" European youth radio camp will be held near Tartu, Estonia from August 5th to the 12th.

This year there will be 10 teams participating from different member societies of Region One of the International Amateur Radio Union. During the week long event the young radio amateurs will be participating in different activities including contesting, visiting radio station installations, a radio observatory and much more.

The 2013 camp is organized by the Estonian Radio Amateurs Union. Two previous "Youngsters On The Air" events in Romania and Belgium and the Netherlands have shown that it will be a great experience for the Europe's young hams which they will likely never forget. (IRTS)

WORLDBEAT: AUSTRALIA'S NORTH QUEENSLAND HAM CONVENTION IN JEOPARDY

Australia's North Queensland Amateur Radio convention in jeopardy and could be cancelled. This as word that the Charters Towers convention venue has had to close its doors due to poor local patronage and mounting debts.

The Wireless Institute of Australia News Service reports that moves are afoot to find another single locations or combination of venues in Charters Towers area to house the North Queensland ham radio outing. More information will be made public as it becomes available. (TATC Inc., WIA)

PROPAGATION STUDY: NEW 70CM BEACON FROM DENMARK

A new 70cm beacon based upon the Next Generation Beacon platform has come to the airwaves from Denmark. The OZ7IGY beacon on 432.471 MHz became operational on March 30th and is expected to remain very stable in frequency as the transmitter is locked to a GPS receiver.

The transmission sequence is timed to start at 00 second sending PI4 followed by a short pause then CW ID sending callsign and locator. Its then is in carrier only mode until next cycle begins.

The OZ7IGY 70 centimeter beacon joins its counterparts on 6, 4 and 2 meters operating from the same location and running the same ttransmission sequence. All four use the PI4 digital modulation system which was specifically designed to work with beacons and propagation studies in mind. You can download the PI-RX to decode PI4 at tinyurl.com/pirx-beacon-software. (DX News)

DX

In DX, a team of 15 German operators will be active as 5W0M from Le Lagoto, Samoa through April 18th. Operation will be on 80 through 6 meters using CW, SSB and RTTY plus 2 meter EME. They plan to have four stations active simultaneously. QSL HF through 6 meters via DL4SVA, direct or by the Bureau and EME QSOs to DL9MS.

CT1FTR is now active from the Sudan as ST2FT operating both the HF and VHF bands using a Yaesu FT-857 and a loop antenna. Word is that he will be there until June. QSL via CT1FTR.

H3QFL and JH3AZC will be operational as V6H and V6S respectively from Pohnpei Island beginning April 29th and continuing through May 5th.

They will be active on 80 through 6 meters using SSB, CW, and RTTY and JT65. QSL direct to each operators home call.

2E1EUB will be operational from eastern side of Scotland in the Cairngorms National Park as 2M1EUB through April 13th. Activity will be on 160, 80, and several satellites as well as 2m SSB. Check out QRZ.com under 2M1EUB for more information.

DL6JGN and DL2AWG will be on the air from Tokelau as ZK3N between April 15th and the 30th and not April 23rd and May 8th as first announced. The reason for the date change is that the shipping service used has changed it boat schedule from Samoa to the Tokelau Islands. If you work this one QSL as directed by the operators.

A group of at least fourteen operators and growing are expected to be on the air from Amsterdam Island for 18 days beginning on January 15th of 2014. Further information will be released as things progress toward the operations start-up date.

Lastly, members of Mexico's Club de Radio Experimentadores de Occidente are celebrating the 80th anniversary of the founding of their organization using the special callsign 4A1TD. Look for this call during various contests as throughout the year. The QSL Manager is XE1GZU.

THAT FINAL ITEM: HAM RADIO STOPS A CIVIL WAR

And finally this week the story of ham radios connection to ending a war. Heres Jason Law, VK2LAW:

--

To stem the flow of weapons from Mozambique into KwaZulu-Natal, a two-man special operations team was inserted into Mozambique for this mission.

One of those two persons was Anthony Turton, selected in part because of his skills as a radio operator, which was deemed to be a necessary element for the success of this high risk but strategically important mission.

Anthony used these skills, honed to a high level of technical competence as an active radio amateur, to gain strategic access to the rebel group RENAMO.

Anthony has now authored a book "Shaking Hands with Billy' which tells this story for the first time.

With international news, I'm Jason, VK2LAW.

--

The book that Jason mentions; Shaking Hands With Billy is published by Just Done Productions in Durban, South Africa but appears to only be available at the website www.shakinghandswithbilly.com. That's where you will also find more biographical information on the author as well. (WIA News)
